After the Civil war Nast cartoons came into even greater fame as he turned his attention to the heated politics of the times. The great contest at that time was between President Johnson and Edwin M. Stanton, the secretary of war, whom Johnson was trying to remove from office. Nast was strongly anti-Johnson and pro-Stanton. When Stanton died, just after his elevation to the Supreme court bench by President Grant, the bitter feelings of the Johnson-Stanton feud had by no means died down and southern Democratic papers attacked Stanton even in their obituary notices. On January 15, 1870, Nast drew his first donkey cartoon. It pictured Stanton as a dead lion kicked by a donkey labeled "Copperhead papers." Underneath were the lines: "A live Jackass kicking a dead Lion and such a Lion! and such a Jackass!" It is curious to note that this cartoon was a small one buried on the last page of Harper's Weekly among the advertisements for cleansing powders, sewing machines and books. Such was the humble beginning of a symbol which was to receive nation-wide recognition.

Nast did not immediately repeat the donkey symbol. He had others for the Democratic party, the serpent in some cases and the fox in others. Soon after the appearance of the donkey emblem Nast gave to the world another political symbol. In 1870 William M. Tweed was the boss of New York and he was ruling with a high hand. The New York Times and Harper's Weekly were virtually the only papers which had the courage to oppose Tweed. Nast especially had fought Tweed with his stinging caricatures until Tweed is said to have exclaimed, "Let's stop them d—n pictures. I don't care so much what the papers write about me, my constituents can't read, but d—n it, they can see the pictures." Nast's reply to this threat was a cartoon in Harper's dated November 11, 1871, which appeared just two days before election. It showed Tweed as Roman emperor in the Coliseum, beaming down upon the scene of a giant tiger rending the helpless form of the Republic. On the tiger's collar was the word "Americus," the name of Tweed's club of which the tiger was the badge. That tiger of Nast's literally tore Tweed's ring to pieces. Only one of its members was re-elected and all were indicted for fraud. By the next week another artist had adopted the tiger as the Tammany symbol and from that time on Tammany and Tiger were synonymous.

Nast's invention of the elephant as a symbol of the Republican party came about in a half-affectionate jab at his own political party. In 1874 the Republicans faced their first defeat since coming into power in 1860. It was not a Presidential year but in New York Samuel J. Tilden, fighting against the Republican governor, John A. Dix, was making a double-edged fight for that office. Tilden appealed to all classes of voters, for he had been a prosecutor of Tweed and he was also a member of the reformed Tammany Hall. The strength of the Democrats lay not in any local issue or in the power of their candidate. There was a national issue at stake, whether or not a President of the United States should have a third term. President Grant was believed to be determined to run for President again in 1876. The principal opponent to the idea was James Gordon Bennett's New York Herald, which shrieked incessantly "Caesarism!" and declared that Dix must be struck down to punish Grant. The New York World and even the Tribune chimed in the chorus and the New York Times gravely warned, "It is not Grantism that is at stake but Tweedism."

At this crucial moment Nast drew his cartoon showing the first Republican elephant. It was called "The Third Term Panic"—The New York Herald, an ass dressed in a lion's skin labeled "Caesarism," is braying loudly and all of the animals in the forest are fleeing in alarm. The Tribune is shown as a giraffe, the World as an owl dropping an arithmetic book, the Times as a unicorn with a monocle. At the edge of an abyss, barely hidden by broken planks marked "Inflation," "Repudiation," "Reform" (Tammany) and "Reconstruction," is a huge elephant marked "Republican Vote." Nearby is a half-concealed fox with features suggesting Tilden's and labeled "Democratic Party." Two weeks later, after the election of Tilden and, for the first time in fifteen years, a Republican house of representatives, Nast drew a sequel to that cartoon. It showed the elephant tumbling down into the pit with the rotten planks and the rejoicing animals following, and it was called "Caught in a Trap—The Result of the Third Term Hoax." From that time on the elephant was repeatedly the symbol of the Republican party in the Nast cartoons. But it was not until 1880 that he showed the donkey and the elephant together definitely marked Republican party and Democratic party. In this cartoon the elephant lay asleep before the White House while the donkey was jumping over a cliff into financial chaos, despite the efforts of Senator Bayard to pull it back by the tail as he exclaims, "Hold on, and you may walk over the sluggish animal up there yet."

Other cartoonists were quick to adopt Nast's symbolism and for the last fifty years the Republican elephant, the Democratic donkey and the Tammany tiger have been recognized members of our political zoo. Just when the camel as the emblem of the Prohibition party joined it or which artist is responsible is unknown, but the camel, which traditionally can go without a drink for such long periods of time, was so obviously a symbol of the party which sought to make the country dry that no such originality as was shown in Nast's invention was necessary to bring it into being. Since the passage of the Eighteenth amendment and the consequent decline of the prohibitionists as a national party, the camel has played but little part in the political procession. However the wet and dry issue which is still a concern of both parties has served to keep this hump-backed symbol alive, although each party is cautious about taking the bold step of teaming it with its own emblem.

The political zoo added a new member in 1912 when ex-President Roosevelt led a revolt in the ranks of the Republican party after the nomination of William Howard Taft at Chicago. The name adopted for the new third party was the "Progressives" but it would have been difficult to have symbolized the Progressives with an animal as striking as either the Republican elephant or the Democratic donkey. By a lucky circumstance, however, such a symbol was soon furnished them. One day newspaper reporters, seeking out Colonel Rosevelt, whose robust health had been threatened with a breakdown, asked him how he felt. The reply was characteristic of the Rough Rider and exponent of the strenuous life —"I feel like a bull moose," he exclaimed. And thus was the new political symbol born. For such a hardy animal, however, the Bull Moose had a short existence. It was strong enough to help the Democratic donkey defeat the Republican elephant in 1912 but soon afterwards it passed out of the political picture

ORCHARD GLEANINGS

HARDY ROOTS AS URGENT AS TOPS

In a recent issue of the Minnesota Horticulturist Prof. W. G. Brierly of the University farm at St. Paul reports results from a root-stock investigation on apples in Minnesota. He states that the behavior of a variety depends more upon the method of propagation than upon the place where the nursery stock was grown. Hardy roots are as necessary as hardy tops. French crab roots are generally too uncertain with regard to hardiness to warrant their use in Minnesota unless so handled during nursery propagation that the trees may be set deeply in the orchard soil. When a French crab seedling is budded some of the stock remains at or close to the surface where injury may be expected. When whole roots are used for grafting the same undesirable condition may be obtained. When piece roots are used with long scions, roots of unknown degrees of hardiness are certain to be set deeply in the soil where winter injury will not be generally expected and hardy scion roots may frequently develop. In the experiments losses of this kind were comparatively small, although the length of the scions used varied. By placing the more or less tender French crab roots deeper in the soil the injury to these roots was markedly less than in the case of trees propagated by budding.

Roots of unknown hardiness even with a long scion are not entirely safe. In one study made at the university farm, root killing occurred to a depth of 14 to 16 inches. In late years the practice has been developing among Minnesota nurserymen of growing seedlings from hardy apple or crab varieties for use in propagating. Whenever such generally hardy seedlings are used there is a fair chance that the hardy variety will have a hardy root regardless of whether the propagation was by budding or by root grafting. This is an obvious advantage which should be given due weight by growers, when selecting nursery stock for planting in the North.

Add Nicotine Sulphate to Sprays to Save Bees

Each spring fear is expressed by orchardists that the arsenate of lead sprays applied to pear and apple blossoms for worms will poison the bees at work disseminating pollen. From recent experimental work it is evident there is little danger if nicotine sulphate is added to the poison spray. Bees will take arsenate of lead, and some poisoning is possible; however, they show an aversion to nicotine, and stay away from blossoms when the mixture is applied. If spraying is done in full bloom, the pollinizing activities of the bees will thus be interfered with by this very precaution against poisoning. On the other hand, if applied at the end of the bloom, which is usually the case, most of the pollinizing will have been performed before the bees are driven away from the blooms. The nicotine sulphate has its value as a spray against aphids, in addition to protecting bees.

Idaho Orchardist Tells of His Spraying Plans

E. F. Stephens, veteran orchardist of Nampa, reports both successful control of codling moth and freedom from excessive spray residue by spraying four times at the rate of six pounds of arsenate of lead to a 200-gallon tank of water, and the fifth time in early July with four pounds of lead per tankful, says the Idaho Farmer.

The second brood was combatted with volc oil from August 10 to 18, according to Mr. Stephens, and casein spreader was used throughout the spraying program. The spray was applied under high pressure (400-450 pounds) and the trees were soaked well, both factors, Mr. Stephens is satisfied, being responsible for much of the good results.

Horticultural Notes

Pruning should be reduced to the minimum as the trees come into bearing.

* * *

The Concord grape needs covering in all except the most sheltered locations.

* * *

Strong, vigorous trees, are, of course, less affected by the wind than weak, slow-growing trees.

* * *

Cultivation is not essential to tree growth, but very frequently where land is reasonably fertile, tree growth can be obtained most economically by its practice.

* * *

When the snow goes off cut out the old wood and thin the new growth of currants and gooseberries. Too much brush and no cultivation usually mean small fruit.

* * *

Apple seeds do not produce fruits that are alike in every respect. In fact, it is generally stated that apples do not come true from seed.

* * *

On account of the danger of winter injury, the pruning of trees planted in the fall is often delayed until just before growth starts in the spring

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

...VELOPE BAG OF CREPE TWIST; PRINTED LINENS AND PIQUES

...e you joined the ranks of the ...pe-twist enthusiasts? Once ...initiated into the workings of ...ist artcraft and you will be ... to devote all your leisure mo... ...o it.

...'s everything to encourage ... to take up this fascinating ...ork. It is, in the first place, ... accomplishment, secondly, the ...ls are inexpensive, and last ... not least, the reward for one's ef... is great, for hand bags, belts, hats ... even parasols embroidered or ...ned, more technically speaking, of ...e twist give a genuinely "classy" ...ch to the costume.

...The young woman in the picture ...d the right idea when she decided ... make an envelope bag of crepe ...st, which should take its color cue ...m the flamboyant hues in the mod...listic print of her blouse.

...This youthful modern knows that ...e simply cannot be too colorful in ...ss this season. That is why she is ...earing such a striking blouse whose ...tterning reminds one of none other ...an gay patchwork design. That is ...y, also, that she is so enthused ...th the thought of a crepe-twist bag ...d belt which shall measure up to ...e color vivacity of the silk of her ...ouse.

...Of course by this time you are ask...g in your mind, what is crepe twist, ...ryway. Well, the surprising thing ... that it is nothing more or less than ...epe paper so remarkably processed ...d twisted that it is as sturdy as ...ine or yarn. One buys it at any ...ounter where paper flower supplies ...e to be found. The stamped canvas ...oundations for bags and belts come runs high, and this applies as much to washable weaves as it does to silk, chiffons and other of the more formal weaves. Just now, women who set the fashion pace are taken with the idea of bright flowered or else modernistic printed linens and piques as media for sports ensembles. The novelty of these costumes is that even the coat or jacket is made out of the patterned material, the one-piece dress or blouse being sleeveless.

Making a Crepe Twist Bag.

This adoption of washable fabrics for the entire ensemble should prove quite inspirational to the woman who does her own sewing. The amateur who hesitates to cut into expensive cloth, realizing that she is not equal to giving it the tailored finesse essential to its proper appearance, can with all confidence undertake the making of a simple washable linen like the one in the picture. And when completed, she has the satisfaction of knowing that her costume stands for the very essence of chic, as the mode looks upon it for spring and summer

For the costume shown here one of the new printed linens was selected. Its gorgeous flower design being silhouetted against a white background. The beauty of these fashionable linens is they look as if hand-blocked, and for that matter many of them are, which gives them distinction.

To accent the fact of color more fully, for color is undoubtedly the "big idea" this season, the designer has picked out the three leading shades in the floral print, which happen to be vivid rose, deep cream and bright blue, repeating them in the girdle and cuffs of belting ribbon. This tricolor effect is considered very smart, the idea being frequently carried out in borders for the jersey blouse or those of solid colored crepes and the like.

An accompanying jacket or coat is almost indispensable to sportswear outfits this year, and as said before, they are most novel when made of bizarre cotton or linen prints.

Considerable variation is noted in the styling of the new washable prints. A deviation from the one-piece sleeveless dress and jacket theme occurs, if the model include a blouse, skirt and jacket or coat.

JULIA BOTTOMLEY.

Coöperation on Better Markets

Big Gains Made in Number of Farmers' Elevators and the Like.

(Prepared by the United States Department of Agriculture.)

The "ballyhoo" days of agricultural co-operation have passed. No longer is the "sign 'em up" campaign the chief aim of farmer business organization. Agricultural co-operation today, says Chris L. Christensen of the United States Department of Agriculture, is emphasizing better marketing services and increased business efficiency.

Three distinct phases of agricultural co-operation since 1905 are cited by Mr. Christensen, who is in charge of the division of co-operative marketing in the bureau of agricultural economics. In the fifteen years from 1905 to 1920, he says, large gains were made in the number of farmers' elevators, live-stock shipping associations, fluid-milk organizations and the like. These were typically local in nature and relatively small in annual overturn. They were designed to perform the first stages of the marketing process.

Striking Feature.

From 1918 to 1925 the formation of large-scale marketing organizations was a striking feature of co-operative development. Some of these attempted the performance of more advanced stages of the marketing process, even going into terminal market operations. Others attempted regional pools, large in volume and in the area covered. Still others sought to improve marketing services and promote payment of differentials for quality, standardization of reliable products and study of and response to consumer preferences. A feature of this growth was the prevalence of "ironclad" and long-term contracts providing heavy penalties for selling outside the pool. Some of these organizations have failed, others have modified their practices.

Members Selected.

"Members of the present-day organizations," Mr. Christensen says, "are being selected rather than merely signed up wholesale. Membership contracts are being modified to meet the financial and other economic conditions of the grower. Notions of arbitrary price fixing by co-operative organizations have been abandoned in favor of efficient business practices."

Experiments Show Much Loss in Manure Storage

It costs a farmer 53 cents on every ton of manure he lets accumulate in the barnyard, according to the Ohio agricultural experiment station at Wooster.

Crop yields tell the story of the results of manure storage more clearly than a chemical test. In an experiment at the Ohio station manure has for 21 years been applied to the clover sod in a three-year rotation of corn, wheat and clover.

On one series of plots the manure has been hauled directly from the stall to the field early in winter. For another series of plots an equal weight of manure has been left in a pile in the barnyard for three months before it was spread on the field.

Stable manure produced 23 bushels of corn an acre, 10.5 bushels of wheat and 1,363 pounds of hay; manure from the barnyard produced an average of 19.5 bushels of corn, 9 bushels of wheat and 840 pounds of hay. Measured by the average value of crop increase, one ton of yard manure is worth $2.92 and one ton of stall manure $3.45.

Oats Are Extensively Used in Chick Feeding

Rolled oats or oatmeal are extensively used in chick feeding, and they are excellent for this purpose. When used as a complete ration they are apt to cause gas. They should be used mixed with other feeds. Steel-cut oats are preferred by some poultrymen as they are smaller and somewhat easier for chicks to pick up. During recent years milk in its various forms has become an established part of practically all chick mashes. Nutrients in milk are easily digested by chicks; they furnish protein and minerals needed to balance the ration and the milk sugar forms lactic acid that is helpful in keeping down the growth of harmful bacteria.

Agricultural Squibs

Keep the poultry house clean and the birds are likely to keep healthy.

* * *

For the first week, baby chicks should have liquid skim milk instead of water.

* * *

Begin collecting stakes for the garden. There will never be enough of them when you want them.

* * *

Look over the hoes occasionally and grease the blades if they are growing rusty. A rusty hoe is a poor tool.

* * *

Keep to the old standbys which have proved their worth on your own place. About one "novelty" a year is all the home garden can afford.

* * *

Chicks hatched in late May and June do not start to lay until the season of high-priced eggs in the fall is past.

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

Radiant—perfect—don't you want *your* skin to be that?

You can have a flawless complexion by keeping it free from the six faults given here. The famous Woodbury skin treatments will help you to overcome any of these troubles.

Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple clear directions for each of these treatments are in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—it will be a revelation to you of how much you can improve your complexion!

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

Scientists in Dispute Over Neanderthal Man

Neanderthal man, whose low-browed skulls and crude stone implements have been found in a number of caves and other sites in Europe, was a separate species of the human genus, quite distinct from modern man, asserts G. Elliott Smith, British anthropologist, writing in Nature Magazine, one of the leading English scientific periodicals. He cites the recently published investigations of a compatriot, G. M. Morant, in support of his views. This opinion is at variance with the views of Dr. Alex Hrdlicka, famous American student of the development of the human race, as expressed in his recent Huxley lecture in England, where he received the award of the Huxley medal, the highest honor within the gift of British anthropologists. Doctor Hrdlicka advanced evidence to sustain his contention that Neanderthal man was a part of the main line of human family descent.

New Experience

It is said that Charlie Chaplin began his career as a circus performer. Before "going on" each night, it is declared, Charlie would put a sack of peanuts in his hip pocket for an elephant friend. The pachyderm would shuffle up behind Charlie, thrust his trunk into the hip pocket and snuffle gratefully.

On one occasion Charlie thought he would give the elephant a real treat. So he placed some nice, fresh, sticky popcorn in his pocket. The elephant could not get the candy out. Nor could he extricate his trunk.

At this point in the story Charlie always pauses for effect.

"You've heard an elephant trumpet," he will say, "but did you ever hear one trumpet in your hip pocket?"

—Kansas City Star.

Ancient Fraternity Charm

While digging between Thayer school and Hanover inn at Hanover, N. H., Ceylon Hadlock found an Alpha Delta Phi fraternity watch charm. It was in perfect condition. It was dated 1832, with the name of Gabriel Campbell, a former head of the Dartmouth department of philosophy at a time when the head of the department was all there was of the department.

Bronze and Brass

The composition of the bronze used by primitive peoples during the so-called Bronze age was an alloy of copper and tin. Bronze has continued in very extensive and general use down to the present day. It resembles closely brass, which is an alloy consisting mainly, if not exclusively, of copper and zinc.

Hard Work

"I am a hard-working man!"

"I'll say you are! I have seen you on the golf links."

Skyscrapers and Wonder

Sir Thomas Lipton said at a dinner in New York:

"A great and subtle compliment was paid to your city by a friend of mine. He was here a fortnight. On his return I said to him:

"'Well, your grace, what did you think of New York?'

"'I have come home,' he answered, 'with the roof of my mouth sunburned.'"

J. E. Stille has purchased a new Paige Sedan which was delivered to him a few days ago.

Mrs. A. W. Gauger appeared on the program of the W. F. M. S. at Nanawha yesterday.

Another snow again Sunday afternoon and evening. Don't it beat anything you ever saw?

Mr. and Mrs. Paul Grange and son Lorance, were entertained at the P. W. Johnson home Sunday evening.

Fred Musfelt has been doing some papering and painting at the Pete Wilson residence this week.

The R. N. A. met last Friday afternoon. Mesdames E. F. Jacobs and Paul Stille served a lunch to the ladies.

George Lawhorn re-painted the interior of the new display room at Jacobs Hardware store the fore part the week.

A. C. Carpenter, of Goodell, was taken to the Hampton Hospital Sunday and underwent a major operation Tuesday.

We are glad to report that Wm Smith is making a good recovery at this time and that he is able to be up and around the house again.

"Abe" Lauritsen, of Renwick was visiting with his folks here Sunday.

Henry Wille is reported to be on the sick list this week.

Donald Turgasen carries one of his arms in a sling as a result of a sprained wrist. Donald is not as graceful with his gestures as formerly.

Miss McGiunes had the misfortune to fall and sprain her ankle this morning near Grandma Haefner's residence while on her way to the Krause residence for breakfast.

Mrs Levi Klotzbach underwent a major operation at the Mercy Hospital at Mason City Friday morning. Mr. Klotzbach returned to Klemme Sunday evening and reported that his wife was getting along fine.

Between spasms of rain and snow A. D. Gimer is having his house reshingled. About the time a few feet of old shingles have been removed another rain comes along and makes the work quite difficult.

Mr. and Mrs. Arthur Wellemeyer drove to Mason City Sunday to see their daughter, Miss Ethel, who is having her eye treated there. She is staying at the Y. W. C. A. while in Mason City.

FOR SALE—S. C. R. I. Red Hatching Eggs from blood-tested and culled flock, $4.00 per hundred. Mrs. Herman E. Back, Phone No. 5153, Klemme, Iowa. (Apr 19)

ESTRAY NOTICE—One red sow, wt. 175 pounds, caught on the public streets of Klemme April 14. Possession may be had by owner proving property and paying accrued costs. Paul Grange, Mayor. 1tc

The road leading into Klemme from the west to Main Street, has been closed by the city dads on account of its impassible condition. All traffic is being detoured over the Ludeke Hill into town, which road is still in a fair condition.

Jay Griggs will put on an Elto outboard motor demonstration at Ventura soon. The exact dates are not set but will probably be on Tuesday and Wednesday, May 8th and 9th. Watch for further particulars you out-door fans.

Jay Griggs and R. A. Jorgenson went over to Ventura Friday afternoon to launch two high speed fishing boats which these men recently purchased. Everything is all set for the opening day of the fishing season with them.

Friday the 13th was certainly a "hoo-doo day," more or less. On that date we had the second big snow and blizard of the late spring and the roads were again blockaded in many places. If April showers bring May flowers, who do April snow storms bring besides a lot of profanity?

FOR SALE—50 head of good fall and winter feeding pigs. R. C. Ludeke, Klemme, Iowa. 1tc

S. A. Harvey and family moved their household goods to Clear Lake Wednesday where they will reside in the future. Their little daughter, Enid, will remain here until school closes. Mr. Harvey works for the Lau Motor Co. at Mason City as a salesman.

Mrs. Geo. Stokesbary received the sad news that her mother, Mrs. Thomas Halligan passed away at her home at Blue Earth, Minn., Sunday evening. Tuesday Mr. and Mrs. Geo. Stokesbary and Mr. and Mrs. Joe Stokesbary drove to Blue Earth to attend the funeral which was held Wednesday.

Paul Grange and family drove to Estherville Friday, or at least made a start for that place. However, on account of the bad roads they had to leave their car up the line and finish the trip by rail. They went to attend the funeral of Mr. G. A. Lyons, secretary of the Northern Lumber Company.

Jack Wellemeyer is taking a vacation from his duties as Chief groceryman at his father's store. We might mention that the vacation is not one of pleasure entirely but has been forced on him due to a peculiar swelling on each of his jaws. This peculiarity is more commonly known as "mumps." Jack took sick Sunday so the doctor prescribed 14 days locked up at home.

Jack Wellemeyer and Bill Gauger drove to Ames last Thursday afternoon to take in a meeting of the amateur radio fans in this part of the U. S. The convention was in session Friday and Saturday. Friday evening a big banquet was pulled off and prizes were drawn Fred Arnold drew a grid-leak for a transmitter, Morris GGreiman received a set of coils. A man from Hartford, Conn. drew out the numbers. The oldest amateur present was 66 years and the youngest 12 years. The latter got the prize for being the biggest liar present. His home is at Rockwell City. Bill mised out on two prizes when his number was called out twice in second place. The third number each time being the prize number. Jack and Bill both report having had a fine time at the convention and also said they were royally entertained by the Klemme boys who are attending school at Ames

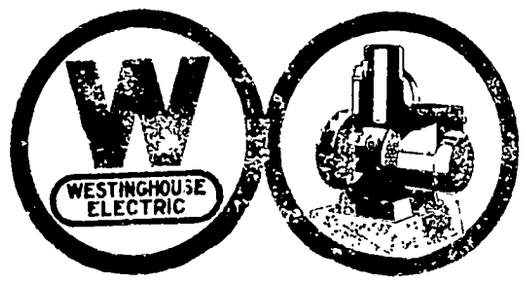
All Teachers Have Now Signed

Our teachers have now all consented to remain at Klemme for another year. They are a group of young people that have gotten along very agreeably together while at work and the school spirit which has been on the whole very pleasant this year can, we believe, be anticipated next year. We beleive they will try their utmost to give a good account of their trust. Seldom does a school these days have the very same faculty two years in succession but we believe it should work to the advantage of a school if it were more generally the rule.

Let none forget that we as teachers appreciate the confidence our re-election shows the community and Board have in us. We do not claim to be infallible or perfect or par-excellence but want to be improving in our profession and in the service we attempt to render the community If at any time we can do more for the young people here than we are doing, we would like to be told about it in, of course, a friendly sort of way.

Our country boys and girls are displaying no little pluck these spring days of snow, rain and mud, in getting to their work and home again in wagons and the slower conveyances of yesterday. A few cases of tardiness have been unavoidable but we are very glad to have the regularity of attendance we have had. Both parents and pupils are deserving of praise for the sacrifice made

The Name Westinghouse on your Farm LIGHT & POWER Plant



KEEP in mind that in choosing your *lighting plant* the *maker* must not be overlooked. The plant we sell is made by Westinghouse—headquarters for radio, KDKA, KYW, WBZ, and KFKX—one of the greatest electrical organizations in the world—a concern employing 50,000 people.

P. T. A. MEETING NEXT TUES. EVE.

ALL PARENTS ARE URGED TO ATTEND THIS MEETING

Other School News Of Interest To Readers Of The Times

The next meeting of the Parent-Teachers Association is scheduled for next Tuesday night, May 1s , at the high school auditorium.

Besides the regular business session, a good program ha- been arranged by those in charge The program follows -

Music
"Health Program," Mrs. W Lau
Talk, Mr Wellemeyer
Music
"Mental Hygiene," Rev. Gauger
Business Meeting.

All parents and frie ds of the school are invited.

Baseball Games Scheduled

Our baseball team, many of them beginners, were taken by Coach Heiden to Swaledale last Friday but came back with no laurels Swaledale has this spring a well seasoned team and older, more experienced players Many of our lads are needed at home as soon as school work each evening is concluded Their parents are rushing like mad to get belated seeding and planting done Coach Heiden has planned mid-day practice from 12:30 to 1:05 in an effort to whip a team into shape for a few spring games.

We have been asked to play Goodell and may soon. Prospects are good for Goodell as usual. But we shall need practice and are not ashamed of defeat after doing our best. Our boys will improve only by practice

Speller Does Real Well

Gladys Schlichting, our Champion Speller, gave a good account of herself at Des Moines last Friday evening Sixty three or more had retired before she missed and only fourty one were left to battle longer when she went down. Many had been coached long and well for the occasion. Ralph Keenan, state champion from last year, was also entered and no doubt had hoped to again win and compete for the national honors. Others were even better prepared for the contest than he and went down with others. Earl Dickinson, of Brighton, Washington county, won the contest and will represent our state at Washington, D C this year and compete for a big share of $2500 offered the best spellers there. His expenses will be paid for the trip to our national capital and he will be accompanied by a representative of the Des Moines Register and he will also be provided a five day sight-seeing trip about Washington. This is an award worth any lad's striving and working night and day for many months Ursula Gedye, daughter of Rev. A B. Gedye, former Klemme pastor, won third place ni the state contest, which is of interest to Klemme people.

It will take a good one to spell Earl Dickinson down for he proved himself able to wade through many hard words at Des Moines A free movie and tour of Des Molnes were provided the contestants and their escorts by the Des Molnes Register, which we thoroughly enjoyed. Between forty and fifty Yellow Cabs were engaged for the tour, and over two hours taken for it.

Athletes Enjoy Supper

Our high school boys and male members of ur faculty were served dinner at Quandt's restaurant on Wednesday evening of this week. This came as a result of the post-season class games in basket ball which were won by the Freshman-Senior team, against the Sophomore Juniors.

But one month of school yet remains. We need employ these four weeks well.

WILL HAVE DEMONSTRATION HERE SATURDAY

HENRY KATTER CELEBRATED SEVENTY-FIFTH BIRTHDAY

Many Relatives Gathered To Help Him On Great Event

Mr Henry Katter, Sr. celebrated his 75th birthday anniversary Sunday and it was a great day for him and his good wife In order that the day might be properly observed Mr and Mrs Henry Katetr, Jr., prepared a big dinner for him and invited a number of relatives to help him celebrate the occasion in proper style Besides Mr Katter Sr. there were present Mrs Henry Katter, Sr., Mr and Mrs Herman Katter, son Otto, and daughter, Minnie; Mr. and Mrs Otto Schlawin and family; Mr and Mrs Elmer Bredlow; Mr and Mrs Henry Kirchhefer, Mr and Mrs Paul Lemke and family; Mr and Mrs Walter Woiwood and family, Mr and Mrs Otto Schroer and family of Buffalo Center, Mr. and Mrs Harold Heimendinger and family, Mr and Mrs Henry Boland

All report they had a wonderful time

METHODIST CHURCH NOTES

A. W. Gauger, PasPtor

We are looking forward to next Sunday's services with more than usual interest, as it is Thankoffering Sunday for the Women's Foreign Missionary Societies in both churches

Helpful and inspiring programs are being prepared by these societies We are indeed fortunate to have as speaker for the day the Rev Armin Klaus missionary in Java. Rev Klaus is a delegate to the General Conference which convenes on May 1 in Kansas City He spends two Sundays on the Algona District and Klemme is fortunate to have him one Sunday

Let the response to the Thankoffering be very general and most generous

Beginning next Sunday evening we will begin our Sunday evening services one half hour later than during the winter months. This means that the Epworth League begins at 7 15 and the preaching hour 8 00 o'clock

Midweek services will continue at the usual time for the present

TEN CARS OF LIVE STOCK ARE SHIPPED SAT. NIGHT

Klemme Shipping Association Has Full Run

Live stock shipments from the local yards continue to hold their own and this fact was again demonstrated Saturday night when ten cars were loaded and shipped to the Chicago markets

The Klemme Shipping Association of which Joe Johnson is the manager handled the entire shipment Saturday night which consisted of four car loads of porkers and six car loads of cattle

Agent M O Barr stated this morning that the outlook for another big run Saturday, was good, as seven cars had already been ordered for that date

Mr Jorgenson of Klemme transacted business here with the Senior Class in regard to invitations.

The Mother-Daughter Banquet was held Tuesday night in the U. B. Dining Room.

HENRY CHURCH FUNERAL MONDAY

DIED AT MASON CITY HOSPITAL SATURDAY MORNING

Had Been A Resident Of Hancock County For Over Seventy Years

Mr. Henry N. Church, son of Charles and Calesta Church, was born January 7, 1854, in De Kalb, Illinois.

When he was two years old his parents moved to Hancock County, Iowa, where they resided since.. Mr Church therefore truly deserved the name of a pioneer of Hancock County. He could and did give a vivid portrayal of those early days—of thrills with the Indians and the wilds—of hardships and privations so common to all pioneers, of hospitality and neighborliness though miles intervened between them and their next door neighbors

All these experiences had a telling effect and performed a fine mission on the average pioneer. I did this in a very special way in the case of Mr Church, who grew up from infancy under these conditions, for, his strongest traits in afterlife were those of hospitality of real friendship and kindliness so greatly treasured by all who learned to know him.

On March the 15th, 1897, he was married to Miss Mary Eckman Goodell, Iowa Six children were born to them, four daughters and two sons Of these their son died when twenty months old. The surviving beside his companion who courageously looked after their affairs during his long illness, are. Mrs. Harland Trees, Mr. Burr Church, Mrs. Henry Ward, Miss Octave amd Miss Lois, all of this vicinity The latter two still remain in the parental home, the older teaching the home school and the younger being a student in the Klemme High School. The son has charge of the home farm.

Deceased is also survived by Mrs. Church's father, Mr. Samuel M. Eckman, who makes his home with them and who is one of the few surviving Veterans of the Civil War. One aged sister, Mrs. A. D. Hiams, of Rowan, Iowa, is the only survival of brothers and sisters. One brother, Cyrus Church, died on last Armistice Day, Nov. 11, 1927, in Belmond.

Although in very poor health some time, his immediate death was brought on by a case of strangulation which called for a surgical operation and which was performed last Friday. Being in frail health, he was not able to withstand the shock and died Saturday morning, April 21, 1928, in Mercy Hospital, Mason City, Iowa, at the age of 74 years, 3 months and 14 days.

Funeral services were held Monday afternoon at two o'clock at the Church home south of Klemme, conducted by Rev. A. W. Gauger of Klemme and Rev. Chas. H. Van Metre of Garner. The latter preached the sermon, bringing a message of helpfulness and consolation.

Interment was made in Calvary Cemetery, Klemme, Iowa.

—Rev. A. W. Gauger.

NEWS REVIEW OF CURRENT EVENTS

Flood Control Bill Fought by Coolidge and Others as "Extortionate."

By EDWARD W. PICKARD

THAT the flood control bill passed by the senate and, with certain amendments, under debate in the house last week, is the most extortionate measure in the history of the government is the opinion of President Coolidge. His remarkably outspoken view of this bill created something of a sensation in Washington and it encouraged a group of representatives, led by Mr. Frear of Wisconsin, in a determined fight on the measure reported by the house committee. The main issue was the question of local contribution upon which the President had insisted.

"Contribution is a cardinal principle in federal, state, and municipal aid," said Mr. Frear. "This case presents no exception. Thousands of corporations and large individual owners under this bill will enjoy enormous financial benefits through flood protection. They should contribute toward the expense. If we pass this bill and adopt the plan of giving away the taxpayers' money without limit to rehabilitate or benefit great interests that can bring political pressure to bear on congress, a hundred other flood control projects now knocking at committee doors will all demand the same treatment without contribution."

Reid of Illinois, chairman of the flood control committee, said in reply: "There is in the bill no provision for local contribution. There can be none if congress intends to protect the lives and property of its citizens from these destructive floods. No levee system can be effective unless it is unified, co-ordinated, and complete, and should any levee district fail to pay a contribution necessary under the reclamation theory the whole plan would fail. Nearly every levee district is now or will soon be bankrupt. There is no possible way for them to get money, as they are unable to sell any bonds because of the default in the bonds already issued."

There were conferences of house and senate leaders for the purpose of modifying the measure so that the President would sign it. Senators Ransdell and Sackett talked with Mr. Coolidge and reported that he would approve a bill similar to the Jones bill originally reported from the senate committee. This draft, while it eliminated local contributions, contained various safeguards which were not in the measure as passed by the senate and approved by the house flood control committee.

BY HOLDING up action on the $364,000,000 naval appropriation bill the radical Republicans forced the senate to adopt the resolution of Blaine of Wisconsin demanding from Secretary Wilbur information as to the cost in lives and money of the operations of the marines in Nicaragua. Mr. Wilbur informed the senate that maintenance of the marine expeditionary force in Nicaragua had resulted in the death of 21 marines and the wounding of 45 others. He set extra cost to the government of marine activities in Nicaragua at $1,530,170. The total cost of maintaining the expeditionary force, Mr. Wilbur fixed at $3,536,000. It was explained, however, that more than $2,000,000 of the total cost would have been expended on the marines even if they had remained in their home stations. The secretary said it was known that 202 Nicaraguans had been killed in fights with the marines.

WASHINGTON, New York and Chicago were making plans to give rousing welcomes to the German-Irish transatlantic aviators, and were assured that the flyers would visit those cities after getting away from desolate Greenly island in Belle Isle straits. The stories of their flight show that they lost their way because their compass failed in the dark and the snowstorm, and they wandered far to the north of their route. Relief and aid reached them by plane and otherwise and they were busy repairing the Bremen so they could continue their flight to New York. James Fitzmaurice, promoted to major by the Free State government, was taken to Lake Ste. Agnes, Quebec, by Duke Schiller, Canadian aviator, to get a new propeller with which he intended by fly back to Greenly island.

Baron von Huenefeld, Koehl and Fitzmaurice will be entertained in New York for five days, and then, proceeding to Washington, will be the guests of President Coolidge, the Irish minister and the German ambassador. The wives of Koehl and Fitzmaurice will soon join them in this country.

GEN. UMBERTO NOBILE and a crew of fifteen left Milan, Italy, in the dirigible Italia on the way to the North pole, and on the first lap of the journey ran into a fierce storm over Germany. Finally the airship, somewhat battered, came down safely at Seddin airdrome, near Stolp, Pomerania, where repairs were made and further trial flights begun. Two more hops will take it to King's bay, Spitzbergen, which will be the base of operations. Nobile, who piloted Amundsen over the North pole two years ago in the dirigible Norge, intends to make several flights over the pole, taking scientific observations. He carries a cross given by the pope which will be planted in the ice at the top of the world.

ADMIRAL J. K. ROBISON, former chief of the navy engineering bureau, was a star witness for the defense in the Sinclair Teapot Dome conspiracy trial and he assumed full responsibility for the change in the government's policy from conserving the navy's oil reserves to storing fuel oil in seaboard tanks and that he favored the opening up of the whole reserve. "Sinclair asked me what we wanted if a contract was entered into," declared Robison. "I told him we wanted a pipe line among other things, and such arrangements as would give him the largest possible profits, and give us the largest possible share of his production. The more money he got, the more I got for the navy.

"I wanted to get the absolute maximum for the navy, and I got it." Robison almost shouted at the jury, as he banged the rail of the witness enclosure with his fist.

Under cross-examination Robison was compelled to admit a close friendship for Sinclair. He disclosed that he traveled for a week in Sinclair's private car and was Sinclair's dinner guest at the exclusive Lotus club in New York. He also admitted he had played poker with Sinclair the very night that Sinclair secured three valuable contracts, one of them to supplement the Teapot lease.

The defense sought to show through Former Secretary of the Navy Denby that the scheme to lease the Teapot Dome reserve was conceived in the Navy department, but Denby's testimony was shut out by a government objection.

Before the senate investigating committee C. C. Chase, a son-in-law of Albert B. Fall, made admissions that were considered extremely damaging to Sinclair's cause, and he was summoned by the government as a rebuttal witness in the trial.

SPRING in China brought a resumption of the Nationalist campaign against the Northerners and according to latest reports the Southern armies under Chiang Kai-shek are making great progress in Shantung province, where the miseries of war are added to those of famine and flood. Foreign military observers in Shanghai predict the collapse of Marshal Chang Tso-lin and his withdrawal to Manchuria within a few weeks. Japan expresses renewed fear for the safety of her nationals and her interests in Shantung and therefore has landed marines at Tsingtae and is preparing to send a large body of troops. It is almost certain that what Japan especially desires is to assure the status of her large interests in Manchuria in case Chang is defeated there.

GOV. AL SMITH was formally entered as a candidate for the Democratic nomination for President by the New York state Democratic committee at a meeting in the National Democratic club in New York city. His name was presented by former Lieut. Gov. George R. Lunn, and the laudatory resolution was seconded by Mrs. Franklin D. Roosevelt. Both speakers centered the hopes of their party on the oil scandals. Senator Blease of South Carolina, who is strongly against Smith, has put into the Congressional Record his opinion of the situation in his state. Summarized, this is that South Carolina will oppose Smith for the nomination to the last ballot; that if Smith gets the nomination in the regular way by the two-thirds rule, South Carolina will not initiate or join in any rump convention; and finally, that if Smith gets the nomination, some South Carolina Democrats, though not a great many, will vote the Republican ticket, while a considerable number of them will remain away from the polls, but not enough, in any event, to throw South Carolina into the Republican column.

Both Republicans and Democrats of Illinois held their state conventions, the former being strong for Lowden and the latter turning the delegates to Houston over to Smith. Republicans of Colorado refused to instruct their delegates at large for Hoover. Those of Delaware and Connecticut chose uninstructed delegations to the Kansas City convention, and it is expected these delegations will do their best to "draft" Coolidge. Senator Fess of Ohio, temporary chairman of the national convention, says he believes it will be the duty of Mr. Coolidge to accept the nomination if a deadlock, real and not manipulated, develops.

Meanwhile one national ticket already is in the field. The Socialists held their national convention in New York city and nominated Norman M. Thomas of New York for President and James H. Maurer of Reading, Pa., for vice president. Thomas is a minister and lecturer. Maurer is a member of the Reading city council and president of the Pennsylvania State Federation of Labor.

PUBLICATION of the government engineer's allotments for river and harbor work during the fiscal year 1929 discloses that Eastern and Southern waterways, together with the Mississippi, Missouri and Ohio rivers, have the lion's share of the items running over $1,000,000. Of the big allotments $7,225,000 goes to the Mississippi river between the Ohio and Missouri rivers and between the Missouri river and Minneapolis, $4,590,000 on the Ohio river, $3,630,000 on the Missouri, $1,700,000 on the Hudson river, $1,200,000 on the East river, $2,150,000 on the Delaware river, $1,000,000 on the inland waterway from the Delaware river to Chesapeake bay, $800,000 for the Savannah, Ga., harbor, $800,000 for the waterway from Beaufort to the Cape Fear river, N. C., $650,000 for Miami harbor, and $1,025,000 for the Sabine-Neches waterway, Texas. The Illinois river is allotted $575,000 for improvement work with the development of the Illinois link of the lakes to the gulf route.

PRESIDENT COOLIDGE, in an address at the opening session of the annual convention of the Daughters of the American Revolution in Washington, criticized federal encroachment on the rights of the states and the growing interference of government in business and the life of the individual. He was warmly applauded when he asserted that the American theory of society "rests upon a higher level than communism," and uttered a plea that the nation return to the high ideals for which the American Revolution was fought.

GEN. OSCAR CARMONA, dictator of Portugal, was inaugurated President of the republic, having been elected by regular suffrage without opposition in March.

Violent earthquake shocks, extending over several days, caused the loss of many lives and vast destruction of property in the Balkans, mainly in Bulgaria. There were also destructive temblors in Peru and in Oaxaca state, Mexico.

Ellsworth Milton Statler, sixty-five, who rose from bellboy to ownership of more hotels than any other man in the world, died of pneumonia at the Hotel Pennsylvania, New York, which he operated.

Forty persons were killed in West Plains, Mo., by a mysterious explosion that wrecked a dance hall.

GOES FROM HOSPITAL TO FACE EXECUTION

Mexican Bandit Upholds Tradition of Bravado.

Mexico City.—Another Mexican bad man, with a brief but lurid past, has passed into the limbo by the firing squad route. He is Pedro Reyes, former soldier, bandit and community terrorizer, and when the execution squad did its work Reyes died just about as all Mexican bandits die, with plenty of bravado and nerve.

But his execution was slightly different from that of the ordinary lawbreaker. He had been trapped by police agents who were forced to wound him when he attempted to make his escape. He was taken in an ambulance to a hospital at Tampico, where he was allowed to rest a few days while his case was being carefully weighed. The balance of justice was for execution.

So Senor Reyes was taken from his cot into a courtyard. He looked at his captors and laughed when they wanted to blindfold him, and when they suggested he tell them who composed his band, which had created a great amount of terror, he simply looked at them and declared brazenly: "It is only a baby who would tell such a thing, and I am a man. Why should I denounce anyone?"

Wants to Write Epitaph.

"As a favor, could you let me have a scrap of paper to write my epitaph?" he asked.

This was granted, and Reyes, simply wrote while seated upon a stone, because he was too weak from his wounds to stand. "Here lies the bandit, Pedro Reyes."

He glanced up from his hard seat and the firing squad did its work. His body was left on exhibition for a few hours, then taken to the public cemetery for burial.

Reyes was once a loyal soldier, it is said, having won recognition for his valor and was promoted to a captaincy. But the discipline irked him and he went in for the more sensational game of highway robbery, and apparently loved to bask in the glory of being termed "a bad man."

He aided in organizing a band of desperadoes which included some of Mexico's worst men, among them the Turrubiates brothers, Nicolas Ramirez, Jose Martinez (El Chamuscado), Plutarco Trevino and Filberto Lechuga, who was for two years head of the band. When Lechuga was captured and shot, Reyes ascended to the leadership.

Known as Fine Resident.

He operated out of the city of Tampico, where he lived under an alias and was known by friends there as a fine resident. But police had watched his activities, and noted that frequently he would leave town for a period of 15 days and return. It was then he got in his work of banditry.

When Reyes was executed, police say it broke up entirely the band of which he was the head, since one by one his followers had been killed, captured or had deserted.

He had committed many crimes ranging from highway robbery to murder and was noted not only for courage but for cruelty to his victims. In one train robbery alone he escaped with more than 100,000 pesos. He had perhaps one of the longest crime records of anybody in recent years in Mexico and he participated in the famous Ladedo train holdup, not long ago.

Abandon Windjammers in Alaskan Salmon Trade

Anacortes, Wash.—For the first time in the history of the Alaska salmon cannery trade not a sailing vessel will be operated this year by packers in northern waters. In former years such famous ships as the Benjamin F. Packard, Guy C. Goss, A. J. Fuller, W. B. Flint, Star of Alaska and Catherine D. were outfitted each spring on Puget sound, and with decks crowded with fishermen and cannery workers set sail for Alaskan harbors.

The windjammer fleet has been abandoned in favor of larger and faster steamships. The estuaries at various Pacific coast ports are filled with forests of masts as the old sailing ships await some cargo offering to start them off toward romantic places.

World's Largest Driftwood Mass at Point Barrow

Point Barrow, Alaska.—Hundreds of Eskimo families have congregated at Shingle point, the mouth of the great McKenzie river, where nature has deposited the world's mightiest mass of driftwood as well as the hulks of two wrecked whales. Vast quantities of forest debris have been washed down the Mackenzie river, from central Canada and once in the Arctic have been tossed in great heaps on sand pits by waves and ice floes. There is no shortage of fuel at Shingle point and natives are not hampered by the high cost of building material.

Coin Machine Talks

New York.—Drop coins in the slot and get a package of cigarettes with a "thank you." A vending machine that talks is now in operation.

Steal Ambulance

Milwaukee, Wis.—Simply nothing is safe from a really ambitious thief, it was proved here when a county ambulance was stolen.

LIVE STOCK

SELF-FED SWINE NOW PREFERRED

(Prepared by the United States Department of Agriculture.)

Once in a great while the easy way of doing a thing proves to be the best way also. An instance of such a happy combination of "easy way-best way" conditions which should appeal to all hog raisers is the method adopted by the United States Department of Agriculture in feeding and handling sows and litters during the suckling period.

Sows and litters are now self-fed in preference to being hand-fed at the government farm as a result of conclusions formed from a three-year study of the two methods. The general plan of the test was to place the same kinds of feeds in separate compartments of a self-feeder for sows and litters being self-fed as were given to the hand-fed group. The hand-fed sows and litters were fed all they would readily clean up twice daily while the self-fed sows and litters had free access to the self-feeder at all times.

The results of the three-year test indicate that: Self-feeding sows and litters during the suckling period saves both labor and feed; the self-fed lot was more thrifty than the hand-fed lot; a total of 441 pounds of feed was required for 100 pounds of gain in the self-fed lots, while the hand-fed lots required 603 pounds; the pigs from the self-fed lots made greater daily gains from farrowing to weaning and also during the various tests in which they were subsequently used.

It was noted also that no overcrowding of sows and pigs occurred at the self-feeders even where there was a large number of sows with litters in one lot. There is also less danger of overeating when feed is available at all times as is the case with self-feeding.

Sows and litters may be put on the self-feeder as soon as the sow is on full feed after farrowing. The trials also indicated that 81 per cent of sows from self-fed lots when bred settled at the first service, as against 47 per cent for the hand-fed sows.

Pasture Fattening for Cattle Is Satisfactory

One usually gets better results in fattening cattle on pasture if he starts on heavy grain feeding late in the spring, at about the same time the calves go on pasture. In other words, pasture is a very satisfactory roughage for fattening cattle at the beginning of the fattening period, but is not quite so satisfactory toward the close of the fattening period.

On a ration of corn or barley and alfalfa hay, your calves should gain from 1.8 to 2 pounds per head per day, so that from now until July 1, they should gain about 300 pounds and should be fat enough to sell right along with calves that had been on grain or hay last fall or at least they should be nearly as good as calves that were put on grain and hay last fall because these calves should have done quite well in the cornfield as long as they have had plenty of corn.

Live Stock Facts

Alfalfa is one of the greatest of hog feeds.

* * *

Alfalfa hay is one of the best feeds available for breeding ewes.

* * *

A place in the barn where the lambs can eat by themselves seems to please their fancy.

* * *

Much of the loss in fall pigs is due to rickets caused by the absence of direct sunlight.

* * *

Calves should be placed in stanchions so that they can only drink their own feed.

* * *

Beef cattle for slaughter and as stockers and feeders seem reasonably certain to find a market in 1928 that will average higher than in 1927, although the peak prices may not be so high.

* * *

At the Indiana station they substituted soy beans for tankage with fairly good results whenever they use a mineral mixture. Without a mineral mixture in the ration soy beans give poor results.

* * *

Bucks compose 60 to 65 per cent of the cull lambs that are marketed, assert authorities at the Missouri College of Agriculture. Proper docking and castrating will increase the value of the animals.

* * *

Navel and joint disease is the great danger in colt raising. A serum against it is now available.

* * *

When hauling cattle to market by truck, put sand on the floor to keep their feet from slipping. Straw is unfit for this purpose, as it lets their feet slip.

* * *

There is no question but what sweet clover hay and sweet clover silage if they are moldy may contain poison for cattle, and this should be guarded against with the greatest precaution.

A "Plaza of Presidents"

By ELMO SCOTT WATSON

THE present session of congress has seen the introduction of an almost unparalleled number of resolutions and bills appropriating money for the erection of monuments, memorials and markers in various parts of the country, and the Americans who are to be thus honored, if the bills pass, range all the way from Presidents, Revolutionary war heroes and Civil war leaders down to vice presidents and other comparatively obscure individuals.

One of the most interesting memorials thus proposed is the plan for a "Plaza of Presidents" in Nashville, Tenn., since this one project will honor the memory of three Presidents. One of the three is so well-known and is so often included in the list of "truly great" Presidents that it would seem impossible to add anything to his fame with another memorial. But the other two, neither of whom is nearly so well known as the first, have certain claims to importance in our history which should make their names better known to all Americans.

Under the terms of a bill offered by Representative Byrns of Tennessee, the federal government will be asked to contribute $300,000 toward the establishemnt of this "Plaza of Presidents" in Nashville on which statues of Andrew Jackson, James K. Polk and Andrew Johnson will be placed. The state of Tennessee would donate $30,000 to the plan and the use of the whole fund in building the memorial would be supervised by the secretary of war and the governor of Tennessee.

As stated above, it would seem almost impossible to add anything to the fame of Andrew Jackson, for this picturesque figure has so impressed itself upon the consciousness of the American people that the mere mention of the name "Old Hickory" brings to our minds as definite and clear-cut a picture as do the names of the "Father of His Country" and the "Great Emancipator." His name and his part in American history have been perpetuated in a dozen different ways. There is scarcely a state in the Union that does not have a town, city or county named Jackson; the famous (and much criticized, from an artistic viewpoint) "rocking horse" statue of him in Lafayette square, overlooking the White House, is one of the best-known landmarks in the national capital; the anniversary of his famous battle with the British is a red letter day on the calendar of thousands of Americans and "Jacksonian democracy" is the fundamental principle of the political faith of one of the two great political parties in this country. His home, the Hermitage, near Nashville, is more than just a state landmark—it is a national shrine, second only to Mount Vernon in historic interest, to which thousands pay a visit of homage each year.

And only the other day, the name of Andrew Jackson, dead these 73 years, was heard again throughout the land when, before a group gathered in Statuary hall in the Capitol in Washington, Andrew Jackson IV, descendant of Old Hickory's adopted son, pulled a cord which unveiled a statue of his famous namesake. It was Tennessee's gift to the federal government of the likeness of one of her two greatest sons and this gift was accepted on behalf of the whole nation by President Coolidge.

The career of James K. Polk, a man vastly different from Andrew Jackson, is nevertheless an interesting one. Like Jackson, he was a "Tennesseean from North Carolina." Polk was born in Mecklenburg county, N. C., in 1795. No such hardships had attended his youth as had characterized the early life of Old Hickory. In terms of formal schooling he was a much better educated man, having been graduated from the University of North Carolina. A man of considerable ability, he rose rapidly in the political world. He was a member of the house of representatives for 14 years and served as speaker in the house from 1835 to 1839. It is interesting to note that he was the only speaker of the house of representatives who ever became President. Following his service in congress he was elected governor of Tennessee, an office which he held for one term of two years.

Considering the importance of the events during his administration as President and the part which he had in shaping those events, it is all the more remarkable that he was the first "dark horse" candidate and that his becoming President was more or less of an accident. A brief review of the political history preceding his election is necessary to give a proper perspective on these facts. When Andrew Jackson was ready to lay down the reigns of power which he had held for eight years, he decided that Martin Van Buren of New York, who had helped manage his second campaign and who was later his secretary of state, should be his successor. Although the Whigs, under the leadership of Gen. William Henry Harrison, had put up a valiant fight in the campaign of 1836, Van Buren was elected and the Jacksonian Democracy was destined to rule for four years more in the White House. But the campaign of 1840 was a different matter. With their shouts of "Tippecanoe and Tyler, Too," the Whigs swung into their famous "Log Cabin and Hard Cider" campaign with an enthusiasm that had rarely before been displayed. And the popular appeal of this military hero, something of the same sort of appeal that had helped elect Jackson, enabled Harrison to defeat the "Little Magician," Van Buren, and put the Whigs in power for the first time in history.

Then Harrison died, soon after taking office, and John Tyler, the vice president who had been elected as a Whig but who soon proved that he was not a dyed-in-the-wool Whig in principle, became President. As the campaign of 1844 approached, it was apparent that Tyler would not be the Whig candidate but that that mantle would fall upon Henry Clay, Jackson's old enemy who had cast envious eyes at the White House since 1824. Van Buren was the logical Democratic candidate but his opposition to the annexation of Texas, which shared with the dispute over the Oregon boundary the honors for being the leading political questions of the day, was destined to lose the nomination for him.

When the Democratic convention met in Baltimore it was apparent that Van Buren would have a majority of the delegates. And then the second morning of the meeting the celebrated "two-thirds majority" rule was passed. After what seemed a hopeless deadlock between Van Buren and Lewis Cass, Van Buren's name was withdrawn. Then followed the first convention stampede in American history and James K. Polk of Tennessee, who had been a prominent candidate for vice president, was nominated as the first "dark horse" nominee for the Presidency. In an exciting campaign in which the annexation of Texas and the dispute over Oregon (with the first faint cries of "54-40 or Fight!" being raised) Polk defeated Clay and took office with the promise that he would not seek nor accept the office again—one of the two Presidents who made that promise and kept his word.

Although Polk was almost unknown when he went into the White House, he soon showed that he was "in some sort a man of iron." He wanted California for the United States and laid his plans to get it. Despite the popular clamor about Oregon, Polk had no intention of embroiling the country in a war with two countries, for he saw that war with Mexico was inevitable. While many historians have declared that the war with Mexico was unjustifiable and have severely criticized Polk for the role he played in that affair, others have justified his course on the grounds of the "manifest destiny" of this nation. At any rate, history has written down James K. Polk as the President under whose administration more square miles were added to the territory of the United States than any other executive except Jefferson by his purchase of Louisiana. It was Polk who gave to the United States California and the great Southwest by conquest and the Oregon country by compromise.

The third President who will be honored, if the "Plaza of Presidents" project goes through, is one who has suffered much injustice from history. Andrew Johnson, who rose to the White House from the obscurity of a tailor's shop in eastern Tennessee, was, like Jackson and Polk, born in North Carolina. Of him it has been said, "His early poverty was deeper than Lincoln's, his family as obscure, his educational opportunities far less. He was in boyhood a white slave, and his master advertised for him when he ran away as though he were a negro. He learned to read and write after his marriage; a few years later was the one man in congress speaking intelligently and forcefully on a constructive policy he had espoused. He was a tailor and as he worked he was read to by a youth he had employed for the purpose."

During the Civil war, at the request of President Lincoln, he gave up his seat in the senate to become military governor of Tennessee and in 1864 he was chosen as the vice presidential running mate for Lincoln in an effort to hold the border states. He became President upon Lincoln's assassination and when he tried to carry out the reconstruction policies which Lincoln had intended to follow, he was bitterly assailed by the radicals who were determined to grind the defeated South into the dust in punishment for its secession. Johnson's determination to follow the generous policy which Lincoln had planned brought down upon him an avalanche of hatred which is difficult for present-day Americans to understand, and an impeachment trial at which, happily for the country, he was acquitted.

Modern historical research has done much to revise the once popular estimate of this "most maligned President" and if, as one recent biographer has said, "He was the most courageous and consistent statesman of his day. . . . No American ever more richly deserved what he was given, the flag as a winding sheet and a copy of the Constitution as a pillow," then no one of the three Presidents whose memory will be honored in the proposed "Plaza of Presidents" is more worthy of that honor than Andrew Johnson.

ORCHARD GLEANINGS

TREATING PEAR BLIGHT CANKERS

(By LEONARD H. DAY, University of California.)

The treatment for pear blight cankers recommended by the California experiment station was used by many growers with good results in 1927. One standard solution was advised in the first recommendations given out, although at that time it was known that a weaker solution, properly used, would give satisfactory results. The station now considers it practicable and desirable for growers to use two strengths of solution.

The wide use of the standard solution the past spring and summer has brought out the following facts: (1) Orchards varied widely in the size of branches that could be treated without injury—in some orchards branches one and one-quarter inches in diameter were successfully treated while in others all branches under two or three inches in diameter were killed; (2) that the graft union of young trees (up to eight or ten years of age) is often killed; (3) that the trees absorbed the zinc chloride solution more freely after the third week of June (previous experiments had shown that stronger solutions could be used during the spring than during the summer and fall); (4) that the solution seldom failed to stop the blight; (5) that the cambium layer was usually killed if the canker was over ten days or two weeks old—except in cases of shallow-running cankers; (6) that trunk infections were often too old to treat successfully before discovered; (7) that in case of old deep cankers treated during June and July the branches did not wilt till after the fruit had matured; (8) that old cankers on one side only of a branch, trunk or root crown were cured with much less injury than is occasioned by surgical methods and that the percentage of cases cured was much greater than in surgical treatments; (9) that the treatment has been very valuable in cases where it is impossible to decide whether or not the disease has yet passed from the infected twig into the larger branch; (10) that scales should not be removed in order to treat scaly barked trees unless these are already loose and ready to fall off naturally.

Previous experiments have shown also that dormant or nearly dormant cankers can often be treated successfully with weaker solutions, even on old branches, trunks and roots.

Seeks Good Substitute for Arsenate of Lead

Anthony Spuler, entomologist for the Idaho experiment station, who has returned to Wenatchee to continue his investigations, will point his efforts toward seeking a practical substitute for arsenate of lead to control codling moths.

"If we can find a spray which will kill the insect pests without injury to the fruit and that will not necessitate washing the fruit before marketing, we will have solved a great problem of the orchardist," Mr. Spuler said.

"That is the end toward which we are working at the present time. We are not alone in this work. Far from it, for the state college is working with us all the time and entomologists in the states of Oregon, Idaho, California, Colorado and Montana and the federal bureau of entomology are all working on the codling moth problem.

"Along with this work an 'insectary' will be used here for the first time this year. A building will be erected at the Bushell ranch and will be of the same type as one at Pullman. The insectary is a building with screen sides which will be used for the breeding of codling moths for observation."

Mastodon Strawberry Is Recommended by Ithaca

Small fruit catalogues contain several new strawberries, but the only one of these that the New York experiment station at Ithaca feels it ought to recommend is one of the everbearing sorts.

Of the several everbearing strawberries that have been tried at this station Mastodon is most deserving of culture for its autumn crop. Its chief claims to attention are vigor and productivity of the plants, in which respect it is far superior to Progressive or Superb, the two sorts commonly grown for their fall crop. Mastodon excels these varieties as a plant-maker. The fruit is large in size, although a little too variable in shape; is borne profusely and is of especially good quality. Unfortunately the berries grow somewhat unevenly. Mastodon originated in Peru, Ind., about 1917. It is now generally offered by small fruit growers.

Graft Fruit Trees

The subject of how to graft fruit trees is too large to be covered in a brief item. Peach cions may be used on plum stocks but apples require apple stocks. The most popular stocks are those of the French and Vermont crab-apple. If you care to grow any of these stocks you can buy the seed. If you use any home-grown stocks, they should be transplanted to the place in which you want them to grow either the year before or the year after grafting.

HELPED DURING MIDDLE AGE

Woman Took Lydia E. Pinkham's Vegetable Compound

Denver, Colo.—"I have taken six bottles of Lydia E. Pinkham's Vegetable Compound and will take more. I am taking it as a tonic to help me through the Change of Life and I am telling many of my friends to take it as I found nothing before this to help me. I had so many bad feelings at night that I could not sleep and for two years I could not go down town because I was afraid of falling. My mother took the Vegetable Compound years ago with good results and now I am taking it during the Change of Life and recommend it."—MRS. T. A. MILLER, 1611 Adams Street, Denver, Colorado.

Venerable Cypress

A cypress tree in Santa Maria de Tule, near Oaxaca in southern Mexico, believed to be 2,000 years old, rises to a height of 140 feet and is 110 feet around.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *genuine* printed in red? It isn't the genuine Bayer Aspirin without it! A drugstore always has Bayer, with the proven directions tucked in every box:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Who's Responsible?

Father—Here, Billy you shouldn't hit Harry. Because Harry hit you is no reason to retaliate.

Billy—Well, he retaliated first.

How Much Water Should Baby Get?

A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight-pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast-fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle-fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty-cent bottles contain thirty-five doses.

LIBERTY TOWNSHIP NEWS

We are glad to see our correspondent back on the job again.—The Editor

Mr and Mrs. George Schoenwetter and children visited at the Ralph Ludeke home Sunday. Mr. and Mrs Fred Schlichting and daughters, Mr and Mrs. Henry Ludeke and Paul, and Mr and Mrs Carl Suckow and sons, of Garner, were dinner guests also

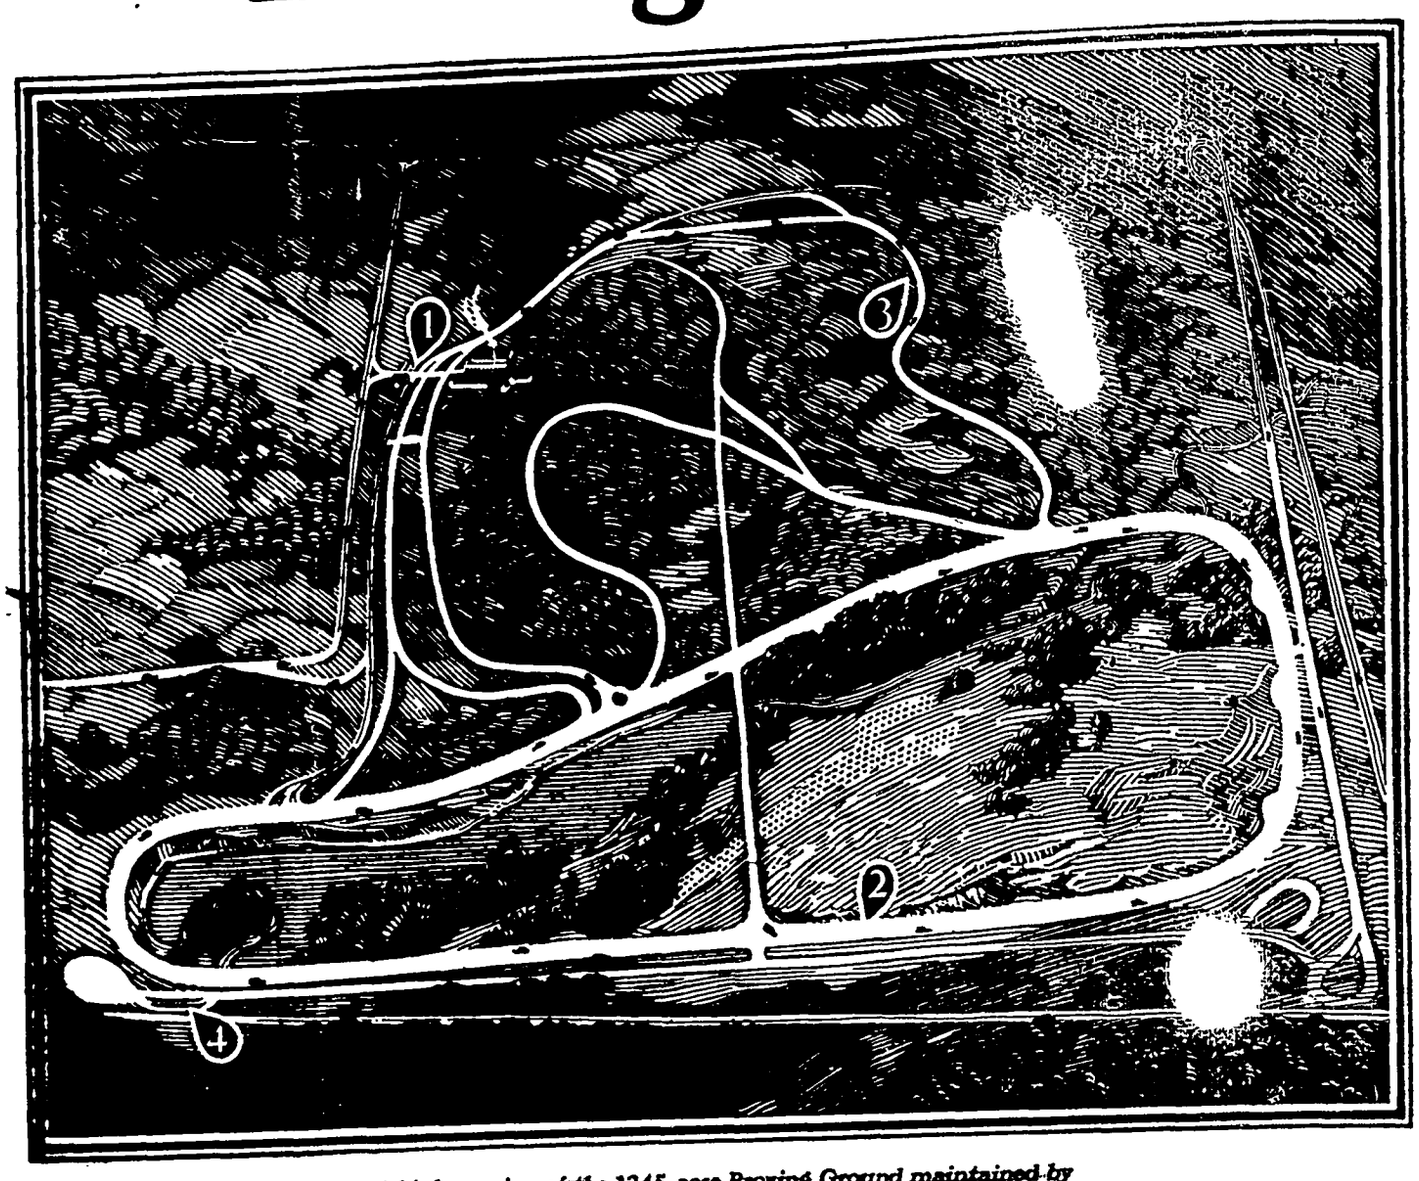
This is General Motors Proving Ground



A birdseye view of the 1245-acre Proving Ground maintained by General Motors to assure the quality and value of its cars and trucks.

1. Entrance to the Proving Ground. The group of buildings includes complete experimental and service shops, engineering offices and comfortable living quarters for resident and visiting engineers and for the driving crews. The Proving Ground personnel numbers more than 200 men.

2. The 4-mile high-speed loop. The largest in America, made of concrete, with turns banked to permit continuous high-speed operation. In addition, the Proving Ground has two concrete straight-aways 1¾ miles long, as level as a billiard table, and miles of brick, tar, gravel and dirt roads which reproduce every driving and weather condition.

3. The hill-te[st] road. Test hill grades at the Proving Gr[ound] range from 7.26 per cent to 24 per [cent]. The grades on public highways seldom exceed 7 per cent.

4. The "bat[h]tub." A depressed concrete roadway whic[h] can be filled with water at varying depths to re[produce] almost any degree flooded roadway conditions.

Here each General Motors car must *prove* its value

ON a 1245-acre tract near Milford, Michigan, convenient to all its car and truck divisions, General Motors has the first and largest proving ground for automobiles.

Here tests are made and facts determined to a degree impossible when cars and trucks are tested on the public highways. Here each new model of General Motors must prove itself, point by point, before it is produced for sale to the public.

More than 135 different tests are applied to each car tested at the Proving Ground. They involve every phase of construction and performance: power, speed, endurance, acceleration, braking, steering, handling, riding comfort, fuel economy and so on. In three months a car or truck covers more miles than you would drive it in three years.

The Proving Ground is another example of how General Motors is serving the public. It is also your assurance that when you buy a General Motors product you are getting all possible quality and value at its price and the advantages of a policy of continuous improvement.

Look at these values—then clip the coupon

The current models of General Motors cars are briefly described below. Never before in the history of the automobile industry have such performance, such quality, such comfort and such beauty been offered in their respective price classes. *They have been proved at the Proving Ground!*

See which car or cars interest you most, then check and mail the coupon below. You will receive complete, illustrated information, together with two interesting little books telling all about General Motors Proving Ground and just what General Motors policies are.

(All prices F. O. B. at the factories)

CHEVROLET. 7 models, $495 to $715. Bigger and better than ever before. 4-wheel brakes. Longer wheel base. Still more powerful engine. Luxurious Fisher Bodies. Shock absorber springs. New hood. New Duco colors. New instrument panel and other improvements. *ALSO* truck chassis: ½-ton, $395. 1-ton, $495.

PONTIAC. 8 models, $745 to $875. The lowest-priced quality "six." Improved from radiator to tail-light. For example: 4-wheel brakes, new GMR cylinder head, increased power, locking device, more luxurious Fisher Bodies. Finished in Duco in new colors.

OLDSMOBILE. 7 models, $925 to $1085. Entirely redesigned by General Motors, the new Oldsmobile has earned the title of "The Fine Car at Low Cost." Longer, roomier, more powerful—and the last word in styling. Fisher Bodies. 4-wheel brakes.

OAKLAND. 9 models, $1045 to $1375. The All-American Six. Advanced engineering and precision construction. Longer, lower and more beautiful. Bodies by Fisher. Every convenience. 4-wheel brakes. New Duco colors. Harmonic balancer.

BUICK. 16 models, $1195 to $1995. The largest value in Buick's famous history. Beautiful low bodies by Fisher. Straightaway like an arrow from a bow. Vibrationless beyond belief. Famous 6-cylinder "Valve-in-head" engine. Sealed-in chassis.

LASALLE. 16 models, $2350 to $2975. This beautiful car was designed as companion car to Cadillac. Has V-type 90 degree 8-cylinder engine which has made Cadillac the standard fine car of the world. Built in Cadillac factory. Continental in appearance.

CADILLAC. 26 models, $3295 to $5500. "What," General Motors asked last year; "can possibly be done to improve Cadillac?" The result is embodied in the new models now on display, representing the high-water mark of Cadillac's long history. Sumptuous bodies by Fisher and Fleetwood. 500 color combinations to choose from.

FRIGIDAIRE—The [Gen]eral Motors Refrigerator. [Em]bodies all the processes which have made [Fri]gidaire available to every family [in] construction of electric refrigerators. The refrigerator made by Gen[eral Motors] and it is now the world's larg[est] product in its field.

DELCO [Light] the co[mplete] of the [Del]co Plants. Provide power [for] more [labor-saving devices] [in]. Electric light and pumps, etc. Used in [mil]lion homes.

For the convenient purchase of these products, General Motors offers the ete *AC Plan.*

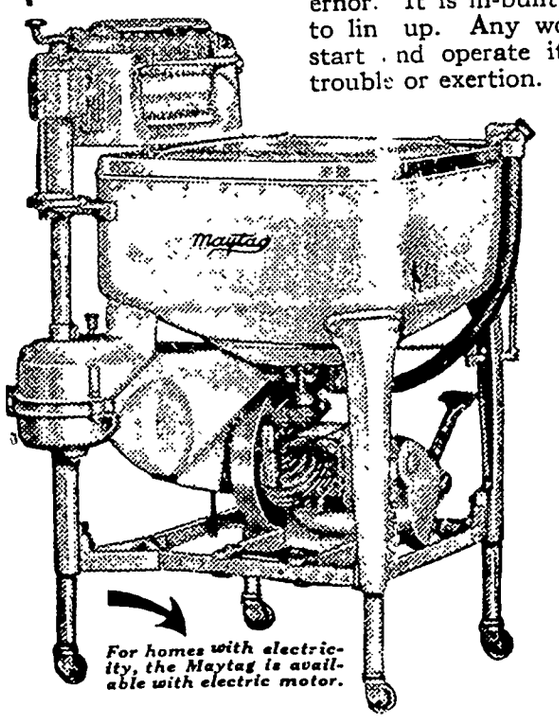
Electricity or Gasoline runs the NEW MAYTAG

FARM and city alike appreciate the new Roller Water Remover, with its semi-soft, balloon-type, never-crush rolls; the Automatic Feed Board that makes it unnecessary to get fingers near the rolls, the smoother performance, the more beautiful lacquer finish.

An Improved Gasoline Multi-Motor

The Famous Maytag Multi-Motor is more perfect than ever. The engine and starter have been combined in one unit, as compact as an electric motor. It has automobile-type carburetor, high tension magneto, and speed governor. It is in-built, no belts to line up. Any woman can start and operate it without trouble or exertion.



For homes with electricity, the Maytag is available with electric motor.

A FREE Washing

Write or telephone for a Maytag. Do a big washing. It will take but an hour or so, and you will not have to hand-rub anything, even grimy overalls. The Maytag does it all. If it doesn't sell itself, don't keep it.

VARIETY IN SILKEN SCARFS; BELTED SILHOUETTE STRESSED

WHAT more colorful than a gay scarf? Why two scarfs, to be sure or three if you please. And so it is, since we must have color, and plenty of it this season that the latest caprice of fashion is to wear scarfs en suite, rather than singly.

This add-a-scarf vogue issues a new challenge to the imagination, for there is no end of intriguing ways which present themselves for arranging the colorful kerchief squares and triangles, which are now so popular. The picture presents an interesting study in the art of scarf wearing.

Around the shoulders, likewise

Ways of Wearing Scarfs.

about the hips, that is one way of wearing a two-kerchief scarf set. The effectiveness of such an arrangement is demonstrated in the picture to the left.

Sports tie sets which consist of head bandeau, tie and girdle have quite captured the fancy of the younger set. And if they are polka-dotted like the set shown to the right, well, that advances them to the top o' the mode without question. Printed crepe de chine is the most popular for these trio-scarf effects.

Country club squares, they call the big silken kerchiefs which give such a modish air to the young modern centered in this group. One would think that this smartly attired young woman had just happened to carelessly thrust her kerchief into her pocket or rather, more properly speaking, out of her pocket. Truth is, it is not just a "happenstance" that the aforesaid silken square dangles so gracefully and so conspicuously at her side. No, indeed! It is due to a premeditated act on the part of this sophisticated young woman that this kerchief falls, yet does not fall, out of the pocket of her blouse. In other words, it is the very latest act of the mode to so position one of two gay-colored and bold-patterned scarfs, while the other skillfully knots itself about the shoulders. No monotony in scarf patterning this season! The reason for this being that most of them are either hand-painted or hand-blocked. Some of the patternings are modernistic to an extreme. Picture a color scheme which involves vivid greens, blue, rose, black, white and yellow, and which depicts a young woman strolling in company with her canine pets midst trees under a fair sky. No, this is not describing a picture to be hung in an art gallery, but rather does it tell of the trend of the mode in scarf designing.

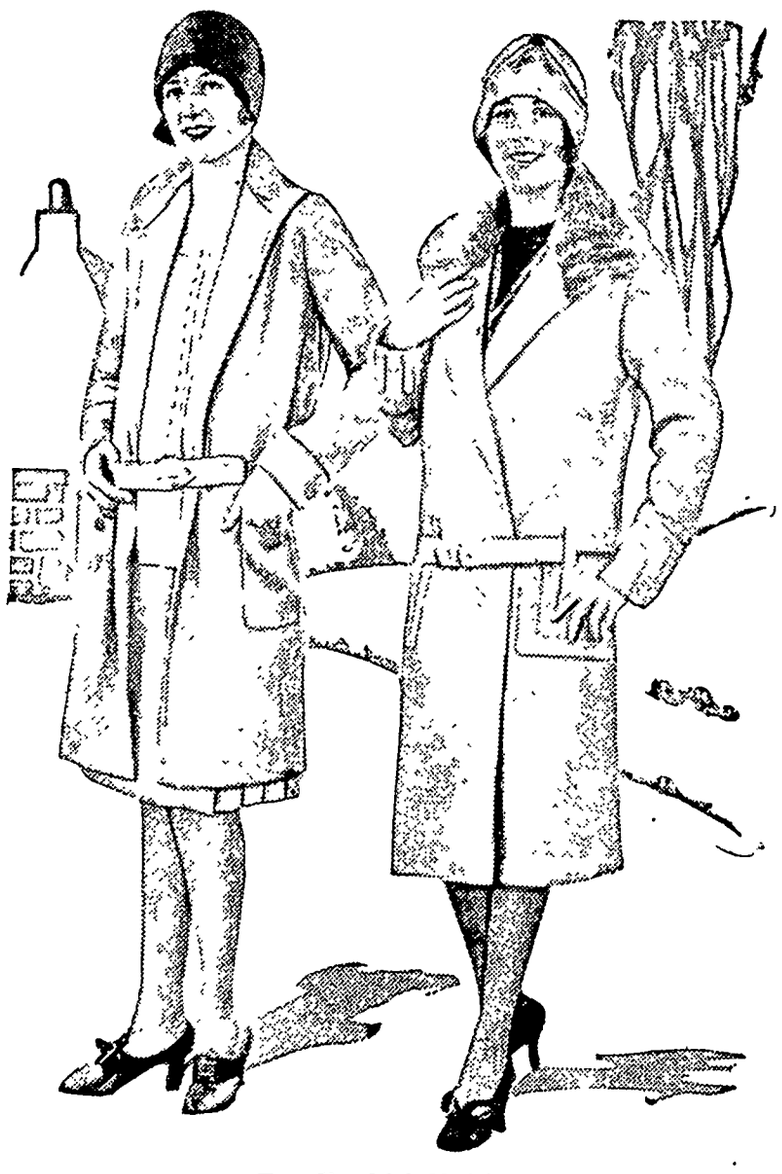
Which shall it be, an ensemble or a separate coat for travel and general utility wear? Truth is, that it is one of those welcome seasons where "you pays your money and you takes your choice." Arbitrary rules are few and far between. Fashion followers, as not for many years, are encouraged and counseled to dress to individuality.

One would not err in event of choosing either of the two candidates which appear in the picture. Whatever their other differences it is perfectly apparent that these models agree as to the "to be or not to be" of the belted silhouette. Indeed, the subject of belts is outstanding this season—not only self-fabric belts on the coat or jacket, but fancy belts for blouse and frock prove of fascinating interest.

Many stylists are settling the status of the belt by designing some of their most successful costumes, especially those of tweed or novelty woolens, with self-material belts.

Natural gray kasha is the medium employed for the semi-sports separate coat shown here. It is lined with crepe to match. There is a piping of marine blue kasha outlining the deep cuffs, the novelty pockets and the strap along the center back. The collar is of summer-weight gray fur. Which calls to mind the importance attached to the union of blue and gray. This color combination is one of the smartest. The belt fastens with a fancy buckle.

The three-piece ensemble suit pictured to the left is of tweed. The blouse and coat facings are of crepe silk. Straps of tweed trim the blouse. The pockets are of the patch type, and by the way, pockets are almost as intriguing a subject as belts these days. The belt in this instance fastens across the front only, which is a very considerate thing for it to do, seeing that this allows the chic coat to fall in a clever unrestricted line from the neck at the back. The skirt which is sewed to a bodice, has a cluster of side plaits.



Two Youthful Models.

Three materials which are indorsed by the ablest designers for either ensemble or separate coat are loose woven basket cloth, repp and jersey cloaking. Navy blue is considered very fashionable. Sometimes the navy coats have tuxedo revers of matching moire, likewise cuffs with perhaps a bow of the moire at the shoulder, or a scarf of the same run through slots cut in the woolen coat collar.

JULIA BOTTOMLEY.

(©, 1928, Western Newspaper Union.)

Written Leases Most Desirable

There Should Be Complete Understanding on All Vital Points.

(Prepared by the United States Department of Agriculture.)

Farm leases should be carefully drawn up, easy the United States Department of Agriculture, because it is dangerous for the contracting parties to slight the business of arriving at a complete understanding on all points where their interests may clash. Many, and perhaps most, rented farms are leased orally, without printed or written memoranda of any kind. Indeed, some landlords and tenants take pride in being informal to that extent. Yet the practice is responsible for many disputes that written agreements would obviate or make easy to settle.

Clear Up Obstructive Points.

Careful consideration of lease agreements, the department declares, promotes mutual satisfaction, tends to lengthen the period of tenancy, and encourages the adoption of improved farming methods. To put a lease in writing clears up points that might have remained obscure, and is thus worth while even if the lease is not looked at again. Standard printed forms, with a few modifications or additions, will generally suffice where the farm is to be leased for a cash rental. For share leases, however, printed forms containing only generalities may prove inadequate.

Share agreements are often considerably detailed. In such agreements consideration must be given to the capital, credit, ability, experience, and purposes of both landowner and tenant. It may be useful also to particularize the conditions of farming and the opportunities of the farm. Printed forms suitable for such leases may not be readily obtained. Usually, says the department, it is best for the contracting parties to write their own lease embodying the various stipulations. Sometimes, where considerable values are involved, it may be desirable to obtain the advice and assistance of a lawyer.

Satisfactory to Both.

Properly drawn leases will not, however, prevent trouble unless both parties have the right attitude. Approximately 3,000,000 American farmers operate land part or all of which they do not own. It is thus obvious that harmony in the landlord-tenant relationship is important in our agricultural economy. It may be promoted not only by attention to the details of lease agreements, but by taking care that the bargain as a whole is mutually desirable and satisfactory. Sharp bargains, the department observes, may be the cause of hard feelling and thus prove to be bad bargains after all.

Found Unprofitable to Crop the Young Orchard

Many people try to grow a young orchard and grow crops on the ground at the same time, says a writer in the Prairie Farmer. Corn is a favorite crop, although hay is often used. Anyone who sincerely wishes to get into the fruit business will be much more successful if he grows the orchard without attempting to grow the ordinary farm crops on the ground at the same time.

The writer has seen several orchards severely set back with corn, as in dry years there is serious competition between a young tree and the corn plant—a competition in which the tree often comes off second best. But worst of all for a young orchard is a hay or grain crop.

A-Type Houses Favored for Saving Young Pigs

Swine authorities at the Nebraska Agricultural college recommend the small A-type hog house for saving pigs, because the low roof reduces air space above the pigs and holds the warm air down close to the pigs. The house when properly constructed furnishes the right amount of ventilation. The slope of the roof prevents the sow from lying on the pigs, and the high door in the front permits the sunshine to strike every part of the house floor and also provides good ventilation in summer time. Last and most important, the house is light and can be moved to clean ground each year. These conclusions in Nebraska agree very well with results in Illinois and Indiana.

Agricultural Hints

Prepare for your fall salads by putting in endive seed.

* * *

Start piling up weeds and lawn clippings for a compost heap.

* * *

Rotate your garden crops. Plant root crops one year where surface crops were the previous year.

* * *

Keep corn and bean plantings in mind every two weeks or ten days to be sure of a succession later in the season.

* * *

Potatoes keep best in storage at a temperature of from 34 to 38 degrees Fahrenheit. Good ventilation is an advantage.

* * *

Don't cut the asparagus too late if you expect an equally good crop next year. Give it a dressing of fertilizer when you stop cutting.

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

A lovely face—youth—charm—don't they all imply a beautiful skin?

You can free your skin from any of the six faults given here. Begin, today, to use the famous Woodbury skin treatments! Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple clear directions for each of these treatments and the treatment for normal skins are given in the free booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—it will be a revelation to you of how much you can improve your complexion!

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

Beasts of the Jungle

The African wild buffalo, according to Martin Johnson, is one of the most dangerous customers on the trail—"a cutthroat from the word go." The zebra is silly and stupid, "a first-class rowdy." The leopard is a killer, "the gunman of the forest." The giraffe he calls "the creature that God forgot." The elephants are "the fine, upstanding, middle-class citizenry of the jungle." The rhinoceros is "always fighting, always grunting, always looking for trouble."

"I don't believe the average rhino has a friend in the world, even among his own kind."—Detroit News.

A Happy Mother

Dorothy Mae Heying

Monett, Mo.—"I was greatly benefited during expectancy by the use of Dr. Pierce's Favorite Prescription. I took several bottles. I also used the 'Pleasant Pellets' all the time to keep my bowels regular and never had kidney trouble or any other trouble. My baby is strong and I believe it is due to my use of the 'Favorite Prescription'"—Mrs. C. H. Heying, 506-3rd St. All dealers.

The use of Dr. Pierce's Favorite Prescription has made many women happy by making them healthy. Get it at once at your neighborhood store, in tablet or liquid form.

Write Dr. Pierce, Pres. Invalids' Hotel in Buffalo, N. Y., for free advice.

Trees of Past Ages in Botanical Garden

Seedling trees of a species that represents the vegetation of Florida 100,000 years ago, during the glacial epoch, have been added to the collection in the New York Botanical garden as the result of a scientific tour of the state by Dr. John K. Small. The trees, which are known as Torreya, or locally as Savern, belong to the botanical genus Tumion, and occur naturally in a small strip of territory along the east bank of the Appalachicola river, in the Florida panhandle. They occur nowhere else in the world, though related species are found in California, Japan and China. They resemble yew trees in some ways, and can be cultivated under the same sort of climatic conditions that favor the yew.

What's the Use

Lucien Hubbard, a supervisor of M. G. M. productions, was patiently explaining the wonders of Yosemite to the leading lady of his company while they were "on location" in the wonder park. "Yes," he explained, pointing to El Capitan, "that was undoubtedly left there by some giant glacier."

"But where is the glacier?" asked the girl doubtfully.

"Gone back for another rock!" snorted the disgusted Hubbard.—Los Angeles Times.

Preacher Surely Had Right to Be Annoyed

E. S. Harkness, the philanthropist and patron of the arts who recently gave $250,000 to the New York Memorial hospital for the purchase of four grams of radium, was talking at the University club against speculation.

"Speculation is demoralizing," he said. "There was once a country preacher who speculated in oil stock. A deacon asked him some time afterward:

"'Well, doctor, what have you done with that oil stock of yours?'

"'Done? I've been done. Got cheated out of it,' the preacher said.

"'No!' said the deacon, 'No! How come?'

"'Why,' said the preacher, 'I thought the stuff was valueless, you see, and so I unloaded it on a greenhorn for a song. But it turned out to be worth thousands, and that swindler who bought it from me knew it all the time.'"—Kansas City Star.

Switzerland's "White Coal"

Although the United States is proud of the fact that its homes are more modern than those of most other countries, it remains a fact that 42 per cent of the homes of the nation are not yet served with electricity. Switzerland leads the world in per capita consumption of electricity, mainly because, with so many waterfalls in the tiny republic, there is power in every back yard, so to speak.

Shifts Earth Quickly

Material could be lifted to the [illegible] of a ten-story building by a g[illegible] electric shovel, largest in the w[illegible] now being constructed, says Pop[illegible] Science Monthly. Placed in the [illegible] ter of a football field, it could [illegible] out the entire field without mo[illegible] from one position, and deposit [illegible] dirt in the stands. Its 120-foot b[illegible] will be terminated by a dipper s[illegible] eighty-two feet long, and a scoop [illegible] can pick up fifteen cubic yards [illegible] earth or coal, weighing nearly tw[illegible] ty-four tons, at a single stroke. [illegible] mammoth shovel will be used in [illegible] open pit mining of coal at Dan[illegible] Ill.

Roman Relics in England

One thousand eight hundred y[illegible] ago Roman women suffered f[illegible] infirmities of the feet. Evidence [illegible] this has just been found at Fo[illegible] ders court, Lothbury, London, w[illegible] excavations for a new building [illegible] being carried on. The sole o[illegible] woman's leather shoe, in which [illegible] mark of a corn at the base of [illegible] little toe can clearly be seen, [illegible] discovered. A few remains of Ro[illegible] glass of the most exquisite colo[illegible] and patterns were found on the s[illegible] spot.

After fifty, no sensible man w[illegible] any more "experiences."

One can be popular by makin[illegible] business of accepting advice.

Doctor at 83 Found People Preferred His Prescription

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice, known to druggists and the public since 1892, as Dr. Caldwell's Syrup Pepsin.

Then, the treatment of constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions that result from constipation was entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, which is a combination of senna and other mild laxative herbs, with pepsin.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. If grown people want to use them no one can deny them the privilege, but they should never be given to children.

The simpler the remedy for constipation, the safer for the child and for you, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take

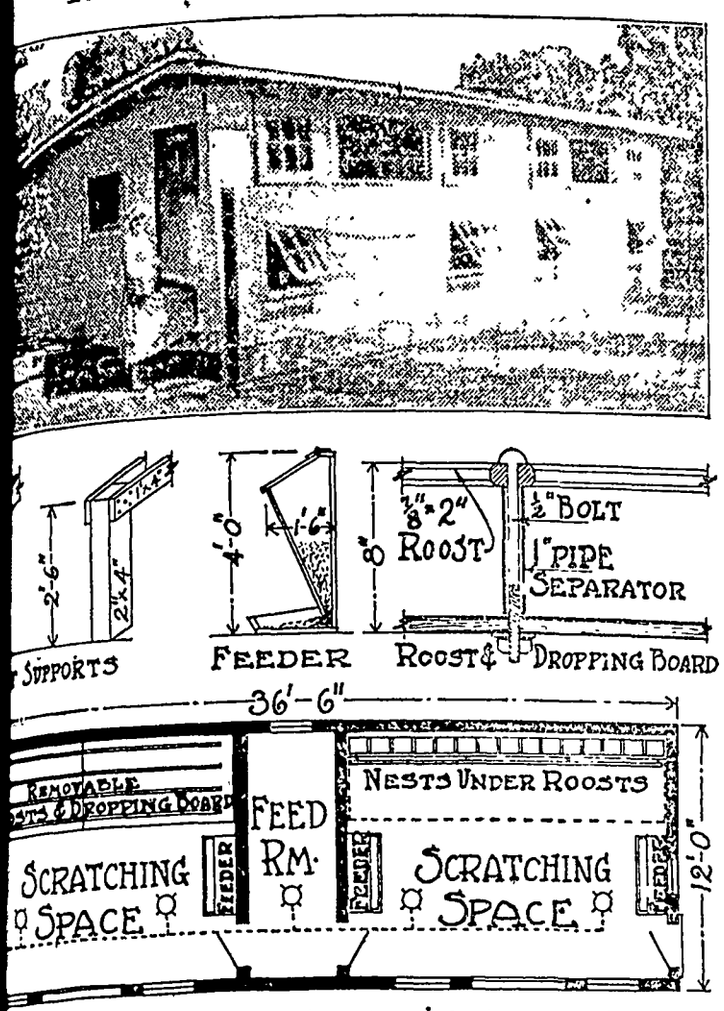
chances with strong drugs? All d[illegible] stores have the generous bottles.

We would be glad to have you pr[illegible] at our expense how much Dr. C[illegible] well's Syrup Pepsin can mean to [illegible] and yours. Just write "Syrup Peps[illegible] Monticello, Illinois, and we will send [illegible] prepaid a FREE SAMPLE BOTT[illegible]

ry House Designed to Make Raising of Chickens Pay Better



By W. A. RADFORD

William A. Radford will answer ns and give advice FREE OF n all problems pertaining to the of building work on the farm, readers of this paper. On ac- f his wide experience as editor, and manufacturer, he is, with- bt, the highest authority on the Address all inquiries to Wil- Radford, No. 1827 Prairie ave- hicago, Ill., and only inclose t stamp for reply.

y farm has its chicken house, w many of these chicken houses built and equipped that the raising will even pay for the labor and feed used, let alone real profit on the investment? ould be surprised to know how the raising of chickens is an loss when figured on a real s basis. And it is all a matter per equipment plus proper han- just like any other part of the g.

ou want a fair proportion of hicks to live, want them to ma- properly and lay well, then you must provide them not only plenty of good food but also suitable housing. The accompanying illustration and plan show how to build a chicken house that will help to make the chickens pay. The small details show the supports for roost, the feeder and the roost and dropping board as indicated on the plan.

The plan shows a well laid out space which makes it easy to take care of the chickens. It will be noted that ample windows are provided to make the inside of the house light and well ventilated. That is essential. Chickens do not thrive in dark, foul quarters any more than cattle do, or than human beings.

You will also note that the inside of the house is equipped with electric lights. Many farms have electricity these days and more are getting it all the time. Lights inside the chicken house will, especially in the north part of the country where days get very short in winter, materially increase the laying. More light, more eggs. It pays.

hasing of a Home Needs Careful Thought

ing or building a home proves ater task than anything ever d before, apparently, and the of the family and the helpmate lize with all their power to se- hat which will suit, the means, ally being foremost in the con- tion.

practically all instances, where e is purchased, the real estate or representative of or seller, ally, sets out the virtues of the In particular. The good quali- re given in all of their ideals, ccommodations which are to be the home itself and the locality old of without reservation.

is a fact that many homes have sold because of some peculiarity e same, handsome fixtures, beau- approach, convenience to car line, ace, kitchen, light in the house,

iters have stated that electric es have attracted more attention any other thing, while others that closets in homes have had erful effect.

e statement has been made that people who are looking over s to purchase see more in fixtures decorations than in walls, foun- ns and construction. The eye of wife is credited with many pur- es of homes. Something attracts vision and a sale is almost con- nated.

hile good construction, substantial dations, walls, roofs and other about a home are essential and e is no intent to in the least elze, still there are many other gs which hold out a strong per- ive hold and are carefully pre- ed. Salesmanship is essential in instances and it is this fact that gs out the qualities as above stat- decorations, fixtures, furnishings, s, closets and so on.

he greater number of people, it is ted out, are interested in conven- es and beauty; in short, many s are made where the home at- ts the eye.

ome buying is an important step he life of any man, for it gives feeling obtained in no other way. re are few men in the world who not happy to walk up to and ugh his own door. Th fact that ebt has been contracted on which e must be consideration given for y a day is overcome with the feel- of home owning.

Sure of Income, Then Buy Your Home

is of primary importance that home seeker has financial ca- city to pay and that he should not ertake the purchase of a home ll he is assured that the equity ich he has saved in that house is sufficient proportion to carry out bargain. First of all he should k to his mortgage market, and usually contemplates both first second mortgage market.

Casements of Steel Refine Newer Homes

Distinction in the home is best arrived at by careful forethought in the assemblage of the seemingly unimportant detail features of design which in the aggregate make up the necessary components of tasteful small-house architecture.

Certainly nowhere in the home design do judgment, personality and good taste manifest themselves more conspicuously than in the choice of windows.

This in itself accounts for the constantly increasing popularity of the steel casement for all the windows of the home. These windows, with their picturesque qualities reminiscent of the older architectures of Europe, achieve the distinction of simple good taste in their appropriateness to interior and exterior decorative schemes.

Nor is the cost of modern and convenient steel window equipment beyond that of other types. Modern methods of fabricating steel products and of efficiently distributing the manufactured products have reduced the cost to the home owner.

One type, in which the casements are made from specially designed hot rolled bars of rust-resisting copper steel, is so manufactured that frames and sash give double weathering, obviating the usual requirements of weatherstripping. Hinges are of heavy pressed steel equipped with brass bushings, and are securely welded to frames, reinforcing the entire unit at the corners. Either extension or standard hinges may be obtained. Friction stays permit of easy ventilating, holding the window at any point desired.

Awnings Add Touch of Color to House

The most unusual artistic effects in exterior decoration are being obtained with awnings. No awnings so harmoniously colorful have ever before come into vogue as those now offered to the home owner. The secret of their peculiar charm lies in their original and exclusive scroll design, which blends appealing hues in such a way that they become an integral part of the home architecture. Such a color treatment is lastingly beautiful and lends itself to appropriate use on every type of home.

Color in Home

Color has come into its own in the American home. The appealing beauty and livableness that result from its proper use are more appreciated than ever before. And nowhere is color being used to more advantage than on the floor.

Save Closet Space

A space saver in the form of a folding clothes hanger rod is now available for the closet. Each rod is capable of holding six hangers. A set of two or three will fully equip the ordinary closet.

POULTRY FACTS

MEAT SCRAPS OR MILK IN RATION

Home-grown feeds should be used as much as possible in the ration of the farm flock, but grain feeds should be balanced with milk or meat scraps or both, says George Ghostley, poultry specialist of the agricultural extension service of the University of Minnesota. Ground feed called mash, as well as grain, is necessary. The following will give good results, he says:

Grain—Cracked yellow corn, two parts; wheat, one part, and heavy oats a half part

Mash—One hundred parts each of bran, middlings, ground yellow corn, ground oats, and meat scrap, three parts each of salt and charcoal.

Milk is nu extremely valuable food for poultry—more valuable even than for hogs. Feed skim milk or buttermilk if possible. Reduce the meat scrap one-half if there is milk before the birds all the time. If they have milk only to drink the meat scrap can be scrapped entirely, particularly if 5 per cent more bonemeal is added to the mash.

One pint of cod liver oil to each hundred pounds of mash, mixed first with charcoal and then with the other ingredients, makes a valuable addition to the ration. The mash should be before the hens in hoppers or feeders all the time. More grain than mash should be fed during the cold weather with the reverse the case in summer. Feed lightly of grain in the morning.

Warm water, oyster shell, grit and green or succulent feed such as alfalfa or clover leaves, mangels, carrots, cabbage, cull potatoes, rutabagas or sprouted oats should be furnished. Changes should be made gradually.

White Hollands From Original Wild Turkey

White Hollands are thought to have originated from sports of the original wild turkeys, and perpetuated by selection and breeding. In fact, some information leads to the belief that the White Hollands were perfected in Europe, where range was restricted and nomadic habits most desirable, and then later returned to America by some of the early Dutch settlers. This may be largely based on the docile, domestic temperament, characteristic of White Hollands, which would indicate the restricted areas of Europe of that day, rather than America. Too, White Hollands are said to have been fairly well-known in England early in the Nineteenth century, and it may be due to their foreign invasion so to speak, that they were later to become well known in the land of their nativity, than were some of the other standard varieties which were perfected in America.

Keep Poults Hungry for First 48 Hours Anyhow

Turkey poults should not be fed anything the first 48 hours after hatching. If they have free range, they will pick up some seeds and insects, which will vary the amount and kind of feed that may be needed after 48 hours. It is best always to keep them just hungry enough so they will be hunting feed and getting the exercise that is required for best growth and livability. Hard-boiled eggs chopped fine and mixed with cornbread crumbs have been found generally satisfactory the first week, after which whole wheat and hulled oats are good. Keep them out of wet grass until they are well along. Three litters of eggs per year are generally about all that will be satisfactory to hatch, because late-hatched poults are likely to be less thrifty.

Kill Harmful Mites

Mites do not live on the chickens by day, but come out and suck their fill of blood when the birds are roosting. First the poultry house must be cleaned thoroughly. Trash, nesting material, etc., should be taken out and burned. Then go over the whole house thoroughly with crude petroleum or carbolineum, using either a spray pump or brush to supply the material. Petroleum is cheaper but the carbolineum gets into the cracks better and lasts longer.

Geese for Breeding

It is inadvisable to dispose of an older goose and keep young geese for breeding purposes, provided the older bird is in good health. Young geese will often lay during their first year, but the eggs are usually infertile and the number produced is seldom as high as would be produced by an older female. Females of the Canadian breeds do not lay, as a rule, until they are three years old, but females of any of the breeds may be kept for breeding.

Eggs for Chicks

Eggs that are tested out of incubators up to the 14th day make good feed for young chicks if properly prepared. They should be boiled for at least 30 minutes so as to kill all germs that may be in them. Then pulverize them in a jar or some container, using a square stick that will thoroughly mix the contents and pulverize the shell as well as the interior portions. The only danger in feeding eggs lies in not cooking them long enough or over feeding.

The Cream of the Tobacco Crop

LLOYD WANER

Noted Star of the Pittsburgh Pirates, *writes:*

"When I arrived at the Pittsburgh training camp I noticed my brother Paul smoked Lucky Strikes exclusively, and he explained why. You will agree that we were in a close and exciting Pennant race and it certainly called for splendid physical condition to withstand the tax and strain upon one's nerves and wind. Like Paul, my favorite Cigarette is Lucky Strike"

For Supervisor

I hereby announce my candidacy to succeed myself to the office of supervisor of Hancock County, subject to a decision of the Republican voters at the June, 1928 primaries.

F. J. Urich. c

Judge E. C. Branch Says:

"That's the Feed That's Safe to Use"

250,000 users and boosters of NUTRENA Chick Mash acclaim the fact that its the "Feed that's safe to use." It is not necessary to hatch two chickens to grow one to maturity. Chick losses from feeding are out of date for NUTRENA Feeders.

Nutrena
REG. U.S. PAT. OFF.
CHICK MASH
WITH COD LIVER OIL

It is a complete feed for chicks of all ages. From first feed to maturity. Grows laying pullets in from 5 to 6 months. It is the safest feed to use, regardless of conditions. Simple, easy to follow feeding directions in every bag. 100 lbs. feeds 100 chicks first five weeks. Costs just one penny more to feed a chick thru the danger period than ordinary scratch grains. Every chick is entitled to life; you do your best for him when you feed NUTRENA. Your dealer has a supply for your convenience. Have a sack on hand for hatching day.

Prevent Leg Weakness and White Diarrhea Cod Liver Oil in NUTRENA Chick Mash helps prevent leg weakness. It enables you to grow chicks indoors during the early spring successfully. Brings them thru to profitable 2 lb. broilers at 8 weeks, and 4 lb. at 14 weeks. Selected Dried Buttermilk helps prevent White Diarrhea and other intestinal diseases. Raise every chick possible this year. NUTRENA Chick Mash will enable you to do this.

ENIOR CLASS PLAY NEXT FRIDAY EVE

STERY PLAY CHOSEN BY THE SENIORS THIS YEAR

er News Of Interest Reported By The Superintendent This Week

There is quite a mystery as to o is going to prove to be the "Cat Nine Tails" in the Senior Class y. The mystery will grow as the y proceeds and it is doubtful that ny will be able to guess it before e play is nearly over Miss Trum- ll expec s to have the players ady for the playing of this mys- y play on Friday evening of next eek.

Goodell Wins Ball Game

Goodell beat our lads in base ball we feared they might but not so dly as we thought, only 5 to 1 ur team has been entered in one the state base ball tournaments be held at Dows this month. They ill get some valuable experience d fine practice but hardly expec win the championship trophy ey are developing well and will ith more practice and experience ake a very creditable showing e appreciate the sacrifice the fath- s of our players are making in rmitting the boys to continue base ll practice and to play at this usy season

Enjoys Trip To Chicago

Verner Priebe lately come from hicago reports a wonderful trip nd sights witnessed in the windy ty We are glad that this opportun- y came to him and that he has aken advantage of it. He is back n school again but is perhaps won- ering when he can return to this reat live stock market and inter- sting city of such mammoth size

Last P. T. A. Meeting Held

Rev Gauger and Mr Wellemeyer ave interesting talks at our P T A last Tuesday evening and D r- nce Day and Blanche Gimer enter- ained us well on piano and violin espectively It was voted to con- inue the officers in office until the firs: meeting of the next school ear, to start the year off with an unusually good program and some good things to eat. Our member- ship has been larger than usual this ear, 49 in all, but not all have at- ended regularly. We believe other parents would profit by joining this ssociation and attending regularly They need to know their teachers and consult with them about their children if they would do them the maximum amount of good. Much f he complaint of parents would van- ish if a better understanding could be created between them and their teachors We are glad so many in our community are disposed to co- operate with the teachers and off- icers and display confidence in them and a genuine good will toward our work It means much to tired tea- chers and more to children in the end We would not ask to be ex- empt of al criticism but wish that it might be made to us in a kindly manner rather than to those who cannot possibly profit by it.

Supt. Cooper Visited Schools

Supt Cooper, of Britt, called to interview our Seniors this week in the interests of the Junior College at Britt. A colege so near as Britt has its advantages. Credits made there will be accepted toward grad- uation later in other four year coll- eges of Iowa and may be earned at less expense than at more distant colleges.

Only three more weeks of school

Garner Store Moved To Humboldt

The Great Atlantic & Pacific Tea Co. store, which has been located at Garner for the past year, last week Thursday closed its doors and mov- ed the stock of goods and fixtures to a new location at Humboldt. Gar- ner, like many small towns was ov- er-crowded with grocery stores and there was perhaps not enough busi- ness to satisfy the A. & P.

Enjoyed Trip To Traer Sunday To Visit Former Klemme Folks

C G Waterman and family, Mr C F Keraus, and Ye Editor and family boarded the Waterman Buick and headed for Traer, Iowa, Sunday to spend the day with Mr and Mrs Billy Keraus and sons, Otho and Verle Besides a wonderful dinner prepared by Mrs Keraus, the day was greatly enjoyed in other ways Mr and Mrs Keraus are comfortably housed in rooms directly above their nice grocery store, in one of the town's best brick buildings, located on a main intersection of the city Mr Keraus has his store neatly arranged and carries a large stock of groceries, fruits vegetables, baked goods and some dishes, crockery and other items found in a first class grocery Although Traer has seven other grocery stocks Mr Keraus enjoys a large business His store is one of the old reliable busines concerns established over fifty years ago A trip about town was enjoyed Traer has most of its streets paved has a fine city library and an immense school house and a large athletic field Supt Bener was kind enough to show us thru the school building, which is modern in every respect from the kindergarten thru the high school. They have well equiped rooms in every department a large gymnasium, a large auditorium with balcony and stage Traer has four large brick churches, all equipped with pipe organs. Mr C F Keraus remained at Traer to do some remodeling at the store, the others returned to Klemme Sunday evening Traer is 122 miles from Klemme, with gravel all the way

METHODIST CHURCH NOTES
A. W. Gauger, Pastor

Fine response in the Thankoffering of the W F M S last Sunday was manifest To those who did not have an opportunity to respond last Sunday, there is still a "last chance" open to do so Both auxiliaries have made commendable showing during the past year by carrying the regular work as well as by doing "special" service. They deserve every credit and encouragement

All services for the coming Sunday will be per schedule W eare laying plans for our Mother's Day Service on the second Sunday in May and desire the presence of every mother as a guest of honor Things of interest and inspiration and joy await them at this their service

NINE CAR LOADS OF STOCK SHIPPED SATURDAY NIGHT

There were a total of nine car loads of live stock shipped from the Klemme yards Saturday night.

Of this number the Klemme Live Stock Shipping Association handled five car loads, consisting of two car loads of hogs, two car load of mixed stock and one car load of cattle.

C A Larsen shipped four straight car loads of hogs.

Heramn Priebe and son, Verner, went to Chicago on the stock train Saturday night

Britt School Superintendent Has Resigned Position

Supt. C. E Cooper has resigned his position as head of the Britt schools, effective at the close of the present school year. Mr. Cooper will take up the insurance business and will be a district manager in some Iowa territory for the M. P. A Mr. Cooper's headquarters will be at Des Moines, where he and his family will move to soon.

Spinach and liver are good iron carriers. They counteract anemia and build up the red blood corpuscles.

WILL HAVE BAKE SALE TO PAY FOR SUMMER CAMP

Local Camp Fire Girls Will Have Ceremonial Gowns

The Ta-Ta-Pochon Camp Fire Girls held their regular meeting on Monday night.

The girls have decided to get ceremonial gowns.

Lela Bachman, Thelma Kluckhohn, Reva Elder and Clarice Wellemeyer served lunch.

Watch for hte date a bake sale will be given by the Camp Fire Girls. This money will help pay for our summer camping expenses.

One of the members handed in a Camp Fire Poem which she wrote and for which she will receive an honor pin:

I think that I shall never see,
A girl as lovely as a C. F. G.
A girl whose middies are always white,
Is a very pleasant sight.
A girl who stands like pine-trees do,
So straight, so strong and very true.
Camp Fire is the thing for me
And I am proud I'm a C. F. G.

By V. V. K.

The next meeting will be May 14

BARZ-ROSENDAHL MARRIAGE

Wednesday, May 2nd, at the home of the Bride's parents, Mr. and Mrs Fred Barz, occured the marriage of Miss Ella Lena Barz to Mr. Walter Rosendahl. Rev. Calvin Grosshuesch pastor of the Klemme Reformed church performed the ceremony.

At the appointed hour some sixty relatives and invited guests sat down to the wedding dinner.

Further social activities took place at the Barz home when about one hundred young folks of the community gathered to make merry at a reception in honor of Mr. and Mrs. Rosendahl

Both of the contracting parties have a wide acquaintence in this community who wish them every happiness and much success. These young folks come from the best of families in the community and both are fine young people of high moral standards and Christian characters.

The Times extends congratulations.

B. L. PROUTY IS CANDIDATE FOR COUNTY SUPERVISOR

Mr. B. L. Prouty, of Garner, this week announces in The Times that he is a candidate for Supervisor.

Mr. Prouty is an experienced business man and is well qualified to look after the best interest of the county in the office he seeks..

We are personally acquainted with Mr Prouty and we know him as an honest, upright man of good habits and character.

SAKAKAWEA STATUE AT PORTLAND, ORE.

POCAHONTAS STATUE, JAMESTOWN ISLAND, VA.

SAKAKAWEA STATUE, BISMARCK, N.D.

By ELMO SCOTT WATSON

MOTHER'S DAY last year was the more significant because of plans which were under way for the erection of memorials to one of the most heroic types of motherhood the world has ever known—the pioneer mother of America. One of them was the selection by popular vote, among the twelve models submitted by the leading sculptors of the United States, of the design by Bryant Baker for the heroic statue of the pioneer woman which E. W. Marland, an Oklahoma oil millionaire, proposes to erect in the famous Cherokee Strip in his state as a perpetual reminder of the part played by women in the winning of the West. The other was the completion by A. Phimister Proctor of his "Pioneer Mother" statue, which was later presented to Kansas City, Mo., by Howard Vanderslice and erected in Penn Valley park in that city.

Mother's day this year, which will be celebrated throughout the country on May 13, will find another project under way for further honoring the pioneer mother with enduring memorials. The Daughters of the American Revolution are planning to mark the National Old Trails road across the country from the Atlantic to the Pacific with twelve "Madonna of the Trail" markers, one each in Maryland, Pennsylvania, West Virginia, Ohio, Indiana, Illinois, Missouri, Kansas, Colorado, New Mexico, Arizona and California. These markers, each 18 feet tall, represent a typical pioneer mother. She holds a babe in her arms and a small boy clings to her skirts as she faces the dangers and privations of the West. The model for the "Madonna," made by A. Leimback of St. Louis, was selected from a large number which were submitted and it is planned to erect the statues in time for dedication on Mother's day.

But the pioneer mother is not the only type of motherhood which is to be honored with memorials this year for plans are now going forward for paying a similar tribute to two mothers of a race which occupied this continent long before the pioneer mother made her appearance. Both are familiar names in American history—Pocahontas and Sakakawea (or Sacajawea, as she is often known).

One of the outstanding features of the "Westminster Abbey of America," the Washington cathedral, which is to be built on Mount St. Albans overlooking the Potomac at Washington, will be the Chapel of Women. The Washington cathedral has selected what it considers to be the "twenty greatest Christian women since the death of Christ" and they will be honored with stained-glass windows in the Chapel of Women. Thirteen women saints have been selected. They are Phoebe, Cecelia, Phipsine, Helena, Ursula, Genevieve, Hilda, Ethelgive, Frideswide, Edith, Margaret, Irene and Elizabeth. Other women, who have achieved immortality by their Christian fortitude, their courage and their piety and will be honored therefor, are Anne of Bohemia, wife of Richard II of England; Mother Superior Harriet Starr Cannon; Julia Emory; Joan of Arc, the immortal "Maid of Orleans"; Lady Jane Grey, who was beheaded in the Tower of London; and Susanna Wesley, mother of the founders of Methodism. And last but not least in that galaxy of great women is the Indian girl, whose kindness and service to the first colonists in America have kept her memory bright for three centuries—Pocahontas.

Everyone is familiar with the story of how Pocahontas, then but thirteen years old, saved the life of Capt. John Smith, when he was captured by the Indians and ordered to be put to death by Chief Powhatan. But few of us are familiar with Pocahontas' later history. Pocahontas the wife and mother has been quite lost sight of in Pocahontas the maiden and heroine of the earliest bit of romance in American history, a story which some historians believe to be a pleasant piece of fiction invented by the doughty Captain John many years after the event was supposed to have taken place, although others bring forth evidence to prove that it is substantially true.

One of the paintings in the Capitol at Washington which attracts universal attention is the canvas by John Gadsby Chapman named "The Baptism of Pocahontas." It was this incident in the life of Pocahontas, or Metoaka, which was her real Indian name, which gives her a place in the Chapel of Women in the National cathedral. For in 1613 she was converted to Christianity and in a solemn ceremonial in the little church at Jamestown she was baptised in the Christian faith under the name of Rebecca. "She stands foremost in the train of those wandering children of the forest," writes the painter Chapman, "who have at different times—few, indeed, and far between—been snatched from the fangs of a barbarous idolatry, to become lambs in the fold of the Divine Shepherd."

Photograph of Pocahontas statue, courtesy Virginia State Chamber of Commerce; of Sakakawea statue, courtesy J. M. Devine, North Dakota commissioner of immigration.

Her baptism had been preceded by a base act upon the part of the English who owed so much to her effort in winning for them the friendship of the powerful Powhatan. A certain Capt. Thomas Argall had bribed some of the Indians to bring her aboard his ship where she was detained and taken to Jamestown and there held as a hostage for the good behavior of her tribesmen. Soon after her baptism she was married to John Rolfe, a young planter. A son was born to them and given the name of Thomas Rolfe. About a year later Rolfe took his family to England where Lady Rebecca, as she was known, was received at court and was the object of many flattering attentions. In 1617 they prepared to return to America, but Pocahontas was stricken in an epidemic of smallpox and died at Gravesend a short time before they were to take ship. She was buried under the flagstones in the chancel of old St. George's church in that city and although attempts have been made in late years to locate her grave, no one knows for sure just where it is. Her husband and son returned to Virginia and the Rolfes became "F. F. V.'s," so that today some of the proudest families in that state claim Pocahontas as an ancestor. One of her descendants was the famous John Randolph of Roanoke, and another is Mrs. Edith Bolling Wilson, widow of President Woodrow Wilson.

While the memory of Pocahontas is to be honored in the National cathedral, Sakakawea, or Sacajawea, is to be honored with another monument, although where that monument is to be located is somewhat of a question. A bill appropriating $5,000 for such a monument has been introduced into congress, but until the problem of where this Indian girl-mother, famous as a guide for the Lewis and Clark expedition, died and is buried is solved, the passage of the bill seems somewhat doubtful. Wyoming, whose representatives are asking the appropriation for the monument, believes that she died on April 9, 1884, at the age of more than one hundred years, and is buried on a bleak hill near the Shoshone agency, on the Wind River reservation, about sixteen miles northwest of Lander, Wyo. The principal authority for this claim is Dr. Grace Raymond Hebard, librarian of the University of Wyoming, who for twenty years has studied the history of Sakakawea and believes that she has the only accurate account of the Indian woman's death and burial place. Her version and its corroboration by Dr. Charles A. Eastman, an educated Sioux who was commissioned to make an investigation, has been accepted by the United States bureau of Indian affairs. On April 1, 1914, a simple concrete slab was erected on the spot where Sakakawea is supposed to lie and there it is proposed to place the monument for which congress has been asked to make an appropriation.

On the other hand, North and South Dakota, basing their version upon the studies of Doane Robinson, veteran historian of South Dakota, believe that Sakakawea died December 20, 1812, at Fort Manuel on the Missouri river near the southern boundary of North Dakota. Along with the dispute over the date of Sakakawea's death and the site of her grave is a dispute over the correct spelling of her name. North and South Dakota, Missouri and Montana say that it should be Sakakawea; Wyoming and Oregon contend that it should be Sacajawea; and a compromise of Sacagawea has been offered.

History records few finer examples of heroic motherhood than this Shoshone Indian girl who, at the age of sixteen as the wife of Toussaint Charbonneau, a French-Canadian trapper, was guiding Lewis and Clark on their "magnificent adventure" over the Shining mountains to Everywhere Salt Water. Strapped on her back was her two months old baby, Baptiste Charbonneau, who, as one historian has recorded was "a boy-child destined to go down in his country's history as the first baby to cross the Rocky mountains and paddle his toes in the Pacific." Mother and son have already been immortalized in three statues. One, which now stands in a park in Portland, Ore., was made by Alice Cooper and was the outstanding piece of sculpture at the Lewis and Clark exposition in that city. Another was made by Bruno Zimm for the Louisiana Purchase exposition in St. Louis, and the third, made by Leonard Crunelle, stands on the state capitol grounds in Bismarck, N. D., the gift of the federated women's clubs and school children of that state. Considering the value of her services to this nation the erection of a fourth statue to her memory to mark the place where she was buried is eminently fitting and even then our debt to Sakakawea is far from being paid.

The nation's debt to a third heroic mother still remains unpaid so far as a memorial to her memory is concerned. She was Winema ("Woman Chief"), better known as Tobey Riddle, a woman of the Modoc tribe who has often been called "The Pocahontas of the Lava Beds." For Tobey Riddle's friendship for the whites caused her to risk her life in their behalf more than once during the Modoc war in Oregon and northern California in 1873. She and her husband, Frank Riddle, a Kentucky frontiersman, were interpreters for the peace commission which was trying to bring about a settlement of the difficulties between the Modocs and the army which had been sent against them after hostilities had commenced late in 1872.

Upon learning that the Modocs were planning to murder the commissioners when they met under a flag of truce, Tobey Riddle, knowing full well that it might mean death at the hands of her tribesmen, betrayed the plot to the commissioners and tried to persuade them not to attend the council. They refused to believe that the Indians would dare treachery and insisted upon going through with the arrangements. So they went to the council and the heroic Indian woman accompanied them. Her warning of the Indians' intentions proved to be a true one. In the midst of the council the Modocs opened fire on the whites, killing Gen. E. R. S. Canby and Rev. Eleazer Thomas and seriously wounding A. B. Meacham. When Tobey Riddle sprang to the defense of Meacham and tried to prevent one of the Modocs from scalping him she was struck down. But her quick wit, which led her to exclaim "Soldiers coming!" caused the Modocs to flee and no doubt saved Meacham's life.

Tobey Riddle was the mother of Jeff C. Riddle, the "handsome boy Charka" mentioned by many writers of that period, an educated Indian who has written what is probably the most complete history of that conflict which has ever been produced. Tobey Riddle died February 20, 1920, during an epidemic of influenza which swept the residents of the Klamath reservation in Oregon.

New Blackboard Idea Has Many Advantages

Experiments looking toward an improved visibility of blackboards in public schools have brought forth the translucent blackboard on whose surface writings are plainly visible from all parts of a room.

This effect is obtained by abandoning the usual opaque board and substituting therefor a ground glass surface uniformly illuminated from the rear. With the customary room illumination, part daylight and part electric, everything on this blackboard is visible from all parts of the room.

Incidental advantages gained are: ease of erasure, ability to use the surface as a translucent screen for projecting lantern slides with the possibility of adding chalk lines to projected diagrams; ability to intersperse chalk talks with lantern slides without changing the general room illumination.

Proof Positive That Story Was Passed Up

Frank Beresford is responsible for the statement that many a good story is never brought to light through lack of faith by the authors in their work. "Some writers with more brass than talent break into print," he avers, "while others discard really worthwhile material because it falls short of their almost superhuman ideals.

"Of course there is such a thing as overconfidence or conceit, like the young lady whose story was returned from a big magazine. 'The horrid editor sent it back without reading it,' she told her mother.

"'But how do you know that, dear?'

"'Well, I've looked through every page and there isn't a single tear drop on one of them,' was the reply."—Los Angeles Times.

Depth of Fascism

"We have a branch in Genoa, Italy," remarked a Detroit exporter, "and while I was there recently I was given a demonstration of the depth and extent of Fascism. One morning our agent came down to the office and in a moment he looked worried. We had an engagement to make a trip, but he begged a postponement until he could go home, a distance of a full hour, and return. It developed that he had forgotten his Fascisti insignia, which the faithful wear conspicuously. 'I must have it,' he said, 'else they might think I had changed my mind over night.'"

German Brides Work

Of the 71,000 brides in Germany during the last two years 54,000 had jobs or had learned a trade. Stenographers working in industrial and insurance offices were most attractive to the opposite sex, 19 per cent of the working girls who married coming from these two branches of business.

Make Slums Airports

The suggestion has been made that slum quarters of large cities be converted into central airports. Demolition of these quarters, it is pointed out, is inevitable, while airports are a uniformly necessary feature of all future population centers.

World's Population

In May, 1927, the population was estimated to be 1,906,000,000, based on figures prepared by the secretariat of the League of Nations.

The toy industry of the United States shows an increase of more than 1,300 per cent in the last 20 years.

Is it more fashionable for an apartment house to have a name or a number? Why not both?

A woman is seldom as strict with her children as she is with her husband.

Jealousy is mostly wounded vanity.

A big, wholesome cake of soap that lathers and cleanses instantly. Routs dust, dirt and common germs like magic.

Reversed Ignition

Reverse the ignition circuit of your Fordson, Ford car or truck. The saving in gas is considerable. The extra speed and power saves you time and money.

The reason: Simply because the stronger, hotter reversed circuit delivers an extra large, extra hot spark to the spark plugs.

Write today for free particulars.

Scott Manufacturing Co.
Knoxville, Tenn.

Illuminated Clubs

To assist in directing traffic at night Paris policemen are carrying lighted clubs, somewhat like the illuminated baton of an orchestra leader, says Popular Mechanics Magazine. They are equipped with a red and white bulb, both supplied with current from batteries attached to the policemen's belt. A switch exposes either of the lights desired.

INSTALL CHAMPIONS NOW

Once again Champion reminds you that to enjoy maximum engine performance during the next twelve months you should install a complete new set of spark plugs now.

Champion is the better spark plug because of its double-ribbed sillimanite core — its two-piece construction and its special analysis electrodes.

Champion X—for Model T Ford and Fordson Tractors 60¢

Champion—For all other engines including Model A Ford. 75¢

Byzantine Architecture

There are three beautiful examples of modified Byzantine architecture in Washington—the Shrine of the Sacred Heart, St. Matthew's church and the Franciscan monastery.

Office Girls

"Are girls making good as messengers around the office?"

"Sure. They can all whistle."

The largest fish hatchery in the United States is at Springville, Utah. Placed end to end, the ponds would extend for nearly a mile.

Feel Tired and Achy?

Too Often This Warns of Sluggish Kidneys.

LAME? Stiff? Achy? Sure your kidneys are working right? Sluggish kidneys allow waste poisons to accumulate and make one languid, tired and achy, with often dull headaches, dizziness and nagging backache. A common warning is too frequent; scanty or burning excretions. *Doan's Pills*; a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of bodily waste. Users everywhere endorse *Doan's*. *Ask your neighbor!*

DOAN'S PILLS 60c

A STIMULANT DIURETIC FOR KIDNEYS

Foster-Milburn Co. Mfg. Chem. Buffalo, N.Y.

Puts An End to Bunion Pains

No Need to Suffer Another Day

There is one simple yet inexpensive way to reduce inflammation of swollen toe joints and help get them down to normal and that is to apply Moone's Emerald Oil night and morning. Ask any first class druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces lasts a long time and furthermore if one bottle of Emerald Oil does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of Moone's Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal.

Horticultural News

RINGING APPLE TREES OUTLINED

Until recently the practice of ringing fruit trees has been frowned upon by practical orchard men. Now it bobs up for attention—not so much because it is anything new as because some new and forgotten principles have been worked out regarding an old art, writes H. B. Tuekey, in the Rural New Yorker. Of course, the idea in ringing is to hasten bearing. Standard cultural practices, such as fertilizing, cultivating, pruning and spraying, should come first on the list, but if all of these possibilities have been exhausted, then ringing may rightfully be resorted to. The practice is especially suited to the filler tree to hasten its fruiting.

But the old methods of ringing in which a piece of bark from half an inch to three inches was removed from around the trunk is no longer considered good. The shock to the tree is often serious, and some trees have not recovered. The better way is to make a ring one-quarter of an inch wide, or even less. In fact, it has been found practical merely to score the trunk or limb by drawing the knife about it, but making sure to cut through to the wood.

Some advise covering the wound with strips of cotton cloth dipped in grafting wax, while others declare that healing is sufficiently rapid so that no protection is necessary. If wrapping is done, the material should not work into the wound or it will interfere with healing. When scoring is done instead of ringing, no protection is necessary.

The best time to ring is when the tree is still growing vigorously, and before the fruit buds have formed for next year. This means the last week in May or the first week in June in average seasons in New York state. With filler trees the entire tree may be "rung" or "scored," but with permanent trees it is safer to treat one or two scaffold branches on a tree at one time rather than the entire tree. If the fruit sets heavily it should be thinned.

Some Essential Points in Spraying for Aphids

A few essential points to watch in spraying for apple aphids are listed as follows: "Do not spray when the buds are wet with dew or during showery weather. Select as far as possible days for spray operations when the air is balmy and little or no wind is stirring. High winds cause waste of materials and make thorough treatment difficult. High temperatures accelerate the volatilization of the nicotine.

"Apply mixtures under high pressure, using a fairly coarse and driving spray. Remove all waterspouts and suckers during early spring. The rosy aphis and the green apple aphis are partial to them and they often constitute centers of infestation, particularly for the green aphis.

"Judicious pruning of trees to remove excess wood not only makes for greater productiveness and better color of apples, but it also helps to simplify the work of spraying. With open-headed trees rains and wind have a better chance to remove many aphids."

Top-Grafted Apple Tree Bears Fruit Like Graft

A tree when top-grafted will bear the fruit like the graft on all branches which grow from the clon. Branches which spring from the original stock below the clon union will continue to bear fruit like that of the original seedling. Consequently all the limbs on the tree will have to be grafted or cut away to change over the tree into a new variety.

The following are good winter varieties of apples: Northwestern Greening, McIntosh, Salome, Malinda, Haralson, Perkins and Delicious. The latter may be used if your tree is in a rather protected location.

Horticultural Notes

Cherry trees seem to need early planting, that is, well before they leaf out. A wet soil is quite injurious to the cherry.

* * *

Watch for currant worms and white butterflies and spray the small cabbage and cauliflower plants before the worms get a chance.

* * *

Oil emulsion sometimes separates when hard water is used, and under such conditions a ½-½-50 bordeaux mixture should be used as a diluent.

* * *

It will soon be time to spray for the peach curl, and we must all be ready to hit this pest such a jolt as it has never had.

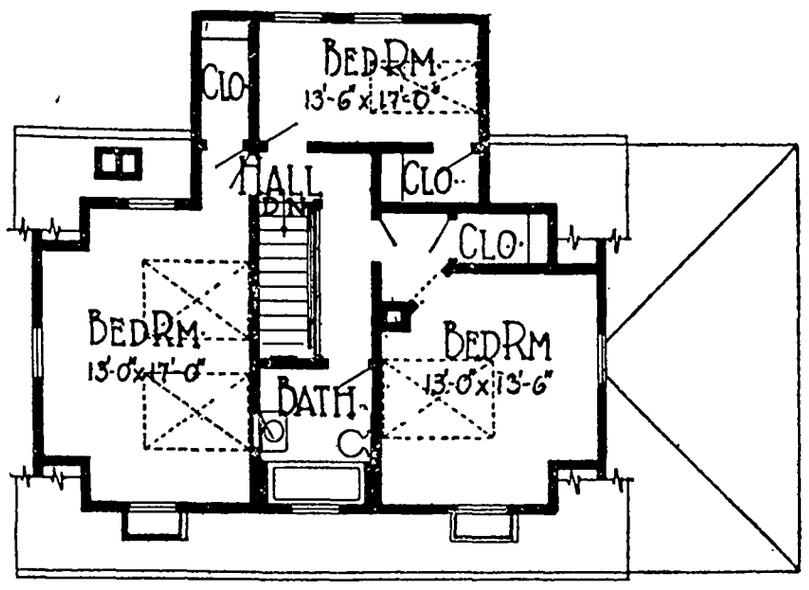
* * *

The pine mouse which girdles the roots of fruit trees underground, is becoming a troublesome pest in New England orchards.

* * *

Clons for grafting should be cut before the buds swell in the spring unless the grafting is done early, when the clons may be cut at the time the graftings are set.

Colonial Style of Architecture Provides Owner Attractive Home



Second Floor Plan.

By W. A. RADFORD.

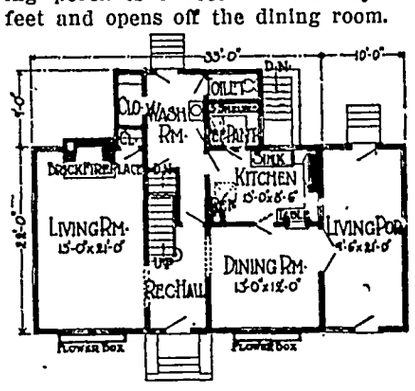
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

The colonial style of architecture gives to the owner a most attractive home. It reminds one of the homes that have long stood on New England farms and during these modern times still are most popular.

The home shown in the illustration is a variation from the true colonial, as it has a wide dormer projection at the front, while the true colonial has walls extending to the eaves without a break. However, the dormer takes away the severe appearance and at the same time gives almost as much room on the second floor as the style from which this was taken.

The home is of frame construction, with wide clapboards on the side walls. Inside, the colonial style of room arrangement is carried out. The entrance hall is in the center of the house, with the living room at one side and the dining room and kitchen at the other. As will be seen by the floor plans that accompany the exterior view, there are six rooms, all large and all corner rooms, so that there is an abundance of light and ventilation.

The living room is 13 feet by 21 feet and is open on three sides. At the back there is a large open fireplace, while the other walls are unbroken. The dining room, also at the front of the house, is 12 by 13 feet, with the kitchen directly back of it. Built on at the back is a projection which contains the washroom, or laundry, and a large pantry. The living porch is 9 feet 6 inches by 21 feet and opens off the dining room.



First Floor Plan.

Upstairs, opening off a central hall reached by the stairs running out of the entrance hall, are three large bedrooms and a bathroom. There are closets for each of the three rooms.

The house looks large, but its dimensions are only 35 feet, with a 9-foot projection at the back. The basement is of the same dimensions, a size large enough for a basement heating plant and the usual storage rooms needed for the family.

Garages of Concrete Blocks Are Efficient

The concrete block garage is being received with considerable enthusiasm by home owners and builders. Concrete block permits a wide variety of architectural treatment and can be designed in keeping with almost any type of home.

With concrete block any kind of surface can be secured. The majority of manufacturers are prepared to supply several types either faced or marble chips, comparing favorably with cut stone, or surfaced to permit of stucco treatment.

A special type of concrete block is the concrete cinder block. Lighter in weight than the ordinary block, it is highly adapted to this type of construction and takes a stucco finish with a maximum of success. This block is being used in apartment construction and in the construction of homes, and its manufacture bids fair to become a highly important end of the building material line.

Many car owners make the mistake of building the garage too small, then when they dispose of their old car and secure a larger one, they find the space inadequate. An addition must be built or a new building erected, causing needless expense.

For single-car garages, an inside width of 12 feet has been found satisfactory, and for a two-car garage 20 or 22 feet. A length of less than 20 feet is seldom advisable. For larger cars, 22 to 24 feet is better. These dimensions will allow plenty of working space around the car and provide room for a small work bench, closets and shelves for car accessories across one end.

The two-car garage is becoming increasingly popular even among men who only own one car. The extra space can usually be rented to neighbors at a profit, or comes in handy as a storage place for extra body or top. There is also the possibility that two cars will be owned at some future time. In sections where motor trucks are coming into general use the advisability of building a garage large enough for both car and truck deserves consideration. Since the dimensions of the truck are usually greater than those of the car, this fact must be taken into consideration at the outset.

Clean Floor Thoroughly Before Giving Finish

It is almost impossible to keep oak flooring looking clean and neat if it has not had the proper preliminary treatment by workmen who laid it.

In the first place the floor should be scrubbed and cleaned until every speck of dirt has been removed. Be sure there is no dust in the corners. Varnish with a high grade of varnish and let this first coat dry well.

When the second coat is dry apply the wax. Rub the wax well into the wood, using plenty of "elbow grease" and you will have a fine finish.

The scraping of hardwood floors with a knife to remove paint and varnish when preparing for a new finish can be eliminated to a great extent by the use of paint remover, a scrubbing brush and a package of ordinary kitchen cleanser.

After applying the remover to a part of the floor and thoroughly softening it, wet the brush moderately, dip it in the cleanser and apply to the floor, scrubbing vigorously. The action of the water and cleanser will remove most of the old stock and leave the floor almost white.

Plaster Arch Gives Home Distinctive Air

Plater arches, doorways, window openings and other exposed corners of the home can be easily and economically safeguarded from destructive bumps and bruises by the use of expanded corner bead.

The round nose is strongly reinforced by a deep groove that provides a bond for plaster.

Another material, known to lathers as cornerite, is a practical and economical reinforcement for all inside plaster corners. Formed from a seven-inch-wide sheet of diamond metal lath, cornerite fits into the room corners and reinforces the plaster in all directions.

Both these materials employ the strength of steel to reinforce plaster at the points where it is most frequently subject to strains or shocks. By their use a great deal of the possibility of damage to expensive decorations is removed, and the home owner is given the freedom of mind which goes with plaster free from the bugbear of cracking.

POULTRY

WATCH INCUBATOR WHILE HATCHING

While many successful poultry growers are now buying day-old chicks for replenishing their flocks and for raising early broilers and pullets, there are still a great number of small incubators used on farms.

"Directions for operating these machines come with them," says Allen G. Oliver, poultry extension specialist at the North Carolina state college, "yet in most cases these directions apply only to the mechanical operation. We would not attempt to give specific rules that would work well under all conditions. The first hatch may be made when atmospheric conditions are ideal, resulting in an ideal hatch of strong chicks; the next hatch may give poor scrawny birds, even though the incubator ran perfectly. There are some few points to consider, however, in hatching out the early chicks this spring."

The normal time for an egg to hatch is 21 days, states Mr. Oliver. Too much heat means a hatch in about 19 days, and too little heat, in about 22 to 23 days. The temperature at the center of the eggs ought to be kept at 100 degrees. Moisture is next in importance. The amount of evaporation in the egg determines the size of the air cell at the end and the quantity of food left for the chick when it hatches. This also determines the size of the young bird. The operator of the incubator should watch the size of the air cell as the hatch progresses and add such moisture as is needed.

Ventilation is also important, states Mr. Oliver. This brings in pure oxygen and takes out the carbon dioxide. The egg is a factory with the materials in the shell as the raw product. By carefully regulating the heat and watching the size of the air cells it is possible to supply enough fresh air and the correct amount of moisture so that there will be little danger from lack of ventilation.

Turning the eggs stimulates the hatching chick to action and gives it exercise and strength.

Value of Hen Depends on Prices Prevailing

A hen may produce more eggs in a year than any bird in the flock, but yet is not as valuable as some other hen that produces less eggs. The hen that produces the largest number of eggs during the seasons of high prices will have the advantage in egg values over another bird which is idle at that period, and which may produce more eggs during the year. The real value of a hen will depend largely upon the persistency as well as intensity of production. Definite records have been kept at the North Dakota Agricultural college of the good laying hens.

"As an example, one hen produced 203 eggs in 1925, which were sold for $6.75, while another produced 219 eggs which brought $6.59. The second hen had laid 16 more eggs, but the eggs sold for 16 cents less due to the fact that this hen did a greater proportion of her laying during the spring and summer when eggs were cheap."

Poultry Notes

Always have feed and water available when lights are on.

* * *

Face the henhouse to the south. Make the north, east, and west sides wind proof.

* * *

Ground oats may be used for growing stock or laying hens when fed in limited quantities.

* * *

Danger from overfeeding is lessened if the chicks are fed often and a little at a time for the first few days.

* * *

Red mites may be controlled by thoroughly painting the house with carbolineum. Spraying coal-tar dip is also effective.

* * *

The greatest need of poultrymen today is not more hens, but better producing hens. Hens that will return a larger profit on the feed consumed.

* * *

Eggs going into the machine are just as important as the incubator itself, in the spring hatch.

* * *

Many digestive troubles are avoided if no solid feed is given for the first 48 to 60 hours, in order that the yolk in the chick's body may be partially absorbed.

* * *

There are four different kinds of oat feeds employed in chick feeds. Oat flour is used in practically all mixtures. It may be made at home if one has a huller.

* * *

Rye, oats, or spring wheat, or other spring grains would be very satisfactory as a forage crop for geese.

* * *

Roup, in its first stages, is nothing but a cold—the result, in almost all instances, of drafty, poorly ventilated poultry houses.

* * *

A good poultry house should afford protection from storms and severe weather because a little shelter from the winds and storms will add to the comfort of the fowls and thereby increase the egg yield greatly.

"WORTH WEIGHT IN GOLD"

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sanative Wash. The medicines that will do for me what the Vegetable Compound and Sanative Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound."—Mrs. Charles Morgan, R. F. D. 1, Tully, N. Y.

Do You Feel Tired in the Morning?

RESTLESS sleep? Poor appetite? Backache? Nature may be saying, "Watch your step. You're overloading the kidneys and poisons are spreading through your system. Do something before it is too late."

Improved appetite, more restful sleep, and a new interest in living are frequently noted by using Warner's Compound. It contains no harmful drugs. Its price is small. Why not benefit as others are doing by taking it regularly?

Sold by all druggists. Sample free. Warner's Safe Remedies Co., Rochester, N.Y.

WARNER'S COMPOUND

Formerly Warner's Safe Kidney and Liver Remedy

Man wants but little here below, but a woman wants everything a little below cost.

Conscience is a cultivated attribute. Flaming youth is said not to have it.

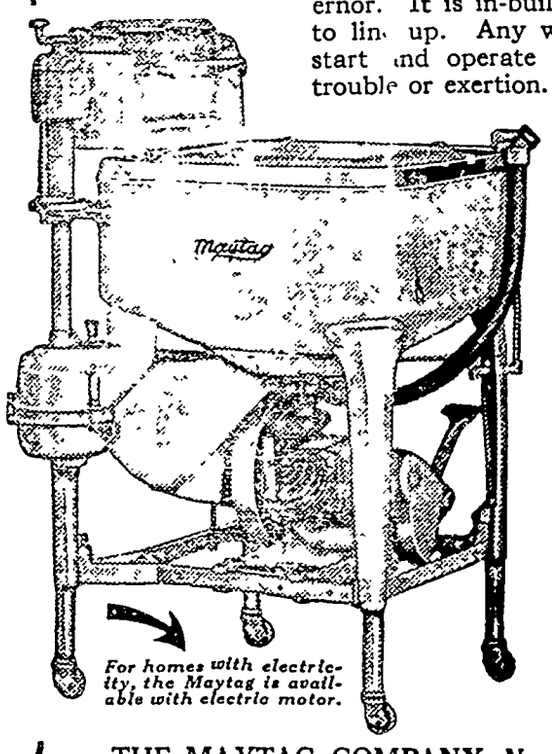
Electricity or Gasoline runs the NEW MAYTAG

FARM and city alike appreciate the new Roller Water Remover, with its semi-soft, balloon-type, never-crush rolls; the Automatic Feed Board that makes it unnecessary to get fingers near the rolls; the smoother performance, the more beautiful lacquer finish.

An Improved Gasoline Multi-Motor

The Famous Maytag Multi-Motor is more perfect than ever. The engine and starter have been combined in one unit, as compact as an electric motor. It has automobile-type carburetor, high tension magneto, and speed governor. It is in-built, no belts to line up. Any woman can start and operate it without trouble or exertion.



For homes with electricity, the Maytag is available with electric motor.

A FREE Washing

Write or telephone for a Maytag. Do a big washing. It will take but an hour or so, and you will not have to hand-rub anything, even grimy overalls. The Maytag does it all. If it doesn't sell itself, don't keep it.

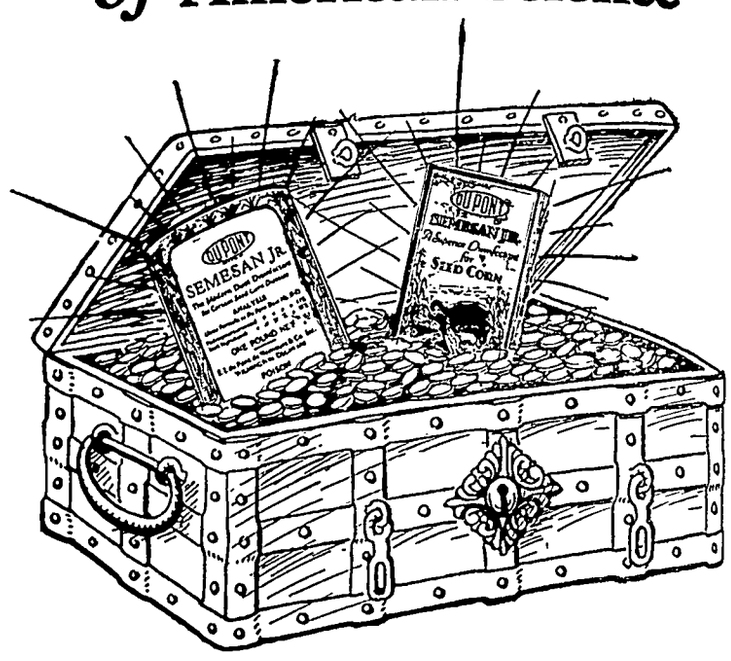
Out of the Treasure Chest of American Science



Improved —

DU PONT SEMESAN JR.

Most Effective Corn Treatment Known

SCIENCE is swift and ruthless in its progress. Inferior articles are swept aside and displaced by more efficient ones. Only the best survive! Out of the Treasure Chest of American Science now comes the peer of all seed corn disinfectants—*Improved* Semesan Jr.—more precious than the old gold of pirate days.

With the advent of *Improved* Semesan Jr. the treatment of seed corn—both selected and diseased—has become a safe, practical and profitable method of crop improvement. Applied to the seed by the simple, easy dust method—at a cost of only 2½c an acre—*Improved* Semesan Jr. will produce every desirable result claimed for any seed corn treatment and do it far better. Its equal does not exist!

More than 300 practical farm tests by Federal and State Experts confirm that fact. Circular No. 34 of the U S Department of Agriculture proves it! We'll gladly give you a copy showing that *Improved* Semesan Jr. has a record of producing 1⅓ to 2½ times greater yield increases than any other treatment. Ask for Semesan Jr. Corn Booklet.

"The chemical that stood out above all other seed corn disinfectants in my demonstration tests was Du Pont *Improved* Semesan Jr," says Oscar Mountjoy, of Atlanta, Illinois. His experience with the most effective corn disinfectant science has yet devised can be profitably employed by you.

Just figure out your needs—2 ounces to the bushel of seed corn—then buy enough *Improved* Semesan Jr. to treat all your planting. The harvest results should reward you a hundredfold for the investment.

Right Now is the time to save your chicks by correct feeding

Be sure it's

Nutrena

REG. U.S. PAT. OFF.

CHICK MASH
WITH COD LIVER OIL

START chicks right from the first feeding. Start them on NUTRENA CHICK MASH with Cod Liver Oil and guarantee yourself the profits that are rightly yours. Heavy, indigestible feeds will overload your chick's stomachs and increase their susceptibility to deadly disease. NUTRENA CHICK MASH with Cod Liver Oil is easily digested and is entirely assimilated by chicks. Its bone and muscle building qualities assure the proper growth and development that are essential to successful chick raising.

NUTRENA CHICK MASH with Cod Liver Oil is made from the best grain (no filler used) and thoroughly mixed with Buttermilk and Cod Liver Oil, which builds flesh and bone and guards against disease.

Thousands of successful chick raisers use and recommend it. 100 lbs. feeds 100 chicks for 5 weeks. Try a sack now—make actual results prove NUTRENA'S true value to you.

"I give NUTRENA Chick Mash credit for being the best chick feed I ever used. Do not gamble this year; if chicks are worth hatching or buying, they are worth the slight cost of proper feeding. Have them sturdy and healthy; have 95% of them live to pay you back for your time, trouble, and expense. Feed NUTRENA!

Quality Butter

"CLOVER BLOOM", Klemme Brand Butter, manufactured by the Klemme Co-Operative Creamery, is a Quality Butter—and to produce this kind of Butter requires the greatest measure of care and skill and the heartiest co-operation between patrons and buttermaker.

That which makes it possible to manufacture "Clover Bloom" Butter is the excellent care that must be taken of the butterfat from the moment it leaves the udder of the cow until the butter reaches your table in the sanitary waxed wrapper in which we pack it

Cream must be kept free from objectionable odors, be properly cooled and delivered frequently enough to guarantee the cream to be of first quality. We are making every effort to sell this idea of QUALITY to our patrons. as well as the public generally.

If your wish is a guarantee of first class butter, just specify Klemme Creamery Company's "Clover Bloom" when ordering of your grocer. If you are not now selling your cream to us, just get in touch with any of our men or stop one of our truck drivers—They will be glad to tell you how you can receive more money for your cream.

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

Minnesota Saw Flies Kill Tamarack Trees

Flies are killing off the tamarack trees near Grand Rapids, Minn., by starving them to death.

So declares Henry Goldberg, forest ranger, who has just returned from a tour through Itasca county forests Goldberg states that he found the woods full of winged insects called saw flies which feed upon the needles of leaves by means of which the tree manufactures its food from the air and soil. By successive assaults the flies literally starve the trees to death

The forest ranger stated the return of the leaf eaters may indicate a repetition of the plague between 1909 and 1916 in Minnesota, when the insects killed 65 per cent of the merchantable tamarack in the state valued at $2,500,000.

Couldn't Lose

The late Judge Reeve assigned a major portion of misdemeanors to lack of will power. "Circumstances govern most of the cases," he once said, "and the only way most people resist temptation is to avoid it

"Like the man who was an inveterate card player.

"Have you had any luck at cards lately?" a friend asked him.

"'You bet! I haven't been able to get into a game for a month!'"

Conan Doyle Now Regrets

At a dinner in London Sir Arthur Conan Doyle told of a conversation he had with a young actor in one of his plays who was getting $10 a week The latter laughingly suggested that he and the author should divide their incomes with each other the rest of their lives. Sir Arthur refused and he said that he has since regretted it—the young actor was Charlie Chaplin.

C. J. Papousek, of Belmond, was a business caller at the Peter Trampel home Wednesday.

NEWS REVIEW OF CURRENT EVENTS

Ohio and Bay State Primaries Boost Stock of Hoover and Smith.

By EDWARD W. PICKARD

REPRESENTATIVE MARTIN B. Madden of Chicago, for years one of the most active and useful members of congress, collapsed Friday in his office in Washington and within a few minutes was dead. For a long time Mr. Madden had been in poor health, and his recent hard work as chairman of the appropriations committee and in trying to bring the house around to the President's views on the flood control legislation were held responsible for the heart attack that ended fatally. Mr. Madden was seventy-three years old and was a native of England. He had represented the First Illinois district in the house since 1905.

LAST week's primaries, especially in Ohio and Massachusetts, provided base for the claims that the Republican and Democratic national conventions will nominate Herbert Hoover and Al Smith, respectively early in the balloting. In the case of Hoover the result in Ohio was considered especially convincing, for, though the Lowden and Dawes forces made desperate efforts to defeat him, the secretary of commerce won all seven of the delegates at large and at least 24 of the district delegates. This was more than his most enthusiastic supporters had expected, and the anti-Hooverites were correspondingly depressed. One most notable feature of the voting was the defeat of Senator Fess, selected as temporary chairman of the Republican convention, for delegate at large. He will not decline the honor of presiding, but must go without credentials as either delegate or alternate. Hoover ran away with the Ohio preferential vote in Ohio, and also in Massachusetts, and his managers claim 30 of the Bay state delegates, who are uninstructed. They hope, too, that the 79 uninstructed delegates chosen last week by Pennsylvania will be led into the Hoover camp by Secretary Mellon when the strength of the Hoover vote is demonstrated in the early ballots. Michigan's state convention instructed that state's 83 delegates to vote for Hoover "as long as he is a candidate for the Presidency," and five of Nevada's nine have declared their preference for Hoover. The line-up of the delegates so far chosen shows: Hoover, 333; Lowden, 183; Curtis, 24; Norris, 28; Borah, 11; unclassified, 203.

Gov. Al Smith captured the Massachusetts delegation of 36 and probably at least 60 of the Pennsylvania delegation. In addition it is assumed all the Ohio delegates, 48 in number, will climb into the Smith wagon when they have obeyed their instructions to vote for Atlee Pomerene. So Smith is now way out in the lead with 471 practically assured votes. Reed comes next with 56, and Pomerene, George, Ayres and Hitchcock are trailing. It seems certain that Smith will have a majority on the first ballot at Houston, and his enthusiastic boomers believe he will have the requisite two-thirds, 733½, on that first vote.

THERE has been a rather widespread impression that the grain-growing states of the Middle West would prefer Lowden to Hoover as the Republican nominee, the idea being that the farmers believed that the work of Hoover as food administrator during the war was inimical to their interests. That this impression is not necessarily correct and is based on misinformation as to Hoover's attitude toward the agriculturists, both during the war and at the present time, is the contention of Don Livingston of Watertown, S. D., former state commissioner of agriculture.

"I know of no farmer who has ever been associated with Herbert Hoover, either in his food administration work during the war, or in his relief or other activities since the war, who is not actively supporting him today for the Presidency," said Mr. Livingston.

"On many occasions my work in behalf of the farmer brought me in contact with Herbert Hoover. In September, 1917, the rules of the grain exchanges concerning grading and handling of grain were not fair to the farmer. I went to Washington, took the matter up with Mr. Hoover, and it was immediately corrected.

"Two months later, we had a bad situation because of the great amount of soft corn and lack of cars to move the grain to the dryers. Every effort had been made to secure cars, without avail. Again I went to Washington, took the matter up with Secretary Hoover, and before I got back to South Dakota the farmers had been given priority of cars to move their corn. This saved millions of bushels from spoilage.

"From that time on, I met him frequently. When the wheat price-fixing committee was appointed the speaker of the South Dakota house of representatives wired me to go to Washington in the interests of the farmers. My contact at that time gave me absolute information that Mr. Hoover had nothing to do either with the deliberations of the committee or the fixing of the price of wheat.

"His whole public record since the war, inasmuch as it touches agriculture at all, has been directed toward the farmers' best interest.

"He may not have approved the McNary-Haugen measure in its entirety, but he was one of the first to advocate a federal farm board. He has always believed that the federal farm board should assist in direction of farm marketing, working as far as possible through co-operative associations.

"He has repeatedly said that the farmer must have as full and adequate tariff protection as has industry.

"He has stood for downward revision of transportation rates on farm products.

"He has not believed in government price fixing. Most people have come to agree fully with him in this."

DESPITE President Coolidge's fears that it will result in land scandals, the flood control bill was passed by the house by a vote of 254 to 91. Previously, in committee of the whole, the house rejected an amendment by Tilson of Connecticut embodying the Coolidge plan to assure property owners in the path of the proposed floodways and spillways such damages by action of the courts as they may be entitled to under the Constitution. Then the representatives voted down a motion to recommit for the purpose of adding a proposal urged by the President as a means of guarding against land scandals. The bill went to conference, having been previously passed by the senate, and administration leaders thought a veto likely unless the conferees should change the provision relative to rights of way in floodways and spillways.

FLOYD BENNETT, one of America's leading aviators and Commander Byrd's pilot on the flight to the North pole, flew to Canada in a relief plane for the German-Irish transatlantic flyers, was stricken with pneumonia and died last week in a Quebec hospital. Believing that Quebec lacked the serum that might save Bennett's life, the Rockefeller Institute appealed to Colonel Lindbergh and that ever-ready young man made a swift flight through a fierce storm to the Canadian city carrying the remedy. His feat was in vain, however, for Bennett died before Lindbergh took off for the return trip. Canada provided a military escort for the aviator's body, and it was interred in Arlington National cemetery near the grave of Admiral Peary. Bennett was to have been Byrd's second in command on the projected South pole flight.

The crew of the Bremen left their plane on Greenly island and resumed their flight to New York on the Ford relief plane piloted by Bernt Balchen. They reached Mitchel field, Long Island, Friday afternoon.

CAPT. GEORGE H. WILKINS, with Carl Ellson as pilot, successfully completed his extraordinary flight across the polar regions from Point Barrow, Alaska, to Spitzbergen Their flying time was 20½ hours, but they were forced by bad weather to stop on the Island of Dead Man's Point for five days. Their route did not take them over the pole, but across the great "blind spot" hitherto never seen by man. In the region where Peary, Stefansson and McMillan saw indications of land in the vicinity, Wilkins and Ellson found nothing but ice fields with occasional leads of open water.

ACQUITTAL of Henry Sinclair by the jury that heard the testimony in the Teapot Dome oil conspiracy case was a sad blow to the government law forces. The verdict, it was said in Washington, made it improbable that Albert B. Fall, named in the same indictment but granted a severance because of illness, will ever be brought to trial. It may be, too, that the government will drop the bribery charges pending against Fall and Edward Doheny.

The senate's oil investigating committee, continuing its work, summoned Sinclair to appear May 1 and tell his story of the Continental Trading company deal. Meanwhile the committee had before it Robert W. Stewart, chairman of the Standard Oil Company of Indiana, who admitted that he received the missing fourth share of the Continental's profits—$759,500—and held it in a secret trust fund for the ultimate benefit of the Standard and the Sinclair Crude Oil Purchasing companies. He said the directors of the Standard had already turned the entire sum over to the Sinclair Purchasing company Stewart's belated admission was reported to the senate by Senator Walsh, and a resolution was adopted urging the oil man's indictment for perjury. The prosecution of the pending indictment of Stewart for contempt also was demanded by the indignant senators.

CONFIDENCE in President Coolidge's Nicaraguan policy was shown by the senate when that body passed the $364,000,000 naval appropriation bill after decisively defeating three amendments, offered by radical Republicans, that would force the withdrawal of American marines from Nicaragua. A few Democrats voted with the radicals, but they were deserted by Borah, although he opposed the sending of the marines to the Central American country. The measure as passed raises the enlisted strength of the navy to 86,000, carries $32,000,000 for aviation, including funds for the construction of two giant dirigibles, and provides approximately $50,000,000 for new ship construction.

COMBINED forces of the Chinese Nationalists and the army of Feng Yu-hsiang, Christian general, are making their way toward Peking through Shantung province. They captured Tsinan, capital of the province and an important key position, and took large stocks of war material. Previously Feng's troops had occupied Tsining and word has come that soldiers killed Dr. Walter F. Seymour, American Presbyterian missionary there. Both the Nationalist and the Peking governments have protested against the action of Japan in sending troops into Shantung province.

SECRETARY OF STATE KELLOGG'S plan for a multi-lateral treaty to end war has the adherence of at least one power, though it is not one of the "great" ones. The Polish government instructed its minister to Washington to accept the American proposal with a few minor exceptions which it was believed could be adjusted easily. Premier Briand of France made public his proposals for a similar treaty, and our State department officials did not like them a little bit. There is small chance of their being approved by the government. The plan offered by Briand is described in Washington as more of a treaty to justify war than a pact to outlaw it.

FRANK LOCKHART, one of the most famous of automobile racers, met death at Daytona Beach Fla., in an attempt to establish a new speed record. A tire of the Stutz special built on his design blew out while he was traveling at a speed of about 200 miles an hour and the car was catapulted many feet, hurtling along the sands. Lockhart was almost instantly killed.

Other deaths of the week included those of Archbishop Mora y del Rio, exiled primate of Mexico; Baron Okura, millionaire Japanese merchant; C. W. Folds, leader in finance and civic work in Chicago, and Baron Peter Wrangel, erstwhile leader of the "White" Russians.

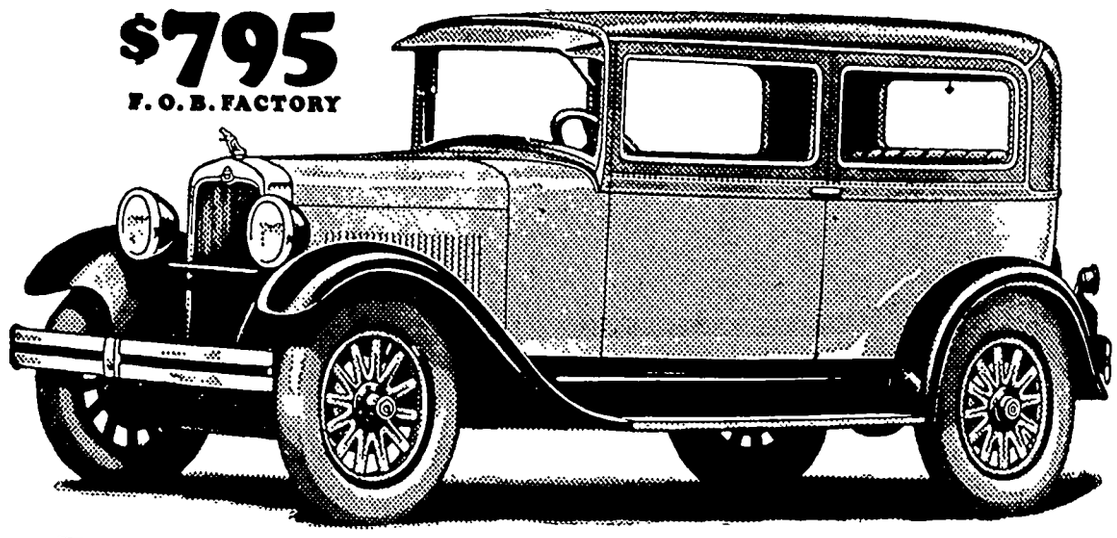
STUDEBAKER

The Great Independent

$795 F. O. B. FACTORY



ERSKINE SIX

40 miles an hour even when NEW! 62-mile speeds later! Here is convincing proof of the engineering genius, quality materials and precision workmanship used in this Studebaker-built Erskine Six at $795 f. o. b. factory.

Compare this luxurious new Club Sedan with any car in or near its price class. See a bigger, roomier, five-passenger family car. Doors almost a yard wide, rear seat four feet wide, adjustable front seats, generous leg room, arm rests and other comforts. *Drive* this car which gives you championship performance at lowest cost—in official tests Studebaker's Erskine sedan traveled 24 consecutive hours at better than 54 miles per hour.

Studebaker's 76 years of manufacturing experience stand back of the Erskine Six.

Dealers' Opportunities

Studebaker assists dealers to conduct their business on a profitable basis—sales training—financing—used car merchandising—advertising helps—accounting—service—etc. No wonder Studebaker-Erskine dealers make money with these 4 great lines: The new President Eight, $1985 to $2450. The World's Champion Commander, $1465 to $1625. The new Dictator, $1195 to $1395. The new Erskine Six, $795 to $965. Write or wire NOW for complete, confidential information if there is no dealer in your town or if you wish to move to a town where the Studebaker-Erskine franchise is available.

FREE *"Trip through Studebaker Factories"*

Every car owner, every family with children in grade or high schools, will want this interesting free booklet, "A Trip Through Studebaker Factories." It pictures how your car is made—complete from molten metal to dynamometer tests of completed cars. If you cannot visit the huge Studebaker plants in South Bend this summer, send for this free book now—use coupon at right. See pictures of great Studebaker foundries where castings are made from molten iron ten times hotter than boiling water. See six-ton steam hammers forge Studebaker crankshafts. Learn how Studebaker springs are forged and tempered. Why Studebaker steel forgings are baked in huge ovens to insure great strength. Understand how a Studebaker steel body can be fused by electric arcs into *one* strong silent unit. See airplane views of Studebaker's 800-acre Proving Ground. Learn more about the 76-year-old company and the 21,000 men who build your Studebaker or Erskine. Send for this entertaining free booklet NOW! Use coupon.

discoveries provided the rea- or the particular steps in swine tion which have come to be as the McLean County sys- t is explained in a recent sum- of the development of the sys- y the men representing the De- ent of Agriculture, in the first scale demonstration of the ef- eness of this method of reduc- e mortality among young pigs. d infection and the subsequent plication of the parasites has so serious that it is estimated wing to these worms and other es not more than 50 to 55 per of the pigs farrowed arrived at table age. These internal para- and the diseases due to or as- ed with filth account for a high rtion of the deaths. Accidents holera also take a toll, but in cases strict attention to sanita- has made profitable ventures in raising which had proved un- able without sanitary control. In n county in a six-year trial on rms the system averaged in ac- practice 97.8 per cent of a theo- l perfection, and this allows for clusion of pigs constitutionally It does not eliminate the s from cholera and from acci- which fall outside the field of tion.

und Grain Best Feed or Young Market Lambs

bs will begin to nibble at grain about two weeks old. They d be fed in a creep where the cannot enter. Ground grain d be fed until the lambs are five weeks old, but after that whole will suffice. They may be started mixture of ground corn, ground and bran. The proportion of should be gradually increased se the lambs must be fattened they grow. A good grain mix- to feed young lambs the last n or six weeks is shelled corn six linseed meal one part. The will consume a great deal of Fine, leafy and bright fourth- g alfalfa hay should be used ever possible. If handled in the er just outlined the lambs d be ready for market while still ng their mothers. They will be three months old and weigh 60 to 65 pounds when marketed.

ds Ear-Marking Pigs Is Profitable Practice

have been well repaid for all the and trouble involved in ear- ing my pigs during the last five ," says Amos Kirchhofer, who ton litter in Adams county, In- last year. "In the first place. arking enables me to determine exact amount of pork which can edited to each sow when I mar- he pigs. Sows that do not pro- profitable litters have no place y scheme of raising pork. nother thing: I like to select ing stock from sows which are stent producers. Gilts from ic sows will be more likely to w large litters of thrifty pigs. cannot select these gilts if he sight of their ancestry—hence importance of earmarking."—L. usche in Farm Journal.

Feeding Young Cattle

e practice of feeding younger e for market is becoming more al. Some feeders who try fat- g calves and yearlings are dis- nted because they do not get as gains or as good finish as they ith older steers. In order to se- satisfactory results in fattening g cattle, it is necessary to select r calves of good beef type and ing.

Millet for Horses

illet hay has been found quite un- factory for feeding horses, par- rly where it made up the entire age. It makes the best hay if mmediately following the bloom- period. Cut with a mowing ma- ; cure a day or two in the , depending upon the weather, rake and cure further in the row or haycock. It makes a very hay for cattle and sheep, but d be fed in conjunction with a legume hay.

Notions About Seed Potatoes

Doubtful Whether There Is Any Difference in Value of Each "End."

(Prepared by the United States Department of Agriculture.)

Much experimental work has been done with the potato to determine the best methods of treating the seed to secure the most satisfactory yields. The results have varied to the point of confusion in many instances. In technical bulletin No. 5-T, "Source, Character and Treatment of Potato Sets," just issued by the United States Department of Agriculture, William Stuart reviews the results of noteworthy experimental work and in addition presents the results of the department investigations on the source, character and treatment of potato seeds.

Value of End for Seed.

The relative value of the seed and stem end of the tuber for seed purposes has served as a basis of numerous studies, both in this country and in foreign countries to determine which portion of the tuber will ordinarily produce the larger yield. Some growers are so firmly convinced that the seed end of the tuber is undesirable for seed purposes that they clip it off and discard it. Other growers are equally convinced that the seed end is superior to the stem end for planting. These different viewpoints have been responsible for repeated efforts to demonstrate the superiority of one over the other.

After a study of the literature in which each "end" of the potato has proved superior to the other in different tests, Mr. Stuart concludes that it is doubtful whether there is any real superiority of one end over the other for seed purposes. The data as a whole, however, seem to indicate that as the weight of the set increases there is a greater response from the seed end than from the stem-end set.

Greening Process.

Sprouting seed potatoes in the light before planting them, a process known as "greening," has long been practiced by growers of early potatoes in most European countries in an effort to hasten the development of tubers of marketable size early in the season. Greening is not yet a commercial practice in the United States. In fact, the department studies, covering a period of years in four different localities show rather conflicting results when yearly comparisons are made, or when the average yields for the period are considered. Detailed discussion of the subject is included in the bulletin. Consideration is also given to the advisability of planting immature rather than mature seed.

A copy of the bulletin may be obtained by writing to the United States Department of Agriculture, Washington, D. C.

Sensible Idea to Want to Own Only Pure Breds

It is a fine and sensible ambition for every farmer to want to own nothing but pure breds, and the ambition can be gratified By starting with pure-bred sires, and then securing an occasional good pure-bred female, satisfactory progress is possible The young man who is at the present time embarking upon the perilous enterprise of farming, may console himself with the idea that if he uses good judgment, and has at least a fair amount of "good breaks," he will enter into the sere and mellow years of retirement with a spendid live stock equipment and some money in the bank. His sons, carrying on where he leaves off, have the priceless opportunity of fixing blood lines and building up families of stock.

Beans All Summer

When a garden runs out of beans it seems like it is about done for. Maybe that is why a good gardener most always sees to it that he has a succession of beans coming on all the time. Pole beans planted in early June should give a steady supply of beans throughout the late summer und fall. Bush beans ought to be planted at intervals of two to three weeks in order to insure enough One thing about beans that is in their favor is that any that are not used can be kept over.

Agricultural Hints

Measurement is the foundation of all engineering work.

* * *

The house wren feeds itself almost entirely on harmful insects.

* * *

Popcorn that is too dry to pop can be put in popping condition by adding a little water.

* * *

Best results are obtained when lime for alfalfa is applied before the seed is sown if the soil is sour, for lime acts slowly.

* * *

Sow seeds of cos lettuce for a summer crop. It is the most heat-resistant and surest cropper of all the lettuces. No use trying to start head lettuce this late.

* * *

Good tools and equipment may mean the difference between a good, clean, well-cultivated garden and one full of weeds. A little time spent in overhauling garden tools will bring ample payment.

New Dresses for The School Girl

By MAE MARTIN

Thousands of mothers with daughters of high school or college age, have problems like this Little Rock, Arkansas, mother. She says: "I don't believe I could have put my daughter through the last two years of high school and college without the help of Diamond Dyes. Dresses long out of style and faded were made new with a package or so of Diamond Dyes and the addition of a few dozen buttons and a little braid. Sometimes two dresses were combined and brought up to date in lines that gave no hint of their past. People never knew they were redyed when I used Diamond Dyes. They never take the life out of cloth or make it limp. They always make things fresh, crisp and bright."

Diamond Dyes are true dyes, like those used when the cloth was made. Tinting with them is as easy as bluing, and dyeing only takes a little more time. Insist on Diamond Dyes and save disappointment. They never streak, spot or run.

My handsome new book, "Color Craft," will help you with your clothes and home furnishing problems. Sixty-four pages of dollar-saving suggestions, fully illustrated in colors. It's FREE. Simply write Mae Martin, Home Service Dept., Diamond Dyes, Burlington, Vermont.

Gold Coin as Trinkets

Six hundred thousand dollars in gold coin was shipped from the United States to the Straits Settlements to serve as wedding presents among the natives, who have little regard for their value but treasure them as trinkets, associating the Liberty head with pictures of Queen Wilhelmina of Holland.

Domestic Revolution

Very Young Wife (tearfully)—And you used to call me "my queen."

Her Hubby—Yes, but when I found that the queen let the dinner burn and took a week to mend her subject's socks, I decided that a republic was better.—Passing Show.

Choked All Night From Asthma

Every Sign of the Trouble Gone. Tells How She Got Well.

All who suffer from asthma and bronchial cough will be glad to learn how Mrs. W. G. Pierson, Route 1, Colby, Kas., conquered her trouble. She writes:

"For 16 years I had asthma in severe form I couldn't sleep, and rarely tried to go to bed before 1 30 a. m. I kept getting weaker and had a terrible cough. I was in Akron, Col., when I started taking Nacor in February, 1925 In March I felt so much better I returned to Missouri Ono night in Missouri used to make me choke terribly, but I don't have a sign of asthma now, not even in rainy weather. I sleep all night, have gained 10 pounds and feel strong and well."

Hundreds of other sufferers from asthma, bronchitis and chronic coughs have reported their recovery, after years of affliction Their letters and a booklet full of valuable information about these stubborn diseases, will be sent free by Nacor Medicine Co., 710 State Life Bldg., Indianapolis, Ind. No matter how serious your case seems, write for this free booklet today. It may give your life a new meaning.

A woman can't be an inspiration to a man if she picks faults in his plans.

One of those Lovely Skins men turn to look at

You, too, can have "a skin you love to touch"

Nearly every woman's skin would be lovely

if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

FAULTLESS!—that is how your skin should be. And you can make it so!

The famous Woodbury skin treatments will help you to overcome any of the six troubles given here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped so many thousands of women to gain a beautiful complexion.

Simple clear directions for each treatment and the treatment for normal skins are in a booklet wrapped around every cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what an improvement it will make in *your* complexion! A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

Dix—Mine doesn't; it goes so fast it gets out of breath.

For That Weakness After Flu or Grip

Clinton, Iowa. —"After I had the 'flu' I was very weak and nervous. I was also tortured with headaches. My blood seemed to be thin and I could not regain my strength. I was advised to take Dr. Pierce's Golden Medical Discovery, which I did, and before I had finished the third bottle I was feeling like a different person. My health improved so rapidly that I was astonished. I think it saved my life and I consider it a wonderful remedy."— Mrs. Louisa Redfield, 230 DeWitt St.

Tablets or Liquid. All dealers.

Emil and Henry Barz drove to Austin, Min., on matters of business Saturday morning.

Dr Missman and family visited with Dr. Specht and family at Garner Sunday evening.

The W F. M. S are meeting at the Parish House today. Refreshments will be served.

Mrs. P. M. Wilson went to Mason City Tuesday with her brother, who is a traveling salesman.

Three third degrees will be put on at the Masonic Lodge at Garner this evening.

Max Barz has been confined to his home the past few days with the flu.

FOR SALE—Post card size Ansco film kodak, like new, bargain. See it at Times Office. tfc

J N. Day and family spent Sunday visiting the John Baumgartner family at Mason City.

Dr. and Mrs. W. F Missman entertained Mr. and Mrs. Ely and Miss Gertrude, of Belmond, Sunday.

Supt. M F Penrod and Coach Carl Heiden drove to Des Moines Saturday morning to take in the Drake Relays.

Miss Adella Schroeder came home from Keswig Wednesday to be present at the marriage of Miss Ella Barz and Walter Rosendahl.

A G Koerner and family enjoyed a visit from Rev. Wm. Koerner of St Paul last week. He is a brother of our townsman.

The kiddies were all out in force Tuesday evening hanging up May baskets It was a great evening for them.

Mrs. Levi Klotzbach returned last Friday from the Mercy Hospital at Mason City where she recently underwent an appendix operation.

Mr. Earl Fin and children went to Goodell Friday for a short visit with her parents, Mr. and Mrs. L. H. Wilson.

The Diltz Construction gang began work on the county road east from Klemme Monday. They are camping at the Swanson farm while working at this end of the road.

Herman Bridges and family have moved to Klemme and are now residing in the house vacated last March by the Kelley Lauden family, in Morningside Addition.

Mr. C F. Weaver, of the Western Electric Telephone Co., of Mason City, was in Klemme Friday looking after business matters for the Iowa Union Telephone Co.

The Masonic Club enjoyed a dinner at the Parish House Thursday evening, after which they all drove to Garner to attend owrk in the second degree.

John Suckow was the successful bidder on the new brick school in Liberty township, District No. 6, which is one mile west of the Wes Lenz farm, north of Klemme. Mr. Suckow built the new school west of town last year and is a fine piece of workmanship. He intends to begin work on the new school in a short time. There were four or five contractors bidding on the job, but Mr. Suckow's was the lowest bid.

There are nine graduates in the Klemme high school this year. The Times Print Shop finished their invitations last week and many have already been mailed out.

A big convention of the Eastern Star will be held at the Masonic Hall at Garner next Thursday evening, May 10th. All Star members in this vicinity are urged to attend.

R. A. Jorgenson was a caller at the Court House Friday morning. The Times Print Shop landed the contract for printing the court calendars and the Editor drove up to get the copy for the May term.

The R. N. A. ladies held a fine meeting Friday at the hall here. All helped serve refreshments and a fine time was enjoyed. The Klemme R. N. A. are a lively organization.

FOR SALE—English S. C. W. Leg. Eggs. Dams have record 260-290 eggs. Mated to males from Iowa State College high producing flock $5 per 100. W. L. Haberkamp, Garner, Iowa. Route 4. M4tp

The Ladies Aid meets next week Thursday at the Parish House. Mesdames Fred Kluckhohn and John Johnson are hostesses. The ladies are all urged to come early and help finish a quilt.

By the way, how do you like the windy weather? This part of the U. S. was blessed with plenty of free air Sunday, Monday and Wednesday The weather man must have had another supply of air, so turned it loose in Iowa

Since purchasing the restaurant building last week, Mr Quandt immediately got carpenters on the job to do some necessary repairing and remodeling Geo. Lawhorn is now on the job painting and papering. Mr Quandt wil have a nice place when he completes all of his improvements on the building.

Did you ever see a mad Englishman? Well there was one doing a lot of jumping in Klemme Wednesday morning. Dr. Anderson had his Fliver Coupe parked in front of the Drug Store where it was peacefully resting when the spare tire suddenly blew up, making a noise like a ton of dynamite had blown up and brought everybody out on the main drag to see who was celebrating. Evidently Doc had pumped the tire plenty of tight and the heat expanded the air beyond the capacity of its container, causing the explosion Doc took one look at the disaster, said some words we have heard the preacher use in church, but with a different expression, got in the car and headed for Etchen's garage. We presume Jack made a tire sale without much sales talk.

Former Garner Banker Now At Farmington

John Vrba, former cashier of the First National Bank, of Garner, which was some time ago taken over by the Farmers National, is now in the employ of the State Banking Department and now has charge of a bank at Farmington, Iowa

Ell Township Farm Bureau Meets Today At Ell Center School

ROCK ISLAND MAGAZINE HAS STORY OF LOCAL MAN

May Issue Of Railroad Paper Tells Of Mr. Blank's Service

The Editor of The Times receives the "Rock Island Magazine" each month through the courtesy of the Company, and it being rather interesting in many ways, we are in the habit of reading it quite thoroughly when it reaches our desk In the recent issue which reached us a few days ago we found an interesting article regarding our townsman, Mr Taalkeus Blank, better known as "Tom" The write up comes under a divisino of the magazine headed In Recognition of Long and Faithful SERVICE As long as men shall live and build, so long as they shall strive for worth while achevements, there shall be honor and glory in work well done"

We re-print the article as it appears in the May issue of The Rock Island Magazine -

Taalkeus Blank section foreman, Dakota division, length of continuous service, 41 years and 4 months; pension effective January 1, 1928, amount $46 35 Mr Blank tells the story of his career in the following interesting manner

"I am very proud to say that I have worked for the Rock Island company My pension proves that it was not in vain to work so long for the company like the Rock Island

"I was the third child of a family of eight I was born on May 6 th, 1861, at Boen, Ostfriesland, Germany, was married March 1884 Ten children were born to us, of these, three sons, two sons-in-law and one gradson are working for the Rock Island at the present time

"I was the first of my relations to come to the United States I left Germany April 2nd, 1886, and arrived at Belmond, Iowa, April 23rd April 24th I started to work for a grading gang on the Great Western railway--they were just building the road through Belmond Iowa On July 5th I began to work in the Iowa Central gravel pit at Belmond, receiving $1 25 per day I was looking for a steady job and on August 19th 1886, I started to work on the B C R & N Ry, under Mr D Madgen the section foreman.

"On July 28th, 1891, I was promoted to section foreman a Hayfield Iowa This section was in very bad condition--there were nine different kinds of old iron rails on the section of 8 miles, running from 48 lbs to 60 lbs per yard During the cold weather here were as many as 6 or 7 broken rails a day I often wondered how lucky we were in not having a wheel off the track In 1893 I relaid these 8 miles of track, taking up these old iron rails and putting 52-lb second-hand steel rails in and this certainly eased my mind

"August, 1895, I was transferred to Klemme, Ioaw, where I remained until I retired During the summer months of 1900, 1901, 1906, 1907 and 1908 I had charge of extra gangs putting in gravel, relaying rails and putting in switches and side-tracks—I also had charge of the steam shovel filling in part of the bridge F33 west of Armstrong, Iowa

"During all my service I have worked for 14 different roadmasters and none ever found any fault with my work as to quality and quanity

"I was foreman for 36 years and 6 months I feel proud to say that I never had a wheel off my section during these years There were a few derailments on side-tracks which was through no fault of the track"

KLEMME REFORMED CHURCH
Calvin Grosshuesch, Pastor

NO SERVICES THIS SUNDAY

The Bible Class will meet Tuesday evening At this meetnig officers will be elected and new members enrolled for the second course of Bible study.

On Ascension Day, May 17th there will be German services at 10.00 a m. At 2:00 p m the annual congregational meeting will be held All members are requested to be present

1928 SENIOR CLASS PLAY

Cat o' Nine Tails

—A MYSTERY PLAY IN THREE ACTS—

Klemme High School Aud.

Friday, May 11

—LISTEN TO THIS RECIPE—

Take one cold-blooded Murder, add to it a Human Skeleton, Blood Curdling Shrieks, Unearthly Noises, a Female Sherlock Holmes, a Half-witted Servant, a Jealous Woman, a Vicious Dog, a Nervous Wreck, a Beautiful Girl, an International Crook; flavor with Comedy and sweeten with a Secret Love Affair; pour into a Lonely Lodge; shake well and serve with Thunder and Lightning and you'll enjoy this newest beverage—The Mystery Frappe!

CAST OF CHARACTERS

JAMES GORDON, SR — Master of "Gorden Lodge"
HARVEY NELSON

MRS JAMES GORDON — His Nervous Wife
ETHEL JOHNSON

JIMMIE GORDON — Their Good Looking Boy
ORVILLE STOKESBARY

JACOB WEBER — The Caretaker of Gordon Lodge
DONALD TURGASEN

BETTY WEBER — His Loveable Daughter
FLORENCE STOKESBARY

THEOADORA MAITLAND — A Friend of the Gordons
GOLDA MOBERLY

HENRY — The Chore Boy
ALVIN THIEMAN

FOX — A Detective
ASA ARNOLD

MISS SMITH — A Female "Sherlock Holmes"
GLADYS WILSON

BRIDGET — The Cook
IRENE CARLSON

CAT O' NINE TAILS

—Synopsis—

ACT I Living rooms in the "Gordon Lodge, near the Canadian line in Maine. And the clock strikes twelve

ACT II Same The next night And the villian disappears!

ACT III An underground room of the Lodge A few minutos later. —And the mystery is solved. Good night!

8:00 O'clock P. M. — Admission, 25 c and 35c.

Avery-Twin Lakes News

(Special Times Reporter)

Mrs Ben Swalve, Sr., has been ill the past few weeks.

Miss Trampel is assisting with the work at the Ben Reemstma home.

David Schwich emberg was a business caller at Goodell one day last week

Henry Buseman is tiling a part of his land which greatly benefits this piece of land

Mrs August Trampel and family visited at the D Swalve home Monday evening

Mr Harlan Trees of Clear Lake is assisting Burr Church with work during corn planting

Carl Wille called at the Fred Gates home in town on business last Friday afternoon.

Mr Beier, of Goodell, made several deliveries in this vicinity last week

Miss Edith Haupt visited at the home of her sister, Mrs. Elmer Schlei last Thursday

Mr and Mrs Dick Swalve and family spent Sunday visiting friends near Meservey.

Mr and Mrs Herman Priebe and son, Verner, were entertained to a dinner at the George Thieman home Sunday.

Mr and Mrs. Will. Wenz visited at the home of Mrs Wenz's sister, the Lippo Wessels family Sunday.

Mr and Mrs Henry Buseman and family visited at the Tom E. Needham home in Mason City Sunday.

Arlene, daughter of Mr. and Mrs. Carl Wille, stayed at the home of her grandparents, the Gottlieb Goll home, Wednesday night.

Lester Buseman spent a few days last week at the Henry Buseman home, being more convenient to get to and from school to take examinations.

Mr. and Mrs Dick Swalve and son Clarence were Mason City shoppers last Saturday, while they also visited Beverly Reemstma at the hospital. She is getting along excellent and returned home Wednesday.

A ten pound baby boy was born to Mr and Mrs. Oscar Wenig, Monday, May 7th at 2022 So. 16th St., Sheboygan, Wisconsin. The young fellow's name is Duane Clarence, and Oscar writes mother and babe are doing fine and that Dad is all swelled up over his big son. Congratulations!

Clarence Elder was recently honored at Ames when he ws given an Honory Key of the journaistic society, Sigma Delta Chi. Five from the the Junior class were awarded this honor.

Gerald Koerner has returned to Klemme from Charles City where he was working for the Western Electric Telephome Co. He is again with the Iowa Union on construction work Aaron Greimann also recently joined the Iowa Union forces as truck driver.

JACOBS HARDWARE WILL GIVE COLEMAN DEMONSTRATION

The New 1928 Air-O-Gas Stove Will Be Shown Saturday At Store

E. F. Jacobs Hardware Store will put on another demonstration Saturday, all day and evening. The new 1928 Air-O-Gas stove will be demonstrated by a special representative from the Coleman Company.

This new stove is attracting a lot of attention and the demonstration should be of great interest to the ladies in the community.

We cal your attention to Mr. Jacobs ad in this issue, which explains the new stove in more detail.

STOCK SHIPMENTS LIGHT PAST WEEK HERE

Shipment Fell Down Several Car Loads Saturday Night

The lightest stock shipment from the local yards for several months past was the shipment Saturday evening at which time only five car loads were shipped. Of this number four car loads were hogs and the other a load of cattle.

The Shipping Association shipped two car loads of hogs, and C A. Larsen shipped two car loads of hogs and the car load of cattle was shipped by C. O. Evans.

METHODIST CHURCH NOTES
A. W. Gauger, Pastor

Next Sunday is Mother's Day. We are planning our services in keeping with the occasion. We extend a most cordial invitation to a mothers to enjoy this service with us

We observe the usual hours of service in both churches with special music as a eature in these services.

ELL DISTRICT NO. 7 SCHOOL CLOSED WITH BIG PICNIC

Miss Stella Bock Has Been Teacher There Past Two Years

School closed in District Number 7 last Wednesday with a very enjoyable picnic, which was held in the grove at the John Neuberger home. Tables had been prepared and at the noon hour about fifty people gathered, bringing well filled baskets. Everyone enjoyed teh dinner immensely. Miss Stella Bock, the teacher, has taught this school for the past two years.

C. G. Waterman and daughter, Marian, and R. A. Jorgenson and family visited Mrs. Waterman at the Mercy hospital Tuesday evening.

KLEMME PEOPLE NOW IN GERMANY

EXPERIENCED STORM ON TRIP TO GERMANY

Mr. And Mrs. George Abers Enjoying Visit In Home Land

The following letter was received by The Times from Mr. nd Mrs. Geo. Albers, who are by this time, enjoying a visit with reatives and many old friends in Germany. The etter wa mailed on shipboard near England, and since receiving the letter the Albers children have received cablegrams announcing the safe arrival of their parents in England.

On Shipboard, April 22

Ye Editor:-

It is Sunday tody and now I want to write you a few lines.

We left New York Wednesday noom, April 18th. They puled this ship out with three small ones. The first day it was very nice but Thursday and Friday was a bad storm. A lot of the people were thrown out of their beds. The water flew over the decks and the old ship leaned on one side and then on the other. The waves looked like hills with snow on top.

I asked one of the head men what he report was for the next day, he said: "You will find out in the morning," and we did But we did not trust it, they all had hip boots on. But it was alright now.

Mrs. was very sea sick the first two days, but is feeling fine now I was not sick one minute. It is very good here on board and our eats are better than in the very best hotels.

In the afternoon Mrs. and I get a small lunch.

We have our room in the center of the ship.

We are just called to church and will write more in the morning.

Monday, April 23rd.

The weather is good but is very cold on deck and the sea is not very rough.

We will reach England tomorrow and then this etter will go.

Your friends,
Mr. and Mrs. Geo. Abers.

The Klemme Eastern Star ladies are all planning to take in the big special meeting at Garner this evening, to which about twelve lodges have been invited.

Lester Stile is carrying one eye in a sling, so to speak, or in other words he has one optic considerably bandaged as a result of infection when he injured his eye by getting a splinter in it which caused a small abcess. The injured eye is gradualy healing but causes Lester much inconvenience.

The flower of meekness grows on the stem of grace.—J. Montgomery.

Ambition is like love, impatient both of delays and rivals.—Denham.

You can't always get the true measure of a man by consulting his tailor.

A father can rear his boys right, but he has to give his attention to it.

Progress is the real cure for an overestimate of ourselves.—G. Macdonald.

Vanity is so utterly artless that the most fulsome praise is accepted without suspicion.

NEWS REVIEW OF CURRENT EVENTS

Smith's Victory in California Seems to Make Nomination Certain.

By EDWARD W. PICKARD

UNLESS most of the political prophets are sadly fooled, California last week settled the Democratic national convention at Houston, so far as the Presidential nomination is concerned. Few of them now venture any other prediction than that Al Smith has the prize all wrapped up, and it is generally believed that the rush to get into the band wagon will result in the nomination of the New York governor on the first ballot, probably by acclamation. The California primary was admittedly a test for Smith, for McAdoo strove to lead the dry Democrats of his state into the Walsh camp, and Senator Reed also was a live contender for the preference vote. But McAdoo fell down so badly that the Montana senator ran third, Reed standing in second place. Smith's victory was decisive, his vote being greater than the combined votes of the other two. With most of the precincts heard from, the result in round numbers was: Smith, 133,000; Reed, 58,000; Walsh, 40,000. Of the 58 counties, all but one were won by Smith. Imperial county was claimed for Reed. Former Senator James D. Phelan, head of the Smith delegation, has displaced McAdoo as the Democratic leader of California. The wets rejoiced in the apparent fact that the state had joined the wet column, but Dr. Arthur H. Briggs, head of the California Anti-Saloon league, asserted the wet and dry issue was not a determining factor in the fight.

Smith's delegates to Houston now number 497, this total including 157 uninstructed but known to favor him. He is expected to garner about 140 more in the next few weeks and to go into the convention with at least 635 votes. His managers believe the Ohio and Maryland delegations will be quick to shift to Smith, and that many of the Reed delegates also will climb into the band wagon promptly.

Wilbur Legette of California, state manager for Reed, asked Josephus Daniels by wire if he would run for vice president on a third party ticket headed by Senator Reed or Senator Borah. Mr. Daniels replied that he would not accept a nomination on any third party ticket, and declared the only hope of wresting the government from the hands of "privilege and corruption" lies in a victory by the Democratic party. He said he intended to support the nominees of the Houston convention and believed enough dry Democrats would be elected to congress to guarantee no weakening of the prohibition laws.

Claude G. Bowers, an editorial writer of the New York Evening World and a political historian of note, was selected by the Democratic convention arrangements committee to be temporary chairman at Houston and to deliver the keynote speech. This choice had been expected.

HERBERT HOOVER was unopposed in the California Republican primary, but the Republicans flocked to the polls to vote for him in surprising numbers. The total G. O. P. vote cast was more than twice as large as the Democratic vote. The Golden state delegation of 29 gives Hoover an estimated total of 366 delegates to date, though 211 of these are uninstructed. His supporters now claim he will enter the convention with 526 votes, only 19 short of the necessary 545 majority. Last week the Tennessee Republican convention indorsed Hoover and also instructed the state's delegates at large to vote for Congressman J. Q. Tilson of Connecticut for vice president.

PROBABLY it will not cost as much to nominate and elect a President this year as it has sometimes in the past, for the senate has adopted a resolution for an inquiry into the campaign contributions and expenditures of both parties. The special committee named by Vice President Dawes includes Steiwar of Oregon, chairman; Dale of Vermont, McMaster of South Dakota, Barkley of Kentucky and Bratton of New Mexico. Senator Robinson, the minority leader, who presented the resolution, made no charges of improper methods in the present preconvention campaigns, but said it was considered desirable to have a committee go into the matter just as the Borah committee did in 1924 and the Kenyon committee in 1920.

BY A vote of 204 to 121 the house passed the Haugen farm relief bill, which is almost identical with the McNary measure passed by the senate. Both contain the equalization fee feature which is especially objectionable to the President, and it was taken for granted that he would veto the bill that comes out of conference. Nearly all the western and southern representatives voted for the Haugen bill. The eastern Republicans voted against it, but it was supported by a considerable number of Tammany Democrats.

Veto by President Coolidge also is expected for the flood relief measure which was reported to the house by the conference committee, since the conferees insisted on retaining the flowage rights feature to which he objects.

PARTY lines were drawn quite sharply when the senate began debating the tax reduction bill. Republicans on the finance committee had cut down the total reduction of the house bill from $290,000,000 to about $200,000,000, which is the limit placed by the Treasury department. The Democrats still insisted on a total reduction of $325,000,000. The fight was mainly over the corporation tax, the Republicans wishing this cut from 13½ to 12½ per cent and the Democrats arguing for a cut to 11 or at most 11½ per cent. The Democrats also would retain the graduated scale of rates for corporations with incomes of $15,000 or less as voted by the house. Senator Smoot expected the debate in the senate would last over a week.

HARRY SINCLAIR appeared before the senate's Teapot Dome committee and told something of the Continental Trading company deal, but not near enough to satisfy the investigators. He fenced skillfully with Chairman Nye and the others and made few admissions except that he had received $757,000 of the Continental's profits, which sum, with interest, he said he had recently turned over to the Sinclair Crude Oil Purchasing company. The committee is making up its report, but expects later to investigate the oil leases in the Salt Creek field.

RETURNING from Washington, where they attended the funeral of Floyd Bennett, the German-Irish transatlantic flyers were given the usual uproarious reception that New York accords to such celebrities. It included parades, banquets and valor medals and the aviators were almost worn out by the attentions showered upon them. Next they journeyed back to the national capital where they were officially welcomed to the United States by Secretary Kellogg with dignified ceremony. They lunched at the White House and President Coolidge pinned on their breasts the distinguished flying crosses which congress had voted them. In Arlington National cemetery they laid wreaths on the tomb of the Unknown Soldier. Among those who greeted them in Washington was Col. Charles A. Lindbergh, who had flown there in his "Spirit of St. Louis" for the purpose of placing that famous plane in the Smithsonian institution. Thursday Baron von Huenefeld, Captain Koehl and Major Fitzmaurice flew to New York to arrange for their air tour of the East and Middle West.

Gen. Umberto Nobile and companions left Stolp, Germany, Thursday in the airship Italia for Spitzbergen, 1,700 miles away. The Italian explorers plan to make several flights over the polar regions during the summer.

DELEGATES from all parts of the world are assembled in Kansas City in attendance on the quadrennial general conference of the Methodist Episcopal church. They have a lot of business on hand, but it is not likely their doings will be tinged with sensationalism, since at the start they voted overwhelmingly against a formal discussion of fundamentalism and modernism. In their episcopal address the 44 bishops recommended that full advantage be taken of the chance to assign responsibilities to younger members of the church. They held the possibility of a world union of Christian churches to be beyond consideration at present. Among the laity there is a strong movement for the democratization of the church government, including the election of bishops for a term of years instead of for life.

The conference approved a court of 17 members to try Bishop Bast of Copenhagen on charges arising out of his conviction in civil court of misusing church funds. Rev. Fred S. Stone of Chicago was chosen prosecutor.

CHIANG Kai-shek, generalissimo of the Chinese Nationalists, has moved his headquarters to Tsinan, capital of Shantung province, and is laying his plans for the final drive against Peking and the armies of Chang Tso-lin. It is reported that Chang has gathered 100,000 men in the vicinity of Techow, where there is a large arsenal, and presumably the next big battle will be in that area. The situation between the Nationalists and the Japanese was relieved when the former agreed to reopen the Shantung railway and permit the Japanese troop trains to operate between Tsingtao and Tsinanfu. But the Nationalists in Shanghai are keeping up their anti-Japanese boycott.

JOHN BULL is likely to cancel his agreement to help Uncle Sam stop the smuggling of illegal liquor into the United States, for he is getting greatly peeved over the impetuous actions of some of the American rum chasers. Coast guard boats have been entering Bahama and Bermuda ports without warrant, and foreign ships have been seized by them allegedly without right. The British government made formal protest, and Secretary Kellogg, after replying in apologetic tone, ordered all coast guard craft to remain away from Bermuda ports. Only a few days ago, too, Canadian authorities complained that our enforcement agents in the Detroit area were firing shots that crossed the river and endangered the lives of Canadians. This was denied by Washington.

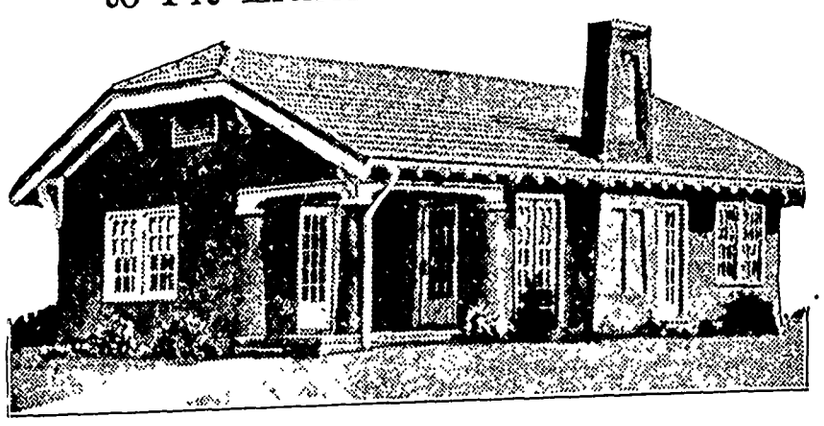
EGYPT isn't going to lose its independence just yet, but it must mind its step. Great Britain's protest against the Egyptian "public assemblies bill," which it was said would hamper the protection of foreigners, was followed up by the sending of several warships to Alexandria and open threats to reduce the country again to a dependency. But the Egyptian government postponed consideration of the objectionable measure and the warships were called off. However, Foreign Secretary Chamberlain warned Egypt that there must be no revival of the controversy.

GERMANY has unqualifiedly accepted Secretary Kellogg's proposals for a multi-lateral treaty to outlaw war. The Berlin government indorses the plan enthusiastically and says it is ready to enter negotiations with the leading powers for the consummation of such a pact. The German note holds unfounded the French fear that an unconditional anti-war treaty would conflict with the League of Nations or a nation's right of self-defense, and takes the position that reservations to the American draft treaty are unnecessary

PREMIER RAYMOND POINCARE won a big victory in the French parliamentary elections and is assured of a working majority of about one hundred in the chamber of deputies. The country thus gave evidence that it wishes him to continue his task of putting its finances in order without interference from the radicals who had threatened his plans with destruction. As a preliminary to stabilization of the franc the premier has announced a heavy loan to reimburse the Bank of France for advances to the state.

DEATHS of the week include that of Congressman Thaddeus Sweet of New York, killed in the crash of an airplane; and of Palmer E. Anderson, United States marshal for the northern Illinois district. Mr. Anderson has been succeeded by H. C. W Lauben heimer.

Handsome Stucco Bungalow Adapted to Fit Either Wide or Narrow Lot



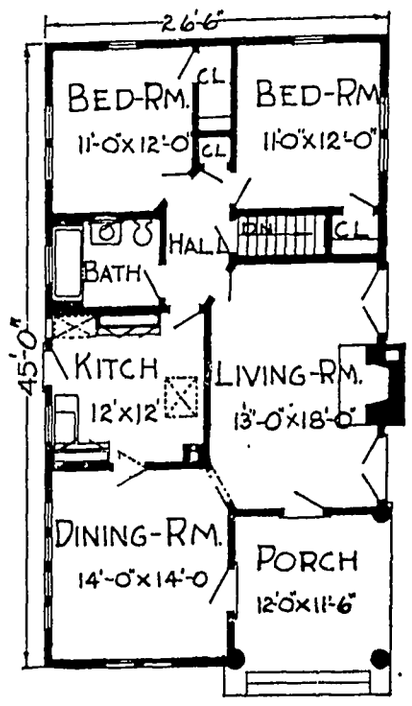
By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

This delightful stucco bungalow possesses many features that will recommend it to the prospective home builder. In the first place, it will fit almost any sort of a lot. The foundation dimensions are 26½ by 45 feet and the house is so designed that it may be placed in either of two positions on the lot. This means that it is suitable either for a narrow lot or for a wide shallow one.

The construction is simple, which makes for economy, and it may be either frame or masonry, as the stucco finish can be applied equally well over either. These days stucco colors of a wide variety and excellent quality are available so that the exterior can be finished to suit the individual taste, the surroundings and the neighboring houses.

For the chimney an infinite number of colors and type of brick are available to fit the taste and also the pocketbook, and now that common brick has achieved artistic and architectural recognition, the cost need not be great. A tile roof is always a handsome covering on a house of this type, but clay tile is rather expensive for some. This need not be a hindrance, however, for cement tile and metal tile may be had these days which will serve admirably.



Floor Plan.

A glance at the plan will quickly satisfy one that the interior is easily the equal of the exterior treatment. The recessed porch leads into both the living room and dining room, the latter a roomy place with an open fireplace to make it more homelike. At the rear of the dining room is the kitchen, with separate service entrance. Back of this, the bathroom, and at the rear, two bedrooms, and all so conveniently arranged that even the woman who must do all of her own work should never find herself wearied by excess steps.

Large Portion of Waste Space Found in Cellar

The age of wasted and dingy cellars has come to an end.

There is no longer reason for valuable space lying idle in the nether domestic regions. The new jacketed sectional boilers, odorless and requiring a minimum of attention, along with such improvements as the electric washers and ironers, have made possible a new era of widened family activity below stairs and increased income value from a new subterranean story.

Modern homes, with their compactness of structure, demand minute utilization of space. Architects know that the cost of a cellar is proportionately equal to that of any other part of the building. Yet the owner's return on this investment is too often disproportionately small, since the realty and rental valuation and the living comfort of the cellar are practically zero.

Statistics show that $1,500,000,000 is invested annually in cellar construction Only 40 per cent of this space is utilized for boiler, coal bins and laundry.

This means $900,000,000 worth of space, unencumbered except for storeroom purposes, standing idle while the family does without room it actually needs for work and recreation. Today an idle cellar is a real expense.

To meet this prohibitive costliness the modern cellar has appeared, a cellar flooded with sunlight through modern casement windows and made gay with paint. No longer need one be greeted, on descending the stairs, by damp odors and coal smoke proceeding from an ashy gloom. Tubs and coal now enjoy private compartments. There is adequate space for storage after a portion of the cellar has been made livable.

The inclusion of the cellar as an integral part of the home comes as the need grows for additional living space at the lowest possible cost Building a new room on the ground floor is an expense the average family will not consider at a cost that is slight, compared with the comfort derived and the saving achieved in labor and upkeep above ground.

The average family cannot afford an extra room for the children's play. On rainy days their tracks and kiddie cars clutter the living room, a wear on the family nerves and more noticeable on the living room furniture.

Thus the cellar is taking its place as the logical location for the recreation of the younger generation. This is only one of the uses to which it is being put. Workroom, billiard room, an extra sitting room and a gymnasium with apparatus and a shower attached are among the unsuspected possibilities where tradition once decreed waste space.

Watch Chimney

nterested in the top of the chimney in your house? Perhaps not. But to be sure that the joints in the masonry are well filled with mortar and that the pitch is enough to allow the water to run off means that you will never face the results of efflorescence, a disfigurement, and even, on occasions, water in the masonry joints.

Mirror Door Convenient Accessory for Bedrooms

Mirror doors offer a pleasant means by which the apparent size of a room may be increased, and are an accessory of genuine usefulness in the bedroom or bathroom. They fit in particularly well with the one-panel type of door which is frequently uniformly used throughout the house in locations which do not require the mirror door.

If two adjacent closets are equipped with mirror doors and the intervening wall space filled with a mirror, a triple arrangement will be secured in which any series of reflections desired may be obtained. To secure this arrangement both doors must be hinged so that the swing is toward the mirror. Such an arrangement is particularly convenient in bedroom or dressing room.

New types of friction-control hinges, recently developed, permit of opening a door to any angle required; in perfect balance, drafts will not move it out of place. The breakage hazard in connection with the mirror door is lessened by use of these hinges as the free swing of the door is restricted. They also obviate the need for the usual baseboard stop which, when the door bangs against it, has a tendency to break the glass by springing the door out of shape.

Laundry Equipment Is Well Placed in Basement

Location of the laundry, with the modern labor-saving equipment that has been vouchsafed as a boon to the housewife, usually is dictated by local conditions, but its logical place would seem to be in some section of the present-day model basement.

When placed in the basement the equipment should be grouped under windows so that a maximum amount of light and ventilation is secured. Modern four-way laundry tubs may be placed in the center of the space allotted to the laundry, with the electric washing machine nearby. Provision should be made for attachment of the machine to a convenient electric outlet, which may be placed close to the tubs. The electric ironer should be directly under the window. A gas or electric plate for heating water may be at any convenient point, as may the gas-fired dryer.

If the concrete floor is covered with linoleum it will considerably lessen fatigue from standing at the machines.

Rough Texture Wall Is O. K. for Any Room

Rough-textured wall finishes are appropriate for almost any room in any home. And they are most attractive, economical and easily applied forms of decoration, which any housewife can well be proud of having in her home. Because a heavy texture in the wall finish has a tendency to make a room look smaller, such textures as the Spanish and similarly shaggy finishes must be reserved for the larger rooms, and ones in which there are large, unbroken wall surfaces. The small room requires a light stipple or an almost smooth troweled texture.

Don't Make a Toy Out of Baby —Babies Have Nerves

By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily Beyond that, being handled, tickled caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset better give him a few drops of pure harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Kill Rats Without Poison

A New Exterminator that is Absolutely Safe to use Anywhere!

Will not injure human beings, livestock, dogs, cats, poultry, yet is deadly to rats and mice every time.

Poisons are too dangerous

K-R-O does not contain arsenic, phosphorus, barium carbonate or any deadly poison. Made of powdered squill as recommended by the U. S. Dept. of Agriculture in their latest bulletin on "Rat Control."

"One of our good customers just told us he gathered 105 dead rats on his farm from using a 2-ounce package of K-R-O We hear of many finding 30 or 40 rats after using K-R-O which is highly successful and should please you." Wolgamot & Drug Store, Richwood, O.

75c at your druggist; large size (four times as much) $2.00. Sent postpaid direct from us if dealer cannot supply you. SOLD ON MONEY-BACK GUARANTEE. The K-R-O Company, Springfield, Ohio.

K-R-O
KILLS-RATS-ONLY

His Fix

"This is awful!" ejaculated Uncle Tybalt. "I've got pretty nearly every one of the symptoms this 'ere patent medicine omenick tells about—tired feeling, buzzing in my head, dark brown taste in my mouth, mental depression, tepid liver, crawling sensation up and down my spine, and disinclination for all forms of labor."

"Mercy! What disease is it, Tybalt?" asked Aunt Fretty.

"That's the worst of it. The symptoms are all there, but the last few leaves of the pamphlet containing the names of the maladies are torn off."—Kansas City Times.

How He Got Them

Doughboy—Aw, what do you know about war?

Leatherneck—Nothin' buddy. Not a thing. War's somethin' I don't know nothin' about. But I got two medals in an intervention, three machete cuts in a pacification, and six bullet wounds in a punitive expedition.—Life.

CAN NOW DO ANY WORK

Thanks to Lydia E. Pinkham's Vegetable Compound

Denison, Texas.—"I think there is no tonic equal to Lydia E. Pinkham's Vegetable Compound for nervousness and I have used Lydia E. Pinkham's Sanative Wash and the Pills for Constipation. I can certainly praise your medicines for what they have done for me and wish you success in the future. I can do any kind of work now and when women ask me what has helped me I recommend your medicines. I will answer all letters I receive asking about them. —Mrs. Emma Gregg, Route 3, Box 53, Denison, Texas.

When Jackson Killed Dickinson

By ALFRED SORENSON

WHEN Andrew Jackson ventured into Tennessee in 1798 to seek fame and fortune as a lawyer he found that frontier country a vast wilderness. The settlements were few and far between and hostile Indians roamed at large throughout that region. The prospects for a professional man d not have appeared very bright to young son, but he was by no means discouraged. pening an office in Nashville he soon secured rge share of the legal business not only of town but of the state. He made his home Mrs. Donelson, who kept a number of board- and there he became acquainted with her ghter, who was living apart from her hus- d, Lewis Robards, a resident of Kentucky. ards had become jealous of his wife, a beau- charming woman, and had written to her her to take her home as he did not intend ve with her any longer. Mrs. Robards' broth- was accordingly sent to Kentucky to escort to Nashville. Robards was censured by his mother for his action, and he soon regret- what he had done. Shortly after his wife's arture he became convinced that any suspicion he had entertained regarding her conduct entirely groundless. Through the efforts of utual friend he became reconciled to his wife was living with her at the time Jackson me a member of the family circle. Within a months Jackson's courteous and innocent ntions to Mrs. Robards excited the jealousy er husband, and, this fact becoming known, result was much unhappiness in the Donel- family.

the fall of 1790 Robards took steps to re a divorce under a law of Virginia—whose sdiction included Tennessee—providing that an, convinced of his wife's infidelity, must in the passage of an act of the legislature horizing a grand jury investigation, and a olution of the marriage in case the woman ld he found guilty.

obards went before the legislature and ged that his wife had deserted him and was g with Andrew Jackson. Upon this state- t the legislature passed the desired act, Robards failed to proceed in accordance rewith. In the course of time the news of this slative action was received in Nashville, and as the general impression that Robards had decreed a divorce by regular procedure.

earning in the spring of 1791 that her hus- d, now divorced as she believed, intended to e to Nashville with a view of compelling her o with him back to Kentucky, Mrs. Robards ded to avoid him by visiting friends in chez. Jackson, whose friendship had now ned into love, accompanied her thither, and nce returned home. In the summer of the e year he again visited Natchez, married Robards, and brought her back to Nash- The couple received the hearty congratula- s of their many friends, and their happiness not disturbed until two years later when learned that Robards had not completed his rce case in Virginia, but had recently revived Kentucky and obtained a decree in accord- with the act of the legislature. This was ed astounding news to Jackson and his wife, to prevent any further complication they remarried. Their social standing in Nash- was not lowered in the least by the predica- t in which they had found themselves.

ckson was the owner of a race horse named xton which he stood ready at any time eavily back with his money. In the fall of a race was arranged between Truxton and . Joseph Ervin's Plow Boy for a stake of 00. The stake money was to be put up in onal notes, payable on the day of the race, just before the race was to be pulled off, ain Ervin and his son-in-law, Charles Dick- n, a prominent lawyer and a popular young paid a forfeit of $800 and withdrew Plow the affair ending amicably.

short time after this event Jackson was rmed that Dickinson had made some remarks reflecting on the character of Mrs. Jackson. When Dickinson, who frequently indulged in the flowing bowl, was interviewed regarding his aspersions, he told Jackson that if he had made them he must have been drunk at the time. Further explanations seemed to be satisfactory to Jackson, who parted from Dickinson in a friendly manner.

This, however, was not the end of the disagreeable matter. Soon after this meeting, Dickinson, while drinking in the barroom of a tavern, publicly repeated his offensive words, which were carried to Jackson, who thereupon urged Captain Ervin to advise his son-in-law to quit his scandalous talk before it was too late to avoid trouble. From this time the enmity between the two men increased in bitterness.

A report was spread by Thomas Swan, a young lawyer, that Jackson had said that the notes paid as a forfeit in the horse race were different from those agreed upon. Jackson emphatically denied that he had said anything of the kind. Thereupon a voluminous and abusive correspondence ensued between the men. In one of his letters, Jackson said: "There are certain traits that always accompany the gentleman of truth. The moment he hears a harsh expression applied to a friend he will immediately communicate it, that explanation may take place; while the base poltroon and cowardly talebearer will always act in the background. You can apply the latter to Mr. Dickinson and see which best befits him. I write it for his eye, and the latter I emphatically intend for him."

Jackson declared to his face that Swan was no gentleman and that if he dared to issue a challenge he would cane him first and then give him satisfaction. Swan, however, sent Jackson a note of defiance in which he demanded "that reparation which one gentleman is entitled to receive from another," and authorized the bearer of the cartel "to make complete arrangements in the field of honor." Jackson did not reply by letter, but answered in person, assailing Swan in a barroom with a pistol and telling him to "draw and defend himself." The fracas, however, ended without bloodshed. Swan's next move was the production of proofs going to show that he was a gentleman, who held himself responsible for whatever he might say. The letter that Jackson had written to Swan, abusing Dickinson, and carrying a threat of a challenge to him, brought a caustic reply from Dickinson, who immediately departed on a trip to New Orleans.

When Dickinson returned from New Orleans he wrote a scurrilous attack upon Jackson, and presented it to a local newspaper for publication. Jackson, upon being informed of this forthcoming assault, called at the newspaper office, and upon demand was shown a copy of the article. He immediately sent a challenge to Dickinson, who had no hesitation in accepting, as he had expected it.

The duel took place May 30, 1806, at a rendezvous some considerable distance from Nashville. Dickinson had the reputation of being the best shot in Tennessee, and was known to have plugged a target the size of a silver dollar four times in succession at a distance of twenty-four feet. The betting odds were much against Jackson, although he was regarded as an expert handler of the pistol.

When the combatants came on the field they appeared to be cool and determined. Jackson bore an ineradicable enmity to Dickinson for the unforgivable slurs that he had cast upon his wife, and Dickinson felt that he himself had been insulted. All arrangements having been completed, they faced each other at twenty-four feet, each holding his pistol downward. At the given word, Dickinson quickly raised his pistol and fired first. A small cloud of dust arose from Jackson's left breast, and lifting up his arm he placed it across his chest for a moment. The witnesses thought he had been hit. But he stood firm, and the next instant took aim and pulled the trigger. The pistol failed to go off. The hammer had stopped at half cock, and while Jackson was recocking it, Dickinson exclaimed: "My God! Have I missed him!" Again taking steady aim, Jackson fired the shot that ended the life of his enemy. Dickinson staggered and fell to the ground, the bullet having passed through his body below the ribs, causing him to bleed to death in a few hours.

Shortly after the duel it was noticed that Jackson's shoes were dripping with blood. Dickinson's bullet had struck him in the left side, breaking a rib and scraping the breast. Jackson, although suffering severe pain, had striven to keep his wound a secret in hopes that no one would know that he had been hit. It was not a dangerous injury, and he was soon on the road to recovery.

It was claimed by Dickinson's friends that Jackson had taken unfair advantage by clothing his slender figure in loose garments. They maintained that if he had been dressed in close-fitting clothes, such as he usually wore, Dickinson would have made a sure-death shot. He had aimed at the spot where he supposed Jackson's heart was located, and was surprised that he had not killed him instantly. However, one of the comments regarding this alleged unfairness was that "at any rate Dickinson deserved killing for slandering an upright woman."

For some considerable time this affair militated politically and socially against Jackson. He was a quarrelsome, quick-tempered overbearing man, always carrying "a chip on his shoulder" and ever ready to fight "at the drop of the hat." His affair with the Benton brothers is a fair illustration of his bellicose nature.

Capt. William Carroll, an intimate friend of Jackson, became involved in a quarrel with Jesse Benton, who challenged him. Jackson endeavored to have the affair amicably settled, but Benton would not listen to anything of the kind and demanded a meeting on the "field of honor." Jackson acted as Carroll's second. Benton fired first, and then weakened. He stooped and turned partly around to avoid Carroll's shot which struck him in the rear, inflicting a painful but not serious wound. Thomas Hart Benton, who was in Washington to save Jackson from bankruptcy, upon his return to Tennessee became indignant at Jackson, whom he charged with having conducted the duel in "a savage, unequal and base manner." Jackson responded with a threat that he would horsewhip Benton at their next meeting..

Jackson went on the warpath and trailed Benton to the City hotel and pointing his pistol at him, said: "Now, you d—d rascal, I am going to punish you. Draw and defend yourself." Benton backed away. Jesse Benton now appeared on the scene with his pistol loaded with two bullets and a slug, and shot Jackson in the shoulder and in the left arm. Jackson fell in a helpless condition. Captain Coffee came to his rescue and fired at Thomas Benton, but missed him. Clubbing his pistol he advanced on Benton who stepped backward and fell down a stairway. Jackson's party was at this stage of the fight reinforced by his nephew, Stokely Hayes, who attacked Jesse Benton with a sword cane, the slender blade breaking in pieces upon striking a button. Hayes now drew a dirk, threw Jesse to the floor, stabbed him in the left arm, and inflicted several slight flesh wounds. A bystander separated them, and others interfered and stopped further bloodshed. Thomas Benton, surrounded by a few friends, denounced Jackson as a defeated assassin and defied him to come forth and renew the battle. Picking up Jackson's sword, which had dropped on the floor, he went out to the public square and broke it in two. Jackson never fully recovered from the wound in his shoulder.

ORCHARD GLEANINGS

SLIGHT CURRANTS AND GOOSEBERRIES

The currant and gooseberry are two of the easiest bush fruits to grow, and perhaps the hardiest. In fact, it is their ability to exist under adverse circumstances that has caused their downfall. They are generally planted in some out-of-the-way place, either along the fence or where the ground is never cultivated and are given practically no attention, but allowed to become matted with dead wood and grass until the fruit degenerates into a small, worthless berry, writes Lloyd A. Garrison in Farmer's Guide. Usually no effort is made to check their only natural enemy, the currant worm, which can easily be killed by any kind of poison, or can be destroyed in their early stages of attack by simply sprinkling with wood ashes.

Currants and gooseberries are usually picked when not entirely ripe, which is the cause of most of the prejudices against them, due to the fact that they have not as yet acquired their full rich flavor. The currant is one of the best berries grown for preserves, jam, or jelly, making a beautiful red dish, very delightful to the palate.

These two berries always find a ready sale on the market at a good price, for few people offer well-ripened fruit for sale, keeping it for themselves. Another advantage of these berries is their splendid keeping qualities. They can be left on the bush from one to three weeks after becoming ripe.

The White Grape currant can be safely recommended. It is the only white currant known that is worth planting and produces a light pink jelly. Nearly any kind of red currant will produce a satisfactory quality and quantity of berries, if given the proper care. Some of the common varieties of currants are the Wilder, Red Cross and Perfection.

Popular gooseberries of the English varieties are the Lancashire and Crown Bob, both producing large berries. The Smith's Improved, Red Jacket, Chautauqua, Houghton and Dowing are all good native berries.

Nicotine Sulphate Spray to Control Apple Aphid

An application of nicotine sulphate spray made after the fruit buds have opened aud when the tips of the leaves extend one-fourth to one-half inch is the best possible insurance against severe losses from apple aphids, says P. J. Parrott, entomologist at the experiment station at Geneva, N, Y., in commenting on profitable spray practices.

Repeated observations of aphids on apple trees in the orchards of the state show that most of the aphid eggs have hatched when the apple buds have reached the stage of development indicated. It is against the newly hatched insects that the nicotine spray is most effective, says Mr. Parrott.

The spray formula used in the station orchards and found to be entirely satisfactory contains 2½ gallons of lime-sulphur, 1 pint of 40 per cent nicotine-sulphate, and 2½ pounds of lead arsenate in 100 gallons of water. This spray should be applied under a pressure of at least 200 pounds and should cover the underside of the twigs and small branches to give the best results, it is said.

Control Cracking of Flemish Beauty Pears

Pear scab is responsible for the cracking of pears. Most varieties of pears are not seriously attacked by the scab fungus, but the Flemish Beauty is so characteristically affected that it becomes possible to identify fruits of the variety by the scab markings on them. Frequently the disease is so severe as to cause cracking of the fruit.

Control is not difficult. The material to be used is either lime-sulphur 1 to 50, dry-mix, or 3-3-50 bordeaux. Lime-sulphur is the easiest material to procure and apply, but may give some burning if it is applied on too warm a day or if it is used in too concentrated a form. Dry-mix consists of 8 pounds of hydrated lime, 16 pounds of superfine sulphur, and 8 ounces of calcium caseinate, the total amount being used in 100 gallons of water. Bordeaux mixture is made by dissolving copper sulphate in water, making a milk of lime solution from freshly slaked lime, diluting each, and pouring them slowly together.

Application should be made (1) a few days before the blossoms open, (2) just after the petals fall, and (3) about two weeks after the petals fall.

Profitable Peach

Asking a certain grower what had been his most profitable peach over a period of years, he immediately said, "Banner." While this is a splendid peach, yet its greatest value is undoubtedly due to the fact that it largely has the market to itself and, oftentimes, people are just awakening to the condition that peaches are nearly gone and they have not secured their supply. It is another sort that does not obtain a satisfactory size if left to itself.

MONARCH

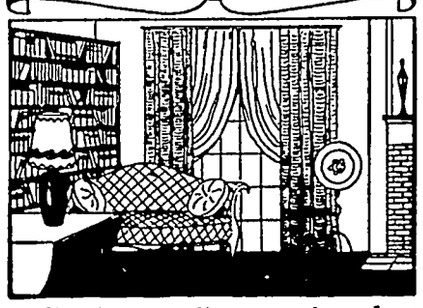
Judge—Do you want a lawyer to defend you?

Bigamist—Well, to tell the truth, I'd rather have a couple of husky policemen.

NEW DRAPERIES for A FEW CENTS
By Mae Martin



All of us realize nowadays how bright-colored draperies seem to invite people in, and how warm touches of color in spreads, cushions and runners help to make us love our own surroundings.

No woman need deny herself these touches of cheer, because they can easily be had at the expense of a few cents and a little planning. Curtains that are faded or drab in color can be made bright and pleasing with a package or so of Diamond Dyes. Then spreads, covers, runners, etc., can be tinted or dyed to match. Anyone can do it. Tinting with Diamond Dyes is as easy as bluing, and dyeing takes just a little more time. Brilliant new colors appear like magic, right over the old, faded colors. Diamond dyes give true, fadeless colors. They are the kind of dyes used when the cloth was made. Only Diamond Dyes produce perfect results. Insist on them and save disappointment.

My new book, "Color Craft," gives hundreds of dollar-saving suggestions for beautifying your home and clothes. Sixty-four pages, fully illustrated in colors. It's FREE. Just write Mae Martin, Home Service Department, Diamond Dyes, Burlington, Vermont.

ASTHMA SUFFERERS

ASMOLIN is a positive and instant relief for asthma. Applied in five seconds to nostrils with pocket size powder blower. No injection; no disagreeable smoke, not taken internally. Contains no narcotics or habit-forming drugs. Can be used at home, at work, or when traveling.

If you have tried so-called "cures" for asthma, ASMOLIN will come to you as a blessed relief. There are no "ifs" nor "ands" about it; it relieves instantly, surely.

Costs nothing to try. We have so much confidence it will relieve your suffering that we will let you try the treatment for 10 days FREE. If it doesn't do what we say it will, send it back and you will owe us nothing. Send no money with order. Just fill out and mail the coupon below.

The Asmolin Company, Dept. B,
P. O. Box 601, Denver, Colorado.
Please send me ASMOLIN on ten days' FREE TRIAL. I agree to return it or to remit $5 to you within ten days of receipt of same.

USED-REBUILT MOTORCYCLES All makes. Guaranteed. Terms. Supplies. Parts. Catalog Free. Boyd Clymer, Denver, Colo.

Before you select your next car see what General Motors offers

GENERAL MOTORS was organized on the principle that a group of strong companies, working together as a family, could serve the public better than they could separately.

The public has approved this principle.

In 1924 one out of every six cars chosen by the public was a General Motors car. In 1925 the proportion was one in five. In 1926 it was one in four.

And last year it was one in three.

The improvement in General Motors products is continuous. Great Research Laboratories are constantly seeking new paths for betterment. A 1245-acre Proving Ground tests all that science has discovered and *proves* each new design before it is offered to you. Each year there has been a steady advance in the quality, performance and beauty of General Motors cars, with no increase in price.

7 famous cars-86 models

$495 to $5500. (F.O.B. Factories)

and the low-cost GMAC Purchase Plan

The General Motors cars are listed on the coupon below. They include a car for every purse and purpose—passenger cars and trucks—models of every kind fours and sixes and eights. You may select any model with full assurance that by every test it offers the largest value per dollar in its price class.

The passenger cars include 86 models, ranging in price-at-the-factory from $495 to $5500. All closed bodies are by Fisher. All cars have four-wheel brakes. All have quality where quality counts most in long life and high resale value. All are backed by service organizations which are permanent.

CLIP THE COUPON

It will pay you to see what General Motors offers before you select your next car. Compare General Motors quality and value in each price class. Learn about the tests General Motors applies to all cars produced here and abroad, at its great Proving Ground. Consider the importance of a time payment plan which gives you low rates, because of the volume of business handled. Remember that you are assured of service, because General Motors dealers are everywhere.

By using the coupon below, you can bring into your home immediately full, illustrated information about any or all of the products made by General Motors. With this will come a new book called "Principles & Policies." You will find it unusual reading for it takes you behind the scenes and shows just what General Motors is and what it is doing to continue to merit public goodwill.

Odd Wedding Customs Prevailing in India

There are certain tribes in India the male members of which sometimes contract marriage with a tree. When a man loses two wives by death and wants to marry a third, the fear lurks that she, too, may die. So before the marriage the man is married to a banana tree or some other plant. All the ceremonies pertaining to an actual marriage are gone through, and at the end the tree is cut down and mourned over. Now the way is clear for the man's real marriage, the new wife being considered immune from evil influences.

From Bombay comes news of an extraordinary wedding ceremony at Bardoli, near Ahmedabad, the principals being a Brahmin girl and a pipal tree, the sacred fig of India.

The girl became blind through smallpox at the age of six, and her father, knowing that no one would accept her in marriage, expressed the desire, before he died last year, that she should wed a pipal tree. He advised her to stay at home all her life dedicating her spare moments to the contemplation of Divine Providence.

A caste dinner was held in honor of the marriage, which was celebrated with the prescribed Hindu rites.

Sometimes when a suitable husband for a girl cannot be obtained, she is married to a sword, a bow and arrow a grinding-stone, or other inanimate object. She is thus freed from the reproaches which would otherwise be showered on her by her caste people for in India marriage is regarded as a sacred duty which must be entered into by every man and woman.

Growth of Beard Not Stimulated by Razor

Whether or not shaving makes the beard grow faster is a question that never has been definitely answered to the satisfaction of all scientists. It is the general belief among medical men and physiologists that shaving itself does not make the beard grow faster and that cutting does not increase the growth of hair.

There is a definite rate of growth in the hair of normal and healthy persons and this growth is not affected by mere cutting. It is possible, however that shaving makes the beard grow faster for a different reason, says Pathfinder Magazine. Shaving tends to irritate the skin somewhat and causes an increased flow of blood to the shaved section Consequently there is an increase in the nourishment of the hair follicles, and this may cause the beard to grow stiffer and heavier and perhaps faster.

It is widely believed that if a man never shaved he would not have as heavy a beard as he would have if he shaved a few years and then stopped

World's Timber Supply

The world will face a serious shortage of timber within a few decades, says Christian Storjohann, a leading industrial and forestry expert of Sweden. Sweden's effort to safeguard and maintain a future supply of timber is in contrast, he says, to the indiscriminate felling of trees in many countries. Russia still has large forest reserves, but only a small part of them can be utilized because of lack of transportation facilities Among the northern countries only Sweden now keeps the cutting of trees on a level with reforestation. Steps to convert waste and swamp lands into forest areas by draining are now also being taken.

Accommodating

"Say!" yelled a man who had had his feet run over for the third time while he was working under his car. "I'm getting tired of this! If you do it again I'll get up and kick your flivver to pieces!"

"I can't help it!" responded the small town girl who was learning to drive and not succeeding very well. "I don't know how to drive yet, and my car seems determined to run over something. I—"

"Aw, that's all right!" said the complainer, crawling forth. "I didn't see who you were. If you'll wait a minute I'll lie down in the street and let you run over me all you please."—Kansas City Times.

Reading

The vast number of books we have impresses on us the necessity of a wise selection of what we read. One book may determine what a man shall be to all eternity Benjamin Franklin said that a single reading of Cotton Mather's "Essay to Do Good," shaped his entire life. One page of a good book may save a soul. One paragraph of a bad book may ruin a soul. John Angell James, one of the best men England has produced, stood in his pulpit in his old age and said that he had never overcome the evil effect of having for fifteen minutes once read a bad book.—Exchange.

The Strawberry Tree

The strawberry tree as distinguished from the strawberry plant is not a native of England, although it is to be seen occasionally in the parks and gardens of that country, but in Ireland it is frequently found growing wild especially in the neighborhood of Killarney It usually bears flowers about the end of September or beginning of October, and along with the flowers are found the fruits of the previous year.

The fruit is a large orange-red berry, closely resembling the strawberry; hence the name of the tree.

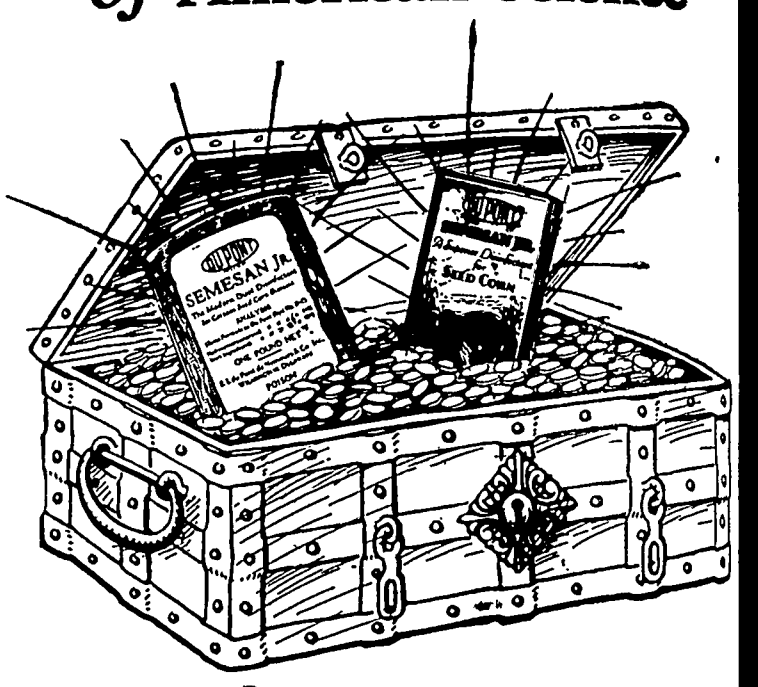
Out of the Treasure Chest *of* American Science



Improved — DU PONT SEMESAN JR.

Most Effective Corn Treatment Known

SCIENCE is swift and ruthless in its progress. Inferior articles are swept aside and displaced by more efficient ones. Only the best survive! Out of the Treasure Chest of American Science now comes the peer of all seed corn disinfectants—*Improved* Semesan Jr.—more precious than the old gold of pirate days.

With the advent of *Improved* Semesan Jr. the treatment of seed corn—both selected and diseased—has become a safe, practical and profitable method of crop improvement. Applied to the seed by the simple, easy dust method—at a cost of only 2½c an acre—*Improved* Semesan Jr. will produce every desirable result claimed for any seed corn treatment and do it far better. Its equal does not exist!

More than 300 practical farm tests by Federal and State Experts confirm that fact. Circular No. 34 of the U. S. Department of Agriculture proves it! We'll gladly give you a copy showing that *Improved* Semesan Jr. has a record of producing 1⅓ to 2½ times greater yield increases than any other treatment. Ask for Semesan Jr. Corn Booklet.

"The chemical that stood out above all other seed corn disinfectants in my demonstration tests was Du Pont *Improved* Semesan Jr.," says Oscar Mountjoy, of Atlanta, Illinois. His experience with the most effective corn disinfectant science has yet devised can be profitably employed by you.

Just figure out your needs—2 ounces to the bushel of seed corn—then buy enough *Improved* Semesan Jr. to treat all your planting. The harvest results should reward you a hundredfold for the investment.

Mr and Mrs Emil Pringnitz are the owners of a new Buick sedan.

Mr. and Mrs Ed. Schoenwetter andc hildren caled att he Will Lemke home Tuesday evening.

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

Mr. Jack Zeilie of Goodell visited at the Ed. Schoenwetter home last week

Mr. and Mrs. Wil Ax and children of Swaledale visited at the Charles Ax home Sunday.

Mrs. Ben Reimer and Lois assisted Mrs. Reimer of Garner with her housecleaning Monday.

"Mother of Mine!"

So brave she was and good—
In worth of womanhood
So like the snow—
She, smiling, gave her life
To blend the name of wife
With Mother—So,
God sees in her a worth
Too great for this dull earth
And beckoning, stands
At Heaven's open gate
Where all His Angels wait
With welcoming hands.
—James Whitcomb Riley.

Sunday in May Given Mother

One day about 100 B. C. a rich Roman woman was visiting Cornelia, a Roman mother. The visitor was showing off her rings and her necklaces and her other ornaments. She had a great many and she was proud of them.

When she had shown off all she had, she asked to see Cornelia's jewels.

Cornelia called to her two boys, who were playing outside. They came in and their mother put her arms around them. Then, with emphasis on "these" and "my," Cornelia said:

"These are my jewels."

On Sunday, May 9, 1907, Miss Anna Jarvis of Philadelphia told a friend that she bad set the day aside to honor the memory of her mother, who had died the year before. During the months that followed Miss Jarvis told many persons that she would like to see one day in each year set aside to honor all mothers. She interested so many Philadelphians that Sunday, May 10, 1908, was observed throughout their city as Mother's day.

Miss Jarvis made herself a veritable missionary in behalf of Mother's day and the movement spread farther and farther each year. By 1913 it was being observed in England. In 1914, by authority of a joint resolution from congress, Woodrow Wilson as President of the United States issued a proclamation for the Mother's day of that year.

By that time Mother's day was being observed generally on the second Sunday of each May.

So—because mothers are like Cornelia, and because Anna Jarvis wanted all mothers to be honored as she honored her mother—Mother's day is now a treasured day of memory.

Love Without Limit

A mother's love is the medium through which we understand God's. It will go to the deepest of depths to save. Victor Hugo, in his "Les Miserables," has given us a vivid portrayal of mother's love in the characters of Cossette and Fantine, and in Ben Hur and his mother we find another illustration of a mother's love without limit. There is an old story of a mother who left heaven to save her child, and this is indicative of the great mother heart of God manifest in Christ.

Debt to Mother Hard to Repay

The debt which the world owes to the mothers of America will never be fully known, much less repaid. Their contribution to the history of freedom is one of those intangible quantities not easily defined nor accurately appraised. Yet it lies back of much of the worth-while accomplishment that makes the history of our country. Trace the careers of men who bulk large in the building of America and you find woven into their character the influence of mothers who had faith in their sons, faith in their country and faith in their country's God.

We have come into a new age which grants to women a larger place in the affairs of mankind. Some of the ideals associated with womanhood have changed with changing times. We no longer insist on that measure of self-effacement thought proper for the women of another generation. But no one can imagine a state of affairs wherein self-sacrificing motherhood will not be exalted or the contributions of motherhood to the state not acknowledged with loving remembrance.

Yet it is to mothers individually rather than to mothers impersonally that the devoted tributes of Mother's day are paid. One thinks of his own mother and, if possible, sends her some token of his thought. He appreciates what other mothers have done and are doing toward making this a better society, but his act of devotion is to the particular mother who brought him into the world, protected him when helpless, inspired him to strive, blessed him as he started out in the world and never ceases watching out for his welfare as long as life remains.

"Men are what their mothers made them," wrote Emerson. America is great because the mothers of American men and women have been great. Today we recall what the mothers of Washington, of Lincoln, of Grant, of Lee, meant to their generation. But we recall even more vividly what our own mothers have meant and still mean to us. And with full hearts we pay them tribute.

Motherhood Universal

The dominating impulse of woman is motherhood, whether she bears children of her own or mothers another's; or mothers a community, a state, a reform; or, in her interests and dedication, mothers the whole world.

I SAW a host of nodding flowers,
Fluttering about like morning hours,
Or new-green leaves in April showers,
On Mother's day.

THEY bloomed in gowns of fluffy white,
Two big brown eyes were sparkling bright,
Ah, they were such a dainty sight,
On Mother's day.

AND yet a tear dropped in my cup
When I sat down with them to sup,
For no one came to pluck them up,
On Mother's day.

POULTRY

ALL-MASH RATION GIVEN APPROVAL

All-mash poultry rations, for both growing chicks and laying hens, are suggested in the most recent bulletin on poultry procedure issued by the extension service of the Ohio state university. "The newer idea of poultry feeding favors the feeding of all the ingredients ground, mixed, and fed as a mash," says Prof. A. R. Winter, of the poultry husbandry department of the university, author of the bulletin.

"The method is simpler, more sanitary, and more economical in the use of the feed than where the ration is fed partly as scratch grain and partly as mash. Since birds prefer a granular mash to one finely ground, it is advisable not to grind the ingredients any finer than is necessary to prevent the chickens from picking over the material and taking out what they like best."

Two "starting and growing" rations, both of them all-mash, are listed in the bulletin. Three all-mash rations and one scratch grain and mash ration are suggested for laying hens.

The first starting and growing ration, a mash, consists of:

Ground yellow corn	72 pounds
Wheat middlings	20 pounds
Meat scraps (50% protein)	5 pounds
Poultry bone meal	2 pounds
Salt	1 pound

Skim milk instead of water is given to drink during the first eight or ten weeks. Other forms of milk may be substituted.

The first ration suggested for laying hens is:

Ground yellow corn	65 pounds
Middlings or ground wheat	20 pounds
Meat scraps	10 pounds
Bone meal	4 pounds
Salt	1 pound

Water is given to drink. If milk is available, the meat scraps in the ration may be reduced to five pounds.

The bulletin discusses 21 feeding materials for poultry, with reference to their constituents and the particular feeding purpose for which they are available. It is entitled "Poultry Feeding Stuffs and Rations" and may be obtained by writing to the agricultural publications department of the Ohio state university.

Toulouse Best Goose Breed for Marketing

The best breeds of geese for market are the Toulouse which is sometimes called the Land goose because it does not seem to miss the water; the Embden geese which are white and are profitable market geese, and the African which are nearly the color of the Toulouse and are also fine, large market geese. These are smaller, however, weighing only a little more than one-half of what the others do. Whenever Canadian geese are used to cross with the three or four above mentioned breeds, this cross produces a hybrid goose which is called a mongrel goose on the market. They are considered a great delicacy and bring the highest prices of any poultry per pound. Only a few of them are raised, however, as the demand is limited.

Successful Incubation

Successful and careful incubation, in the case of either duck or chicken eggs, is one of the first and most essential steps towards a strong, healthy flock. Many early chick losses are due to improper incubation and much of the low hatchability of eggs can be traced to poor incubator management. As a consequence, care to details at this time will mean dollars and cents for the poultryman when selling or egg-laying time comes.

Goose Septicemia

There is a disease of geese and goslings known as goose septicemia which causes sudden death. This is a disease undoubtedly due to poison in the feed. No cure is yet known. Sanitary conditions will prevent the disease.

The healthy goslings should be removed to new quarters, a coarse mash should be fed and everything kept as clean as possible. With clean water and a fresh range there should be no trouble to raise them.

Raising Baby Chicks

Raising baby chicks is not such a difficult operation as some would think. Yet a few things are necessary for proper care and raising of chicks. You can raise chicks without much preparation or very much equipment, but your losses will be heavy and your profits will be little if you do not use the proper methods.

You should be prepared to receive the chicks so that when they come you will not have to delay putting them in their future home.

Dirt Floors Poor

Dirt floors are the poorest kind for the poultry house because of the great amount of labor required to keep them clean through each year. Board floors are better than dirt but are hard to clean thoroughly. Concrete floors are the most sanitary and economical. It pays to put in concrete floors in the spring or early summer so they will have time to dry out before the hens are housed for winter. The concrete floor should be 0 or 8 inches above the outside soil.

MAKE YOURS "A Skin ...ove ...ch"

Who can resist the charm of a beautiful skin?

Nearly every woman's skin would be lovely . . . if it weren't for one of these six easily-corrected faults:

- *Blemishes*
- *Blackheads*
- *Sallowness*
- *Conspicuous nose pores*
- *Excessive oiliness*
- *Dryness*

EVERY DAY your skin is changing! Old skin dies—new skin takes its place.

Make this new skin as it forms, the clear, flawless complexion everyone loves and admires!

The famous Woodbury skin treatments will help you to overcome any of the six common skin troubles listed here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments, and the treatment for normal skins, are in the booklet wrapped around each cake of Woodbury's.

A skin specialist created Woodbury's Facial Soap. Use it—and see what a wonderful improvement it will make in your complexion!

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

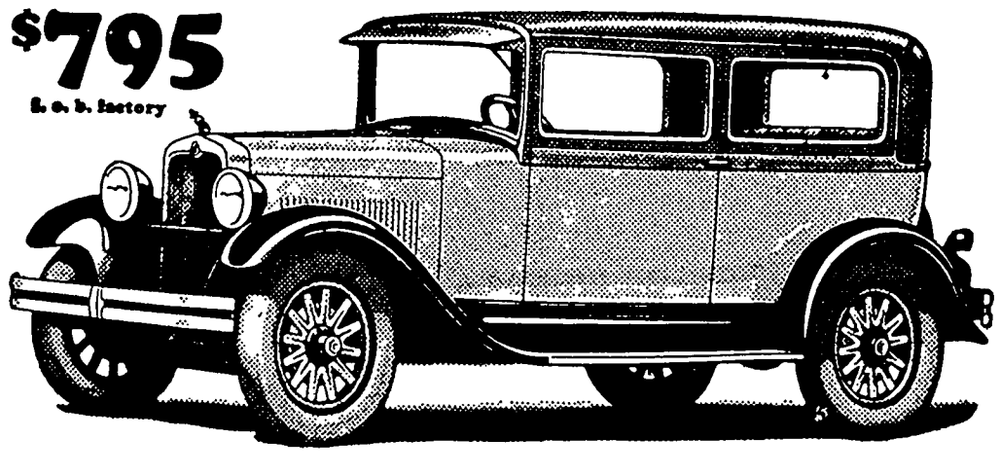
STUDEBAKER
THE GREAT INDEPENDENT



ERSKINE SIX

Only cars costing into the thousands equal the high standards of materials, workmanship and inspection maintained by Studebaker in producing this roomy, comfortable Erskine Six Club Sedan at $795.

Engineering genius and quality clear through—that's why you can drive this new Erskine Six 40 miles an hour the day you buy it—62 miles an hour later—why you need change the oil *only* every 2500 miles—why this car set a new record unequaled by any car under $1000 when it ran 24 consecutive hours at better than 54 miles per hour.

Low in first cost—so sturdily built that repairs are few and far between—Studebaker's Erskine Six is an all-around thrift car, for it is remarkably economical, too, in gas and oil consumption.

Dealers' Opportunities

Studebaker assists dealers to conduct their business on a profitable basis—sales training—financing—used car merchandising—advertising helps—accounting—service—etc. No wonder Studebaker-Erskine dealers make money with these 4 great lines: The new President Eight, $1985 to $2450. The World's Champion Commander, $1435 to $1625. The new Dictator, $1195 to $1395. The new Erskine Six, $795 to $965. Write or wire NOW for complete, confidential information if there is no dealer in your town or if you wish to move to a town where the Studebaker-Erskine franchise is available.

Every car owner, every family with children in grade or high schools, will want this interesting free booklet, "A Trip Through Studebaker Factories." It pictures how your car is made—complete from molten metal to dynamometer tests of completed cars. If you cannot visit the huge Studebaker plants in South Bend this summer, send for this free book now—use coupon at right. See pictures of great Studebaker foundries where castings are made from molten iron ten times hotter than boiling water. See six-ton steam hammers forge Studebaker crankshafts. Learn how Studebaker springs are forged and tempered. Why Studebaker steel forgings are baked in huge ovens to insure great strength. Understand how a Studebaker steel body can be fused by electric arcs into one strong silent unit. See airplane views of Studebaker's 800-acre Proving Ground. Learn more about the 76-year-old company and the 21,000 men who build your Studebaker or Erskine. Send for this entertaining free booklet NOW! Use coupon.

EANS POOR FOR FATTENING

the soy bean is one of the inable summer legume crops h Carolina, it is a poor feed ning hogs.

iments conducted by our have shown conclusively that seeds are unsatisfactory for oduction because they are in palatibility, produce a soft and give a low amount of r acre when compared with tandard feeds used for fat- swine," says Earl H. Hostet- harge of swine investigations North Carolina State college. other hand, soy bean meal n found very palatable and sed as a supplement to corn, nd uniform gains are secured." ssor Hostetler conducted one three different trials, using s, comparing soy bean meal sh meal. He found that the ade about the same daily gain ght, but that the cost of the as greater where the animals d the soy bean meal and that ts paid about the same price ch bushel of corn consumed. gs used were high grade Po- China animals and were sold Richmond market and there o dockage because of soft or rcasses.

nother test where he used 235 four trials, he compared fish with one-half soy bean meal and her half fish meal. In these the total feed required to pro- 00 pounds of gain was about me. However, the pigs con- about twice as much of the ean meal and fish meal mixed erefore brought down the value soy bean meal to about $30 instead of $50, which was the actually paid.

Movers Preferred by a Minnesota Farmer

s cheaper to raise the good draft that weighs 1,500 pounds at years than it is to buy them, he inferior type can be bought er than raised, as there are lots em throughout the country.

refer the heavy horses for the as they do their work easier o not reduce in flesh as fast as ght horse, writes M. P. Delzer odge county, Minnesota, in the er. I also prefer the slow mov- or they are easier to handle and ot heat up as the fast horses and most of the farm work is at a slow gait. This means all the work is done with horses none of the heavy work is done a tractor.

the mare is in good condition s worked right up to the day she he colt, but not worked too hard. n thin condition she is only ed when an extra horse is need- In either case she is not worked en days or two weeks after she the colt or not at all as long as possible to get along without

m Milk Is Valuable for the Growing Pigs

ery breeder of pigs knows how able skim milk is for growing In the standard book "Feeds Feeding" Professors Henry and rison state: "For swine of all , and especially for young pigs, milk is unsurpassed as a sup- ent to the carbonaceous grains." districts where there is no fresh milk dry skim milk will supply same healthy growth as fresh milk will. One pound of dry milk (dry in grain mix, or in er to drink) equals three pounds corn for gain in weight.

Live Stock Notes

ive stock as well as people need light.

* * *

Corn, oats and oil meal will push nbs along for the early summer rket.

* * *

Careful experimenting long ago ved that it doesn't pay to cook n for hogs even in the winter time.

* * *

When docking with a knife, if you one lamb bleeding too much, you tie a twine around his tail for a .

* * *

For baby beef, heifer calves finish icker than steers and are worth re on the market than steer calves d for the same length of time and der the same conditions.

* * *

You may have your ewes in ever fine condition and still the lambs on't do exactly right unless you feed e ewes a milk-making ration.

* * *

Colts given kind treatment when ung give little or no trouble later hen first harnessed and driven, as ey have confidence in the driver.

* * *

After the calves are two weeks old ey will generally start eating small mounts of grain if it is offered to em in their pails after they have nished drinking.

Old Prejudices Upset by Tests

Argument Is Found in Value of Oversized Potatoes for Seed.

(Prepared by the United States Department of Agriculture.)

Phases of the moon and position of the horns still govern planting operations, particularly of potatoes, in many sections of the country. The light or the dark of the moon, or whether the horns point upward or down are of no concern to horticulturalists of the United States Department of Agriculture, but they are interested in providing information looking toward settlement of some of the other disputed questions dealing with potato planting.

William Stuart and several assistants report on experiments in potato planting carried on in leading potato-growing districts, Norfolk, Va.; Presque Isle, Maine; Greeley, Colo., and Jerome, Idaho.

Merits of Potato Sets.

Growers have long disputed the comparative merits of potato sets cut from the stem and and from the seed end of the tubers. Some previous experiments seem to have indicated considerable superiority for one end or the other. The seed values of the two ends probably differ somewhat in different varieties. Results varied with the weight of the set, according to numerous tests, and the data as a whole seem to indicate that as the weight of the set increases there is a greater response from the apical (seed) set than from the basal (stem) set.

Another fruitful source of argument is found in the value of oversized tubers for seed. Most growers of seed potatoes have a strong prejudice against using large-sized tubers. After three years of experiment the investigators conclude that "sets from oversized tubers are evidently as productive as those from normal-size tubers, and in seasons when a considerable proportion of the seed stock grows too large to satisfy commercial demands it may be recommended for seed purposes. The chief objections that have always been raised in regard to oversized tubers are that there is more wastage in cutting, involving a larger quantity by weight to plant an acre, and in addition that they are slightly more difficult to cut."

Use of Immature Seed.

Several experimenters have claimed great advantages from the use of seed dug when it was somewhat immature. Departmental experiments at three stations were inconclusive. At the Idaho station the increased yield from immature seed ranged from 77 bushels an acre for one variety to 180 bushels an acre for the best of three varieties.

Italian Red Clover and Alfalfa Seed Worthless

Results of tests conducted at several experiment stations show conclusively that red clover and alfalfa seed from Italy are unfit for use anywhere in the United States. Alfalfa seed from South America also has been declared unfit for use in certain parts of this country. It now begins to appear that a similar study of adaptation must be conducted with red clover and alfalfa seed from different sections of the United States and adaptability areas located and defined. It has been discovered now that red clover seed produced in the Williamette valley, of Oregon, produces less hardy plants than seed produced in Wisconsin, Michigan or Minnesota and may prove to be as undesirable as Italian seed.

Grasshoppers Have Well Balanced Mineral Bodies

You have, no doubt, observed, and often heard people remark about chickens and turkeys doing so well where they had range and had access to a lot of grasshoppers. Do you know that a grasshopper's body, when chemically analyzed, shows that its body is made up of a perfectly balanced mineral mixture? The grasshopper's body contains a large per cent of vital minerals, and that's the secret as to why chickens and turkeys do well on them, and are always seen chasing grasshoppers. The same is true of other bugs and worms, and is one of the main reasons why poultry do so well on free range.

Agricultural Notes

Make repeated plantings of beans and corn so as to have a continuous supply of these vegetables.

* * *

For carrots, no fresh manure should be applied. It makes 'em knotty and rough, and they often crack. Carrots like a sandy soil, not too rich.

* * *

Some of us don't have much success with lettuce after the hot weather comes. The secret of making it do well then is to provide some shade and give it plenty of water.

* * *

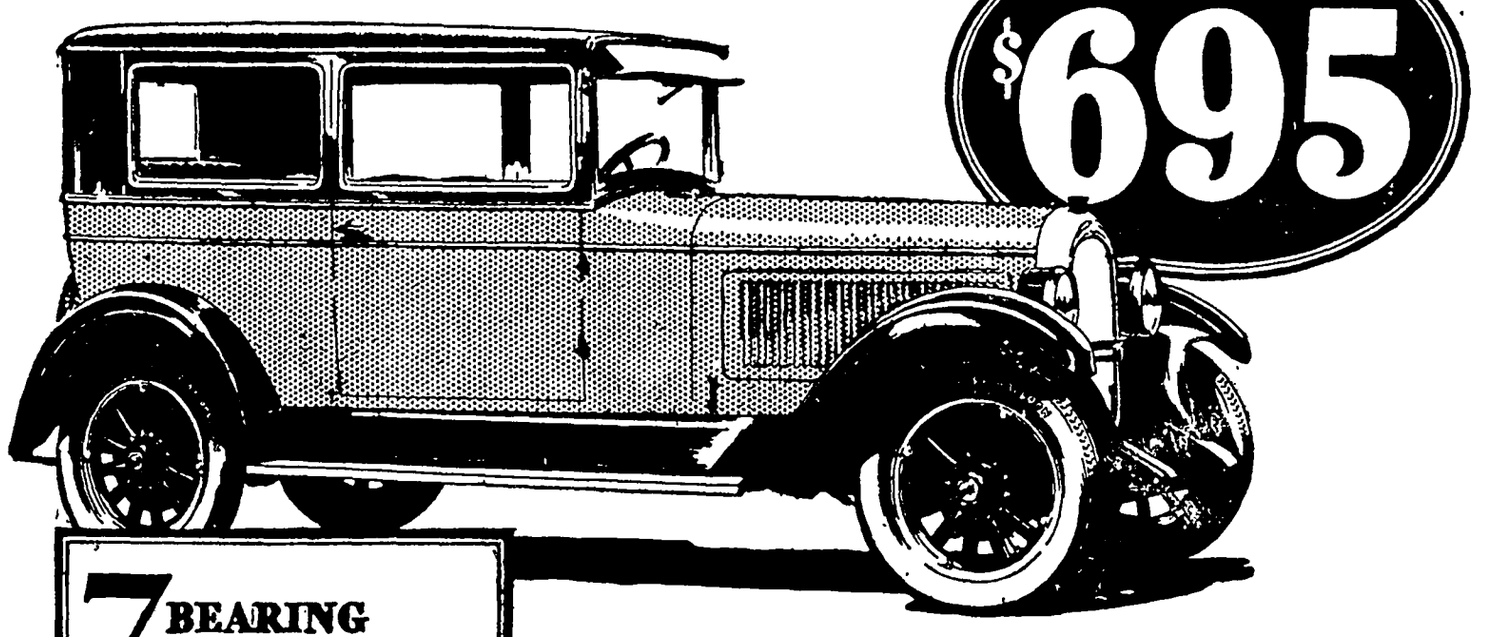
In a small home garden, plants can be saved from cutworms by putting a collar of stiff paper in the ground around them. This should go into the ground two inches and reach that high above it.

* * *

Watch the young cabbages and nip the cabbage worms. When white butterflies put in an appearance they mean cabbage worms. A spray with an arsenic compound will check them in a hurry.

ANNOUNCING

THE World's Lowest Priced Six



7 BEARING CRANKSHAFT

Full Force-feed Lubrication

"Busy" Men Can Learn Lesson From Genesis

"Big Business is Too Busy," says Bruce Barton in McClure's Magazine. He begins his article with this suggestion:

"Once a year the president of every company should assemble his entire staff and read the first chapter of Genesis aloud. It is the supreme record of the way in which work used to be done.

"A clear-cut program.

"An early morning start.

"No conversation or consultation.

"Each day's work finished at the end of the day.

"Real rest at the end.

"Let us refresh our memories with a glance at the seven-day program:

"First day—The Almighty said:

"Let there be light; and there was light.

"Second day—The Almighty said: Let there be a firmament . . . and it was so.

"Third day—The Almighty said: Let dry land appear. Let the earth bring forth grass and herbs and fruit trees . . . and it was so.

"Fourth day—He made the sun and moon and stars.

"Fifth day—He created all fish and fowl.

"Sixth day—He created animals; also Adam and Eve.

"Seventh day—He rested."

New Thrill for Hunters

Wildcat hunting with dogs has replaced fox hunting in the favor of people of Miami, Fla., where these vicious felines are plentiful in the back-country. A recent hunt staged under the direction of Col. D. D. Young as huntsmaster had a spectacular climax when the pack of 20 hounds treed the cat west of Miami, and Howard Hill, archery professional and quarter Cherokee Indian, made the kill with bow and arrow at 35 yards.

Almond Varieties

Almonds are of two kinds—bitter and sweet. The bitter almond is cultivated to a limited extent in Mediterranean countries, and the nuts are used in the manufacture of flavoring extracts and of prussic acid. The sweet, or edible, almond is grown on a commercial scale in the south of Europe, in California and in some other countries.

Leap-Year Hint

Mr. Bach (moralizing)—"After all, man is weak." Miss Willing—"In union there is strength."

At the Movies

"I'm getting kinda tired of taking my children to the picture show in town," said Gap Johnson of Rumpus Ridge. "They always get into a row with the Betts kids, and the Bettses usually lick 'em, and I have to fight Buck Betts, their dad. My kids gener'ly tote rocks in their pockets and pour 'em to the young Bettses.

"Well, tuther night they took their rocks and broke up the show and durn' nigh broke up the Betts kids. Then Buck Betts came running with his gun in his hand and driv' me and my kids out of town. I'm getting sorter weary of the picture show, somehow."—Kansas City Star.

If You Need a Tonic, Get the Best!

Sedalia, Mo.—"I can recommend Dr. Pierce's Favorite Prescription all right, although I took only a small amount of it, what I did take relieved me. I could hardly walk and just hurt all over. The doctors I had could do nothing for me it seemed. But as soon as I learned about the 'Favorite Prescription' I began taking it and I was soon all right. It certainly is a great medicine for women."—Mrs. Amy L. Paxton, 1003 E. Third St. In Liquid or Tablets, at all Drug or General Stores.

Send 10c. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. Tablets and write for free advice.

Sign Was Correct

Mrs. Hopkins—I thought your sign read: "Photos While You Wait?"

Photographer—It does, madam, but, as you'll have to wait four days, maybe you'd rather wait at home.

Every girl knows at least a score of men, any of whom she could have married—had she asked them.

Some fools have the gift of speech and some wise men have the gift of silence.

DON'T suffer headaches, or any of those pains that Bayer Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for *Bayer*. And don't take any but the box that says Bayer, with the word *genuine* printed in red;

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

For Foot Rot in Sheep and Fouls in Hoofs of Cattle
HANFORD'S BALSAM OF MYRRH
Money back for first bottle if not suited. All dealers.

W. N. U., DES MOINES, NO. 19—1928.

Here's Speedy Relief From Bunion Pains and Soft Corns

Get a two-ounce bottle of Moone's Emerald Oil (full strength) today. Every well stocked drug store has this, with the distinct understanding that your money will be cheerfully returned if it does not reduce the inflammation, soreness, and pain much quicker than any remedy you ever used.

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the inflammation is gone.

And as for Soft Corns a few applications each night at bed time and they just seem to shrivel right up and scale off.

No matter how discouraged you have been with pads, shields, or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees the first bottle of Moone's Emerald Oil to end your foot troubles or money back.

Buying On The Installment Plan--

About 75% of the Automobiles now-a-days are bought on the Installment Plan. If you can pay a couple of hundred dollars down you can have a nice car.

WHY NOT GET A HOME ON THIS INSTALLMENT PLAN?

We can make it possible for you to live in Your Own Home while you are paying for it and when the last payment is made you will not know that you have been inconvenienced in the least, and furthermore, it will not be ready for a good trading off on account of being out of date or worn out.

If you ever have a dream about owning your own home and want help or the thot ever enters your head that you would like to be able to say, "Let's get a home of our own," you make a beeline for the NORTHERN LUMBER COMPANY and I'll bet you a nickle if you have any determination that in side of a few years you will be realizing what you had been dreaming or thinking of.

Come in any time and we will talk this matter over with you.

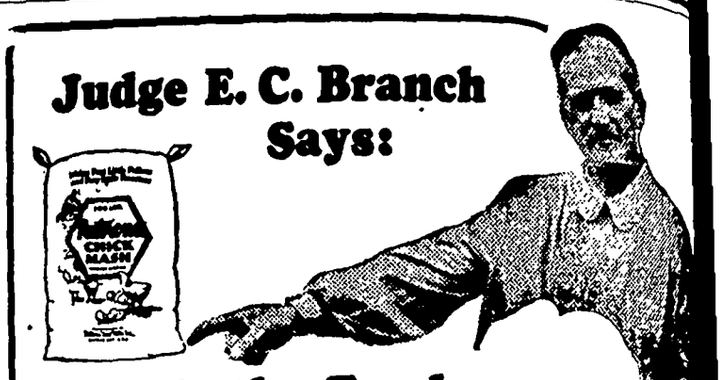
Judge E. C. Branch Says:



"That's the Feed That's Safe to Use"

250,000 users and boosters of NUTRENA Chick Mash acclaim the fact that its the "Feed that's safe to use." It is not necessary to hatch two chickens to grow one to maturity. Chick losses from feeding are out of date for NUTRENA Feeders.

Nutrena
REG. U.S. PAT. OFF.
CHICK MASH
WITH COD LIVER OIL

It is a complete feed for chicks of all ages. From first feed to maturity. Grows laying pullets in from 5 to 6 months. It is the safest feed to use, regardless of conditions. Simple, easy to follow feeding directions in every bag. 100 lbs. feeds 100 chicks first five weeks. Costs just one penny more to feed a chick thru the danger period than ordinary scratch grains. Every chick is entitled to life; you do your best for him when you feed NUTRENA. Your dealer has a supply for your convenience. Have a sack on hand for hatching day.

Prevent Leg Weakness and White Diarrhea
Cod Liver Oil in NUTRENA Chick Mash helps prevent leg weakness. It enables you to grow chicks indoors during the early spring successfully. Brings them thru to profitable 2 lb. broilers at 8 weeks, and 4 lb. at 14 weeks. Selected Dried Buttermilk helps prevent White Diarrhea and other intestinal diseases. Raise every chick possible this year. NUTRENA Chick Mash will enable you to do this.

ORMER RESIDENT MET TRAGIC DEATH

S. CHAS. GRUETZMACHER IS VICTIM OF FATAL ACCIDENT

sband Visiting In Klemme At The me Of Her Death in Minneapolis

Mrs. Charles Gruetzmacher, of mo Springs, Iowa, passed away rly Sunday evening at the home her daughter, Mrs. Franey, of nneapolis, a few hours after she d been struck by a street car and ceived fatal injuries.

Mrs. Gruetzmacher had gone to nneapolis for a visit with her ughter and Mr. Gruetzmacher had anned to join his wife a few days ter and was visiting with his other, Frank, in Klemme at the me Mrs. Gruetzmacher was injur- and left imediately when the re- rt of the accident reached Klem- e.

According to a news report Mrs. ruetzmacher was returning from a metery where she had been to ace flowers on the grave of her n and returning to the street was ruck by a street car. The motor- an reported that she stepped in ont of the car from behind a pole.

Frank Gruetzmacher and J. E ille, of Klemme and George Gru- zmacher, of Garner, left early ednesday morning for Minneapo- s to attend the funeral services, hich were held in the afternoon.

Mr. and Mrs. Charles Gruetzmach- are former residents of Klemme nd lived here for several years af- r their marriage. They lived for number of years in Minneapolis, nd more recent years moved to lme Springs.

Mrs. Gruetzmacher was a woman out sixty years of age.

ISHING SEASON OFFICIALLY OPENED TUESDAY

nly A Few Good Catches Reported On Opening Day

Tuesday, May 15th, was a great ay for many North Iowa outdoor portsmen, as that was the official pening day for game fishing in the orthern Zone of Iowa.

Clear Lake was literally covered ith boats and anything which was f a floating nature was on the lake lled with enthusiastic anglers. The ay had all the ear-marks of a good pike day," as the wind was blow- ng fairly stiff and waves were roll- ng just about right. However, the eather was none too warm and has een quite cold for the past weeks. Pike were striking, but were not itting hard enough to hook and heir strikes were invariably short. However, a few good strings were rought in during the day. Ye Edi- or came in for his share and at east had a good meal of pike.

NEW ELECTRIC WATER PUMP IS INSTALLED AT CREAMERY

Throws Stream Of 720 Gallons Per Hour: A Good Supply Now

The force at the Creamery, with the aid of two men from the Hawk-eye Supply Co. put in Monday night and nearly all day Tuesday installing a new Gould's Centrifugal Electric Water Pump. This machine will furnish a full stream of water from a 1½ inch pipe at the rate of 720 gallons of water per hour. For a run of twelve hours 8,640 galons of water can be supplied for the needs of the creamery, which has for some time been up against it for lack of sufficient water Buttermaker Gimer believes this new pump will supply all that is needed, providing the well will hold out for the arge amount used daily.

ELL TOWNSHIP GIRLS CLUB IS RE-ORGANIZED

Saturday afternoon, May 5, twelve girls met at the home of Mrs. Chas Griffen for the purpose of organizing a 4-H sewing club The following officers were elected: president, Luella Goll; vice-pres., Pearl Newberger; secretary-treas., Charlotte Greiman; reporter, Mildred Hampel.

Various things relating to sewing will be studied such as sewing equipment, attractive summer dresses, care of clothing, patterns and construction problems.

Music, footwear and feet will be studied also. During the business part of the meeting it was decided that the members should select a new name for the club. The S. S. S.'s of Ell Township was chosen as the name of the 1928 club. The name stands for simple, serviceable sewing.

Mrs. Chas. Griffen will act as the leader this year. Other new faces in the club are Nellie Stromer, Charlotte Greiman, Lydia Pearson, Alveda Mullen and Ethel Barz. At the close of the meeting delicious refreshments were served by the hostess. The next meeting will be May 19, at the home of Luella Goll

SENIOR CLASS PLAY WAS BIG SUCCESS

"Cat O' Nine Tails" Kept Audience In Suspense

The Senior Class Play, "Cat O' Nine Tails," given Friday evening packed the house and $127.70 was taken in for the one performance.

Miss Wilma Trumbell, principal of the high school directed the play and is to be complimented on her excellent coaching, as the various parts were difficult for amateur actors but the parts were well played. The mystery was finaly cleared up in the last act when to the surprise of all Alvin Thieman proved to be the "Cat O' Nine Tails."

Held Training School

A training school for the local leaders of Twin Lake township was held Thursday at the home of Mrs. Eliason. Miss Ramer gave the lesson on foot health, the care and selection of shoes and hose. A picnic lunch was served. The follow-up meeting will be held at the home of Mrs. J. Kudje, Jr. this afternoon.

Lloyd Wistey came in from Omaha Friday for a visit with his sister, Mrs. E. F. Jacobs here, and with his parents at Clear Lake. Lloyd is going to school at Omaha where he is making a study of advertising. Besides coming for a visit Lloyd came home to have a tonsil operation performed.

A GOOD ATTRACTION AT THE IDLE HOUR FRI. AND SAT.

Special Program Arranged For This Friday Evening

In co-operation with the Klemme High School the Ladies Auxiliary, managers of the Idle Hour Theatre, have arranged a special program for this Friday evening to which the public is invited.

Besides the feature picture on the screen, a very high class type of entertainment has been provided for following the pictures, "Mary Louise Smith's Box of Trix," with Dorothy Hicks, accompanist. This group is composed of eight little girls under twelve years of age who will put on the following program:

Harmony Duet, ...
Jean and Catherine Curtis
Coquette Mary Louise Seeley
It All Belongs to Me..... .....
.... Marian Hayes
Pizzicatto Pola, Betty Ann Shepard
Real Estate Papa. .. Jean Shepard
Raggedy Ann and Andy. .....
Beth Carter, Jean Curtis
Lucky in Love .. . Marian Hayes
Sunshine . . Bety Ann Shepard
Fifty Million Frenchmen.....
.. .. Jean Shepard
Novelty Solo. ..... Jean Curtis
Whirlwind ..... Mary Louise Seeley
Did You Mean It ....Catherine Curtis
Acrobatic Novelty .. .. Betty Edwards with Catherine Curtis
When The Morning Glories Wake
.. .. Up, Entire Group

The feature picture for the evening is "The Gateway of the Moon."

This picture will be shown again on Saturday evening and with it the regular comedy feature.

The special attraction featuring the little girls is Friday evening only School children 10c, high school pupils 15c, and adults 30c. for Friday evening. Saturday prices are regular.

FARM BUREAU LADIES HELD MEETING AT LENZ HOME

Girls Club Work Will Soon Begin For The Summer Months

The Farm Bureau Meeting of the Ell and Liberty Township Ladies was held at the Wesley Lenz home Friday. Quite a large crowd was present to get the last lesson for this spring on hose, shoes and the care of the feet. The Girls Club Work will soon begin for the summer months and the work this year will be sewing, with Ruth Lenz as leader.

A. J. Kudje, Clerk

SPECIAL COUNCIL MEETING

Klemme, Iowa,
April 10, 1928

Special meeting of town coucil held at Mayor's office.

Meeting called to order by Mayor Grange, with Suckow, Schuldt, Missman and Larsen present. Larsen appointed Clerk pro tem.

County Engineer Merten and business men present and the matter of the roads west of town discussed.

The members of the council were appointed to act as a committee with the assistance of Editor Jorgenson to see the County Auditor and get any and all information possible and make a report so that whatever action is necessary may be taken before the meeting of the Board of Supervisors before April 17, 1928.

On motion the council adjourned.

C. A. Larsen, Clerk Pro. Tem.

Walter Blumer was at Jewell on business yesterday. He stated it did not rain there and he encountered no rain returning until he reached Belmond. This vicinity had a good rain which fell nearly all day Wednesday.

CORWITH WILL PLAY BALL AT LOCAL PARK SUNDAY

Klemme Ball Team Lost First Game To Leland There Last Sunday

Klemme has scheduled a home game for next Sunday afternoon at the local diamond when they will meet an old rival, Corwith. This looks like a good game, as in the past Corwith and Klemme teams have put up some good, exciting encounters.

Hamilton, of Goodell, and "Abe" Lauritsen will perform on the pitchers mound for Klemme. Tanner is behind the bat.

Lost Game To Leland

Klemme played their opener last Sunday at Leland and took home the short end of the score, 5-10, in favor of Leland This was the first game of the season for the locals who benefited by the experience and found a few weak spots to mend. Ben Greiman opened the game on the mound and "Abe" Lauritsen put on the finishing touches. This was Ben's first attempt in that position.

The game here Sunday is called for 2:30 o'clock.

Twin Lake Farm Bureau Meeting

The next regular meeting of the Twin Lake township farm bureau will be held at the Center School House, Friday evening, May 18. A good program has been planned and all are invited. Mr. Rickansrud of Kanawha will speak.

KLEMME REFORMED CHURCH
Calvin Grosshuesch, Pastor

10:00 a. m. English service.
11:00 a. m. Sunday school.
Baccalaureate address at 8:00 o'clock p. m.
8:00 p. m. Tues. Young Peoples Bible Class.
8:00 p. m. Saturday, Junior choir

Johnnie—"Mrs. Jepson, can I use your telephone?"

Mrs. Jepson—"Certainly, Johnnie. Is yours on the blink?"

Johnnie—"Not exactly, but Sis is using it to hold up the window, Ma is cuttin' biscuits with the mouthpiece, and the baby is teethin' on the cord."

Lester Stille and Ethel Wellemeyer both have bandaged up eyes due to infection, and to save time both make regular journeys together to a Mason City specialist for treatment and under his care both are making a good recovery. Miss Ethel has been suffering several months with an ulcer on the eye. Mr. Stille's trouble developed more recently when he got a splinter in his eye, causing infection of a severe nature and which hinders him in his farm work.

The M. E. Ladies Aid meeting was postponed a week but is meeting at the Parish House today. Mesdames John Johnson and Fred Kluckhohn are the hostesses for this meeting.

The little Reemstma baby has so fully recovered from its recent mastoid operation that the Reemstma family were able to bring it to town with them Saturday evening.

Frank Gibbs and Harl Gimer, of Morningside College, Sioux City, "hiked" their way home last Saturday to spend the week end with home folks here. They returned to Sioux City again Sunday in the Gimer Buick, a more certain and speedy mode of traveling than that which the boys used in coming home.

There were no services at the Klemme Reformed Church Sunday, as the pastor, Rev. Calvin Grosshuesch filled the pulpit at Waukon on that date. He drove there Saturday and returned Monday.

Mr. and Mrs. Theo. Wright, of Belmond, drove up Friday evening to attend the senior class play. Miss Wilma Trumbell, who directed the play and is principal of the Klemme High School, makes her home at the Wright home when not on duty at school during vacation.

BACCALAUREATE SUNDAY EVENING

REV. GROSSHUESCH WILL GIVE SENIOR CLASS SERMON

Commencement Exercises Will Be Held Next Week Friday Eve

On Sunday evening of this week, May 20th, the Annual Baccalaureate Service will be held. This year it is to be held at the Klemme Reformed Church and Rev. Calvin Grosshuesch will deliver the class sermon. The program will be substantially as follows:

Baccalaureate Service, Klemme Public Schools, May 20th
At The Klemme Reformed Church

—Program—

Procesional March .....
.....Miss Lenora Wheatman
Invocation ..... Rev. A. W. Gauger
Hymn ..... Congregation
Scripture Reading ..... Rev. Gauger
Song, ..."Praise Ye The Father"
H. S. Girls Glee Club, Directed by Mr. D. M. Lewis
Sermon ... .Rev. C. Grosshuesch
Song ... . Audience
Benediction .... Rev. C. Grosshuesch
Recessional ..... Miss Wheatman

All are invited to attend this service Sunday evening.

Junior-Senior Banquet This Friday Evening At Gym

On Friday evening of this week the Juniors will welcome the faculty and Senior Class to a banquet at the school gymnasium. Rather elaborate preparations are being made for the affair under the direction of Miss McGinnes, our Home Economics Instructor. A program of after-dinner speeches and toasts will be given. Claire West, president of the Junior Class, will act as toastmaster.

Managers of our local theatre have planned a special program for our faculty and high school for the same evening, and to which the public are also invited. Pupils from Miss Smith's dancing school of Mason City have been engaged for a program of classic dancing and a number of songs, we understand, to furnish a bit of diversion. The banquet and program at the school will be called early that those in attendance can later enjoy the picture and esthetic dancing up town.

Commencement Next Friday

Final examinations will begin on Tuesday afternoon and conclude on Thursday morning, leaving teachers little enough time to grade papers and get out their annual term reports. Friday following will be occupied with a class day program at the school gymnasium at 10 a. m. followed, perhaps, by a picnic dinner there and a game of base ball with Goodell at 2:00 p. m., and the Commencement the same evening at 8:00 p. m at the school house.

Grant Of Nashua Will Speak

We have been led to believe we have chosen well a Commencement speaker in the person of Rev. Raymond Grant, of Nashua. We invite friends of our school to this our last school program of the year, confidently predicting they will feel they have been well repaid.

Class Play Was A Success

We desire to express our appreciation for the splendid house that greeted our Seniors in their Class Play. The door receipts were well over a hundred dollars. But considerable expense was involved in staging the play and the class will be left none too much to defray other expenses of graduation.

We Like This One

"May I print a kiss on your lips?"
I said,
And she nodded a sweet permission.
So we went to press and, I rather guess,
We printed a full edition.
"One edition is hardly enough,"
said she, with a charming pout.
So again on the press the form was placed.
And we got some extras out.

—Briscoe News.

GEN. SUMMERALL AT FIRST DIVISION MONUMENT ©Harris & Ewing

By ELMO SCOTT WATSON

Romagne-Sous-Montfaucon, France. — The "wooden crosses, row on row" of World war days no longer mark the graves of 23,500 American soldiers who lost their lives in the World war and lie buried here.

Marble slabs now mark each grave.

General Pershing has signified his desire to place the last marble slab on a grave here when the work is completed.

The last wooden cross to be replaced will be taken back to the United States.

THE above dispatch which appeared in the newspapers recently tells how America is planning to give Memorial day this year a special significance by finishing the work of erecting more enduring individual memorials to her sons "who sleep in foreign fields." For by May 30 the last historic white wooden cross which marks the resting place of an American soldier who lost his life in the great war, will be replaced by a Carrara marble cross on which will be engraved the name of the soldier, his regiment, his home state and his decorations, if any, received during the war.

Two years ago congress made an appropriation of $548,855 in the War department budget for this purpose, the estimate being based upon the slab type of marker. The American battle monuments commission, of which General Pershing is chairman, later decided upon the stone cross marker instead of the slab and this was authorized by congress. When it was found that the original appropriation would not be enough, since the crosses cost a little more than the slabs, the present congress appropriated an additional $186,000 to complete the work of erecting those markers over approximately 31,000 graves in Europe.

According to figures compiled by the quartermaster general of the army, 30,502 American soldiers are now buried in the eight American cemeteries in Europe. The largest cemetery is at Romagne-sous-Montfaucon in the Meuse-Argonne region where 14,045 of the new white crosses will stand "row on row." In the Oisne-Aisne cemetery there will be 5,934; St. Mihiel, 4,141; Aisne-Marne, 2,212; Somme, 1,816; Suresnes, France, 1,506; Flanders Field, Belgium, 365; Brookwood, England, 437. Originally there were about 3,100 soldiers who had not been accounted for and were listed as missing, but that number has been gradually cut down as new identifications have been made, so that eventually the total of 31,200 graves (the latest number given by the battlefields monuments commission) will be marked.

These individual markers, however, are not the only monuments which are to stand on European soil in memory of the Americans who redeemed it from the enemy at the cost of their lives. Sixteen memorials are to be erected under the direction of the battle monuments commission in the localities most conspicuously identified with the actions fought by American troops, and five addition monuments will recall the service of the American navy. Two years ago congress appropriated $3,000,000 for that purpose and this year's budget of the War department includes an additional $600,000 to carry the work forward. The survey of the sites for the monuments has been completed and the designs for the memorials, made by some of the outstanding architects of the country, have been accepted by the commission, so that Memorial day, 1928, finds the project for honoring America's World war dead well under way.

In selecting sites for the memorials the commission attempted to give an idea of the widespread use of American troops in various sectors from the North sea to the Swiss frontier and in deciding upon the type of memorial it decided to build three large monuments in the places where the greatest American military operations took place and to mark the sites of other engagements and historic points with more modest memorials. Accordingly the three great memorials will stand at Montfaucon in the Meuse-Argonne, at Montsec in the St. Mihiel area and at Chateau-Thierry in the Aisne-Marne region.

The Meuse-Argonne monument at Montfaucon, which will cost more than $400,000, will commemorate one of the greatest American operations of the war. The town of Montfaucon, which stood on one of the dominating hills of the region, was captured by American troops in the offensive of September 26, 1918. The town itself, now only a mass of ruins, is to be preserved in its present condition by the French government as a relic of the war. The American memorial will be an imposing column, 165 feet high and 24 feet in diameter, topped by a statue of Liberty.

The monument at Montsec, to be erected at a cost of $230,000, will be a magnificent temple, 80 feet square and 55 feet high. It will commemorate the reduction by American troops on September 12, 1918, of the St. Mihiel salient, which had projected into the allied lines for four years and had been considered impregnable up to that time.

In Flanders Fields

In Flanders fields the popples grow
Between the crosses, row on row,
That mark our place. While in the sky
The larks, still bravely singing, fly,
Unheard amid the guns below.

We are the dead. Short days ago
We lived, felt dawn, saw sunsets glow,
Loved and were loved—but, now, we lie
In Flanders fields!

Take up our quarrel with the foe!
To you, from falling hands, we throw
The torch—Be yours to bear it high!
If ye break faith with us who die
We shall not sleep, though poppies blow
In Flanders fields.

—Lieut. Col. John D. McCrae, C. E. F.

This battle was one of the most brilliant actions by the Yanks during all their service in France. The Chateau-Thierry monument, also costing $230,000, will be somewhat similar to the Montsec temple, 600 feet high and with a colonnade 55 feet long. Although the Montfaucon monument will be largest of the three memorials, it is doubtful if it will have a greater appeal to the American people than will the one at Chauteau-Thierry which will recall to their minds the deathless valor of their countrymen who there stemmed the German drive toward Paris in May, 1918, who blocked the last great German offensive on July 14, then helped in the drive south of Soissons on July 18, which compelled the German forces to retreat, and took part in fighting the enemy back to the Aisne river.

Monuments commemorating American service in other sectors will be erected at Audenarde and Ypres in Belgium; at Bony, Juvigny, the Vesle river, Soissons, Sommepy, the Meuse river, Sedan, and Cantigny in France; and in Rome. Two other monuments will be erected, one to be known as the Sector Occupation monument and the other the Monument to the Services of Supply. The Sector Occupation monument will list the sector service of all American divisions in France and will stand at Nancy, which was centrally located in the American sectors. The Services of Supply monument will be a tribute to the American soldiers who did not see front line service, but who contributed their share to the victory.

The service of the American navy in the World war will be commemorated in five monuments to be erected in widely separated localities. One will stand in England and will recall the activity of our fleet in the vicinity of the British Isles. Another at Brest, France, will commemorate the escort of troop transports and other service in the waters of continental Europe. Others will be erected at Corfu, at Ponta Delgada in the Azores and Gibraltar.

The erection of these beautiful and impressive monuments in the European cemeteries is something in which all Americans have a sympathetic interest, especially as Memorial day approaches each year. For the World war gave a new and poignant meaning to Memorial day for thousands of American families. Before 1918 the observance of Memorial day was for many a patriotic duty alone and their participation in it was more or less impersonal. True, they could not help feeling a thrill as they watched the little group of veterans—men who fought under the Stars and Stripes in '61, or perhaps in '98—as they marched to the cemeteries to pay their tribute of respect to their comrades who would march no more. But perhaps not one out of ten who helped strew flowers on the graves were saddened by the knowledge that this act of remembrance was all that they could perform for a father, a brother, a son or a friend.

But how different it has been since 1918! To how many thousands does Memorial day have a more personal significance because there have been added to the list of those we honor on May 30, the names of more than 46,000 World war dead whose bodies were returned to this country for burial and the names of more than 31,000 who still "sleep in foreign fields"!

The relatives and friends of the 46,000 can have the joy of paying their tribute in person at the graves of their soldier dead, but this high privilege is denied those who would honor the memory of some one of the 31,000. But they can find some happiness in knowing that their fathers and brothers and sons truly "sleep in beauty." "No graves anywhere and no cemeteries in the world are better cared for than these," declared Congressman Guy U. Hardy of Colorado after his return from an official tour of the war cemeteries abroad. "I have seen hundreds of cemeteries where millions of the soldiers of the World war are buried. The English cemeteries are fairly well kept up. The French and German cemeteries have a sadly neglected appearance. The American cemeteries are the best cared for of all.

"They are located in picturesque spots near the great battlefields in which most of the men buried lost their lives. No two of the cemeteries are alike, but all are uniformly beautiful, well-arranged and are given excellent care. They are all covered with blue grass and are as green as any Washington lawn. Trees and shrubbery have been planted, beauty spots laid out and developed. At the entrance gate of each is a caretaker's home and hostess house where relatives may find quarters. In the center is a tall flag pole from which an American flag flies always in the daytime.

"One thing that impressed me as I walked around reading the names on the crosses was the fact that there is no distinction given to rank or prominence. I found a brigadier general laid in an inconspicuous spot with a private on each of the four sides. The rows and rows of crosses stand out in the green field clean and prominent. From miles away over the rolling fields of France, you can pick out an American cemetery with its flag flying and its field of even rows of snowy-white crosses. The American cemeteries are beauty spots in Europe and will be hallowed ground to Americans for centuries to come."

It can be a comforting thought, too, to the friends and relatives of these war heroes, to know that the care which their government has given to the maintenance of their last resting place is supplemented by loving attentions from those who have best reason to remember gratefully the men who rest here—the French people. The American cemeteries, especially that at St. Mihiel, are constantly visited by the French who come to honor the memory of the men who redeemed their land from the invader.

For no matter what differences of opinion there may exist between America and France as nations, the French people hold in grateful remembrance the American boys who once lived among them and especially those who did not go back home after the war was over. How France feels toward America's war dead was summed up by Marshal Foch in an address before the American Legion in France last year when he said:

Let us meditate deeply before these numerous graves.

What lesson they convey in their impressive silence, these men so young who sleep here their last sleep! Had they for one single moment desired, wished and prepared for war with all the atrocities in its wake? Were they menaced in their national interests? Were they animated by desire for glory or hope of gain? Nothing like these sentiments inspired them. But on the day when they saw the justice, liberty and peace of the world menaced by violence and might, nothing could stop them and resolutely they took up their arms.

Abandoning their occupations, families, homes and country, they sailed to fight in a faraway land. They came, fought and fell for the ideal which is ours. They showed us our duty in order to remain faithful to their memory and to the task which they understood and with resolution equal to theirs to safeguard what they won.

Let us maintain the faith which animated them and the close union between the allies which made victory possible.

Horticultural News

BRIDGE GRAFTING TO SAVE TREES

Where the bark of fruit trees has been eaten clean to the wood and entirely around the trunk, that part above will die. When the part eaten off is only a short circle, the trees may be saved by practicing what is called bridge grafting. Bridge grafting is not difficult. when a person knows how, but it is not so easy to make it clear by written instructions, says a writer in the Dakota Farmer. Then, too, it is very seldom that I would advise practicing this method. Then again, from what you say of the rabbits having eaten the bark off as high as they could reach, it would not be practical for even an expert in bridge grafting to save such trees. At least it would not pay. In most cases, especially where the trees are small, it is best to leave them alone. New sprouts will start in the spring, from just below where the bark is girdled, and in nearly every instance these new sprouts will make better trees than the old ones would do through patching. Leave the sprouts grow about as they will during the first summer, then in the spring following, about time buds are swelling, cut all surplus ones off, leaving just a single one of the strongest to make the permanent tree.

There is just one principal objection to this plan. If the trees have been budded when propagated in nursery, and the union is enough above ground that the girdling extends below, the resulting sprouts will be seedlings and not produce fruit according to the variety. Most apples are propagated by root grafting, so the union is nearly always below ground surface; while plums and cherries are commonly budded in the nursery and this kind of union is about ground level, unless planted a little deeper than they were in the nursery. In selecting sprouts a person should have a little knowledge of nursery practices, so that he may know whether the sprout is above or below the union; but in any case the sprout will bear fruit of some kind.

Biennial Bearing Habit of Some Apple Trees

The habit that some apple trees have of bearing fruit only every other year appears to be almost a second nature but this is due neither to habit nor to the character of the tree. It is caused by a lack of nitrogen in the soil. It has been found at the Missouri College of Agriculture that this difficulty can be overcome by a judicious and proper application of nitrogenous fertilizer. Either nitrate of soda or sulphate of ammonia will do the trick. Five pounds of the former or four pounds of the latter applied about the first of April each year will supply the necessary amount of nitrogen.

The idea is to encourage terminal shoot growth this year. It is on these shoots that terminal buds grow. Next year fruit spurs will have come from these buds and the third year fruit will be produced on the spurs.

In Ordering Grapes One-Year-Old Vines Are Best

Grapes are a fruit that most everyone likes and yet many of us experience much trouble in trying to raise our own. In ordering grapes, good one-year vines should be bought. In the case of grapes the two-year plants are apt to be weak one-year vines left over from last year. No advantage is gained in planting two-year vines as they are pruned back to two buds at planting time anyway. Concord, Moore's Early and Worden are the most commonly planted black grapes in the Central West. Agawam and Caco are extra fine quality red grapes. Niagara is a white grape but along with the last mentioned two it is not very hardy. Beta, a medium-sized black grape, is perhaps the best to plant in the North Central West.

Horticultural Hints

One reason why many young trees fail to make a start after planting is due to the fact that the soil was not firmed around the roots.

* * *

Live stock and young trees do not get along well together. Many good starts towards thrifty shelter belts have been ruined by live stock.

* * *

For orchards that are reasonably free from scale insects, the first application of spray material should be put on just as the fruit buds are unfolding and show a pink color.

* * *

Borers prefer fruit and shade trees that are in a weakened condition. One of the first steps in preventing injury by this class of insects is to keep the trees in a strong, vigorous condition.

* * *

The hand sprayer or duster should be cleaned and put into good working order. It may take some time to get new parts, and they should be ordered now. Nozzles and valves may be cleaned by soaking them in kerosene.

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Tender, Aching Swollen Fee

In Just Five Minutes Those So Tender, Aching Feet Get Amazing Relief.

You probably feel like a lot of oth people that about all you can do dust some powder in your shoes or gi your feet a special foot bath and let go at that, but don't be foolish. Ma up your mind today that you are goi to give your feet a real chance to g well.

Go to any good druggist today a get an original bottle of Moone's Em erald Oil.

The very first application will gi you relief and a few short treatmen will thoroughly convince you that sticking faithfully to it for a sho while your foot troubles will be thing of the past.

Don't expect a single bottle to do all at once but one bottle we know w show you beyond all question that y have at last discovered the way solid foot comfort.

Remember that Moone's Emerald O is a clean, powerful, penetrating An septic Oil that does not stain or lea a greasy residue and that it must gi complete satisfaction or your mon cheerfully refunded.

Autos in New Zealand

New Zealand, one of the riche countries in the world, is exceede only by the United States and Ca ada in the number of automobil owned per capita, one car for eve eleven inhabitants. Sales are depe ent upon the financial condition pastoral industries. Most of the c and trucks bought are Americ made.

CAN'T PRAISE IT ENOUGH

Lydia E. Pinkham's Vegetable Compound Helped Her So Much

Kingston, Mo.—"I have not take anything but Lydia E. Pinkham Vegetable Com pound for months and cannot praise it enough. I weigh about 100 pounds and was not able to do any kin of work. My housework was done by mother and my out-of-doors wor was not done. I have taken four bottles of the Vege table Compound and now I am well and strong and feel fine. I got my sister-in-law to take it after her baby came and she is stronger now I cannot praise it enough."—Mrs. Hattie V. Eastin, R. 1, Kingston, Missouri.

IRGINIA PRIVATELY OWNED MOTOR DRIVE

Mill Mountain road, a concrete thoroughfare to the top of Mill mountain, ar Roanoke, Va., is one of the few privately owned tourists' drives in the untry. It was built by Henritze Brothers, who operate it as a toll road, arging 25 cents per vehicle and 12½ cents per passenger.

The pavement rises 620 feet in a distance of 7,041 feet. The average ade for the distance is 8.8 per cent and the maximum is 11 per cent. The adway winds around the mountain, in one place making a complete op, crossing over itself within a distance of 300 feet.

While most of the pavement is 18 feet wide, some of the curves have en widened to 32 feet in order to reduce the accident hazard.

Tourists who have traveled over this road report that the gritty textured ncrete pavement is skid-proof even on rainy days.

IR CLEANERS ON EAVY-DUTY CARS

ower Repair Bills and Increase Efficiency of the Engine.

Heavy duty vehicle owners today e operating their machines with wer repair bills and increased effiency of the engine, due to the great rides of engineering development, ys H. G. Kamrath, research engler. Not only does the automobile llar purchase more today than it d 15 years ago, but the quality of e product has advanced accordingly. Among the many improvements on the esent heavy duty vehicles is the air eaner which removes dirt and dust efore it reaches the carburetor and es the job so thoroughly that damge from this cause becomes absolute negligible. Actual tests have shown at on certain vital parts of the car, e wear is 17 times less than what it as before the air-cleaner equipped r made its appearance.

Dust Always There.

Oftentimes the dust on a good road nnot be seen, but it is there just the me. Truck wheels are constantly inding off fine particles of road maerial which are dispersed through the r. Trucks used in building new ads are virtually bathed in a show of this dust and from the materials ed in highway construction. Viewg these particles under a microscope ey look precisely like the stuff the lve man uses to grind the valves. Without an air cleaner this dust enrs the engine, forms on the cylinder alls and soon becomes thoroughly ixed with the lubricating oil. The evitable result is the formation of grinding compound which, besides tacking the pistons and cylinder alls, is driven remorselessly into the earings and other working parts.

Causes Damaging Work.

Analysis of almost any carbon deosit taken from the average engine hows that it contains a considerable mount of hard extraneous matter at must have been drawn in through e carburetor. This is what does the maging work throughout the engine, wering its performance, shortening s life and causing unnecessary reair costs.

Air cleaners which have been deeloped minimize this trouble and ey are now recognized as essential leading manufacturers.

Motor Exhaust Tested in Setting Carburetor

As an improvement over the usual ethods of adjusting the carburetor process has been developed that akes use of a simple testing apratus to examine the exhaust from e motor and so tell accurately if the roper combustion has been effected, ys Popular Mechanics Magazine. It similar in some respects to the outfit ed in making an analysis of flue ses in steam-generating plants. The to-exhaust tester gives an exact easure of the amount of carbon dioxe in a sample of the gas, so that djustments of the carburetor can be ade until the proper amount is regtered. But little skill is necessary operating the tester.

lan for Parking on a Congested City Street

"When forced to park on a congested street, stop parallel to, and out one foot outside of the car beind which it is intended to park. urn wheels sharply to curb. Back owly until it is possible to see that hen swinging the front wheels hard er to the left the right fender will st clear the left rear fender of the r ahead. Turn wheels fully to left— en back into position. Learn these oints at which extreme turns are to e made. This method will park the r at the proper distance from the rb and in one backward movement, d will cut down the time traffic is eld up while the car is being parked.

Half of Horsepower Is in Automobiles

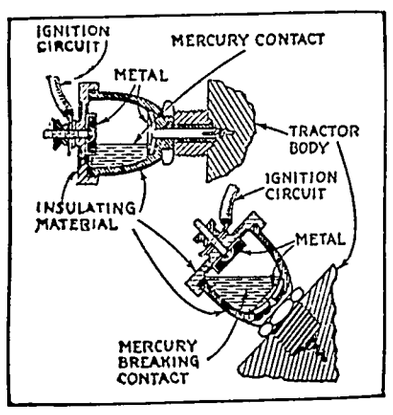
Computations made by a large manufacturer reveal that one-half the horse power available in the United States is in automobile engines.

The total amount of energy which can be generated by all the power development equipment in the country, running full capacity, is placed at approximately 800,000,000 horse power.

Rating the 20,000,000 automobile engines at what is regarded as the conservative figure of 20 horse power each makes their combined capacity amount to 400,000,000 horse power, or just one-half af the nation's total.

Unruly Tractors Curbed by Automatic Cutout

The small farm tractor that drives through cleated rear wheels has one bad habit. When an attempt is made to pull a load so heavy that it is near the limit of pulling power, there is a tendency for the tractor to rear on its hind wheels and if the driver doesn't remove his foot from the throttle quick enough, the tractor may roll over backwards with serious results.



Automatic Cutout Switch.

This peculiar trouble can be eliminated by adding an automatic cutout switch as shown in the illustration. When the switch is horizontal the mercury completes the circuit between the electrodes, but when the tractor starts to rear up on its hind wheels the mercury flows away from one electrode and cuts off the ignition, thus stopping the engine and eliminating the chance of a serious accident occuring.

Ettore Bugatti Proposes New Type of Auto Race

A real race between the world's great automobile drivers but all with exactly the same cars, is being organized by Ettore Bugatti, one of the leading car builders of France. He is anxious to see what different men will do with the same automobile and to determine whether it is the car or the man that wins a race.

Bugatti, whose firm has been entered in most of the big races all over the world for many years, proposes to furnish a large number of cars and let the drivers draw lots for them.

AUTOMOBiLE HINTS

Worn bushings cause many unpleasant noises in motor cars.

* * *

Most well-equipped repair shops are able to recondition an automobile engine in one day's time.

* * *

Pistons are now being made for motor cars of less than one-third the weight of those previously used.

* * *

Capt. Malcolm Campbell, British racer, holds the new world's speed record for automobiles. He averaged nearly 207 miles an hour.

* * *

Maybe that strange Cape Sable fish which the experts cannot identify is a cousin of the new specimen on the automobile number plates.

Fungus Causes Clover Failure

Anthracnose Blamed for Decline in Popularity as Forage Crop.

(Prepared by the United States Department of Agriculture.)

"Clover failure" has been one of the causes for the decline in popularity of red clover as a forage crop. Diseases are among the important causes of the failure of the crop, and of the diseases anthracnose is the most important. In Technical Bulletin 28-T, "Clover Anthracnose Caused by Colletotrichum Trifolii," just published by the United States Department of Agriculture, John Monteith, Jr., of the bureau of plant industry reports studies of the disease. This bulletin is devoted to the anthracnose caused by the fungus Colletotrichum trifolii. A subsequent paper will treat a similar disease caused by another fungus, Gloeosporium caulivorum.

Clover failure was reported in 1905 in Tennessee, and has since been reported in many clover growing sections. Mr. Monteith reports that several other legumes, but not all, are susceptible to the damage. This particular fungus does its greatest damage in the southern part of the clover belt both because the fungus lives over the winter more readily there and more particularly because high temperatures and humidity in that section are more favorable to the development and spread of the fungus at the time it is attacking the plants.

Control by spraying or dusting is not practicable even if it were effective. The injury can be reduced by a change of seeding dates. The fungus thrives in the heat of summer. If seeding is delayed until August, the plants are likely to escape injury and go into the winter in good condition and would then make at least one crop before the fungus is at its height the second year. The common practice of sowing a nurse crop with clover is particularly unfavorable. The clover loses protecting shade and is somewhat weakened when the nurse crop is harvested, and this happens at the time when the fungus finds conditions most favorable.

Best Control.

The best control and one which has proved effective in Tennessee is found in the selection of strains resistant to the disease. Such a strain was developed at the Tennessee experiment station and has retained a high degree of resistance. This resistant strain failed when seeded in New England, but Mr. Monteith reports that the damage there was from a similar anthracnose caused by the other fungus he has studied. Home-grown seed from stock produced in regions where the disease is regularly severe is, in general, more resistant than imported seed, or seed from regions where the disease is not prevalent. Natural selection must be depended on to play an important part, Mr. Monteith concludes, in increasing the degree of resistance in clover grown continuously in an anthracnose infested region.

This bulletin is technical in character and may be obtained free upon application to the United States Department of Agriculture, Washington, D. C.

Individual Feeding of Dairy Cows Is Favored

Different cows have different capacities for converting feed into milk. No man who has not a full appreciation of the wide variation in individual cows will be fully successful as a feeder. Some cows may have natural capacity for producing large quantities of milk, and may not receive feed enough for maximum production. By increasing the feed of the highest-producing cows and carefully consulting the milk sheets on which each cow's daily production is recorded, the skillful feeder will soon find that some cows in the herd will respond to the increased allowance and return a good profit on the additional feed given. On the other hand, there are cows that have a limited capacity for milk production and are very liable to be overfed. By carefully studying each individual cow the feeder will soon ascertain the point beyond which any addition to the grain ration becomes unprofitable.

Short Farm Notes

Cabbage growers need particularly to watch crop market reports. In a short crop year, consider holding part of the crop, unless the fall price is very high.

* * *

Grain growers annually lose millions of dollars from plant diseases. These diseases can be controlled. Stinking smut of wheat is one the most serious of these diseases.

* * *

When tomato plants bear fruit the size of an egg, a top dressing of nitrate of soda or sulphate of ammonia will increase its size and give the fruit a deeper color. Naturally this will also increase the size of your crop.

* * *

All the hardier vegetables, like onions, carrots and beets, should be hurried into the ground. But there's nothing gained by being too brisk with such tender ones as beans and cucumbers. They don't make any headway in chilly weather.

CLOTHES IDEAS FROM ABROAD By Mae Martin

Last fall when I was in France, I admired the dress which the daughter of our hostess was wearing, and she confessed it was three years old, originally rose-beige, now dyed a rich, deep shade of red! The French are eternally surprising you with thrifty little tricks like that—tricks which it pays to imitate.

Most of us have dresses which, if allowed to remain their original color, are discarded or seldom worn. Redyed, they become favorites again.

Just get a package or two of true, fadeless Diamond Dyes, and try your hand at tinting or dyeing. You'll be amazed to see how easy it is to use Diamond Dyes. They never disappoint you. The "know-how" is in the dyes. They are real dyes like those used when the cloth was made. They never give things that redyed look, like make-shift, inferior dyes. The more than sixty colors you can get from them include everything that's fashionable.

My new 64-page illustrated book, "Color Craft," gives hundreds of money-saving hints for renewing clothes and draperies. It's FREE. Write for it, NOW, to Mae Martin Home Service Dept., Diamond Dyes Burlington, Vermont.

Muskrats Save Fish

Muskrats are not generally regarded in the role of life-savers, but their beneficial effects on fish in a government hatchery at Gravel lake, North Dakota, near the Canadian border, have been so great that the animals are being protected from hunters and trappers and are encouraged to build their houses along the shores of the lake, says Popular Mechanics Magazine. In doing this, they keep the waters from being completely sealed over with ice, with the result that the fish are not likely to smother. Both fish and muskrats are multiplying there.

Passing the Buck

Lee—Will you kiss me?

Dora—Isn't that just like a man, always trying to shift the responsibility?

JIM IS HERE"

The sentence that brings everybody to the party—the words that make every party a success—"Jim is here."

Wouldn't you like to be the one that insures a gay evening for the crowd—to be the lion of all occasions—to have parties given just to insure your presence?

You can have the admiration of all your friends. You can be the limelight at every gathering, by becoming a popular songwriter. If you can make clever lyrics, if you can compose a tuneful melody, you are on the road to social success.

Our book "Hints on Popular Song Writing" will teach you how to reach your goal. It goes into detail regarding the popular songs of the day and also fully explains the best method of having your songs published.

DEBROHEN PUBLISHING CO.,
745 Seventh Ave., New York, N. Y.

I enclose one dollar as full payment for a copy of "Hints on Popular Song Writing."

STUDEBAKER'S $795 ERSKINE SIX

Sets Ten New Records by Traveling 1000 miles in 984 minutes

ON April 26, two strictly stock Erskine Club Sedans *each* traveled 1000 miles in less than 1000 consecutive minutes.

The run took place at Atlantic City Speedway, and was supervised by officials of the American Automobile Assn. who verified the stock design of the cars.

As a result, ten new records for stock cars under $1000 were established by the Erskine Six. And Studebaker has demonstrated that its 76-year-old traditions for careful building are carried through in the design, materials and workmanship of this low-priced fine car—named for Albert Russel Erskine, Studebaker's president. That is why this car was able to travel 1000 miles at better than a mile a minute—why you can drive your Erskine Six 40 miles an hour even when NEW—why the Erskine is so economical to maintain and to operate.

A drive in the New Erskine will introduce you to a type of performance as sensational for its price class as that of the World's Champion Commander is to the field of higher priced cars.

Dealers' Opportunities

Studebaker assists dealers to conduct their business on a profitable basis—sales training—financing—used car merchandising—advertising helps—accounting—service—etc. No wonder Studebaker-Erskine dealers make money with these 4 great lines: The new President Eight, $1985 to $2485. The World's Champion Commander, $1435 to $1625. The new Dictator, $1195 to $1395. The new Erskine Six, $795 to $965. Write or wire NOW for complete, confidential information if there is no dealer in your town or if you wish to move to a town where the Studebaker-Erskine franchise is available.

FREE "Trip Through Studebaker Factories"

Every car owner, every family with children in grade or high schools, will want this interesting free booklet, "A Trip Through Studebaker Factories." It pictures how your car is made—shows airplane views of Studebaker's 800-acre Proving Ground—pictures the great Studebaker foundries where castings are made from molten iron ten times hotter than boiling water. Learn more about the 76-year-old company and the 21,000 men who build your Studebaker or Erskine. If you cannot visit the huge Studebaker plants in South Bend this summer, send coupon for this entertaining free booklet NOW!

THE STUDEBAKER CORPORATION OF AMERICA
Department B-4, South Bend, Indiana

Please send me a free copy of your booklet, "A Trip Through Studebaker Factories," without cost or obligation to me.

INDUSTRY HELPS AGRICULTURE BUILD UP THE SMALL TOWN

Decentralization of Manufacturing Brings Markets for Products Closer to the Farm—Gives Employment and Better Standards of Living to Rural Communities.

By T. R. PRESTON
President, American Bankers Association

NO class of people has been more diligent in trying to understand the agricultural problem than the bankers of this country. The agricultural problem is a real problem and demands the best thought of everyone. This country cannot continue along happy lines with only sections of the country prosperous. Prosperity must be passed around if anybody is long to enjoy it. This question cannot be solved by the farmers alone, but the majority opinion is that there is no legislative remedy for agriculture. It is an economic question pure and simple and must be worked out accordingly.

T. R. PRESTON

A few years ago it was contended that agriculture did not have sufficient credit facilities. That proposition was often made a political question. I do not presume there are many who will question the fact that agriculture now has ample credit facilities.

Mixing Farms and Factories

It is a fact that no community and no state has ever become great purely from agriculture. It is not to the interest of New York and other great centers to see the small communities and the agricultural sections losing their wealth and importance. In the end it will react upon them to their disadvantage. There seems to me a real remedy for these small communities and also for agriculture This remedy, which is the mixing of industry with agriculture, is now being applied in many localities with satisfactory results.

Industry and agriculture are better balanced in Ohio, North Carolina and Pennsylvania than in any other states of the Union, and in these states there is no serious agricultural problem and we hear little complaint from the farmers. This mixing of industry and agriculture is called by some decentralization of industry.

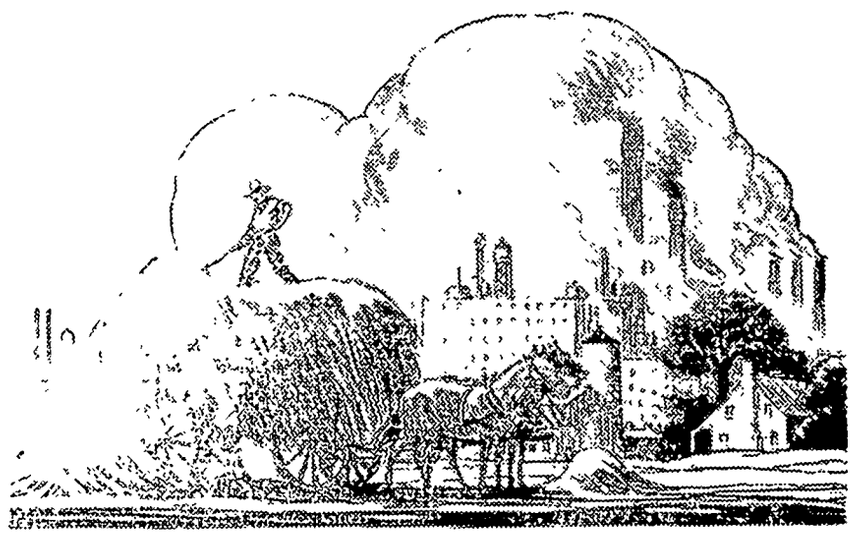
I would not suggest that manufacturing institutions move from the cities to the small villages, but I do think it would be better for this country for future industries to be placed in these small villages rather than to be further congested in the great centers This would in part also be a solution of our labor problem. The bringing of industries to small villages increases the market for agricultural products, gives employment to surplus labor, elevates the standards of living, increases public revenue, reduces taxes and vastly increases educational facilities

Two Striking Examples

I believe I can give you two striking examples from my own state to prove this proposition, and I mention these because I am more familiar with conditions there than elsewhere

Twelve years ago Kingsport, Tennessee, had a population of about one thousand. Great industries like a large camera company, a big cement plant and a number of other industries were located there partly through the influence of an outstanding New York business man In a little more than twelve years these have brough the population of that city up to seventeen thousand Just a few miles away, at Elizabethton, they are building a great rayon plant, the first unit to cost $5,000,000 The population of that town is now two thousand, but it is estimated that this will be multiplied by five in less than two years It is stated that the total investmen in manufacturing industry in that community within a period of five years will probably reach $50,000,000.

The balancing of industry and agriculture will solve most of our so-called agricultural problems and we will no need such political measures as will in my opinion, do harm if enacted to the very class they pretend to benefit.



Mixing Industry With Agriculture Means Prosperity for Rural Districts

THE BANKER-FARMER MOVEMENT GROWING

There are several reasons for the rowth of the banker-farmer movement in Pennsylvania, William S. McKay, Chairman of the Agricultural ommittee, Pennsylvania Bankers Association, has reported to the Agricultural Commission of the American ankers Association The cooperation and leadership of the county ents in the several counties of the te, the appointment and functioning of county chairmen of agriculture nown as Key Bankers, one of whom ere is in each county of the state; nd the organization of county bankrs associations, whereby agriculture given consideration by all the banks, re responsible for this interest. The llowing table shows the activities r the year

Project	Number of Counties
nt young farmers to state college for special course	5
ncouraged farm shows . .	16
ld agricultural tours	6
onsored various club activities	38
ve illustrated lectures on poultry, cow testing, and improved farm methods	1
tributed purebred livestock, chicks, and disease-free potatoes	13

"There is probably no class of business men that has a greater opportunity for helpfulness than the banker in this movement," declares Mr McKay "It builds up a substantial community which makes for better banking institutions; It adds to the material prosperity of our state, but above all, it is the expression of a service which will react favorably upon the character of those interested."

BANKERS HELP OUT

The Oklahoma Bankers Association for the past twelve years has financed through its five groups ten scholarships in the A. & M. College at Stillwater. The winners are chosen by the Extension Department of the college on the merits of the club work done by the boys and girls over a certain period of time. The groups of the association finance the first year of the winner's college work.

The president of a national bank in Fayettesville, Arkansas, has been credited with doing more for the farmers of his section than any other one man His work has consisted of introducing pure bred Holstein cattle into his county, helping employ a county agent, donating prizes to boys and girls in club work, and distributing better seed.

Here are some of the things accomplished in Randolph County, Ark with the help of bankers last year forty-three purebred gilts were bought at a reasonable price and placed with boys and girls, on notes; three thousand eggs from high producing hens were distributed with the idea of developing flocks of at least one hundred hens on every farm; four purebred Jersey bulls whose dams had a record of over 700 pounds butterfat, have been purchased by the banks and will be paid for out of service fees.

Goodell News

(By Special Correspondent)

Jay Griggs was a Ventura caller Sunday afternoon.

Gus O'Krueg was a Klemme caller one day last week.

Miss Wava Bachman spent Sunday with her parents, Mr. and Mrs. Fred Bachman.

Supt Vasey, of Mason City, has been engaged to give the Commencement address May 22nd.

Chris Jacobs of Garner was a caller in this vicinity canvassing voters.

Mrs Clarence Bachman was a caller at the Jay Grigs home Monday.

FOR

Summer Cooking

For your summer cooking what is any better than a good oil or gas stove in your kitchen for making a quick fire without overheatng your kitchen?

Even though you have a good range you will find one of our "summer stoves" a great convenience for every day cooking.

We handle only reliable, tried out oil and gas stoves and we sell and recommend:-

KEROSENE STOVES

New Perfection New Puritan

These come in various styles, improved designs in 2 to 4 burner types.

We have a few makes which we are closing out at special low prices.

GASOLINE STOVES

Coleman Air-O-Gas Stoves

Albert Lea Kitchen Kook

These stovesa re absolutely SAFE and give you a clean, blue flame like city gas.

These come in various sizes and styles.

E. F. Jacobs

Gifts for Graduation

It's time to think of Gifts for Graduates. Let us show you our line of nice, appropriate Gifts—both for the Young Ladies and Young men. We will be glad to help you select the right Gift.

GIFTS FOR GIRLS

We suggest Silk Hose, Underwear, Boxed Stationary, Jewelry, Fancy Dishes, Toilet Articles, Dress Goods, Pyrex Ware, Curling Irons, Etc.

GIFTS FOR BOYS

Boys area lways pleased with Dress Shirts, Ties, Caps, Hats, Belts, Silk Socks, Pocket Knives, Fishing Tackle, A Good Flash Light, Base Ball Mitts or Gloves.

K. H. S. COMMENCEMENT, MAY 25th

Congratulations To The Class Of 1928

G. W. Kluckhhn & Sons

Stronger Every Year

On March 31 this year the Central States Electric Company was much larger than on the same date last year.

Its property was much more valuable;

Its earnings were over $900,000, an increase of over $131,000 in the year.

Its kilowatt hours of electricity had increased moret han 1,800,000 to a total for the year of over 11,600,000.

The gas section of the business increased remarkably during the year,

And the Company had an increase of over 1,300 customers for the year;

And more than 800 new investors in the preferred stock, alone, were added since March, 1927;

While over 160 old stock holders, since January 1st this year, increased their holdings in the preferred stock.

If you are not yet a stock holder, why not investigate the 6% Preferred Stock and the Class A Common Stock both of which can now be had at $100 a share?

See our local office or inquire of any employee.

START chicks right from the first feeding. Start them on NUTRENA CHICK MASH with Cod Liver Oil and guarantee yourself the profits that are rightly yours. Heavy, indigestible feeds will overload your chick's stomachs and increase their susceptibility to deadly disease. NUTRENA CHICK MASH with Cod Liver Oil is easily digested and is entirely assimilated by chicks. Its bone and muscle building qualities assure the proper growth and development that are essential to successful chick raising.

NUTRENA CHICK MASH with Cod Liver Oil is made from the best grain (no filler used) and thoroughly mixed with Buttermilk and Cod Liver Oil, which builds flesh and bone and guards against disease.

Thousands of successful chick raisers use and recommend it. 100 lbs. feeds 100 chicks for 5 weeks. Try a sack now—make actual results prove NUTRENA'S true value to you.

"I give NUTRENA Chick Mash credit for being the best chick feed I ever used. Do not gamble this year; if chicks are worth hatching or buying, they are worth the slight cost of proper feeding. Have them sturdy and healthy; have 95% of them live to pay you back for your time, trouble, and expense. Feed NUTRENA! F. B. BIGELOW, Blair, Nebraska

Mr and Mrs Fred Bachman and daughter, Bonnie, were business callers at Hampton last week Monday

Mr and Mrs Fred Bachman and daughters, Bonnie and Mrs Robt Roths, were business callers at Mason City Tuesday and also to visit their daughter and sister, Wava, who is working there

CORRECTION

Our corespondent has called our attention to an error in last week's items which was caused in making up the paper in which lines were accidently reversed The item stated Mr and Mrs Will Reuben and family, of Kanawha were visitors at the John Bachman home Sunday afternoon," and it could have read they visited at the Peter Trampel home The other item, "Mr and Mrs Hamm Beek were visitors at the Peter Trampel home Sunday afternoon," when this should have been at the John Bachman home The lines of type evidently exchanged places and we regret the error in this report.—The Editor

Send in your news items or call us on the phone We want the news and are glad to have your co-operation Times Office.

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

NEWS REVIEW OF CURRENT EVENTS

Watson Defeats Hoover in Indiana—Japan Is Fighting Chinese.

By EDWARD W. PICKARD

INDIANA farmers indicated last week that they did not approve of the Presidential candidacy of Herbert Hoover. The vote of the rural districts in the Republican primary was strong enough to give Senator James E. Watson, favorite son, a majority of something like 25,000 over the secretary of commerce, whose strength was mainly in the cities and larger towns; and the 33 Hoosier delegates at Kansas City will vote for the senator at least on the first ballot. Anti-Hooverites claimed the result in Indiana was a severe blow to Hoover's chances, but his supporters asserted he really had won a victory by keeping Watson's majority down to comparatively small figures.

Despite Senator Watson's protestations that he is in the race to win, the politicians nearly all assume that be is a stalking horse for Lowden or Dawes, and the opinion is widespread that the Indiana delegation, or many of its members, will shift to Dawes as soon as the senator releases them, though they may first give Lowden a chance. G. Burt Thurman, the Watson campaign manager in the state, said: "Indiana will be for Dawes or Lowden or any other Republican," with significant emphasis on the word Republican. Maryland Republicans last Tuesday pledged their 19 delegates to Hoover.

Democrats of Indiana voted to send their 30 delegates to Houston instructed to vote for Evans Woollen, the Indianapolis banker whom Tom Taggart brought forward. He was unopposed. The Republicans renominated Senator Robinson and the Democrats picked Albert Stump for the senate. The nominations for governor must be made by the party conventions, for no candidate on either side won a clear majority.

Michigan's state Democratic convention voted to instruct the delegation of 30 to vote as a unit for Al Smith, the opposition being easily squelched. But the fight against the New York governor is not entirely abandoned, for in Alabama the anti-Smith or "uninstructed delegation" faction captured the majority of the state's delegates to Houston. In Texas the bitter struggle to send an uninstructed delegation to the Republican convention seemed likely to win.

SENATOR STEIWER'S campaign expenditures investigation committee has not brought out anything interesting so far except a small display of temper by Herbert Hoover. He was subjected to a long examination as to promises, contributions and political deals and managed to retain control of himself, but when Senator Barkley of Kentucky asked him whether he had advised the manufacturers of chinaware to raise the price of china, he exploded, saying: "I wonder, Mr. Chairman, if the committee is not getting down to dealing with a pretty small type of street slander."

From the other candidates for the Presidential nomination the committee extracted no information in the least sensational.

BOTH the house and senate accepted the conference report on the flood control bill after the measure had been so altered that it would meet with the approval of the President. Three important revisions suggested by Mr. Coolidge were made and it was understood the bill would receive executive approval, although the President still dislikes some of its provisions.

The bill as it reached the President authorizes the expenditure of $325,000,000 for the flood control project, but, according to President Coolidge and Maj. Gen. Edgar Jadwin, chief of engineers, the actual minimum cost will be at least $500,000,000. The bill places final authority in the hands of the President. Actual construction work would be in charge of the present Mississippi river commission under the direction of the secretary of war and the supervision of the chief of engineers.

While the bill declares for the retention of the principle of local contribution toward flood control projects, local interests under the bill must furnish only such additional rights of way as are needed for levees on the main channel of the Mississippi and must maintain the flood control works when completed. The federal government will bear the entire cost of construction of levees and other flood control works and will furnish rights of way for levees along floodways and spillways.

FOR the first time in history the senate has assumed the prerogative of offering advice to the Supreme Court of the United States. By a vote of 46 to 31 it approved a resolution asking that Donald C. Richberg of Chicago, counsel for the national conference on the valuation of American railways, be allowed to intervene in proceedings before the court for the purpose of making an oral argument and filing a brief. The conference Richberg represents was formed some years ago by radical groups and is headed by Senator Norris of Nebraska, who introduced the extraordinary resolution. The case in question is an appeal by the railroads from a lower court's decision upholding the interstate commerce commission's ruling with respect to the determination of valuation for rate-making and recapture purposes.

CHINA and Japan are actually at war, though not officially, because Japan insists on giving military protection to the Shantung railway and to her nationals there. Protests of both the Nationals and the Peking government were unheeded and bloody clashes between the Japanese and the Southerners at Tsinan, capital of Shantung province, followed. There were many casualties on both sides and the fighting continues at the time of writing. Each side blamed the other for the outbreak of hostilities, and each accused the other of brutal outrages. The Japanese commander in Shantung established a neutral zone along the railway and at latest reports had driven the Southerners out of it. The Tokyo government speedily prepared and sent over heavy reinforcements and dispatched additional warships. Then Marshal Chang, dictator of north China, issued a proclamation ordering all his forces to cease fighting the Nationalists, in order, evidently, that the Chinese nation might employ its combined strength in combating the Japanese aggression. In his pronunciamento Chang intimated his intention of soon retiring to Manchuria, stating he was willing to be not insistent regarding national politics, and he concluded with the statement that the ship of state was sinking rapidly and he hoped the people would come to their senses and save the country from destruction.

Suggestions of mediation by the United States have been made but are useless, for Washington has said it would not undertake to mediate unless asked to do so by both sides, and Japan says it will neither ask nor accept mediation. The unofficial government view in Tokyo is that Japan does not consider the present situation war and that therefore the matter can be settled diplomatically between Japan and China. All Americans in the war zone are believed to be safe, though some, including Consul Price at Tsinan, were under fire.

RUMANIA almost had a revolution last week, but the government nipped it in the bud. The peasants gathered in vast throngs—two hundred thousand in Albajulia and smaller numbers in other places—and formulated demands for a change of government and the end of the despotic regime of Premier Bratiano. Some of the leaders wished to have the hordes march on Bucharest to enforce their demands, but others dissented and only a few thousands started on the trek to the capital and they soon quit. At the gatherings the government had stationed large detachments of troops which did not interfere with the deliberations but effectually squelched all the ardor for militant action. An interesting feature of the affair was the fact that Prince Carol, in England with his female companion, plotted to take advantage of the assemblage of the peasants to gain possession of the throne. He intended to send airplanes over to scatter messages to the people, and perhaps to fly there himself. But the British government discovered the plan, frustrated it and ordered Carol to leave the country. It was rumored he might come to the United States. Leaders of the peasants' party denied that they had any part in Carol's scheme.

PREMIER MUSSOLINI, in an official note to Secretary Kellogg, states that Italy is entirely willing to collaborate with the United States in the negotiation of a multilateral anti-war treaty. The State department officials, however, do not like the dictator's suggestion that the United States should participate in an international jurists' conference which would discuss the whole subject of outlawing war. It is not believed Italy will press this point.

JOHN D. ROCKEFELLER, JR., has made public two letters to Col. Robert W. Stewart, chairman of the board of the Standard Oil Company of Indiana, in which he asked the latter to resign his position because of the revelation of Stewart's participation in the Continental Trading company's deals that were involved in the Teapot Dome lease scandal. Mr. Rockefeller wrote Colonel Stewart that he was calling upon him "to make good the promise you voluntarily gave me some weeks ago that you would resign at my request." Stewart up to the time of writing has declined to comment on the matter. Rockefeller is a very large stockholder in the Standard of Indiana, but it was said in Wall street that he might not be able to enforce his demand for Stewart's resignation if the chairman decided to resist. District Attorney Rover in Washington submitted a transcript of Stewart's testimony before the senate Teapot Dome committee to the federal grand jury with a view to his indictment.

PRESIDENT COOLIDGE told callers at the White House the other day that if all projects before congress are approved the required expenditure would be so huge that tax reduction would be impossible. Indeed, he warned, it would be necessary to levy additional taxes. The aggregate expenditure called for would be more than a billion dollars, according to Chairman Snell of the house rules committee. Included in the big projects are: Flood control, at least $325,000,000; farm relief, $400,000,000; Boulder dam, at least $125,000,000; Muscle Shoals, $75,000,000; good roads, $75,000,000; retirement of civil employees, $30,000,000; Welch federal employees' salary increase bill, $18,000,000; Mississippi river barge line, $10,000,000; war mineral relief bill, $5,000,000 to $10,000,000, and vocational training bill, $6,000,000.

BARON VON HUENEFELD, Captain Koehl and Major Fitzmaurice, the Bremen transatlantic flyers, flew from Philadelphia to Chicago and spent two strenuous days and nights there. They were feasted and entertained in various ways, and on Saturday there was a grand parade to Soldier field on the Lake Front where they were formally welcomed to the city. More than one hundred German and Irish societies were in the line of march and took part in the ceremonies. Among the guests of honor were Prof. Hugo Junkers, manufacturer of the Bremen plane, and T. A. Smiddy, minister of the Irish Free State at Washington.

INFORMATION reaching the War department shows that Great Britain's army expenditures during the coming year for the development and purchase of new machine weapons and motorized equipment will be ten times the amount expended by the United States for a similar purpose. The British will spend $5,000,000 in army modernization work. The United States is planning to expend more than ever before in peace time on machine weapons, but its total spendings for testing and new development work will not exceed $500,000.

Of the funds allotted to the ordnance department of the United States army about $140,000 will be utilized for the purchase of trucks, tractors, ammunition power carts, and other material for completely motorizing an infantry regiment. The balance will be expended in tank experimentations and in perfecting new artillery.

HISTORIC LANDMARKS SAVED BY ANNAPOLIS

Maryland Capital Sets Example to Other Cities.

Washington.—American architects, fostering a movement to save landmarks of American communities, point to Annapolis, Md., as a city which has preserved many mementos of its past.

In a communication to the National Geographic society, Dr. Gilbert Grosvenor, its president, describes some aspects of the colonial capital which, in part, follows:

"Annapolis has been preserved as our country's most truly colonial city. You may wander about this fine old community and feel that you are living in those dramatic days when the little city on the Severn had a major part in shaping the course of the nation's history.

"Going down to the water front, you can pick out a sailing craft and vision the square-sterned, 60-ton brigantine, Peggy Stewart, which, on October 15, 1774, arrived at Annapolis from England with an assorted cargo, including 17 packages of tea. Anthony Stewart, the owner of the brig, was a Marylander who had signed the nonimportation agreement. In order to unload the bulk of the cargo, he rashly paid the duty on the tea.

"When he was called to account he begged to be allowed to burn the tea publicly. But he was not to escape so lightly. Finally Stewart purged himself by undertaking to burn his brig, with the tea aboard.

"According to John Galloway, an eye-witness, the majority would have been satisfied to burn the tea; but, however that may be, it was an act that fired the colonies and cast Maryland's lot irrevocably with the forces of freedom. A picture of the firing of the Peggy Stewart hangs on the walls of the statehouse.

Why Carroll Identified Himself.

"Charles Carroll headed the delegation chosen at Annapolis to represent the province in the Continental congress.

"When it came his turn to sign the Declaration of Independence, there was some bantering remark as to whether the signers would hang singly or hang together, if the Revolution should fail.

"Some one added that Carroll would have a chance to escape, because there were so many Charles Carrolls that the British would not know which to seize.

"Thereupon Carroll reached for his pen and added the words, 'of Carrollton,' with a remark that now they would have no trouble to identify him if he were ever called upon to forfeit his life for the part he played in the cause of independence. Carroll outlived all the other signers, dying November 14, 1832, at the age of ninety-five years.

"Begun in 1772, the Maryland capitol is filled with memories of these eventful years. Scores of pictures that grace its walls are of that famous body of soldiers, the Maryland line—companies, regiments, and brigades of which fought on every major Revolutionary battlefield from Massachusetts to Georgia.

"The voice of General Washington himself comes down the years, as he told Ramsay at Monmouth that 'if you can stop the British for ten minutes, until I can form, you will save my army.' He held them thirty minutes! And we hear General Greene saying of a charge by the Marylanders at Eutaw Springs that 'it exceeded anything I ever saw.'

"Maryland withheld neither men nor money that the colonies might be free, and no state, in proportion to population and wealth, contributed more of either.

Contribution to Union.

"While her soldiers were fighting so valiantly, her statesmen, meeting in the halls of the old statehouse at Annapolis, originated a pioneer thought that prevented the colonies from falling apart after their victory. With great foresight, the Maryland leaders realized that the harmonious relations existing between the thirteen colonies must inevitably be destroyed, after the triumph of American arms, by bitter disputes arising as to the ownership of the vast region northwest of the Ohio, east of the Mississippi, and south of the Great Lakes.

"Knowing from boundary experiences with her neighbors the enmity that disputes about land engender, Maryland, though giving unsparingly of men and substance to the Continental armies, refused to sign the articles of confederation unless assured that vacant Western lands would be used to form new states and not to enrich enormously any individual state.

"For a long time Maryland raised her voice alone; but gradually the other states were convinced of the fairness and wisdom of her stand and the necessity of the program she urged, if any lasting nation were to be the fruit of the Revolution. New York, Virginia, Massachusetts and Connecticut generously ceded their territorial claims to the nation.

"But Maryland's clear-sighted and effective course had achieved something far greater than merely removing the cause of future strife between jealous colonies; by her insistence on the creation of a national domain she welded the most effective bond that could have been devised for a lasting union. When peace came the thirteen states found themselves joint owners of this great territory, and their common interest in developing their joint property and parceling it out into new states held them together.

TEXAS LUNATICS TO TAKE UP GOLF

State Lays Out Course on Grounds of Asylum.

Austin, Texas.—Lively times are in prospect on the new golf course which the state board of control is laying out on the grounds of the state insane asylum at Austin. Inmates of the institution make it their principal topic of discussion, and they are already preparing to challenge some of the best golf players of the state for match games. It is the theory of R. B. Walthall, chairman of the board of control, that playing golf will result in much physical and mental benefit to insane patients. The board is preparing to establish golf courses at all of the other nine insane asylums, sanitariums, training schools and hospitals of the state.

"Some of the institutions have more ground than others, but we shall see to it that all get golf courses," Mr. Walthall said. "It will be recommended to superintendents that they set certain hours of the day for certain groups in order that all may get a few rounds every day. If this can be arranged, the 2,000 inmates at the San Antonio asylum, 2,000 at the Terrell asylum and 2,000 at the Austin asylum will get in their 'daily dozen.' The Wichita Falls insane hospital has but 1,028 inmates.

"Many of these inmates already are doing outdoor work, such as gardening, but some kind of sport also is needed. Most of these institutions raise their own garden truck and have dairies that produce sufficient milk and butter. This largely reduces the state expenses and nearly all of the work is accomplished by patients. We had patients recently to put up a building at San Antonio and they thoroughly enjoyed the labor. It did them much good."

Marines' Good Behavior Makes Friends in China

Tientsin—A foreigner's treatment of the Chinese coolies with whom he deals is taken by old-timers in China as a good test of that foreigner's character. Americans in Tientsin therefore have taken pride in the fact that not a single case has been reported of trouble between rikisha pullers and the 3,800 American troops here—3,000 marines and 800 of the Fifteenth infantry—since the marines arrived eight months ago.

Clashes between foreigners and rikisha coolies are not uncommon in the Orient. Some passengers are sticklers for the legal fare while many of the coolies are truculent. The marine and the rikisha boy, however, are good friends. The coming of the Third marine brigade has proved a blessing to the thousands of rikisha coolies who swarm Tientsin streets seeking a precarious living. Last winter hundreds of them spent days on the bitter cold streets without picking up a fare. Now there are hardly enough rikishas to meet the demand. And the American leatherneck or doughboy is not disposed to argue about a few cents after the Chinese fashion; hence new prosperity for the rikisha boy.

John V. A. MacMurray, American minister, expressed official praise over the behavior of the men in Tientsin, saying that it had "contributed toward that better understanding which we all hope to see grow and develop in China."

Millikan Finds Evidence of Continued Evolution

Pasadena, Calif.—Discovery of evidence that the process of creation is going on in the heavens, and the earth, instead of disintegrating, as long has been believed, is going through an endless cycle of evolution, was announced here recently by Dr. Robert A. Millikan, noted scientist.

Doctor Millikan's announcement, made at a meeting of the California Institute of Technology, said while his experiment had not been completed and should not be taken as final, "we may have some confidence in the conclusion."

The findings of Doctor Millikan indicated the atoms which form oxygen, silicon, magnesium and iron—the elements which make up about 95 per cent of the mass of meteorites and a similar proportion of the earth—are being constantly created in the heavens and shot with terrific speed into the body of this planet.

The cosmic rays are held to be energy which escapes in the process of formation of these atoms.

Hen Earns Twice as Much as Stenographer

Vancouver. — Maizie, the world's champion hen, made twice as much money laying eggs for the University of Columbia last year as the average stenographer reaps annually for beating out letters on the typewriter.

Earnings of the famous White Leghorn pullet totaled $2,225 for 1927, according to Prof. E. A Lloyd of the university. Of this total, the proceeds from hatching eggs represented $925, while the sale of breeding stock, which were progeny of the hen, brought $1,300. Maizie broke all records in 1926 by laying 351 eggs in a 365-day test.

Encouragement for Weak, Nervous Women

Sedalia, Mo.—"For some time, until about one year ago, I was suffering with pain in my side and back and was very nervous. This weakened me until I had but little strength. Finally Dr. Pierce's Favorite Prescription was recommended to me as a very good remedy for women and I started taking it. I began to improve right from the start. The aches, pains and nervousness left me and I soon felt better than ever before. I gained in weight and felt stronger than I ever did." — Mrs. Cora Curry, 207 E. Salina St.

SHE WAS SLIGHTLY MISTAKEN

(© by D. J. Walsh.)

THERE'S George Putnam, now," exclaimed Ida Allen, as the train pulled into Helena. "Congratulations," she d, mischievously, "I'll hurry out s not to embarrass you when I ratulate him."

What do you mean?" asked her panion, opening her hazel eyes with surprise, either real or simed. Ida thought the latter and hed, saying, while putting on her "Oh! You didn't fool anybody n you announced you were going isit your aunt in Seattle. We all w just about the time George was ecting to sail for China. Still, I 't know why you wanted to pass big wedding, unless you thought ore romantic to elope. What a , though, that I should strike the e train on my way home from vis- mother."

he other woman laughed mirthly as she said, "Your wild conjecs are a bigger joke. George Putproposed to Elsie Green, at the ton masquerade, and—got turned n, and—I don't want any woman's vings."

don't believe it," cried Ida, inantly. "He has been daffy over for a year."

Over my money, you mean," was cynical rejoinder, "but Elsie has e."

For shame, Joan. George isn't kind of man. Somebody has n trying to make trouble between He didn't propose to Elsie en."

Ask him," taunted Joan, "you say is on the platform."

I will," retorted Ida, flouncing out the pullman, without even bidding fellow traveler good-by.

eft alone, Joan sank back in her t and closed her eyes, entirely abbed in her painful reflections. orge Putnam filled her mind, and smiled derisively although tears led up in her eyes. She finally sed herself as the voice of the por- 's "las' call for lunch" rang through car; then she rose, languidly, and lowed him into the diner.

The dining-car conductor seated her a table where a man was reading newspaper that effectually conled his face. Two or three min- s later the waiter brought his or- , when he put down the paper, and an found herself face to face with orge Putnam.

She flushed, then bowed formally, rmuring his name. He returned salutation with great composure, ving, "Ida told me you were on this in. I was going to look you up aft- lunch, as I could see no reason why rejected suitor should consider him- f a pariah."

He smiled as he spoke, but Joan de no answer, merely folded and folded her napkin nervously and gered the cutlery by her plate.

ller brain was in such a turmoil at she could not converse intelliently. She looked out of the win- w, but the wind blew the engine oke so that at times it entirely lled the landscape and she really w nothing. As she kept her eyes rned toward the window he could tch her unobserved. A shadow ossed his handsome face as he noted r golden red hair, matchless comexion and lithe, graceful figure, and e dimple that nestled so close to the eet red lips.

He lingered over his luncheon and ve an extra order so as not to finish fore her. As she began to eat he ught her eyes turned on his face ith a speculative expression in their pths, which was easy for him to unerstand after his conversation with rs. Allen.

They left the diner together, and, they reached the outside platform, e said, resolutely, "I want to explain out the Dalton masquerade, Joan et your wraps and we'll go out on e back platform of the observation r, where we can, probably, have a ance for private conversation, as it pretty cold this afternoon."

His assurance nettled her. It was her mind to refuse his request, or ther command; still, as they walked rough the car that contained her erth she picked up her coat and went with him to the observation car. e took a couple of camp stools as ey went out to the platform, placed ers in the most sheltered corner, en sat down at an angle where his oad shoulders would shield her still ore from the wind.

"So," he said without preamble, aft- they were seated, "you think I proosed to Elsie Green at the Dalton asquerade and you don't want 'her eavings?'"

The satirical smile on his lips, and he mocking light in the eyes that ere looking Joan squarely in the ace, again roused the girl's indigna- ion.

"I know you proposed to her," she etorted angrily. "I suppose you liked er best all the time and were just ooling with me to make her jealous. hen, when she refused you, you hought you might do worse than take me."

In answer to this unpleasant speech George laughed long and heartily, hich so exasperated Joan that she ose, and would have left him and one inside the car, had he not deained her with a strong yet tender and.

"Forgave me," he said, still laughng, "but who told you such a story? It really is awfully funny because I wasn't at the Dalton masquerade."

"What!" exclaimed Joan, forgetting her resentment in surprise, "you told me, yourself, that you were going as the earl of Leicester, and a man, your size, dressed in that costume was there, and—proposed to Elsie Green. I saw and heard him myself," she added excitedly, "I was in that little curtained alcove, just off the conservatory. I know you were missing at supper, when we all unmasked, but I supposed you were so fussed by her refusal that you left at once."

Again George laughed gaily, saying, "Fortunately, I can prove an alibi. I expect two telegrams at Spokane, one from my father, and another from Dalton. I wired them both at Helena, after I saw Ida, and learned what you thought about me." He paused, and the merriment died out of his face as he continued, "I was dressing for the masquerade that evening, hoping for an opportunity there to ask you to be my wife, when father phoned that my mother had been taken ill, suddenly, and to come at once. I was hurriedly getting into my street clothes and packing a grip, when Coleman came in. He had just returned from a fishing trip, and I suggested that as he was about my size, he had better take my suit and go to the dance in my place, as it might put Mrs. Dalton out to run shy a man, at the last minute. He didn't need a second invitation ofter learning Elsie would be there. They grew up together and I believe he proposes to her, regularly, about twice a year. Her money isn't the attraction, either, as she is poor, compared with him. I am glad we have had the chance for this mutual explanation," he added, formally, "as, otherwise, I should have gone away thinking you a heartless coquette. Then, too," he added, a hard note in his voice, "I would not like to be considered a fortune-hunter, as I am not guilty."

He rose to his feet abruptly, saying with exaggerated politeness, "I hope I haven't kept you out here too long. I hope you are not cold."

He stood before her, evidently considering their interview at an end, but she remained seated. Her lips moved, but no sound came from them. A dumb devil seemed to possess her, as she looked up at him, entreatingly, paling and flushing alternately.

"Sit down, George," she managed to articulate at last. "Will you ever forgive my mean suspicions?"

He smiled rather bitterly as he resumed his seat and answered, "Perhaps—when you have read those telegrams, and I—have made my fortune in the Orient."

"I don't want to read the telegrams," she protested. "And—and sometimes it takes a long while to make a fortune. Have you quite forgotten last summer, George?" she pleaded, putting out her hand until it rested on, but not in, his. "Don't you care for me a little still?"

"Care for you—a little," he repeated, his large hand opening suddenly and engulfing her small one, "My God!" he groaned, "I wish it were—a little."

"Then why leave me, when—I want you to stay?"

"Because I have a little pride and self-respect left."

"Have you?" asked Joan, while her quivering lips twisted into a crooked little smile. "I don't believe I have, because I am going to ask you to please marry me in Seattle, and take me to China with you, as—as—Ida expected."

For a minute he looked uncertainly into her sweet, earnest face, flushed with the shame of her unmaidenly request. Then a merry smile chased all the shadows out of his eyes as he answered tenderly, "It would be a pity to disappoint Ida, wouldn't it?"

Fortunately, at that moment, an opportune tunnel enveloped them in darkness.

Snakes' Sting Supply Renewed When Lost

According to experts at the New York zoological park, rattlesnakes in captivity shed their fangs at least twice a year. Nature has provided these snakes with a magazine of fangs that is apparently inexhaustible. If the fangs are extracted the rattlesnake is rendered harmless for only a short period, until new fangs replace those removed. The only effective way of rendering rattlesnakes harmless is by an operation which removes not only the fangs but also a portion of the bone to which the fangs are attached. This operation is very seldom performed by anybody. On this subject the United States biological survey says: "So long as snakes are healthy, teeth will be replaced when lost. Ordinarily harmless snakes have two rows of teeth in the upper jawbone. In the venomous snakes, the upper jaws carry a single pair of functional teeth, the poison fangs, in addition to the undeveloped successional teeth. When either the fangs or the teeth of snakes are dislodged or lost, they are replaced functionally by these supernumerary teeth."—Pathfinder Magazine.

Head-Hunting Lovers

Dyak women urge their husbands, sons and lovers to join in head-hunting expeditions, to prove that they are really men of valor.

In his book, "In Borneo Jungles," Mr. W. O. Krohn says that no Dyak is a real man until he has got a head. So the young Dyak fortifies himself with an orgiastic dance, consults the omens, and sallies forth. When he brings home the head, there is a feast. The whole thing is a rite deeply interwoven in Dyak religion.

LIVE STOCK

DIRECT BUYING OF FEEDER CATTLE

(Prepared by the United States Department of Agriculture.)

Increasing use of the system of direct buying of feeder cattle by Corn Belt farmers is reported by C. G. Randell, United States Department of Agriculture economist connected with the division of co-operative marketing. This has been brought about, Mr. Randell states, because a considerable number of ranchmen want to sell their stock at home and a considerable number of feeders want to buy their stock direct from the range.

Mr. Randell says that although the auction method of marketing still prevails to a limited extent, it is almost entirely in the hands of the speculator, and it is doubtful if either the producer or feeder desires a return of the auction system.

There are advantages and disadvantages of direct buying as applied to feeder cattle, Mr. Randell says, but the disadvantages are not insurmountable. The advantages include the elimination of terminal market expense, the arrival of animals at the feed yard in better physical condition, a gradual trend toward the elimination of speculation in live-stock marketing, and a better appreciation on the part of both producer and feeder as to mutual problems and interests.

Objections to the direct buying method include the difficulty of obtaining uniformity as to size and quality among animals purchased, greater shrinkage en route, greater opportunity for delay in transit, and the loss of identity of cattle in carlot movement.

Cattlemen with whom Mr. Randell has discussed the subject have expressed need for a standardization and grading program. They declare they can make their cattle good and uniform, provided they are rewarded for so doing, but no cattleman can afford to buy high-priced bulls and carefully cull his herd only to have his good cattle sell at a flat price along with other cattle not of the same quality and grade.

Many feeders feed good to choice cattle. Others prefer a medium-quality grade. Some feeders want a good-quality animal but are not particular about his being a white-face. There could be a grade for each group, Mr. Randell says.

Experience in handling the cattle pool, according to Mr. Randell, has definitely established the fact that permanency of direct contact depends to a considerable extent upon the manner in which purchases are made. The per-hundredweight basis will offer a greater degree of satisfaction to those involved.

Light Hogs Make Best Use of All Their Feed

When corn is cheap and hogs are scarce, it usually pays to feed the hogs out to heavy weights. When the other way around—hogs plentiful and cheap, and corn dear—then it generally pays best to market at lighter weights.

The lighter hogs make the thriftiest use of feed, and commonly sell highest. Thus on the average it takes about 663 pounds of feed—of which 60 pounds should be tankage—to bring a pig to 200 pounds live weight. And to add on 150 pounds more weight, will take nearly as much more feed, or an average of 627 pounds—of which 45 pounds should be tankage.

As to prices, light hogs have sold higher than heavy ones in 45 of the 60 months of the past five years.

Nevertheless, heavy hogs pay best when corn is plentiful and cheap and pigs are scarce. While they may pay less per bushel for the corn they eat, they will usually pay more for it than the corn is worth at cash prices.

Live Stock Notes

A sow may be given a thin slop of bran and middlings 24 hours after farrowing.

* * *

A creep will prove a great advantage to pigs after they become two or three weeks old.

* * *

Ordinarily alfalfa will replace about one-third of the grain rations for hogs. Many trials have shown that it can replace as much as 50 per cent of the ration.

* * *

Spring lambs that make the most money are those receiving all the grain they will eat from the time they are two or three weeks old until they are marketed.

* * *

A practical way to check increase of tsomach worms is to change sheep back and forth between two pastures every two weeks.

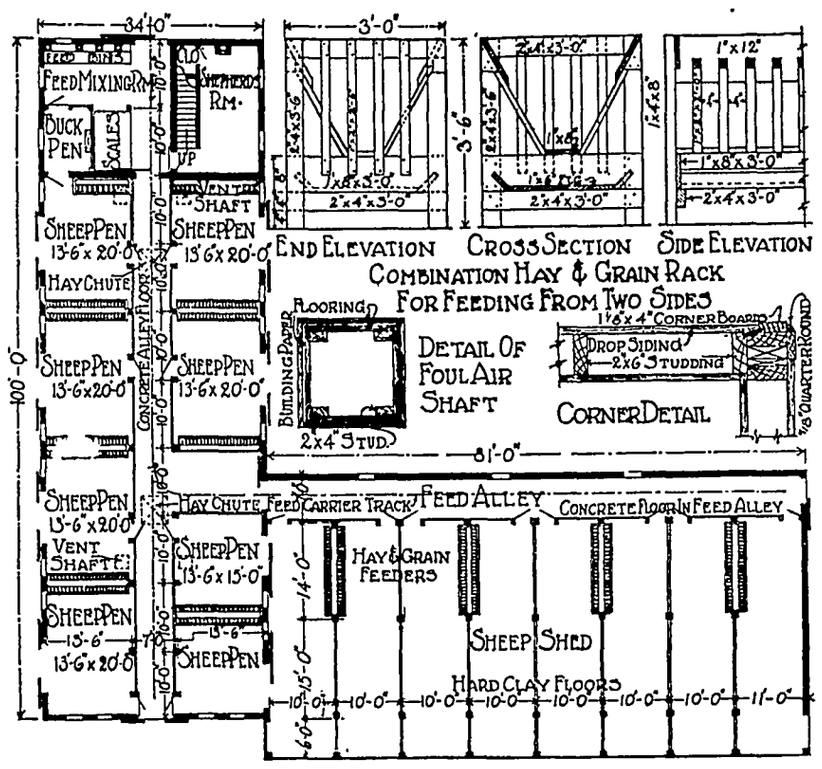
* * *

Feeding oats to lambs increased the rate of gain and decreased the cost of the feed. Their use also reduced the roughage consumption 40 per cent.

* * *

Common salt must not be overlooked. This is a most vital mineral agent for feeding live stock, and a good supply always available is necessary for their health.

Modern Sheep Barn and Shed That Provide Proper Housing for Flock



By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

With high prices for lambs for slaughter and good prices for wool, a farm flock of sheep of considerable proportions is a paying part of farming. To be successful with sheep, however, it is necessary that they and their feed be housed in a modern barn, where the proper conditions for their health and the health of the lambs may be maintained.

Shown in the illustration are plans for a modern sheep barn with an open feeding shed attached. This building is of the type used by those who are raising sheep and lambs successfully. It is designed to keep the animals healthy and to permit those who care for the flock to perform the necessary work efficiently.

The barn is a regular two-story structure with pens on the ground floor and mow space above, where the forage for the flock is stored. The pen floor is equipped with partitions, feeding racks, etc., and is ventilated with a suction ventilation system. Sheep need plenty of fresh air, but are susceptible to drafts, so that such a system as is indicated on the plans is necessary. The feeding shed adjoining the barn is open on one side, the other three being closed on the sides toward the direction of the winds prevalent in the section where the building is erected.

A study of the floor plan will show the arrangement of the first floor of the barn and of the feeding shed. There is a feed mixing room, a pen for the buck and a shepherd's room. The pens are partitioned so that the ewes and their lambs may be separated into small groups.

The feeding shed is open so that the sheep may have a free run of the space and access to the feed racks.

This building should be erected on a site that is high so that there will be good drainage, and the floors constructed so that they will be dry at all times.

Foundation Footing Is Called Important Item

Throughout all the planning now going forward of new homes to be built this year, one item of the utmost importance to the home owner, but too frequently overlooked, should be placed first in rank of things to be watched.

This is the foundation footing. Upon the adequacy of the footing depends the durability and satisfaction derived from every part of the house. Even the most strongly constructed frame or masonry wall, for instance, cannot withstand the unequal strains imposed by a settling foundation without showing distortion which results in cracked plaster, sagging floors or roof, and other serious troubles.

The first consideration in constructing the footing is the sustaining power of the soil or rock upon which it is placed.

Sandy or loose soil requires greater total area of the footing to give proportionate spread, while stable rock requires practically no footing excepting an effective bond with the masonry foundation, obtainable by carefully washing off the rock and bonding with good mortar, whatever the foundation masonry material.

Where ordinary trench footings are used all around, the ground beneath should be tamped to increase its density. The footing materials should be portland cement, clean sharp sand and clean aggregate usually in the form of crushed rock.

The mixture most often used is one part cement to two and one-half of sand and five of stone or gravel.

Where conditions demand that part of the footing be placed upon rock and part upon soil or upon strata which vary in density of the underlying material at different points around the foundation, careful provision should be made to equalize the supporting power of the footing.

Otherwise the footing, upon receiving the load of the house, will settle at different points, cracking the foundation wall and distorting the house.

Adequate Lighting

The first essential in room comfort nowadays is the provision for a sufficient amount of light for all occasions and enough outlets to permit the attachment of occasional electric appliances at points desired. This is only achieved in a home with adequate wiring installation, more and more coming to be accepted as standard in the modern dwelling.

Colonial Style Came Over With the Early Settlers

While siding and shingle exterior coverings for homes did not strictly originate in this country, being largely modifications of existing methods brought over by the early settler-artisans, the availability of the materials and suitability to native architectures give houses sheathed in siding or shingles a distinctly American flavor.

Houses covered with rough-hewn siding boards, or clapboards, and crudely split shakes, or shingles, directly succeeded in the first log cabins of the early colonists in this country. These materials have been refined by improved methods of manufacture into types which are individually appropriate to the variations of modern colonial architecture and to the architectures of other countries in American adaptations.

Cedar and pine, and other durable native woods, are used in modern manufacture of shingles and siding, which are frequently stained to enhance their appearance and resistance to weather. Wood siding and shingles have integral insulating value in themselves, increasing comfort and fuel economy in the winter and keeping the home cool in summer.

Double Weathering Adds to Tightness of Windows

Basement windows must not only admit daylight but also must shut out wind and rain so tightly that chilling drafts do not penetrate to the cellar, to the detriment of heating plant efficiency. A new type steel basement window employing double-contact weathering insures the quality of tightness by interposing an air cushion between the two contacts.

These windows are constructed of rust-resisting steel. They may be quickly fitted into openings left in cellar walls of any masonry material. For use in concrete block walls, an end plate is furnished which assures of proper installation.

The windows are equipped with hinges of the hook type, facilitating removal and replacement. A cam-acting lever latch gives security against unauthorized entrance and maintains tightness of the weathering contacts.

Face Brick

From a wall of diversified color effect to one of quiet monotone of any shade, simulating dressed stone, is the range in surface tone variety available today in face brick.

POULTRY FACTS

POULTRY FEEDING QUITE IMPORTANT

For later profits, development of pullets on range should be closely watched and an effort made to get them to maximum size before they are allowed to come into production, asserts L. M. Black, extension specialist in poultry husbandry at the New Jersey State College of Agriculture, New Brunswick. Undersized pullets, he points out, require much more skillful feeding to maintain steady production, and they reward the owner only with second-grade eggs that are hard to sell.

From the time their birds reach twelve to fourteen weeks of age, it is the aim of the better poultrymen to get them to consume, in so far as possible, equal parts of mash and scratch grain. Where this is done it is unnecessary to dilute the mash with bran or corn meal, according to Mr. Black. Changing the formula of the mash is regarded by some poultrymen as a foolish and dangerous practice. They believe it is more simple to watch closely the relative consumption of scratch grain to mash and vary the amounts fed to meet the changing requirements of the birds.

Some flock owners place before the birds enough of a mixture of equal parts of scratch grain and mash to last the pullets until 2 or 3 p. m. In the evening scratch grain alone is given to bring about a heavy consumption of it. This system of feeding tends to hold back the sexual development of the birds and promotes growth. Under it, Leghorn pullets that are capable of a year of hard work should be ready to go into the laying house when five to five and one-half months old.

Mr. Black states that nothing is to be gained from early hatching if the pullets that develop in August and September are not placed in the houses at that time. From then on a little skill in feeding with an eye especially on the maintenance of the body weight will ward off a molt and will convince the owner of the value of the early hatched pullet.

Sell Broilers Closely to Prevent Loss Later

The bottom usually drops out of the broiler market before the first of July. Usually it starts downward quite rapidly after the middle of June. This makes it profitable to sell all birds that are ready for market. At this season of the year it is often possible to get more for the young birds, even though they do not weigh more than two pounds, than they bring later in the season after they have consumed a large amount of feed.

Another advantage in selling the broilers closely is that the pullets need room. If the broilers are sold the pullets can utilize the room that was occupied by the cockerels. This will give them a better chance to develop. Pullets that are crowded, that are confined with the old birds, or that are raised on contaminated ground are working under a handicap. If a separate house is available, such as the brooder house, this can be pulled to the edge of the orchard and be made the headquarters for pullets. If a mash hopper is plentifully supplied with a good mash ration and the pullets are given plenty of fresh water, minerals and scratch feed, it is likely that they will develop into good winter layers.

Poultry Hints

Avoid overcrowding chicks in the brooder.

* * *

If you want to keep your reputation for supplying fresh eggs, market them frequently.

* * *

Meat meal or meat scrap are high protein feeds and are found in most chick mashes or laying mashes.

* * *

Turkeys should have a shed open on the south for shelter and should be fed in this shelter so that they can locate it when necessary.

* * *

A chick that is well started is half grown. For this reason it is important that the young chicks be started off on the right feeds.

* * *

When the breeding season is over, sell or separate your male birds from the laying flock and produce infertile eggs during the summer months.

* * *

Start the ducklings on stale bread soaked in milk, squeezed dry, sprinkled with fine sand, feeding every two hours the first two days what they will eat up clean in five minutes.

* * *

Buckwheat ought not to constitute a large proportion of a grain mixture, not more than 20 per cent.

* * *

Many poultrymen fail to take into consideration the effects of a damp cold and the opposite effects of a dry cold upon the health and egg producing ability of the layers.

* * *

Goslings are more easily reared than chicks, poults or ducklings. Goslings are better hatched by chicken hens rather than by geese, although some geese make splendid mothers.

Buying On The Installment Plan--

About 75% of the Automobiles now-a-days are bought on the Installment Plan. If you can pay a couple of hundred dollars down you can have a nice car.

WHY NOT GET A HOME ON THIS INSTALLMENT PLAN?

We can make it possible for you to live in Your Own Home while you are paying for it and when the last payment is made you will not know that you have been inconvenienced in the least, and furthermore, it will not be ready for a good trading off on account of being out of date or worn out.

If you ever have a dream about owning your own home and want help or the thot ever enters your head that you would like to be able to say, "Let's get a home of our own," you make a beeline for the NORTHERN LUMBER COMPANY and I'll bet you a nickle if you have any determination that in side of a few years you will be realizing what you had been dreaming or thinking of.

Come in any time and we will talk this matter over with you.

BUILDING MATERIALS OF ALL KINDS

Northern Lumber Co.

Soy Beans Chick Feeds

We can still supply you with goo SOY BEANS. This is good seed and highly recommended

Come in and get what you need at once while we have a good supply on hand.

POULTRY & CHICK FEEDS

We handle the well-known and tried GLOBE POULTRY FEEDS of all kinds. We have a good supply on hand and can supply you with Growing Mash, Chick Starter and all other kinds. None better than GLOBE.

GET YOUR WHEAT HERE

You folks who want good Wheat for your chicks can get it here. We have plenty on hand for everybody. Bring your sacks and fill up. This is nice wheat.

A Full Line Of High Grade Mill Feeds

Klemme Co-Operative Grain Co.

Try Our Flour

FLOUR IS GOING HIGHER, but very fortunately we contracted for a large amount early at a gooo price and we can pass this saving along to our customers at the old price for a time. So take advantage of our offer and buy now. We handle the high grade brands:-

MISS MINNESOTA MISS KANSAS

We can still supply you with good seed potatoes. We have EARLY OHIO and the BURBANK RUSSTTES—the price is right!

—CHICK FEEDS—

We can sell you a 90 lb. bag of ROLLED OATS for $4.10.

We handle American NO-CORN Chick feed—a 100 lb. bag at $3.75.

FOR SALE—2,500 bushels of corn on SE¼ Sec. 23, Erin Twp., on farm occupied by Sam Early. W. W Reat, P O. Box 291, Britt, Ia. 1c

Several car loads of Klemme Auxiliary Ladies motored to Garner on Tuesday afternoon to attend a county auxiliary meeting.

The steady rain Wednesday came in just the right time to suit most of the farmers who have finished up planting corn.

Mrs. Carrie Kinden, of Thompson, Iowa, was a Sunday visitor at the home of her daughter, Mrs. F. W. Kluckhohn and family.

Glenna Espe came Saturday morning for an extended visit with her parents, Mr. and Mrs. F. Grutezmacher.

Mesdames Ed. Jacobs, Sumner Trumbell and R. A. Jorgenson took in the big Eatern Star doings at Garner last Thursday evening.

Dr W. F. Missman and son took in the Iowa Alumnus banquet given by the Lions Club at Garner last Thursday evening.

One of the pretty sights the past few days, viewed from the east part of town was the big orchard on the Albert Barz farm just east of Klemme. The trees were all in bloom and made a pretty picture.

Mr. and Mrs. Elmer Schaefer and children, and Mrs. J. J. Stille drove to Hampton Sunday to see Miss Fern Stille at the Lutheran hospital.

Mr. and Mrs. Fred Bell and little daughter, Julia Jane, spent Sunday at the home of Mrs. Bell's brother, Cornelius Wille and family.

Mr. and Mrs. Fred Kluckhohn and daughter, Thelma, visited with Mrs C. G. Waterman at the Mercy hospital Sunday afternoon.

C G. Waterman and daughter, Marian, spent Sunday visiting with Mrs. Waterman at the Mercy Hospital at Mason City.

Mr. and Mrs. E. F. Jacobs and son, Elwyn, and Mr. Lloyd Wistey, spent Sunday at the Wistey home at Clear Lake.

W. F. Lau drove down from Wabasso, Minn., the latter part of the past week for a week-end visit with his family.

Mr. and Mrs Charles Gibbs, of Mason City, spent Sunday in Klemme visiting with his mother and brother and other relatives

Mrs Paul Mueller enjoyed a visit from her mother. Mrs. Christ Reibe of Garner a few days the past week.

Miss Gertrude Ely, Mrs. R. A. Jorgenson and son, Buster and Byrnes Missman drove to Hampton Saturday afternoon.

Mr. and Mrs. Geo. Gruetzmacher and son of Garner, visited at the Frank Gruetzmacher home Monday afternoon.

Wm Gauger was released from his mumps quarantine and was able to return to school again Wednesday. This is the only case of the mumps in town or this vicinity.

Mrs Ted Dutheridge gave a birthday dinner Sunday in honor of her daughter, Jane, and Reva Elder, who both celebrate the same age on the same date

FOR SALE—English S. C. W. Leg. Eggs Dams have record 260-290 eggs. Mated to males from Iowa State College high producing flock. $5 per 100. W. L Haberkamp, Garner, Iowa Route 4. M4tp

E F. Jacobs put on a demonstration of Coleman Air-O-Gas stoves at his store Saturday which attracted a lot of attention. A special factory man was here to demonstrate.

Wm. C. Keraus and family of Traer drove up to Klemme early on Sunday morning to spend Mother's Day with their mothers and other relatives and friends

Mrs. J J. Stille was at Hampton Friday where her daughter, Miss Fern, had an operation performed on her hand that day Fern is getting along nicely at this time.

Mrs. Ed. Jacobs and son, Elwyn, and Lloyd Wistey drove to Clear Lake Saturday for a visit at the Wisty home, parents of Mrs Jacobs and Mr. Wistey.

Sunday was Mother's Day all over the world. The event was appropriately observed in Klemme by special church services, and various family dinners

Erick Josten drove to Spencer on business Friday. From there he drove to Harris for a visit over Sunday with Earl Josten, returning to Klemme Monday.

John Miller, of Watkins, Iowa, accompanied by his brother-in-law, Mr Walters, were in Klemme on business Tuesday. John reports the family all well.

Mrs. D. Cushman and baby son of Manchester, Iowa came Saturday morning for a visit at the home of Mr. and Mrs. Frank Gruetzmacher and daughter, Glenna, who is also home now.

The Central States Company were well pleased with the attendance at their electric stove demonstration at the Idle Hour last Thursday afternoon, which was attended by about twenty ladies. Each housekeeper present received as a gift an electric bulb. Miss McGinnes and her class of domestic science girls attended the demonstration after school.

MEMORIAL SERVICE WEDNESDAY P. M.

STORES WILL BE OPEN TUESDAY EVE FOR SHOPPERS

Services At Park Will Be Held In The Afternoon At 2:30 O'Clock

The Klemme Legion Auxiliary, who have charge of the Memorial Day services in Klemme this year, have completed their plans for a very appropriate observance of this patriotic day.

As in the past, the services will be held at the Klemme Park and will begin at 2:30 o'clock. An excellent program has been outlined and will be carried out. A copy of this program appears on the front page of The Times.

A speaker of note has been secured to deliver the address of the day, Rev. Jewell Picket, Chaplain of the Clausen-Warden Post of Mason City, and minister of the Baptist Church of that place. Rev. Pickett is highly recomended as a public speaker and will deliver an address which should be of great interest.

Following the services at the city Park, a procession will be formed and will march to the cemetery, there to pay tribute to our Soldier Dead.

Special music for the services has been provided and a quartet will sing. The Reformed Bible School have a number and the balance of the musical part of the program will be given by the Duncan Band, who have been engaged for the afternoon.

Stores Will Be Open Tuesday Evening Next Week

In order to accomodate the trading public, the merchants of Klemme will keep open their stores next week on Tuesday evening, instead of the customary Wednesday night. This will give all a chance to do their shopping before Memorial Day. However, as a further accomodation to the public the stores will remain open a short time Memorial Day for late shoppers, but will close their doors promptly at 10:00 o'clock a. m. and will not again open until Thursday morning.

Remember. Klemme stores will be open Tuesday evening, and Wednesday morning until 10:00 o'clock after which they will be locked up tighter than a can of sardines.

Klemme welcomes all to come here Memorial Day for the services.

AMSTERDAM TWP. SCHOOLS CLOSE WITH UNION PICNIC

Big Time Was Enjoyed At The West Lake Park

Schools closed in Amsterdam twp, last Friday with a union picnic that was very enjoyable for everyone n the township.

The picnic was held at West Lake Park. Tables had been prepared and at the noon hour about three hundred people gathered, bringing well filled baskets. Everyone enjoyed the dinner immensely.

At 1:30 o'clock a very interesting program was given by all the schools, seven in number. Following a program given by the children Supt. J. R. Baggs gave a very interesting talk, and Mr. Rickansrud also spoke on education.

The day was spent playing games. ball game, fishing and races.

Following are the names of the instructors of Amsterdam township: Trena Vander Ploeg, Norma Stromer, Norva Carr, Dalia Stromer, Nora Eliason, Anna Mae Stole, Dena Daggy, and all are to be complimented on the excellent school spirit they have shown in their school districts the past school year. All the instructors mentioned have had a number of years of experience in teaching and the school board of the township always believes in hiring highly recommended instructors

Amsterdam township shows great interest in their schools. They have a number of Standardized Schools, and those that are not yet Standardized do not have the attendance at present All schools are supplied with text books, tablets, pencils, and an unlimited amount of supplies for busy work Contributed by Kanawha Reporter

HANCOCK COUNTY FARM BUREAU PICNIC JUNE 15th

Annual Gathering Will Be Held At Eagle Lake State Park

The annual Hancock County Farm Bureau picnic will be held Friday, June 15th at Eagle Lake State Park Mrs Charles Sewell of Indiana, director of the Women's Department of the American Farm Bureau Federation. will be the principal speaker Mrs Sewell is a very good speaker and is one that every farm family will enjoy

Other interesting things are being arranged for the program.

BOY SCOUTS ARE ORGANIZED HERE

PUBLIC CEREMONY PLANNED FOR NEXT THURS. EVE.

Klemme Scouts Affiliated With The North Iowa Area Council

Some time ago The Times urged that a Boy Scout Trop be organized in Klemme. That suggestion began to work and interst was aroused in the Scout Movement. At this time Klemme has a group of some fifteen boys who are gradually being brought together into a fully organized Boy Scout Troop.

A few details are yet to be worked out but the Boy Scout movement is now fully assured

Scoutmaster Mr. Underwood, of Mason City met with a group of business and professional men in Klemme last Friday evening and plans were presented and adopted and the first steps to assure a Boy Scout troop in Klemme were taken.

Before a Boy Scout Troop can be organized, and recognized by the National body, an organization of some kind must first back the movement. This organization then appoints five men in the community to act as the Scout Executive Board. The duties of the men on this board or many and the success or failure of the troop rests largely in their hands. This Board must make regular inspections and reports, and is, to a large extent, responsible for the local troop to the North Iowa Area and National headquarters The system works in a chain, the troop being responsible to the Scout Master and Assistants, they to the Executive Board, and the Board to the sponsoring club, and vice-versa However, the Scout Movement is entirely a community affair and all should be interested in the success of the Boy Scout Troop.

All Boys Are Welcome

Any boy in this community, who is twelve years of age, and under 18 years of age, is eligible to become a member of the local troop. Parents are urged to encourage their boys in the movement.

Anyone wishing further information will cheerfully be given full information by seeing Dr D. P. Anderson, Scoutmaster, Asa Arnold, Assistant Scoutmaster, or R. A Jorgenson, Recruiting Officer.

More information on the Scout movement will be published from time to time.

The regular meetings will be held on Monday evenings at the Parish House in charge of Dr. Anderson, and his Assistant Asa Arnold. The hikes and camping will be in charge of Rev. Grosshuesch, a member of the executive. board.

Other men on the Board and the duties assigned are: Dr. Missman, Chairman and General Manager; E. F. Jacobs, Inspection Officer; Andrew Wellemeyer, Instruction and Personnel Officer. The other two officers were mentioned above.

Klemme Memorial Day Program

To Be Given At The Klemme City Park
Beginning At 2:30 o'clock
WEDNESDAY AFTERNOON, MAY 30th, 1928

—PROGRAM—

SONG, "AMERICA" ..... Audience

Music Will Be Furnished By The Duncan Band During The Program and March

CORWITH WON SUNDAY GAME BY 5 TO 4 SCORE

Will Play At Corwith Decoration Day For Return Game

The game Sunday on the local diamond gave the fans their money's worth as it was one of the best exhibitions ever staged on the home field. The game between Corwith and Klemme was tied a few times to add to the excitement and the game was put on ice for Corwith when with one man on the sack a home run put the game one to the good

Both teams were at bat 38 times, Klemme registered 12 hits against 7 for Corwith; Corwith chalked up but one error, while Klemme was marked down for 4. Hamilton performed on the mound for Klemme and struck out fifteen men. Stokesbary was high hitter for the game and socked out three safe ones.

Coulter To Play Here Sunday

Coulter will play the locals here Sunday. Klemme and the visitors have always put up a good game, so the game Sunday should furnish good entertainment.

At Corwith Memorial Day

Klemme wil play a return game at Corwith on Wednesday, Memorial Day This game should draw a big crowd after the close game played here Sunday.

MRS. E. H. SCHULDT SURPRISED ON HER BIRTHDAY

Ladies Spent An Enjoyable Afternoon At D. P. Anderson Home

(Contributed By A Guest)

Dr and Mrs. D P. Anderson invited some of their lady friends to their home the 11th of May in honor of Mrs. E H. Schuldt's birthday Dr Anderson brought the guests to their home previous to the arrival of Mrs. Schuldt, the guest of honor, it being a complete surprise to her when she found the ladies waiting for her Mrs Schuldt's daughters were all present also. All were royally entertained in the afternoon after which a most delicious six o'clock dinner was served by Mrs. Anderson, who was aclaimed by all a most excellent cook. The table was beautifully decorated with a large bouquet of carnations as a centerpiece At the conclusion a kodak picture was taken of all present. All had a fine time at the Andersom home, and Mrs. Schuldt expressed her appreciation to her many friends for the occasion.

BAYSIDE PARK WILL OPEN ON SUNDAY, MAY 27th

Many Improvements Have Been Made At Amusement Park

The Bayside Amusement Park at Clear Lake, Iowa, will be opened on next Sunday, May 27th, for the 1928 season For several weeks a crew of men have been working in the park getting things ready for the opening date. Buildings have been painted and decorated and many changes and improvements have been made since last season Several thousand dollars have been spent to put the park in a finer condition than ever before Next Sunday the amusement program will include free attractions, free picture show, a base ball game at 3 o'clock between Mason City and Des Moines Highlands, and all the amusement concessions will be in full swing. Sunday the entertainment concessions, including the merry-go-round, roller coaster, the little train, fun house and aeroplane will amuse visitors for the first time this season. The bath house will be open and many will no doubt take their first 1928 plunge in the lake This season the toboggan slide on the north shore will not be in operation and so Bayside will have the only slide for bathers. The roller skating rink has recently been improved and good music is provided for those who enjoy this sport It is open every afternoon and evening and for several weeks young folks have been enjoying themselves there. The Ritz Hotel will open on Sunday and will again be managed by Mrs. Chas. Ritz, who will serve meals daily commencing on the opening day of the park The picnic grounds, tables and children's play grounds have been fixed up recently and are now ready for visitors. No charge is made for their use.

CAMP FIRE GIRLS WILL HAVE BAKE SALE SATURDAY

Money Thus Raised Will Help Pay Summer Camp Expenses

The Camp Fire Girls had a meeting Monday evening, May 21st at the Legion Rooms.

They decided to have their Bake Sale on Saturday, May 26th from 2:00 to 5:30 p. m. They will sell cakes, pies, baked beans, cottage cheese, etc.

The money from this sale will go toward their Camp this summer at Clear Lake

Trade Name: Bock Oil Company. Owner, Edwin F. Bock, date 5-14-28

AUXILIARY WILL HOLD POPPY SALE TWO DAYS

Friday At Goodell And Saturday In Klemme Is The Plan

The Klemme Legion Auxiliary Ladies will put on their annual sale of Poppies this week Friday and Saturday.

As Goodell has no Post the Klemme Ladies wil conduct a sale there Friday The following day the sale will be put on in Klemme.

Buy a Poppy! Wear a Poppy! Help along a good cause

SPECIAL SERVICES AT CHURCHES SUN.

WILL OBSERVE TWO EVENTS AT M. E. CHURCH SUNDAY

Pentecost And Memorial Services To Be Given That Date

Next Sunday comes to us as a very exceptional day, as it memorializes great events of history. In the first place it is Pentelostal Sunday and reminds us of that first day of Pentecost when the Holy Spirit was poured out without measure as promised by Jesus Christ when he went back to Heaven

Then also it is Memorial Sunday, the Sunday immediately before Decoration Day

We shall observe both of these events in our services on the coming Sabbath day.

With both events in mind we are planning our Memorial service to be held on Sunday morning A very cordial invitation is extended to all patriotic organizations to be present and to participate. We especially invite the Veterans of the Civil War, of the Spanish American War and of the World War. A place of honor is also reserved for the American Legion Auxiliary and for all Gold Star Fathers and Mothers. Decorations, music and messages will combine to make it a memorial day indeed.

Pentecost today will be our subject for our evening service.

Our Bible School in Liberty had a fine beginning on Monday morning with increased attendance from day to day Two fine classes in catechism are hard at work—one will finish this year, while the other is working to do so one year from now.

Our Bible School in Klemme as announced last Sunday will begin in the first Monday in June. We urge the co-operation of all parents to make this school the best and most profitable ever.

—Rev. A. W. Gauger.

SPECIAL SERVICES TO BE HELD AT REFORMED CHURCH

Reformed Church Bible School Will Begin Monday, May 28th

Pentecost Sunday, May 20th.
10:00 a. m. German and English sermon.
Celebration of Lord's Supper.
Offering for Church Erection and Home Misions.
11:00 a m. Sunday school.
8:00 p. m. Re-union of all the Confirmation Classes confirmed in our Church.
Offering for Missions.
9:00 a m. Monday our Bible School will commence. All children 7 to 15 years of age, are invited to attend. Please start your children the first day and send them regular.
8:00 p. m. Tuesday, Young People's Bible Class.
8:00 p. m. Saturday, Junior choir.
Rev Calvin Grosshuesch, Pastor.

LAST DAYS OF SCHOOL ARE BUSY

BIG SCHOOL PICNIC WILL BE ON TOMOROW NOON

Commencement Exercises Will Close School Events For The Year

A final big community picnic on C. A. Larsen's lawn, just east of the Reformed Church, is being prepared and those bringing eats are requested to have them there by 11 a. m, or in case of rain, at the high school gym.

The Seniors will give a class day program at the school gymnasium at 10 00 a m, to which the public is invited This has been hurriedly prepared during a very busy time but it may be of interest to those interested in the class membership.

The ball game that Mr. Heiden thought he had secured for our base ball boys was called off by the Goodell coach who tells us Goodell is also to have a picnic on the same day and that their boys could not well be at both places at the same time.

On Friday evening our Seniors will receive their diplomas and the public will be present to hear a splendid address by Rev. Raymond Grant of Nashua. Our Eighth grade pupils will also be awarded diplomas entitling them to entrance to any high school in the state of Iowa.

Those graduating from the high school are. Harvey Nelson, Alvin Niemon, Orville Stokesbarry, Florence Stokesbarry, Donald Turgasen, Irene Carlson, Ethel Johnson, Golda Roberly, and Gladys Wilson.

Those completing the Eighth grade andg oing into high school next year are Blanche Gimer, Grace Quandt, Nova Koerner, Gladys Schlichting, Ethel Barz, Emma Goll Ella Stiemann, Mildred Lemke, Paul Thompson, Kenneth Kluckhohn, Marvel Carson, Esther Jahnke, Thelma Kluckhohn, Byrnes Missman, and Kenneth Patet. They will also be awarded diplomas at the general commencement Friday evening.

Those who may have been overlooked by those soliciting eats for the picnic dinner are invited to come and bring their provision and join the crowd. Everyone in our school district or interested in our school we welcome. We hope for a fair day and expect all to quit work and come for a few hours. They will enjoy eating and visiting neighbors and friends. We still hope for a base ball game in the afternoon.

Rev. Grosshuesch gave us an excellent address on Sunday evening and many were in attendance at the Baccalaureate service at the Reformed Church. Our Glee Club Girls did well under the direction of Mr. D. M. Lewis. They will furnish music for the program Friday night.

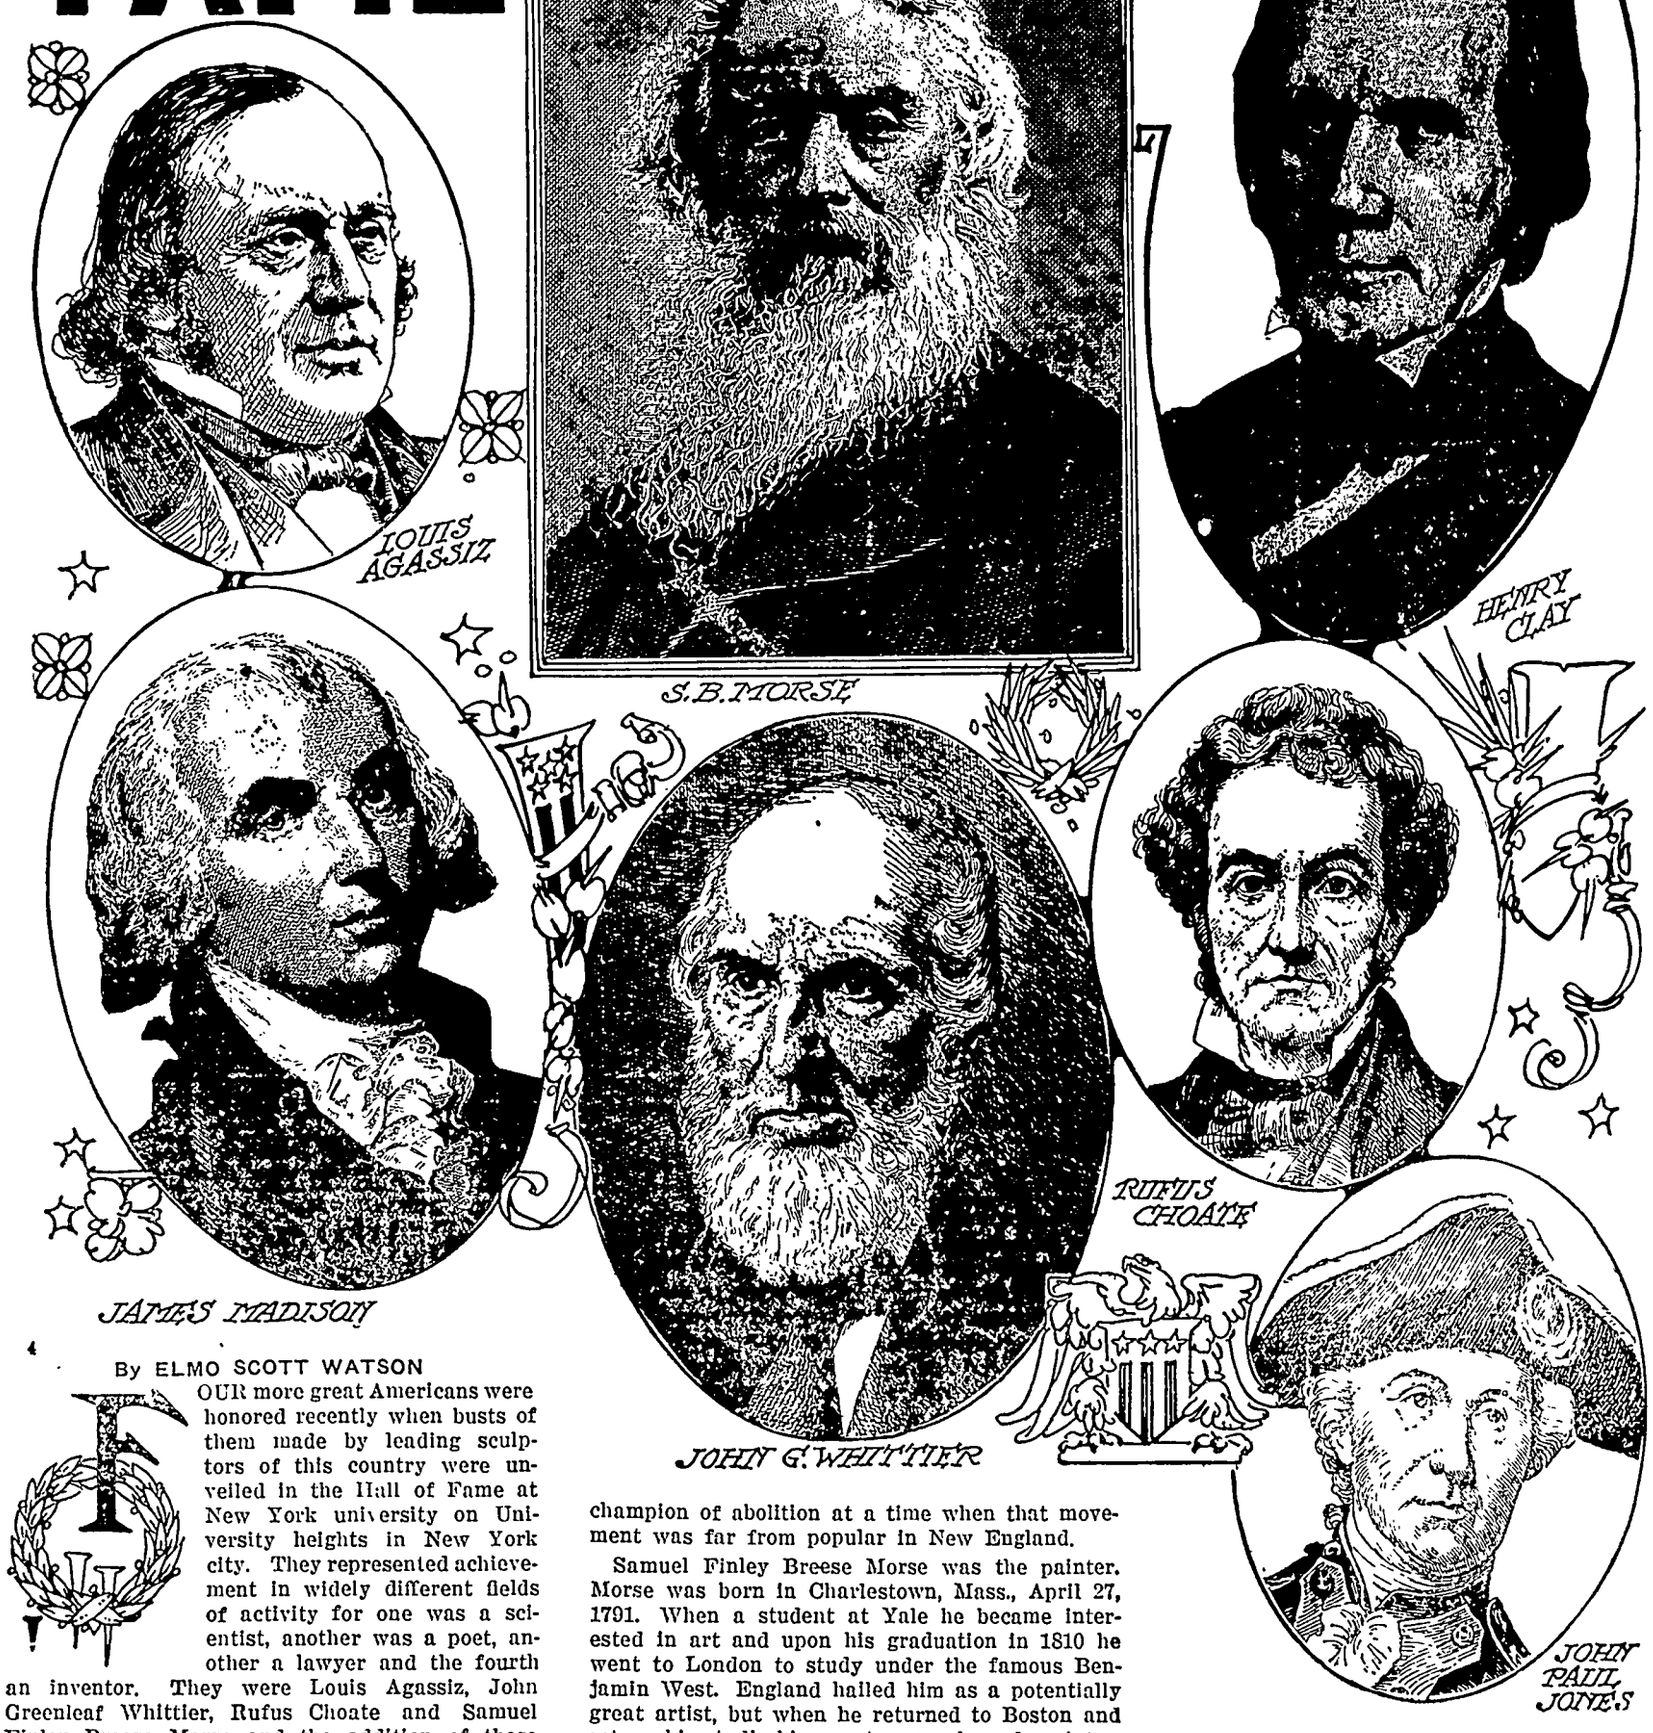
Our Seniors in company with Miss McGinnis and Miss Trumbell gave a May Breakfast to the Junior Class on Tuesday morning in the woods east of Goodell. It seemed a "call to the wild," for some whom we expected did not reoprt for duty when the roll was taken the same morning at 9:00 a. m.

Our school faculty were invited to the Day home on Tuesday evening of this week and after an hour or two of chatter and jokes were treated to plenty of delicious ice cream and cake. We retired to our homes between eleven and twelve with a conviction that Mr. and Mrs. Day and Dorance know how to entertain.

We have been gladdened by another most agreeable surprise in the form of an invitation to a picnic supper and motor boat ride at Clear Lake on Thursady evening of this week. Mr. and Mrs. R. A. Jorgenson are to be our host and hostess on this wonderful occasion. Some profess to be fearful of water but those of us who are not, will see that they get used to it. And O Boy! how we'll eat! But there will be plenty, we are sure.

With the evening at Day's, the picnic with the Jorgensons, and the big picnic dinner on Friday to cheer us up we all feel Klemme is a pretty good place to be and shall be glad to return next September.

INTO THE HALL of FAME



By ELMO SCOTT WATSON

OUR more great Americans were honored recently when busts of them made by leading sculptors of this country were unveiled in the Hall of Fame at New York university on University heights in New York city. They represented achievement in widely different fields of activity for one was a scientist, another was a poet, another a lawyer and the fourth an inventor. They were Louis Agassiz, John Greenleaf Whittier, Rufus Choate and Samuel Finley Breese Morse and the addition of these four now brings the number of portrait sculptures which have already been unveiled up to 48.

So far 65 men and women have been elected to the Hall of Fame and bronze tablets commemorating their achievement have been placed, but money for placing the busts of the remaining 17 has not yet been raised. Busts of James Madison, Henry Clay and John Paul Jones have been prepared for their niches, but, at the time of the announcement of the plans for this year's unveiling, sufficient funds had not been guaranteed to assure the inclusion of these three notables in the 1928 ceremony.

The history of the Hall of Fame, in brief is this:

On March 5, 1900, the council of New York university accepted a gift of $100,000, afterward increased to $250,000, from a donor whose name was withheld, for the erection and completion on University heights, New York city, of a building called "The Hall of Fame for Great Americans."

The hall was dedicated May 30, 1901, when twenty-six national associations each unveiled one of the bronze tablets in the colonade. May 30, 1907, eleven new tablets were unveiled, orations being given by the governors of New York and Massachusetts. May 21, 1921, twenty-six new tablets were unveiled. April 27, 1922, a temporary bust of Gen. U. S. Grant was unveiled by Marshal Joffre of France.

In May, 1922, busts were unveiled of Edgar Allan Poe, George Washington, Miss Maria Mitchell, Gilbert Stuart and Mark Hopkins. The busts of Robert Fulton and Horace Mann had been unveiled several years before. May 22, 1923, there were unveiled busts of R. W. Emerson, H. W. Beecher, Frances E. Willard, U. S. Grant (permanent), R. E. Lee, Alexander Hamilton, and Abraham Lincoln. On May 13, 1924, busts were unveiled of John Adams, Rev. Phillips Brooks, Samuel L. Clemens (Mark Twain), Peter Cooper, James B. Eads, Joseph Henry, Andrew Jackson, Thomas Jefferson, William T. G. Morton, and Alice F. Palmer.

On May 12, 1926, busts were unveiled of Roger Williams, advocate of religious freedom and founder of Rhode Island; James Kent, chancellor of the state of New York; Daniel Webster, statesman; Daniel Boone, explorer and frontiersman; Jonathan Edwards, theologian; George Peabody, financier and educator; Eli Whitney, inventor of the cotton gin; Edwin Booth, actor, and Augustus Saint Gaudens, sculptor. On May 5, 1927, the following were honored: John James Audubon, naturalist; William Ellery Channing, preacher and theologian; Admiral David Glasgow Farragut, Civil war naval commander; Benjamin Franklin, scientist and statesman; Washington Irving, man of letters and historian; Mary Lyon, founder of Mount Holyoke college.

Massachusetts has good reason to look upon the Hall of Fame unveilings this year as something of a Bay state triumph, for of the four men thus honored she claims three as native sons and the fourth, a citizen by adoption, sleeps in her soil in the shadow of her great university. However, there is something of the irony of fate in the fact that two of these sons of hers, who later became world-famous, did not fare very well at her hands in their youth. She let one almost starve when he was a struggling young painter and she ostracized and virtually drove from her borders the other when he became a champion of abolition at a time when that movement was far from popular in New England.

Samuel Finley Breese Morse was the painter. Morse was born in Charlestown, Mass., April 27, 1791. When a student at Yale he became interested in art and upon his graduation in 1810 he went to London to study under the famous Benjamin West. England hailed him as a potentially great artist, but when he returned to Boston and set up his studio his countrymen showed no interest in his pictures. The inventive genius, which was to make him famous later, was alive even then and in 1816 he and his brother invented an improvement in a pump for a fire engine. Although Eli Whitney, inventor of the cotton gin, and President Jeremiah Day of Yale were enthusiastic over the invention, the public was not.

Finally Morse decided to go to New York and continue his career as an artist, and there in the face of discouragement and poverty persisted until he gained the recognition which he deserved. Although at the age of forty he seemed committed to an artistic career, he was still interested in invention and in 1832, while returning from Europe, got the idea for the electro-magnetic telegraph from a certain Dr. Charles T. Jackson of Boston, who was a passenger on the same ship. Morse perfected his invention in 1837 and for the next few years vainly tried to get congress to appropriate funds to develop its use. Success came at last when he had all but abandoned hope and when the day came for the official demonstration, the message which was ticked off over the line which led from the United States senate chamber to Baltimore, 80 miles away, was: "What hath God wrought?" Morse lived to see his epoch-making invention used all over the world and when he died in 1872 he carried to his grave in Greenwood cemetery in New York city the greatest honors that the nations of the world could bestow upon him.

The story of John Greenleaf Whittier, the beloved Quaker poet, the "American Robert Burns," is similar in some respects to that of Morse. He was born December 17, 1807 at Haverhill, Mass. His youth was one of toil as a farmer boy until a wandering Scotchman, a tramp, struck the poetic fire in his soul by reciting some of Burns' lines to him. Through a devoted sister and the editor of the local newspaper, later famous as William Lloyd Garrison, the prophet of abolition, the boy's verses were published and he was given a chance for better schooling.

His contributions to the New England Weekly Review carried his name afar and by 1830 he was editor of that journal. But the death of his father took him back to the rocky hillside farm near Haverhill and there he remained for three years. In the meantime the abolition movement was gaining ground and it was a cause which appealed to the young poet. He became secretary of the Anti-Slavery society and editor of the Haverhill Gazette, which he made an abolition organ. But abolition was anathema to the New England mill owners and Whittier was forced to leave the state, as were Garrison and others.

After a short time in New York Whittier went to Philadelphia as editor of the Freeman and there a mob sacked his office and threatened his life. In 1840, he returned to Amesbury Mass., to make his home and when the slavery issue was raised again after the Mexican war he went to Washington to become editor of the National Intelligencer, an antislavery paper. When the Civil war ended the question of slavery for all time, Whittier returned to his home in Massachusetts and the belligerent abolitionist once more became the Quaker poet, desirous to "bury in the waters of oblivion all the bitter things I said in the strife."

When the Centennial celebration came in 1876 he was chosen to write the ode which should sing the glories of the nation on its one hundredth birthday. But for all this honor and the many others that came to him, he remained the simple poet of the people, beloved by simple people all over the world, and by none more than those of his own state among whom he died on September 7, 1892.

The third son of the Bay state who was honored in the Hall of Fame this year was Rufus Choate, lawyer, orator and scholar, of whom it was once said, "His personal magnetism combined with his wealth of learning and his strong sense place him among the greatest forensic advocates that America has produced. He may fairly be ranked as the equal of Lord Erskine." Choate was born at Essex, Mass., October 1, 1799.

While a student at Dartmouth college he was so strongly influenced by the great speech of Daniel Webster in the famous Dartmouth college case that he determined to study law. After his graduation from Dartmouth in 1819 he studied another year in that institution and then entered the law school at Harvard. After a brief time in the office of the attorney-general of the United States he opened his law office in Danvers, Mass., and in 1830 was elected to congress where he distinguished himself the next year by a speech on the tariff.

In 1841 Choate was elected to the United States senate in the place of Daniel Webster, who had been appointed secretary of state by President Harrison, and soon proved that he was a worthy successor of the great orator. Among his most brilliant speeches, which are ranked among the greatest ever delivered in the senate, were those on the Oregon boundary, the tariff, the fiscal bank bill, the Smithsonian institution and the annexation of Texas. For the next twenty years he was prominent in national affairs until his health failed and he died in Halifax, Nova Scotia, July 13, 1859, while on a journey to Europe to seek to regain his lost health.

"I cannot afford to waste time in making money," once declared Louis Agassiz and in that sentence he summed up his lifelong devotion to the ideal that made him one of the greatest scientists the world has ever known. Although he was born in Switzerland, America claims him as her own since he came to this country in 1846 at the age of thirty-nine and spent the rest of his life here. At one time Napoleon III of France offered him the directorship of the great Paris botanical gardens and a seat in the French senate, both great honors and highly remunerative. But Agassiz's reply was that he found the fauna and flora of this country too interesting ever to desire to leave it.

Nature study was his all-absorbing passion. He gave eighteen hours of every day to it. "There is never a moment except when I am asleep that I am not joyfully occupied," he once said. "Give me the hours you say bore you and I will receive them as most precious gifts." He cared nothing for money. "I am not a quarter of a dollar ahead in the world, and never hope to be," is another of his statements. And this was made at a time when business began to be a God in this country. By his personality and his devotion to science he awoke in Americans a greater appreciation for the work of the scientists and he did much to popularize nature study in this country. Agassiz died in 1873 and his grave in Cambridge, Mass., is marked by a massive bowlder from the Aar glacier in Switzerland, where some of his earliest geological studies were carried on.

Love's Tribute

To you men who spent weary months in barren, gloomy training camps in remorseless drudgery.

To you who went over seas and under murderous fire and sickening torturing gas, never faltered or failed.

To you lads who defied submarines and a nameless grave in the ocean and landed our army in France.

To those who are still suffering from wounds and gas, shell shock and disease.

To those who died.

Our prayers, our love and our tears.

Memorials Call Living to Duty

This is the seaaon when God's acre, to use a name favored by the Pilgrim Fathers, is at its loveliest. Nature is kind to even the meanest and most neglected burying place, carpeting the sunken grave with the softest green and glorifying the crumbling headstone with clinging vine and fragrant blossom. This is the season when the well-kept cemeteries are bowers of beauty, and the Gracelands, the Greenwoods, the Woodmeres, of the great cities, are visited by musing multitudes who do not forget to remember.

All over this land of ours are patriots' graves. The heroes of five wars rest in the soil of the country for which they died. Linked together inseparably is the youngest who died in the World war with the oldest who gave his all in the War of the Revolution. Roses and lilies; fuchsias and lilacs; flags and insignia; songs of thrush and cardinal; bugles sounding taps; thin wavering line of the veterans of the Grand Army of the Republic; strong, sturdy and youthful veterans of the last great conflict—what memories Memorial day brings, how costly is a nation's achievements in brain and brawn and blood!

It is a good and wise thing to muse amid the monuments and memorials where sleep those who loved the nation well enough to defend its principles and die for the preservation of its integrity. A journey to Mount Vernon just to stand five minutes before the tomb of Washington is worth all that it costs in time, money, even to those who live clear across the country. A pilgrimage to Springfield to dream by the hillside where the dust of Lincoln rests amidst the prairies that he loved and in the old town where his children used to play, is an education for the heart. What lessons at the patriot's grave for those of us who live—lessons of loyalty, sacrifice, and high service!

Visiting Graves of Brave Men They Led

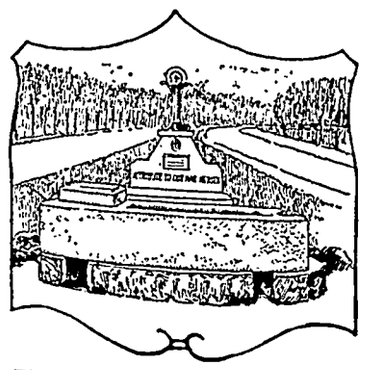
The American lads lying beneath the crosses in France received their measure of commemoration in the observance of Memorial day last year.

General Pershing, their commander, Marshal Foch, Ambassador Herrick, high officials of the French government and representatives of the American, French and British veterans' societies joined in honoring the hero dead.

A special service was held in the American cathedral in Paris and similar ceremonies in the American churches in other cities and towns. The French joined with the Americans in decking with flowers all the American war cemeteries.

Photograph shows Marshal Foch and General Pershing inspecting graves of American heroes in the cemetery at Suresnes.

Australia Has Unique War Horses' Memorial



The illustration shows a Purple cross memorial to war horses erected at Victoria, Australia. The Purple cross is an organization to help dumb animals. The memorial is a granite watering trough with a small dish for dogs at one end. It is surmounted by an electric globe on which is figured a purple cross. The motto of the society is, "Handle horses humanely."

To those we loved—who've gone away!

MONARCH

IVE STOCK NEWS

INE HUSBANDRY DEMANDS FORAGE

ere is no substitute for good man- ent in the production of pork. l management implies that one s attention to such factors as may ce production costs.

amplifying these statements, Wil- C. Skelley, assistant animal hus- man at the New Jersey experi- t station, adds: "One of the most rtant factors in reducing the pro- ion costs after the pigs are far- ed is the use of forage crops with grain. This has been proved not by scientific experiment, but also the experience of leading swine ers in the United States. Forage s are valuable for all swine, and cially for young pigs, because they ain much of the body-building ma- l needed in liberal amounts by ng growing animals.

Such crops are rich in protein ch is of the right quality to supple- t effectively the proteins of the mon feeds given to swine. In ad- on, they are rich in mineral mat- particularly lime and phosphorus, ded in large amounts by growing mals.

Lastly, forage crops contain vita- es, which scientists have found to necessary for the growth and th of animals. The choice of a ge will depend on the soil and atic conditions. The following do in New Jersey for summer pas- : alfalfa, the clovers, rape, oats peas, soy beans and bluegrass. early spring and late fall pasture, may be used."

illful Inbreeding Is Useful in Improvement

breeding of animals, in the opin- of experts in the United States artment of Agriculture, is one of most effective practices in the im- vement of live stock. However, ss directed with skill and under- ding nnd followed by intelligent ction of the progeny, inbreeding have undesirable consequences. reeding should be practiced only the most skillful breeders, and by n only when they have definite wledge of the ancestry of the ani- s involved. The purchaser of in- d males, however, need have no of using them if they are superior resentatives of the breed. As a tter of fact he should prefer inbred es to others, especially if they are related to his females, because are more nearly pure in their editary make-up, and for that rea- are more likely to reproduce them- es with uniformity. They should sold under a guaranty of replace- t if they do not breed. It is a gen- l rule that inbred animals when d to unrelated ones, even though latter are themselves inbred, pro- e offspring larger and more vigor- than either parent.

ractical Reasons Why Small Lambs Sell Best

he reason generally given by the king companies for the higher ce paid for the smaller lambs is t the butcher shops and house- es demand the small cuts when y buy lamb. A lamb carcass di- es naturally into several cuts, such the leg of mutton, the lamb chops, d the shoulder, roast, or stew. The of lamb and the shoulder cannot cut up into smaller pieces very lsfactorily, so they are usually sold one piece. When these pieces get ittle too heavy, the consumer ob- ts seriously and will not buy them as high a price as the smaller ces. The packing companies nat- lly must buy accordingly in buying live lambs on the market. There usually a slight advantage in qual- of meat in favor of the smaller b carcass also.

d Hog Pastures Are Cause of Runty Pigs

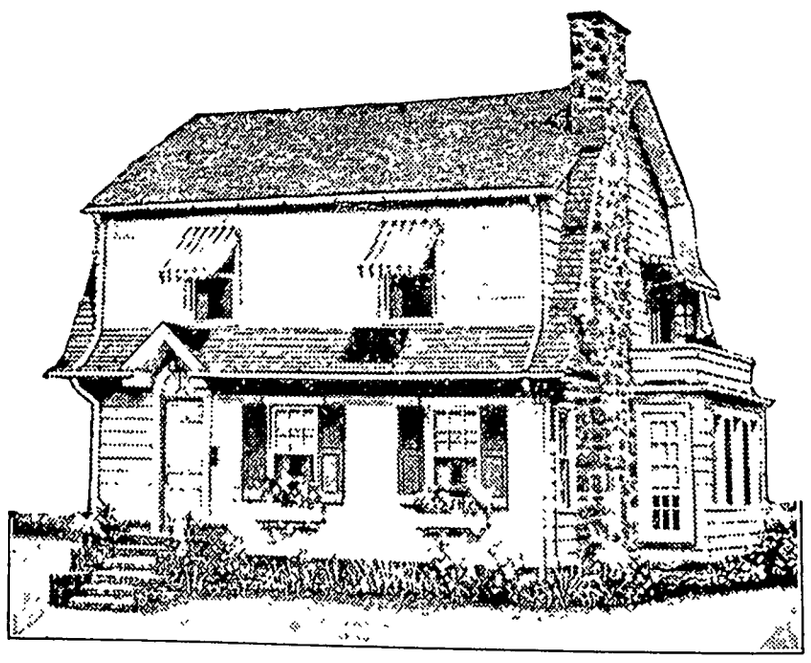
log lots and pastures used year er year are one of the causes of nty pigs. Rotating the hog lots and stures so as to keep free from dis- se and hog parasites will help swine wers to get the best and cheapest wth and gains from pigs. This is pecially important if a farmer plans grow hogs as a business.

Results obtained on farms where a stem of rotation is being used to vide lots and pastures which are e from worms and diseases show at the size of the average litter tured could easily be increased one two pigs. An increase of 1.25 pigs each litter was obtained in 1926 m 702 sows on 55 farms in South kota where such a system of lot d pasture rotation is being devel- ed.

Sows Eat Pigs

Depraved appetite due to some ab- rmal condition which almost always caused by improper feeding usually the reason for sows eating their gs, and the way to stop it is to bal- ce the ration. Lack of protein or neral matter is indicated, and the dition of skim milk, buttermilk or nkage or the placing of a mineral xture before sows during pregnancy suggested. Keep the pigs away from ir mother except at nursing time a few days.

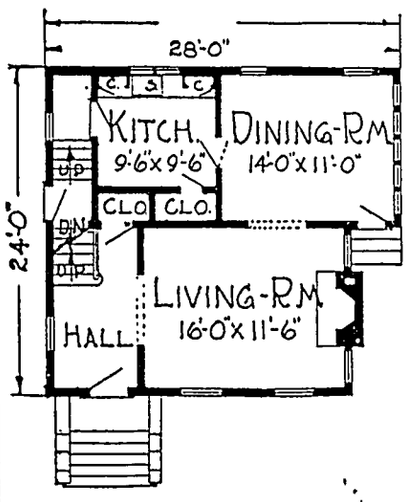
Six-Room House Specially Designed for the Family of Average Means



By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

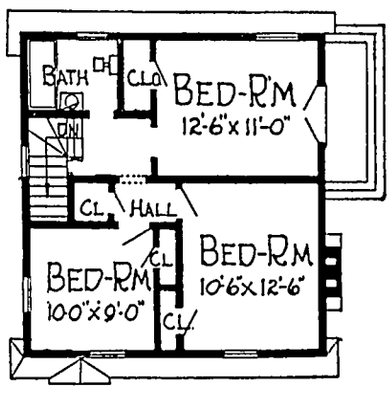
A small home at once unusual in appearance and pleasing to the eye is to be seen in the accompanying photograph. The unusual effect results from the side hang of the false roof from the second floor, which has been done in imitation of the Dutch colonial style of architecture. Though a false roof it is not subject to the



First Floor Plan.

criticism which might be expected to be made of it. In actual fact it adds to the appearance of the house, and the rough stone fireplace chimney completes a finishing touch of real merit.

Though measuring but 28 by 24 feet on the foundation, this little house offers a surprising amount of roominess. On the first floor there is, in addition to a rather large entrance and stair hall, a living room of ample size, a dining rooom and kitchen with an



Second Floor Plan.

entry leading to the basement and service entrance. Not only that but there are also two good closets, one in the entrance hall and the other in the kitchen, which will be greatly appreciated by the housewife.

Above stairs there are three bedrooms, all of about the same size and all provided with roomy closets, a bathroom and, in the hall, a linen closet. All the bedrooms have good cross ventilation and all are well lighted. Though none of them, or any of the other rooms in this house, could be called large, they are of sufficient size to afford an ample measure of comfort for the average family and the whole arrangement possesses a coziness that adds much to the homelike effect.

Modern Decoration Makes Use of the Stippled Wall

How many housewives face housecleaning season with the wish: "If only I could think of some way to renovate these old walls!"

Various paints, papers and fabrics may have been used, one after another, so that something novel but not too expensive is wanted.

Today the tendency in wall treatment is toward stippled, palm-finished, texture-and-glazed, "antiqued" and other rough-surfaced effects for walls and ceilings. These can be produced with sand-floated or lime-putty-finished, gypsum plaster. But what is wanted is a material that will give these effects without replastering over old walls, that is washable and possible for the housewife herself, or her husband, to apply.

There are several materials available which meet these specifications. They are paints which come as dry white powders which, when mixed with water, become plastic. Then dry pigment or oil paint of any desired hue or shade or tint is stirred in, and this mixture then is brushed onto the wall.

But, while flat wall paints and calcimines are liquid, these materials have body.

So, before they dry, these can be stippled with an ordinary stippling brush, or given a scroll texture with the finger tips, or a palm of the hand, or the brush, putty knife or even the heel of a kitchen spoon to produce any distinctive texture that may be wanted.

If one of these plastic paints is to be applied over new plaster or wallboard, it is best to size the surface first with a good grade of varnish size. If it is to be put onto old papered walls, the paper should be removed first; cracks should be patched and the sizing brushed onto the walls when they are dry.

Where it is desired to make the walls washable, a final coat of size should be added to the outside of the decorated surface. Then soap and water will not affect either the texture or the color of the plastic decoration.

The variety of texture-tone combinations possible with such materials is limited only by the imagination and skill of the decorator. They also lend themselves to "two-toning," glazing and similar rich effects.

"Home" for Baby

Crib, bath, dressing table, toilet-ware cabinet, garment drawer and indoor carriage are combined in a new utility outfit for infants recently placed on the market. The unit gives enough room for a two-year-old baby, and will conveniently go through an ordinary door.

Home Entrance Reflects Character of the Interior

Choosing the entrance is one of the most important parts of the planning of a new home. How shall we know that we have selected one of good taste and right lines?

Proper use of details is one of the best means of distinguishing the entrance that is done in a masterly way, from the ordinary, mediocre type.

Three qualities are essential in the entrance. Besides being beautiful in itself and suitable for its purpose, it must be durable.

Beauty implies good design and correctly proportioned parts. Suitability means that size and elaboration are in keeping with the size and type of the house. Durability means that it is made by the best methods and of the right materials to withstand the ravages of wear and weather.

Where the artist uses different colors, or light and shade, the architect, working with building materials, relies on moldings or molded surfaces to produce the play of light and shadow that gives character to an otherwise flat, uninteresting expanse of wood. So it is that we find doors and other woodwork divided into panels of various sizes and shapes, outlined usually with a simple molding.

Expert Lauds Copper as Roofing Material

"Of late years," says Austin C. Lescarboura, former managing editor of the Scientific American, in writing on home building, "there has been an increasing tendency to use copper for roofing purposes, especially in the better types of dwellings. It is purer than most other metals as they are ordinarily manufactured for industrial purposes, and is less active chemically than any but the noble metals, gold and silver. This immunity to chemical attack insures a high resistance to corrosion by air, water, acids and other agencies. In comparison with other metals its endurance may be counted by decades rather than years. For strength coupled with ductility, it is unexcelled."

Moreover, copper is fireproof 100 per cent, thus reducing to a minimum the hazard of fire from an adjoining building. Connecting a copper roof to the ground by copper down spouts provides for the home the best possible protection against lightning.

The Porch

The porch must be treated with care to seem a part of the whole, rather than the excrescence it so often appears. Avoid the many posts and pillars which were so favored some years ago, and if you have columns be sure that they are of graceful proportions.

POULTRY

DEVELOPMENT OF YOUNG TURKEYS

Many people report good success in raising young poults until they are one or two months old and then report losses. In a recent majority of cases this is due to the birds becoming affected with blackhead. This disease does not always show a blackened color of the head and for this reason many confuse it with something else. Blackhead is really a disease of the liver and intestine and in some of the extreme cases the head shows a discoloration. The more common symptoms are weakness in activity, a diminished appetite and diarrhea.

Blackhead is closely associated with small cecum worms. The small parasitic protozoan which causes blackhead seems to enter the system of the fowls through the small irritations made by these worms. Therefore, the prevention of worms is as important as the prevention of the disease proper.

Fortunately the prevention of worms is accomplished by the steps necessary to prevent the disease. Keeping the poults on fresh ground away from old birds, especially chickens, is necessary. Chickens are often affected with the disease but it does not injure them in the same manner as turkeys. Moving the poults to fresh ground at frequent intervals not only insures greater freedom from the disease, but it also helps to furnish green material and good range.

It has been demonstrated that it is not necessary to allow young poults the run of the farm. In fact many people are reporting better success when keeping them on ground that is not frequented by chickens.

A good ration for growing chickens is also a good ration for young poults.

Tuberculosis Is Subject of New Government Film

(Prepared by the United States Department of Agriculture.)

"T. B. or Not T. B.," a question that is causing many Midwestern poultry men to soliloquize on the future of their flocks, is the title of a recently released United States Department of Agriculture educational film. The picture is a two reeler dealing with tuberculosis of poultry.

The film, which is presented in story form, is designed to instruct poultrymen on ways and means of controlling this plague and keeping it from their farms. Scenes depict the various common conditions which are conducive to the introduction of the disease to the poultry yard, the breeding of germs and the spread of the infection Avian tuberculosis is not only fatal to fowls but spreads to swine as well, frequently resulting in heavy financial losses to the owners of the sick birds. Methods of wiping out the dreaded avian T. B. baccili and preventing future losses from the disease are stressed in the new film.

Copies of United States Department of Agriculture films are available for loan without charge other than the cost of transportation, which must be assumed by the borrowers. Prospective users of the film should apply for bookings to the office of Motion Pictures, United States Department of Agriculture, Washington.

Apoplexy and Internal Rupture Cause Death

When hens that have been apparently healthy are found dead under the roost in the morning or on the nests, the loss is probably due to apoplexy or some internal rupture. This is often due to the strain of laying. Too heavy feeding of corn which makes the birds overfat is responsible for some of the sudden losses. Leghorns do not become overfat as easily as the heavy breeds but they lay a large egg which may cause a severe strain and occasional losses. A few birds may die from apoplexy and internal rupture in spite of the best of management and such losses help to make up the normal death rate in most poultry flocks. A postmortem examination of the internal organs may help in locating any disease if that condition is present.

Get Chicks Outside

Weather permitting, baby chicks should be allowed to run out into the open air when they are a week old. Running outside will give them an opportunity to get away from the heat of the brooder stove and absorb the life-giving elements of the sun at the same time. Wooden frames two feet by ten feet, covered with one-inch poultry netting, can be used to make a small yard near the brooder house. The first few weeks the baby chicks should be confined to this small yard

Buy Baby Chicks

Many poultry raisers would find it more profitable to buy their baby chicks rather than try to batch them. Each year the hatcheries are producing better-quality chicks. This year it would be safe to state that average hatchery chicks will be better than many farm-hatched chicks. Such a condition may be attributed to the hatcheries having culled their breeding flocks closer than ever while the average farmer has not practiced culling

Water for Your Birds

Fresh water is a necessity for your bird, says Nature Magazine. Water for bathing should be made available daily during the warm months and twice a week during the winter. If the bird refuses to bathe do not force it. Always keep a supply of good gravel or grit in the cage to serve in place of teeth.

Carvings of Living Men

Faces of living men are carved in stone on the new building of the Imperial Chemical Industries, nearing completion at Westminster, England.

One of the faces is that of the head of the concern, Sir Alfred Mond. All the other carvings are said to be excellent likenesses of many men prominent in the chemical world.

The sculpture around the building also includes figures of peacocks, which are said to be there as a symbol of incorruptibility, following the ancient tradition that the flesh of the peacock is incorruptible.

In Wrong

The prevailing system of buying everything on credit caused Roger Babson to remark: "The system has stripped nearly every one of their financial privacy and in small towns this does not always work out to advantage. I met a friend of mine in one of these towns and asked him if he knew a certain party.

"Oh, yes, I know all the best people in town," he cried, "but I can't help you socially."

"How is that? Is there anything wrong?"

"Oh, no, but I'm the credit man, and they know I know too much about them."

Any Woman Can Look Stylish

By MAE MARTIN

Most stylish looking women you see are simply "good managers." They don't open their pocket-books wide for every change in fashion. They know simple ways to make last season's things conform to this season's styles.

Thousands of them have learned how easily they can transform a dress, or blouse, or coat, by the quick magic of home tinting or dyeing. With true, fadeless Diamond Dyes, anyone can do this successfully. The "know-how" is in the dyes. Each package represents the perfection of 50 years of dye-making. They don't streak or spot like inferior dyes. New, fashionable tints appear like magic, right over the out-of-style or faded colors. Tinting with Diamond Dyes is as easy as bluing, and dyeing takes just a little longer. Only Diamond Dyes produce perfect results. Insist on them and save disappointment.

My new 64-page book, "Color Craft," gives hundreds of ways you can make your home and clothes stylish and attractive, and do it with little money. It's FREE. Send for your copy, NOW. Write Mae Martin, Home Service Dept., Diamond Dyes, Burlington, Vermont.

Meaning of "Greyhound"

The "grey" in greyhound is not meant to represent the color of the animal. "Grey" is a Scandinavian word for hound, this particular species of animal from that country having the name. So that when we use the word "greyhound" we are really saying "hound-hound."

Protection

Hunter—What's all the trouble?

His Wife—Willie has swallowed one of your cartridges and I daren't wallop him for fear it will go off.—Passing Show.

Hot Stuff

"Some pretty spicy testimony in that divorce case, eh?"

"Yeh; he claimed she threw pepper in his face."

Always look on the bright side of things—and if you are buying them it is well to look on both sides.

If a fat man is anxious to lose flesh all he has to do is shave himself.

The vain being is the really solitary being.—Auerbach.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *genuine* printed in red? It isn't the genuine Bayer Aspirin without it! At drugstore always has Bayer, with the proven directions tucked in every box.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

In a Pinch, Use

ALLEN'S FOOT-EASE

For Tired Feet It Can't Be Beat

At night when your feet are tired, sore and swollen from much walking or dancing, sprinkle two ALLEN'S FOOT-EASE powders in the foot-bath, gently rub the sore and inflamed parts and relief is like magic. Shake Allen's Foot-Ease into your shoes in the morning and walk all day in comfort. It takes the friction from the shoe. For FREE Sample address, ALLEN'S FOOT-EASE, Le Roy, N. Y.

REDUCE PUFFED ANKLES

Absorbino reduces strained, puffy ankles, lymphangitis, poll evil, fistula, boils, swellings. Stops lameness and allays pain. Heals sores, cuts, bruises, boot chafes. Does not blister or remove hair. Horse can be worked while treated. At druggists, or $2.50 postpaid. Describe your case for special instructions. Horse book 5-S free.

Grateful user writes: "Have tried everything. After 3 applications of Absorbine, found swelling gone. Thank you for the wonderful results obtained. "I will recommend Absorbino to my neighbors".

ABSORBINE

TRADE MARK REG. U.S. PAT. OFF.

W. F. YOUNG, Inc. 510 Lyman St., Springfield, Mass.

Raindrops Measured

If 312 average raindrops were laid side by side they would make an inch of water. This has just been determined at University college, Dublin, where more than 3,000 falling drops were measured. The experimenters found that raindrops vary in size, some being ten times as large as the average.

No Wonder

"My husband was furious yesterday. He came across one of my love letters unopened!"

"But if it were unopened what could he be angry about?"

"It was one that he had sent to me!"—Stockholm Kasper.

The Usual Result

"So you had a quarrel with the boss. What was the outcome?"

"The cessation of my income."

WILL DO ALL IT CLAIMS TO DO

Mrs. Steele Says of Lydia E. Pinkham's Vegetable Compound

Pratt, W. Va.—"I was so weak and nervous that I was in bed most all the time and couldn't sit up and I am only 30 years old. I saw your advertising in a magazine and after I had taken three doses of Lydia E. Pinkham's Vegetable Compound I could feel that I was better. After taking two bottles I began doing my work and I feel like a new woman. I recommend the Vegetable Compound to my friends and say it will do all it claims to do and more. I will gladly answer all letters I recive."—MRS. S. E. STEELE, Pratt, W. Va.

Here's Speedy Relief for Tender, Aching, Swollen Feet

Moone's Emerald Oil Must Give Complete Satisfaction

Or Money Cheerfully Refunded.

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture, you'd give anything to get relief.

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the swelling reduces.

And as for Soft Corns and Callouses a few applications each night at bed time and they just seem to shrivel right up and scale off.

No matter how discouraged you have been with powders, foot baths or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees Moone's Emerald Oil to end your foot troubles or money back.

SERVICE

from over 33,000 stations in more than 100 countries

PERMANENCY of service is a part of the sale of every General Motors product. General Motors has girdled the world with service organizations. Authorized service for General Motors' customers is provided through 33,000 stations in more than 100 countries.

The fact that so many General Motors' sales each year are made to former owners of its products is the best possible proof that the service of both the car itself and the dealer who sold it has been *continuously* satisfactory.

"A car for every purse and purpose"

The new models of General Motors cars offer more quality, more performance, more comfort, more beauty than at any other time in the history of the automobile industry. They include "a car for every purse and purpose"—a choice of suitable models in each price class. Check on the coupon below the car or cars about which you would like full details, then mail in the coupon. No cost—and no obligation.

CHEVROLET. 7 models, $495 to $715. Bigger and better than ever before. 4-wheel brakes. More powerful engine. Luxurious Fisher Bodies. New hood. New Duco colors. *Also* truck chassis; ½-ton, $395; 1-ton, $495.

PONTIAC. 7 models, $745 to $875. Lowest-priced quality "six." New models improved from radiator to tail-light. 4-wheel brakes. Bodies by Fisher. New GMR cylinder head. Increased power. Duco finish.

OLDSMOBILE. 7 models, $925 to $1085. "The Finest Car of Low Price." Completely redesigned and improved by General Motors. Longer, roomier, more powerful. 4-wheel brakes. Fisher Bodies.

OAKLAND. 7 models, $1045 to $1325. The All-American "Six." Smooth, powerful engine. Longer, lower and more beautiful bodies by Fisher. 4-wheel brakes. Every convenience. New Duco colors.

BUICK. 16 models, $1195 to $1995. Largest value in Buick history. Beautiful low bodies by Fisher. Getaway like an arrow. Vibration beyond belief. 6-cylinder "valve-in-head" engine. Duco finish.

JUNIOR-SENIOR BANQUET WAS GREAT SOCIAL EVENT

Gymnasium Beautifully Decorated For The Occasion

The greatest social event of the year for students of the Klemme High School, and especially for the upper classes was the Junior-Senior Banquet given last Friday evening.

Much credit for the success of this affair must be given Miss Lenabelle McGinnes, Junior class sponsor and head of the domestic science department of the Klemme high school. Miss McGinnes supervised both the decoraitng of the gym, the preparing and serving of the banquet.

The room was very prettily decorated and the Junior class showed real skill and art in the finished product. The west part of the gym was divided off from the room and converted into a beautiful reception room, nicely furnished and well lighted with floor lamps.

Directly off from the reception room the guests passed through a door into an artificial garden where the bansuet was served. This part of the scheme ocupied the greater part of the gym to the east of the reception room.

The garden was a very pretty representation. A lattice had been built in a square some few feet out from the gym walls to make the enclosure smaller. Sweet peas and vines covered the lattice work. In the center of the garden a May olPe had been put up and streamers from this came down to the tables arranged about the garden, the streamers being fastened to the backs of the chairs on the outer sides of he small tables, where four guests were placed at each table. On the back of each chair was suspended a May Basket as a place card; and the center piece of each table was a large May basket filled with sweet peas. The "path" leading into the garden and the center portion of the garden floor was covered with green artificial grass sod. The menu and toast program were properly placed for each guest.

Claire West was master of ceremonies and lead as toastmaster, extending a welcome. Harvey Nelson, Senior class president responded to the toast with "A Rose." Other toasts on the program were, "The Soil," Lucille Kraus; "The Roots," Ethel Johnson; "The Rain," Orville Stokesbary, "The Weeds," Lawrence Greiman; "The Stem and the Leaves," Gladys Wilson; "The Bud" Marie Carson; and "The Perfect Flower," Miss Trumbell.

THE MENU

Fruit Cocktail
Baked Fowl with dressing
Whipped Potatoes Peas in Cases
Clover Leaf Rolls Butter
Radishes Olives
Peach Salad Supreme
Salteens
Vanilla Ice Cream Cake
Coffee
Candy Nuts

The affair is more than of passing interest in more ways than one. The Junior Class under the direction of Miss McGinnes, put on the affair with but a minimum of expenses. All of the decorations were fashioned by the class, the menu cards, programs and flowers were all hand made. The banquet was prepared by the domestic science girls under the direction and help of Miss McGinnes and the ice cream was home made. The class and their teacher are to be complimented on all of this.

Ell Township News

(Special Times Reporter)

Alvin Goll spent Sunday at the Wm. Schlawin home.

Mr. and Mrs. Henry Barz were Sunday visitors at the Geo. Born home.

Mrs. E C. Buentenbach was in Garner on business Tuesday afternoon.

Mr. and Mrs. Werner Schlawin and La Vohn were Sunday guests at the Irvin Rosendahl home.

Mr. and Mrs. Albert Schmidt and family visited at the Albert Barz home Sunday.

Mr. and Mrs. Emery Schaefer and little son, Donald, visited at the Peter Christian home Sunday.

The Ladies Aid of the Reformed Church met at the home of Mrs. Albert Barz on Wednesday afternoon. About twenty members were present and everyone enjoyed the meeting. Delicious refreshments were served by the hostess.

Liberty News Notes

(Special Times Reporter)

Frank Ward is working at the Emil Beier home this week.

Miss Lydia Beier helped Mrs. Haefner Tuesday and Wednesday with house cleaning.

Mr and Mrs. Otto Pringnitz and children visited with Mrs. Pringnitz parents in Minnesota Sunday.

Mr. and Mrs. Roy Schaefer and children were Mason City callers on Tuesday afternoon.

John Miller and brother-in-law from Benton County visited at the Oscar Carlson home Wednesday.

Harry Pringnitz accompanied Mr. Will Schaper to Wells, Minn. last Friday to help take down a silo.

Mrs. Oscar Carlson and Carl were callers at the Will Lemke home on Thursday evening.

Mr. and Mrs. Floyd Franklin were Mason City callers one day last week.

The M. E. Church kiddies are busy this week attending the Bible School. Rev Gauger is conducting it this week in the Liberty church.

Will Suckow is driving the Skelly Oil Truck for Clarence Bredlow now days while Clarence is on his honeymoon.

Miss Fern Stille returned Wednesday from the hospital in Hampton. Her hand is healing as well as could be expected.

Mrs. John Lemke, Mrs. Henry Lemke Sr. and Billie and Byrnes Lemke visited in Goodell Monday afternoon.

Ethel Schoenwetter, Dorothy Marshall and Leon Gast all had their tonsils removed Friday in Dr. Missman's office, Dr. Carlson doing the work. All are recovering nicely.

Miss Annabelle Carlson and Mr. Clarence Bredlow were married in the Little Brown Church. From there they will go to Wisconsin to visit her parents for a while.

CARLSON—BREDLOW

Miss Annabelle Carlson and Mr. Clarence Bredlow quietly slipped away from their friends and were married at the Little Brown Church near Nashua, Iowa, Wednesday.

Following the ceremony at the famous shrine, they drove in their car to Wisconsin, where they will visit Mrs. Bredlow's parents for a time before returning to Klemme to begin housekeeping.

Mr. and Mrs. Bredlow are of the best of the comunity's younger set. For some time the Bride has been a teacher in the rural schools of this vicinity, and last year taught in the new brick school west of this town. She is a very pleasant young lady and is very capable in many ways. Mr. Bredlow is one of our young business men and is in the oil and gasoline business. Mr. Bredlow is a clean cut young man of high ideals and has gained many friends while in business here.

The Times joins their friends in extending congratulations and very best wishes.

Robert Roths visited at the Henry Buseman home and also to get his mother who had been visiting there

Mr and Mrs Dick Swalve and family were Tuesday evening visitors at the David Schwichtenberg home.

Mrs Frank Roths spent Wednesday and Thursday of last week at the home of her daughter, Mrs. Henry Buseman and family

Mrs. David Schwichtenberg drove to Mason City last Saturday to meet her sister, Mrs. Frank Ryan, who came for a week's visit with relatives here

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for tho 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about tho height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

NEWS REVIEW OF CURRENT EVENTS

Signing of Flood Control Bill Stimulates the Mississippi Valley.

By EDWARD W. PICKARD

PEOPLE of the lower Mississippi valley threw up their hats and cheered when the news was flashed over the country that President Coolidge had signed the flood control bill and made it part of the law of the land. Throughout the region especially affected there were happy celebrations, and New Orleans particularly rejoiced, calling the day the greatest since the end of the Civil war. That city, relieved of fear of annual floods, will go ahead with plans to take her place among the big cities of the country and her industrial and real estate men already are out after new business. In lesser degree the whole valley up to the mouth of the Missouri river is similarly stimulated, and the railways running through the area are expecting steadily increasing business.

Under the provisions of the act a board of three is to make recommendations to the President in connection with the adjustment of engineering differences between the Jadwin plan and the Mississippi river commission plan for flood control. Major General Jadwin, chief army engineer, and the president of the river commission are two members of this board, and Mr Coolidge selected Carleton W. Sturtevant of New York as the third member. Mr. Sturtevant is sixty-four years of age and was recommended by members of the American Society of Civil Engineers. He graduated as a civil engineer from the University of Missouri in 1884. In his early years, Mr. Sturtevant had charge of survey work as a government engineer on the Mississippi as a private engineer. He was employed on the Panama canal and had charge of engineering work in South America and in Mexico.

The bill centers authority in the hands of the President and the army engineers. Actual construction work will be handled by the present Mississippi river commission under the direction of the secretary of war and the supervision of the chief of engineers. An appropriation of about $25,000,000 will be required for the first year. The act authorizes a total expenditure of $325,000,000, but the President and General Jadwin believe the actual outlay during the next ten or twelve years will be at least $500,000,000. Mr. Coolidge's fears that a land scandal would arise were allayed by a provision that the government shall acquire flowage rights only on such land as is not now subject to overflow.

TWO more big pieces of legislation were put up to the President when the senate adopted the conference reports on the farm relief and merchant marine bills. That the former, known as the McNary-Haugen measure, was certain to be vetoed by Mr. Coolidge was generally admitted, and its supporters were not sure they could muster enough votes to pass it over the veto. The report on the merchant marine bill was accepted only after a filibuster conducted by radical senators who attacked it as a ship subsidy measure in disguise, the postal subvention and construction loan features especially being denounced. Nine Republicans and eleven Democrats voted in the negative. Though a majority of the house rules committee are against the Boulder Dam bill, the extremely active lobby boosting that measure forced the committee to put it up to the house and a special rule was granted permitting its consideration with eight hours of debate. This may prevent the planned adjournment of congress at the end of this week, but it is unlikely that the filibuster against the bill, announced by Senator Ashurst, can be broken down.

NOTHING happened last week to change the prediction of the Hoover and Smith boosters that their respective candidates would have virtual walkaways in the Republican and Democratic national conventions. Indeed, these predictions were strengthened, for Hoover gained 21 and perhaps 29 delegates in New Jersey and 14 in Alabama, and Smith garnered 44, from New Jersey, Vermont and Montana.

South Carolina Democrats in convention elected 18 delegates to Houston uninstructed but directed to vote for a dry nominee and a dry platform. The anti-Smith faction lost in the attempt to instruct the delegates to vote against Smith "or other candidates of similar views."

The New York governor, according to his supporters, already is assured of 603½ votes on the first ballot at Houston, or within 30 of the necessary two-thirds. His opponents dispute 79½ of these votes, but there are few bold enough to dispute the claim that Smith is certain of nomination and that the convention will be only a Democratic love feast. Reports reached the senate committee on campaign expenditures that the governor's campaign was being financed by contractors who had held fat contracts from the New York state or city governments; but these were denied by W. F. Kenny, one of the contractors in question who has contributed $70,000 to the Smith fund. He said he had done, in eleven years, not more than $243,000 of business with the city and he added he was ready to add to his contribution to the limit of his ability to pay. Other substantial contributors made similar pledges.

Hoover's certainty of nomination is more open to discussion and is especially disputed by Lowden and his followers. The Hooverites claim 382 instructed and favorable votes and a probable total of 467 on first ballot, and give 226 to Lowden. But the Lowden figures are: Hoover 329½; Lowden, 258½; uncertain, 317.

Secretary of the Treasury Mellon, addressing the Pennsylvania delegation, created a sensation by giving Hoover as his choice for the nomination provided President Coolidge could not be persuaded to run again. "Hoover seems to come closest to the standards we have set for this high office," he said, but at the same time he urged the delegates to remain uncommitted to any candidate until they reached Kansas City and could determine in caucus what course was best for the party and the country. To reporters Mr. Mellon said afterwards: "It is not certain that Mr. Coolidge will not consent to the use of his name. The President may be a candidate." In which opinion he agrees with Charles D. Hilles of New York and other Easterners. It was said in Philadelphia that Mr. Mellon's declaration concerning Hoover was prompted by the knowledge that William Vare, local Republican boss, was ready to come out in favor of the secretary of commerce. And this Vare did shortly after the Mellon statement. Lowden and Dawes partisans still insist that some of the 79 Pennsylvania delegates will be against Hoover.

CHIANG KAI-SHEK, leader of the Chinese Nationalists, rejected Marshal Chang's proposed truce in the civil war for the purpose of uniting against Japanese aggression, and both the Southerners and their allies, the forces of General Feng, resumed their movement on Peking. Chang prepared for the withdrawal of his troops and himself to Manchuria but Feng intercepted him at Machang where there was heavy fighting. Early capture of both Peking and Tientsin was foreseen, and both American and British forces in that region were made ready to protect their nationals. The Japanese, in full possession of Tsinan and the zone along the railway, decided to send troops to Manchuria if necessary to prevent disturbances there. The American force in north China totals 4,400, most of whom are at Tientsin.

PREMIER BRATIANO of Rumania defies his enemies, and has told parliament that his cabinet has no intention of resigning or heeding other of the demands of the peasants. Juliu Maniu, leader of the peasants, says they will now boycott the government completely and if that doesn't have effect they will resort to active resistance in nonpayment of taxes.

Carol, former crown prince of Rumania, driven out of England, took refuge in Belgium, where he was told he might remain so long as he behaved himself. Friends have leased for Carol and his companion, Magda Lupescu, the magnificent Chateau d'Ardennes, near Dinant.

DR. GUSTAV STRESEMANN, foreign minister of Germany, lay almost at the point of death most of last week, but at latest reports his condition showed a little improvement. His illness created great anxiety in Germany and his political enemies, the Nationalists, took advantage of it to push their candidates in the general election set for Sunday.

SECRETARY OF STATE KELLOGG'S anti-war treaty plan was warmly indorsed by the British house of lords when it unanimously adopted Lord Reading's resolution calling on the government for "prompt, favorable consideration of these proposals." Premier Bruce of Australia has given the proposals his hearty approval, and Japan's reply is expected to be an acceptance of the principles enunciated. It is reported in Paris that Mr. Kellogg will be given this year's Nobel peace prize by the Norwegian parliament for his work in forwarding world peace. The award will not be made until November.

REDS from sixteen countries, including the United States, attended a Communist convention at Cassel, Germany, held under the auspices of the Third International and presided over by a nephew of Rykoff, assistant Russian commissar of foreign affairs. The discussion was mainly concerning means of extending Communist activity in the armies and navies of "capitalistic" nations and was extraordinarily frank. Progress in this work in the navies of England, France and America was reported, but Moscow delegates were told the prospects of revolutions in Europe were discouraging, especially since the failure in Vienna last year.

ANNOUNCEMENT is made by the Fairchild Aerial Camera corporation that it has built for the army air corps an aerial camera with a range of eight miles, designed to photograph areas as large as four square miles. Picture taking at heights of 30,000 feet or more will be possible by devices which include an electrical heating system to prevent the shutter from freezing at temperatures as low as 60 degrees below zero. The machine has complete automatic control and operation, including a device to record the time the picture was taken, the altitude, the time of each exposure and other useful data.

FASCISM'S new electoral law was passed by the Italian senate. It reforms the chamber of deputies and abolishes democratic popular suffrage. The new chamber will be made up from a single list of 400 Mussolini-picked men, whom the people will approve or reject in a special "yes" or "no" plebiscite. No opposition list is to be presented.

UNCLE SAM is going into the business of manufacturing and disposing of fixed nitrates and electric power, if the Morin resolution adopted by the house is accepted by the senate in lieu of a similar resolution by Norris already adopted by the upper house and becomes law. The measure, relating to Muscle Shoals, may be vetoed by the President. In addition to setting up a $10,000,000 corporation for the operation of the obsolete nitrate plants, and the disposal of power, the bill authorizes expenditure of sufficient funds to complete dam No. 2. Estimates on the authorized improvements run as high as $40,000,000. This will be in addition to the $140,000,000 which the government has already spent on the Muscle Shoals project.

GUILTY on two charges of imprudent and unministerial conduct and suspended permanently from exercising the functions of a bishop was the verdict of the Methodist Episcopal ecclesiastical court in the case of Bishop Anton Bast of Copenhagen, tried during the general conference in Kansas City. The court continued the Danish bishop in his membership and ministry and recommended provision for his support until the next meeting of his conference. The charges against Bishop Bast involved misuse of charity funds.

A Soldier's Grave

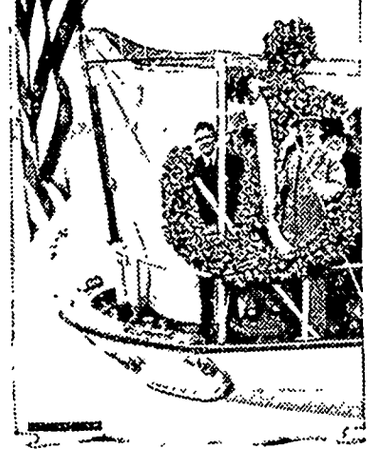
They laid him away in the orchard; that's all that we'll ever know,
That's all that his comrades told us an' I 'm kind o' glad it 's so—
I'm glad that we don't remember the battle an' wound an' pain,
But only the grave in the orchard grass
That waves in the blossom rain.

They laid him away in the orchard; that's mebbe tho reason why
I like to set in the gloamin' in the orchard here an' try
To picture him a-sleepin' in the orchard there, the sound
Of drums an' bugles an' war fergot,
An' the pink bloom all around.

That's why, when it 's Decoration an' the vets tromp up an' down,
I ruther stay with my feelin's an' never go off to town—
To dream of the place he's sleepin', the grave 'neath the flowered limb,
Where every day that the blossoms fall,
It's Memorial Day for him!

—John D. Wells in Buffalo Courier-Express.

Sailors Honor Their Dead



Veterans of Foreign Wars last year placed a buddy poppy anchor on the Potomac river, at Washington, in honor of the heroic dead, as part of Memorial Day service.

Should Inspire True Patriotism

There are two things for which Memorial day specially stands, and of which it speaks—sacrifice, and the honoring of sacrifice. The memorial is to those who gave their lives in order that the unity of America should not be broken, while the memorial itself is the holding in memory of the sacrifice and of those who made it. The day is therefore in a very special sense sacred—is in truth a religious day, though we do not as a nation seem to think of it in that way. Yet, wherever sacrifice is there is sacredness, and sacrifice is the root idea of Christianity as a religion of love. It would be well if we could keep the great day in something of this spirit, laying aside for the time all catch words and "slogans," and realize that the relation between the citizen and the state is, when it is what it should be, much the same as that between the citizen and his family and home. The men who died in the Civil war, died that the nation might live, and as a result of what they did, gave and suffered, the nation itself was endowed with a sanctity which perhaps it had not before had. The obvious moral is that what men were willing to die for, those who come after should be willing—and glad and proud—to serve unselfishly, and with a spirit of self-dedication that shall at least suggest the self-sacrificing devotion of those who died for their country. Theirs was the patriotism of service—and there is no other that is entitled to the least respect. Lowell in his great poem, one of the greatest, if not the greatest in American literature, said:

Life may be given in many ways,
And loyalty to truth be sealed
As bravely in the closet as the field,
So bountiful is fate.

What Americans need to ask themselves on each Memorial day is whether there is among them that "loyalty to truth," without which there can be no true patriotism, no service to the country—except for hire!—Exchange.

NEW YORK'S TRIBUTE

"If ye break faith we shall not sleep." Seven hundred veterans of the one Hundred and Seventh regiment attended the ceremonies last year at the new War Memorial at Fifth avenue and Sixty-sixth street, New York. This photograph was made when "taps" were sounded for the 580 dead of the regiment.

VOLUNTEERS HONORED

Monument erected in Paris, on the Place des Etats Unis ("Place of the United States"), to the Americans who volunteered for service in the French army.

Shadows Beckon "Boys in Blue"

Memorial day, originally designated as a day when the survivors of those grand armies which battled from '61 to '65 to save a nation should call to memory their comrades who had passed on before them to the eternal shores, has become a national day, when all Americans pay loving tribute to their dead.

Memorial day comes with banners draped in emblems of mourning, and the music of muffled drums. The survivors of those armies—and alas, how few they are—with trembling limbs and faltering steps wend their way to the various cemeteries, and there drop a flower, and perchance a tear on the sod which covers those who marched with them, who fought with them, who suffered hardships with them.

How few, indeed, are those survivors! Since Memorial day one year ago more than 20,000 have gone to the echoless shore. In a few years, a very few years, taps will have been sounded for the last of them. Some of those surviving are treading close to the century mark; the very youngest has outlived the three-score and ten allotted years.

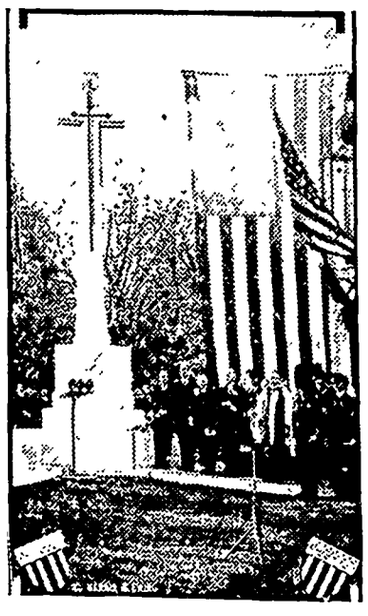
There may yet be some who stood on Little Round Top and beat back that magnificent charge of Picket, sending the hope of the South into the shadow of starless gloom. Here may be a few who fought with Hooker in that battle above the clouds, or who, without waiting for orders, in fact, over the protests of their officers climbed the rugged sides of Missionary ridge and broke in twain the army of Bragg. There are still a few who marched with Sherman in that grand military parade from Atlanta to the sea, or rode with Sheridan in that last wild dash to head Lee and his retreating troops at Appomattox.

In total they are but few, and soon all will be gone, and only history and memory left—history telling of objects accomplished, a nation saved and made glorious, memory of heroism, devotion, exalted patriotism and then, too often, neglect by the nation they had saved. To the dead, in the language of the poet—

What is worth living for is worth dying for, too;
And therefore all honor, brave heart! unto you
Who have fallen, that Freedom, more fair by your death,
A pilgrim, may walk where your blood on her path
Leads her steps to your graves! Let them babble above you!
Sleep well! where no breath of detraction may move you!
And the peace the world gives not is yours at the last!

To Those Who Fought With "Princess Pats"

A gracious recognition to the Americans who fought and fell in the Canadian ranks in the World war is that accorded by the Dominion government, which appropriated funds for the erection of a memorial. How many thousand Americans enlisted in the Canadian army prior to the declaration of war by this country will never be known, since many of them enlisted as Canadians; but they probably represented every state in the Union and the memorial will be a visible evidence of one more of the intangible bonds between the two countries. It has been given the name "Cross of Sacrifice."



"Cross of Sacrifice"

Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity of bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

GOLDEN OPPORTUNITY. Tourist camp at service station. Acre wooded land [illegible] paved highway, interesting price, half down, don't delay. Box 375, Waterloo, Ia.

STOP; LISTEN: 40 acre improved farm $750, terms. 80 acre valley farm $[illegible] terms. 160 acres timberland, $800. Frank McGrath, Mountain View, Mo.

Great Flyer Leader in All His Undertakings

Lieut. Frank Luke, Jr., of Arizona, the only American flyer in the World war to receive the congressional medal of honor, who brought down 14 balloons and four planes within 17 days before meeting his own death, had always been a leader in everything he did, long before he got in the war, writes Norman S. Hall in Liberty.

In telling of Luke's younger days in Arizona, he says: "It mattered little whether it was a fishing expedition to the junction of the Salt and Gila rivers, or a football game with the Mission Indians, who understood a deal about kicking but relatively little concerning football—Luke led. He assumed leadership as his natural prerogative and until the day of his death found willing followers. He was at his best when the odds were against him; triumphant when it seemed he could not win."

The Lesser Evil

Perkins was a prominent figure in the amateur theatricals of his town. He played all sorts of parts. One day some one asked him if he did not get tired of appearing in every private theatrical performance.

"Sure I do," he said, "for I am not crazy about acting at all. But I know that if I am not on the stage I shall have to sit in the audience."—Kansas City Star.

EDDIE HAD A PREVIOUS ENGAGEMENT

(© by D. J. Walsh.)

HE expectant little group at the general store and post office had been waiting for more than 20 minutes before the old man in for his mail.

spite of his snow white hair and y years Ephraim Strong always d himself as straight as an ar- et this morning, with head held walking on air rather than the ement, a new importance had added to his stature.

re he is, boys—shoot!"

as he stepped inside there was burst of "Hail to the Chief" in ranging from Joe Freeman's to—that flatted every other note Murphy, the blacksmith's bumble ess.

ing the singing Ephraim stood ing in the midst like a lighted o tower.

sn't exactly the chief, you know," tioned, when the singing ended; to turn grabbed the old man's in hearty grip.

ell, you can't deny that you are hief parent in Centers all right," ed back Joe.

y, Ephraim how does it feel be- ther to a senator, anyhow?" Pe- , the proprietor, chimed in over unter.

reckon it feels like cider for the e" chuckled the old man. "The st that you've got, Pete."

It began. And so it went on. hen he left the store and went town attending to his other er- constantly Ephraim was d for handshakes and congrat- ons.

was a morning that he would forget. And he had good reason excited. To think of his son—y Ed—going to Washington as a d States senator! He could not er the surprise and the shining e of it.

et ever since he was a little tike, high to a grasshopper," Ephraim ed to himself as he rattled back farm in the old tin Lizzie, "Ed as smart as they make 'em."

ter came another morning of ex- ent.

their way to Washington, the senator and his wife stopped over to see him.

a whole the visit was a disap- ent. Ephraim and his daugh- -law, a born social climber, never t off very well and now Eleanor g's head had been so turned by prospect of living in the national al and, at the thought of her e prestige as the wife of a United s senator that she was more high ighty than ever. And while his Ed was as unaffected and un- d as he had always been, there a subtle change in him. Even he appeared attentive to his r's talk, looking him straight in es, the old man had the feeling his thoughts were miles away. Although Edward Strong had left s to practice law in one of the cities of his native state years e, when Ephraim saw him off night, for the first time he real- that Ed had left home for good.

ell, even if Ed's gone out of my I still have Eddie," the old man orted himself as he rattled back e farm in the old car.

e there was a very important ber of the new senator's family included in that stop-over-train Edward Strong, Jr., already in East at a prep school preparing Harvard. He and his grandfather great chums. Even after the y removal from Centers every er "Eddie" visited the farm. And night of new lonesomeness the thing that Ephraim did when he ed home was to take out from ner pocket, a letter received some s before and read it for the y-ninth time.

ear Pal," (it began) "Maybe it s rather 'previous' to be talking ert summer this early in the day, as my plans are all made up I ght I'd write you.

have to sachez home first of e and present the glad hand to and the mater. A fellow's finan- standing suffers if he does not on speaking terms with his fam- But on July 1 it's Johnnie-on- ot with me and the farm. And ear I'm going to stay until the come home—that's French for last train out to make connec- with my entrance exams in the drat 'em!

d say, old boy (such was the tionate impudence of the scamp) got the dandiest scheme. Let's old Eliza her walking papers for nth's visit to her married daugh- and bach together alone by our selves. The crispy way I can siz- hot dogs on a chafing dish will the hair on your bald spot curl, know you can flap flap-jacks to the band.

erra, the pesky old girl, is ing with her finger, so I'll have it to a math class.

long!

"Eddie.

S. How is that acre that we to timothy showing up?"

born farmer," chuckled Ephraim, folded the letter, "And a darned better help than any hired man you get these days."

raim Strong was an early riser the weeks that followed he laid me ten minutes after awaken- y morning in a luxurious day- planning of all that he and Ed- die would do together, when that young rascal came to the farm in July, and never once did it enter the old man's head that the change in his son's residence—and position—would have anything to do with Eddie's plans for the summer.

Eleanor's letter then came as a knockout blow between the eyes.

"The first of June we are leaving Washington for Clear lake," she wrote. "Those who know say it is the most charming of summer resorts where you meet the best people. There's bathing and boating, and tennis and other outdoor activities, so there will be plenty to keep Junior occupied and happy. For of course," she concluded casually, "under the changed conditions he will not come to the farm this summer as formerly."

It was after the receipt of Eleanor's letter that two things happened. The group of cronies at the store began to shake their heads and say that Ephraim Strong was showing his age. And old Eliza, who had kept house for Ephraim ever since his wife's death, "worried herself stiff," because he was not eating enough to keep a hummingbird alive.

It was not merely the disappointment of not seeing the boy that summer. The thing that hurt was Eddie's too apparent indifference.

"If he'd only written, expressing some regret that he was unable to come," thought the old man with a pain at the heart like a knife-thrust, "I wouldn't have minded so much."

But the only word his grandfather had from Eddie was a line scrawled on a picture postcard mailed the beginning of his last week at school:

"Finals start tomorrow. Prayers of the congregation requested. Kindly omit flowers."

"I wouldn't have thought it of Eddie," grieved the old man. "Why, from the time he was a little chap, him and me were always pals!"

And the knife in his heart turned and twisted as he went over bright memories of other summers—from childhood days when Eddie's delight was to ride old Dobbin while his grandfather walked at the horse's side, a steadying hand upon the high-perched urchin's outstriding leg far too short to reach the stirrup.

The first of July, so looked forward to, so dreaded, came. For the first time in Eliza's knowledge Ephraim Strong stopped work in the middle of the morning and sat in the porch rocker—"with the most pitiful wet hen droop to him you ever set eyes on!" wailed Eliza.

A locomotive whistle sounded. Over distant treetops curled a plume of smoke. It was the train on which Eddie would have come. The old man closed his eyes and gave a long quivering sigh. And partly because nature gently mothers the old; partly because Ephraim had been sleeping poorly of late, he fell asleep.

He awoke with a start. Such a riotous honking of a horn—such a rattle-bang of a car speeding up the front drive he had never heard!

Rubbing open his eyes, Ephraim staggered onto his feet. Still bewildered from sleep, he stared dumbfounded at a tall youth, enough like Eddie to be his twin, dash up the steps and throw hugging arms about him.

"Here I am, old boy, right on schedule time!"

"But, Eddie," gasped his grandfather, his face beaming, "your mother wrote you were going to spend the summer at Clear lake!"

"Well, she didn't know I had a previous engagement!" he laughed. "Gee, it's good to see you!"

Millions of Pennies Are Lost Annually

How many pennies did you lose last year?

If you did not lose any, some one did, for it is estimated that from five to ten million pennies are lost annually in the United States. The making of new ones goes on by the millions, but still there never seems to be enough to go around.

To date, over three and one-half billion pennies have been put in circulation, enough to make a train of 378 carloads of 30 tons each. Uncle Sam's seigniorage profit on each $1,000 worth of pennies is $800, so he is not much worried over those lost coins. The number of these made last year was 170,000,000.

Frank J. Conway of De Witt, near Syracuse, N. Y., was ordered to pay $8 alimony every week to his wife Margaret. The first time he came to make his weekly payment he left a bag with 800 pennies in it, but he found that would not do. Pennies are only legal tender up to $5. After that legal tender must be provided in some other form.

The American one-cent piece and other lands and are considered two American dime are much admired in of the most artistic and beautiful coins in existence. We used to have a two-cent piece about the size of a British penny, but it was always getting confused in dim light with the nickel and the quarter, and when it was taken from circulation everyone was happy.

Tiny Plant Saving Coasts

So successful has been the experiments in growing plants along the English coast to avert the damage done by waves that Holland is taking up the idea. The wave-defying vegetation is the humble English pasture plant known as Spartan townsendii, and its usefulness in making the sand of the beaches firm against erosion of the water was learned by accident. British agricultural experts are planting it systematically along the shores that suffered most from the sea, and Holland is following the same plan.

PETER DEPAOLO ENTERS A CAR

Winner of the Big Race in 1925 Will Drive Machine This Year.

Peter DePaolo, sun-stained son of Italy, who was the American racing champion in 1925 and 1927, has just entered a car in the International 500-mile race to be held at the Indianapolis Motor Speedway, May 30.

Peter, a nephew of the great Ralph DePalma, in whose speeding tire-prints he has followed and surpassed, will pilot a Reo Flying Cloud, marking the entrance of another manufacturer in the most spectacular sport, which not alone provides thrills for thousands of spectators but points

Peter DePaolo.

the way to the refinements and innovations in passenger car construction.

His First Appearance.

DePaolo made his first appearance at the Indianapolis track eight years ago as a grease ball for Ralph DePalma's immaculate speedsters. He was permitted to join DePalma's stable as reward for an impeccable record in Uncle Sam's army during what has become known as the World war.

Soon he was riding beside the canny DePalma, as riding aide, all this being in the days of two seater cars, long before the sleek, projectile type of hurry buggies were in vogue.

Many a trick DePaolo learned as he sat beside his skillful uncle, watching Ralph maneuver his car through 125 mile an hour traffic. Peter got the urge to drive. Ralph, with the wisdom of age, declared he wasn't ready for a pilotship. They disagreed and parted.

Got a Car.

Peter got a car all right. Then he proceeded to smack fences and retaining walls on every track in the country. He couldn't even place in a race—except against a fence.

Just as he had about run out of angels to provide cars for his fence-busting act, Fred Duesenberg, the soft hearted creator of a long line of winning cars, gave him one more chance.

It was all Pete needed. He won the International 500-mile race at Indianapolis in that start in 1925. He gained fame, wealth and confidence. Ever since he has been one of the foremost contenders and was the American Automobile association champion in 1925 and in 1927.

He is married and has a son three years old.

Cause of Motor Knocks Explained by Scientist

Motors "knock" because of the very rapid burning of tiny drops of the fuel containing peroxides, formed during compression, believes Prof. E. N. da C. Andrade, whose lectures on engines before the royal institution in London are attracting wide attention.

Professor Andrade says there are at least 14 theories as to the causes of the "knock" which is so disconcerting to automobilists. He inclines to the one mentioned and says that regardless of the cause, certain chemicals, among which may be named lead othide and iron carbonyl, if put into the petrol in quite small quantities. will cause it to occur more easily.

As the use of the "anti-knock" substances allows the use of a higher compression, Professor Andrade believes there is a great future for the development of this method of increasing efficiency.

Spark Plugs Lose Their Efficiency

Explaining different causes of spark plug deterioration, H. Rabezzana, research engineer, says in part:

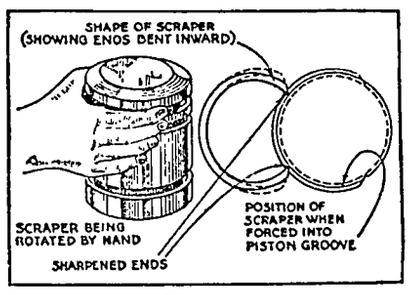
"Gasoline has several elements including sulphur that cause plugs to wear away, and when sulphur is present in an excessive amount, it will hasten deterioration of plug electrodes as well as valves. When the electrode wire is eroded through the action of sulphur, the old system of cleaning with emery cloth or a scraper, is of no avail.

"Another source of deterioration is the iron content in the gasoline which, in time, leaves a brown coating over the insulator. This coating under certain conditions is a good electrical conductor and causes missing of the engine because the spark current travels through the coating instead of jumping the gap. This brown coating cannot be cleaned off the insulator by any available means the car owner has on hand, and when it is a very dark brown, the best thing to do is change plugs.

"Carbon is still another trouble. It can be cleaned from the insulator by running the car a few miles at high speed to heat the insulators to a point where they will burn away the oil and carbon which has accumulated from slow driving. If this does not correct the trouble the best thing to do is change plugs."

Proper Compression in Motor Engine Cylinder

Good compression in a motor car engine cylinder depends on the fit of the rings in the cylinder and on the fit of the rings in the grooves of the piston. Many amateur auto mechanics fail on a ring fitting job because they fail to realize the importance of piston ring fit in the cylinder grooves and the need for a clean groove that will permit the ring to operate without binding. Before you attempt to fit new rings scrape all



SHAPE OF SCRAPER (SHOWING ENDS BENT INWARD)
SCRAPER BEING ROTATED BY HAND
SHARPENED ENDS
POSITION OF SCRAPER WHEN FORCED INTO PISTON GROOVE

A carbon scraper fashioned from an old piston ring makes an ideal tool to remove the carbon from the ring grooves in the piston.

carbon and gummed oil out of the piston ring grooves. A simple tool for this job can be made from an old ring. Grind or file off the ends until the remaining portion is about a third of a circle. Sharpen the edges as shown and you have a tool to remove the carbon with ease.—Popular Science Monthly.

AUTOMOBILE ITEMS

Germany is now using 2,714 motor busses in the postal service.

* * *

Police in Kansas City, Mo., recently tagged 430 unlighted parked cars in the residential district.

* * *

More than 981,000 children are carried in 85,860 motor busses between home and school daily in this country.

* * *

Accidents in traffic and the havoc of nature causes a loss of life that should prevent thought of a risk of war leading to further sacrifice.

* * *

After all there is but little difference in automobiles. A $70,000 car will turn turtle just as readily as a second-hand hay-tedder that cost $14.75.

* * *

High pressure oiling systems on many cars demand that hardened and ground parts used for replacement be fitted with sufficient clearance to permit proper lubrication.

* * *

Do you use kerosene or gasoline to wash the windshield? When moist, the drops of water will be larger, increasing the glare to the eyes, and the windshield wiper will not function as well.

* * *

Dripping water from the front end of the car is an indication of a leak at the water pump. Tighten the nuts or flange the same way the shaft turns. One has a right and the other a left-hand thread.

"FRONTIER GARAGES" IN GLACIER PARK

The photograph shows the original "frontier garages" which the Indians along the western border of Glacier National park use to keep their flivvers in during the snow months.

Some Questions to Ask Farmer

Find Strong and Weak Points in Farm System and Make Changes.

(Prepared by the United States Department of Agriculture.)

Mr. Farmer, ask yourself these questions. If you can answer all of them accurately and satisfactorily you are probably prosperous and contented with your lot. If not—well, try to answer them anyhow.

What is the size of your farm business?

What part of your investment is in land, buildings, live stock, machinery, and other capital?

Are your crops properly proportioned for greatest returns?

Compare Yields.

How do your crop yields compare with the average yields of the locality?

What classes of live stock return you the most money?

How do the returns from your live stock compare with the average of your locality?

How many acres of crops do you raise per man? Per horse?

Is your farm so organized that each part of the business is yielding satisfactory returns?

How much have you left for your own labor after deducting from your total receipts your expenses, value of labor performed by members of your family, and interest on your investment?

How much does the farm contribute toward your family living?

Strong and Weak Points.

Farmers' Bulletin No. 1139-F, published by the United States Department of Agriculture, is designed to help you answer these questions intelligently. Then if the answers are not satisfactory you can more readily find the strong and weak points in your system of management and make such changes that the answers next year to the same questions will prove more satisfactory. This bulletin includes blanks for the compilation of an analysis of the farm business as a whole and in its parts, and the authors explain how the spaces may be filled and the summaries made. It is mailed on request to the Department of Agriculture, Washington, D.C.

Proper Care and Feed for Any Breeding Ram

The ram need not be with the flock more than two months, as during that period he will have had time to serve a ewe twice or even three times. If he is to serve more than 30 or 35 ewes it is best to turn him with the flock only at night. To test a ram, paint his brisket with red or yellow ochre and you can tell whether he serves the same ewe twice by the mark he leaves on the rear of the ewe. By using a different color each week you can tell just when a ewe is to lamb and can give her close attention.

The ram should be in good condition. He should receive, at this time, a regular allowance of grain and a good supply of clover or alfalfa hay. A succulent ration is recommended but avoid heavy feeding of roots or mangels since they bring about bladder troubles when fed to rams or wethers. After the breeding season is over it is only necessary to keep the ram in medium condition. In most cases, a hay ration will be enough, but some juicy feed would be desirable. Do not pen him up close but permit him to have ample room for exercise.

Agricultural Notes

If you are buying flaxseed, be sure to get a disease-resistant strain.

* * *

If there is land on the farm that is too poor or rough to cultivate, one may establish a woodlot.

* * *

Only the best potatoes pay to ship when a surplus of tubers exists in the country. Feed the lower-grade stuff to live stock.

* * *

It costs just as much to raise a 40-bushel crop as one that yields 50 bushels so why not plant your farm to adapted varieties?

* * *

Growing tomatoes by the staked method for ordinary late summer market or for the canning factory is entirely out of the question.

* * *

Sanitation as a means of control for diseases of both pigs and chickens, is being advocated as the nearest thing to "sure fire" that has yet been discovered.

* * *

Millet makes very good hay for cattle. It is not desirable for horses. Use common millet. Sow after danger of frost is past, about 25 pounds per acre.

* * *

Rape may be sown at the rate of three to four pounds per acre in rows, or five to six pounds broadcast. Where rainfall is a limiting factor the minimum row seeding is preferable.

* * *

Cutworms are among the most troublesome insects with which the gardener and the farmer have to deal. Their principal damage is done in the spring when they cut off young plants at or near the surface of the ground. Cut worms are not difficult to control. The most effective and most practical method is to poison them with poisoned bran mash.

Around Orchard

TEN REASONS FOR FRUIT ORCHARD

There are ten reasons why we have a home orchard:

1. First of all, it increases the value of our farm, and also is beautiful.

2. We have a small orchard of apples but it is kept generally in good condition and well taken care of, especially after blossoming, when we spray them a couple of times with arsenate of lead.

3. It is the cheapest fruit obtainable in large amounts.

4. It keeps us with plenty of supply during winter and part of summer.

5. Sometimes it is also a great help regularly in keeping the family healthy.

6. By having our own orchard we are sure of having fresh fruits when wanted.

7. With the home supply of apples, it is often nice to invite our friends and have a party and good time and serve apples to them together with lunch, for everyone is fond of apples.

8. Our small apple orchard is a good investment when there is a good year with no disease on them. Then there is more than the family needs. So we market the surplus at the stores in our town. Sometimes we can sell many bushels from our small orchard and it counts up to quite a bit of money. We have a net profit which is clear without any expense. We also grade our apples, carefully, taking all the sound ones and good ones and storing them away. The defective ones are kept separately. We hand pick our apples.

9. Folks who buy fruit are short-sighted, because it takes a lot of cash to supply the family needs, especially in the winter when they are high in price. Farmers would do a great deal better by planting small orchards for themselves, than buying at the stores.

10. With our own orchard we are sure of having fresh fruits. Fruits purchased at stores are sometimes defective though a good price is being paid for them, so it is best to have our own home orchard.—L. H. Halvorson, Trempealeau county, in Wisconsin Agriculturist.

Fertile Orchard Soil Has Great Advantage

On a fertile soil the orchard has an advantage over the orchard on poor soil in two ways in resistance to shot-hole. When the ground begins to dry out the fertile soil having a higher per cent of organic matter, which is a great water holder, retains more water than does the poor soil. Since the soil solution is richer in the fertile soil the plant needs less water than the plant growing on poor soil.

At once the great significance of a fertile soil becomes apparent as far as shot-hole and moisture factors are concerned. If, in addition, the roots of the tree on fertile soil have made better early growth relative to the top development this means that their water gathering power will be greater than the roots of the tree growing on poor soil.

Large Trees Preferred in Planting an Orchard

Apples trees perhaps form the largest and most important part of the farm order. In ordering apple trees it is the best practice to get two-year-old trees. In planting two-year-old trees one year is gained over ordering one-year trees. One-year trees are cheaper in price but why throw away one whole year of bearing for the few cents difference in price? Two-year trees come into bearing one year quicker. It will also pay in the long run to order the largest size trees. The largest size in apple trees will be the four to six foot size. The large sized trees represent the pick of the stock. They are more healthy and vigorous than the smaller sizes as indicated by their large size for the same age.

Latham Red Raspberry Is Most Notable Plant

Probably Latham is the most notable red raspberry now under general cultivation. The plants are conspicuous for hardiness and healthiness, and they do not contract the dreaded mosaic disease as readily as do most other red raspberries. The plants are also very vigorous and productive. The berries are large bright red, glossy, and hold up in size well. Unfortunately they are a little inferior in flavor, crumble a little too much, and there are often too many double berries. This berry originated at the Minnesota state fruit breeding farm in 1914. Latham received the Wilder Silver medal of the American Pomological society in 1927.

Live Stock Not Hurt

Many people who use spray materials in their orchards believe that live stock which may get into the orchard will be injured by the poison used. Experiments have been conducted penning sheep, cattle and horses in fruit orchards that were very heavily sprayed with arsenic and other spray materials, and although these animals had no other feed than the grass growing under the trees, they showed no ill effects from the poison.

The

Johnson

Lawn Mower-

You are not buying Lawn Mowers every day—but when you do buy one you want one that will give you many years of satisfactory service. That's what you buy in a JOHNSON Pressed Steel LAWN MOWER.

JOHNSON MOWERS have pressed-steel gears, special steel reel and cutting knife. Years of service is built into each part of th Johnson. Try them out against any mower and judge for yourself their excellent cutting qualities, their ease of running—in fact a six year old child can push them easly n tough cutting grass.

Johnsons are no higher than any other good mower—in fact they are much cheaper in the long run. Practically ever need to be adjusted or sharpened.

News of Klemme and Vicinity

Dr. R. W. Specht, Dentist, Garner, Iowa. adv

The Senior Class enjoyed a picnic at Clear Lake Tuesday.

Harvey Stille and family have moved to the Thieman place.

F. A. Arnold was at Greene, on business yesterday.

Dr. Missman attended a clinic at Hampton Wednesday.

FOUND—Red knitt cap. Call at Times Office. tc

G. B. Lawhorn of Garner was in Klemme on business Tuesday.

FOR RENT—Pasture land for cattle. J. J. STILLE. tfc

Harry Buss is putting up a new house to replace the building destroyed by fire this spring.

J. N. Wilson and family from Vinton are expected tomorrow for a visit at the P. M. Wilson home.

Rev. Gauger started his Bible classes in Liberty township this week.

Rev. and Mrs. Gauger and children enjoyed a picnic supper at Clear Lake Tuesday evening.

Lee Ridder has purchased a pool parlor at Manley, Iowa, and will take possession soon.

FOR SALE—Enough screens and frames, good condition, to enclose a porch. C. G. Waterman. tfc

The Reformed Ladies Aid met at the home of Mrs. Albert Barz Wednesday afternoon.

Miss Fern Stille returned home yesterday from the Hampton hospital.

Geo Carson and family were at Eagle Grove Sunday visiting relatives

Mr. and Mrs. J. N. Day entertained the teachers Tuesday evening.

Mrs. Grange and Dorance and Mrs. Jas. Thoams were Mason City visitors Wednesday.

Alvin Stokesbary and family drove to Eagle Grove Sunday to see his uncle who is very sick.

Rev. C. Grooshuesch will preach for a Mission Fest at Belmond this evening, May 24th.

Mr J. N. Sprole of Garner was a business caller in Klemme Tuesday afternoon.

Mrs. C. G. Waterman had her tonsils removed at Mercy hospital Saturday morning. She is making a good recovery.

A baby girl was born to Mr. and Mrs Arthur Kudje Friday evening. Patricia Ann is the young lady's name and she weighs eight pounds.

Mr. and Mrs. Geo. Stokesbary and Joe Stokesbary drove to Eagle Grove Tuesday to see George's uncle who is sick.

Mr. and Mrs. Geo. Stokesbary entertained Mrs. Stokesbary's sister and family, the E. J. Widen family of Corwith for dinner Sunday.

"Happy" Johnson, wife and Shirley Rae and Paul Grange and family attended a show at Mason City Tuesday evening.

Mr. and Fred Musfelt, and Mrs. Hattie Lanahan and daughter, Laura, spent Sunday at the Rice home at Clarion.

Mr. Halverson, candidate for the office of County Treasurer, was in this vicinity Tuesday calling on the voters.

The Boy Scouts held their meeting Tuesday evening at the Parish House. The meeting next week will be Monday evening.

Sam Harvey will run a stand at Clear Lake this summer and a new place is being built for him across the street north of Wellman's Bath House. The building looks nice, is now being rapidly completed, and a cement awlk being built all around it

FOR SALE—English S. C. W. Leg. Eggs. Dams have record 260-290 eggs. Mated to males from Iowa State College high producing flock. $5 per 100. W. L. Haberkamp, Garner, Iowa. Route 4. M4tp

PIANO STUDENTS—I will be at the A. D. Gimer residence every Tuesday. Call or write Ruth Ramsay, Belmond, Iowa. tfc

Harold Gruetzmacher and family are expected to arrive in Klemme Friday, from Tecamah, Nebr. for a short visit at the F. Gruetzmacher home.

The Central States Electric Co., at Garner were granted a twenty-year franchise at a special election held Monday. The proposition carried by better than a two to one vote.

The Klemme Legion Auxiliary Ladies enjoyed a meeting last week Thursday evening. Mesdames Walter Lau and Frank Klückhöhn were hostesses and served a delicious lunch.

Wm. Lau was on the sick list a few days the past week, but has about recovered at this time. The forced vacation put a crimp in his fishing activities, but "Bill" is after the finny tribe again.

Carlyle Gauger came down with the mumps this morning. That's a fine way to start the summer vacation and miss out on the school picnic! We wil save some pickles for you old Scout!

Conrad Quandt installed a new Frigidaire ice cream container in his cafe yesterday. The new machine will enable "Coony" to carry still larger assortment of frozen dainties

Emil Barz and son Max, Grandma Schroeder, Lena Schroeder and Mrs. Croner and Dorothy drove to Ames Sunday for a visit with Mrs. Behnger. Adella Schroeder came home with them.

Clarence Lemke in running up stairs at the school house Tuesday bumped his head so hard that a big gash was cut on his scalp. A few stitches by the doctor made the old dome as good as new again

Chas. Gibbs, of Big Lake, Minn., came Saturday to see his mother, who is quite ill at her home here. At this writing she is reported to be some better. Miss Mae Ferleman trained nurse, is caring for her.

Rev. A. W. Gauger of Klemme, and Rev. Taylor of Kanawha returned Saturday from Kansas City, Mo., where they went to attend the Methodis General Conference. They made the trip via auto.

Grandma Schroeder, Lena Schroeder and daughter, Adella, and Mrs. Croner and Dorothy all drove over to Ventura Tuesday afternoon We are not sure whether or not the ladies went fishing. However, they had some nice fish.

Miss Adella Schroeder has returned to her home in Klemme to spend her summer vacation. She has just closed a successful term of school as instructor in Domestic Science at the Keswick, Iowa, high school. She has been engaged to teach there again next year.

Dr. Missman conducted a clinic at his office last Friday for the purpose of operating for tonsils. Dr. Carlson, of Mason City came over and performed five operations The following had their tonsils removed and all are recovering nicely: Dorothy Helps, Dorothy Marshall, Ethel Schoenwetter, Leon Gast and Alvin Lauden.

Mrs. Alfred Josten was the victim of an accident Tuesday while helping her husband. Mr. Josten was loading hogs and needed the services of his wife to hold a gate or fence. One of the animals, instead of going where directed, headed under the fence held by Mrs. Josten, throwing her over and in the mix-up she received a bad three cornered cut on her chin, which required the doctor's attention.

We want to compliment the Auxiliary Ladies for the high class entertainment they brought to Klemme Friday evening when they presented Miss Smith's Box of Trix, a group of dancing and singing numbers put on by some little girls from Mason City. The entertainment was greatly enjoyed. Likewise we wish the public would see the picture this Friday evening and Saturday, "What Price Glory," one of the big productions of the year

PRIMARY ELECTION NEXT MONDAY

MEMORIAL SERVICES OBSERVED IN AFTERNOON

Rev. Jewell Pickett, of Mason City Gave Memorial Address

The Klemme Memorial Day Services in charge of the Legion-Auxiliary were well planned and carried out. The services took place at the Park at 2:30 p. m.

Places of honor were made at the speaker's stand for Civil War Veterans, Lew Lewis and wife and Sam Eckerman. Mrs. Asa Gibbs, widow of Veteran Asa Gibs was ill and unable to attend; Spanish-American War Veteran H. F. Jost, and Gold Star Mothers and Fathers, the band and speaker, Rev. Pickett. Rev. Pickett is a wonderful speaker and his address was greatly enjoyed. The program at the park was interspersed with patriotic singing by the audience, songs by children nd music by the Duncan band.

The parade to the cemetery was made up of the Colors, and GGuard, Band, Firing Squad, Past War Veterans, Legion, Auxiliary, Boy Scout Troop, Camp Fire Girls, Gold Star Mothers and Fathers, School Children, Citizens.

The services at the Cemetery included decorating of graves and paying tribute to Our Heroes, closing with a salute by the Firing Squad and Taps.

Altogether, the Memorial services here were well arranged and everything worked smoothly. The attendance was fairly large, and all were ethusiastic.

EDWIN BOCK INSTALLS A SELF SERVE GAS PUMP HERE

Edwin Bock, proprietor of the Bock Oil Company, has installed at the Etchen Garage a self-serve gas pump. Mr. Bock handles the Deep Rock Products and his new pump in Klemme dispenses that brand of gasoline.

The pump is easily worked by anyone, simply drop in the coin for the amount of gas wanted, pull a handle and fillter'up!

Mr. Bck has a pupmp of the same kind installed at Garner and reports business as being fine. He also makes country deliveries with his truck

COW TESTERS TO MAKE TOUR OF COUNTY

Ames Specialist Will Assist In The Various Programs

Plans are being made for farm tours of the Hancock No. 2 Cow Test Association on Tuesday, June 12th and the Garner-Klemme Association on Wednesday, June 13th. Arrangements are being made for visits to different farms and programs will be given which will deal with the feeding and management of the dairy herds as well as the manufacture of butter.

Mr. Earl Schultz of the Extension Service will be in the county to help with these tours.

The High School pupils gave a party Thursday night in honor f Daphne Houghton and Verner Hamilton. Miss Houghton expects to spend the summer in Spirit Lake working in a store, while Verner will go to his home in Britt and assist his father in the Implement business.

OBITUARY—MRS. GRAHAM

Laura Elevy Brooks was born n August 24, 1902, on a farm near Goodell, Iowa. At the age of six months, the family moved to Swaledale, Iowa, where they resided six years. From there they moved to a farm near Clear Lake where she grew to womanhood.

She attended the public schools there and was a graduate of Clear Lake High School with the class of 1923, after which she became a successful teacher of Cerro Gordo County

On July first, 1924, she was united in marriage with Floyd E. Graham at Mason City, Iowa. To this union, three children were born, James Wesley dying in infanay, Eva Loivna, who preceded the mother, March 30, of this year, and Robert Duane age two weeks, surviving.

Mrs Graham became ill with influenza on Wednesday, May 16, and though everything possible was done to relieve her suffering by doctor, family, and friends, her constitution was not strong enough to withstand the disease, and she passed away from this life, Friday afternoon, May 25, at the age of 25 years 9 months and one day.

Mrs Graham was possessed with a kindly disposition and a true mother heart. Her death leaves a broken link in the home which can never be filled Though her life was short, it has been one of service to her family and friends. Her home was always the uppermost thought in her mind.

Besides the grieving husband and little son, she leaves to mourn her departure, her parents, Mr. and Mrs. Harry Brooks of Madelia, eight brothers, namely, Cyrus and Harold Brooks of Waterman, Ill., Paul, Edward, James, Lloyd, Oliver and Warren, all of Madelia, and one sister, Mrs Sylvia Maitland of De Kalb, Ill

A short service was conducted at the home of her parents at Madelia, Minn., by the Rev. Joseph Loken, pastor of the first Baptist Church, with all members of the family present.

Funeral services were held Sunday afternoon in the Methodist Church of Klemme, conducted by Rev A. W Gauger, assisted by Rev. Loken, of Madelia, Minn. Interment was made in the Klemme Cemetery.

—Rev A. W. Gauger.

FOUR CANDIDATES IN RUNNING FOR GOVERNOR

Monday, June 4th, Will Decide Who Is The Best Man!

Monday, June 4th, is the date f he Primary Election. The Times here lists the men on the ballot for the various offices. We are not telling you how to vote and it is not our policy to offer suggestions on a mater of this kind. We merely list the men in the running.

For Governor

M L. Bowman, Des Moines; John Hammill, Britt; Lars J. Skromnile, Roland, and Marion E. Anderson, of Clinton.

Lieutenant Governor

Clem F. Kimball and Jonas D. Buser.

Secretary Of State

J A McIntosh, Ed J Moore, Ed. I. Smith, Walter H. Beam and John M. Hazlett.

Auditor Of State

J C McClune, O. C. Burrows and J W. Lolig.

Other State Offices Unopposed

Ray E Johnson for Treasurer; John Fletcher for Attorney General and Mark Thornburg for Secretary of Agriculture are unopposed

L J Dickinson for congressman and C H. Nelson for county representative are unopposed.

Senator, 43rd District

Clarence Knutson, Clear Lake; E W. Clark, Mason City, and R. M. Hall, Clear Lake.

County Offices

There will be competition for a few of the county offices, while others will have clear sailing.

Chris Jacobs, of Garner, and H C. Meyer of Britt will appear on the ballot for County Auditor.

For Sheriff: Peck Hanson and E. H Wahlert, both of Garner.

For Treasurer, John Suurballe of Garner and A. C Halverson of Miller.

For Supervisor, F. J. Urich and C L. Prouty.

Mrs. Fern Katter for Recorder, and Chris J Johansen, for clerk do not have any opposition.

SPECIAL MEMORIAL SERVICES HELD AT THE M. E.

Civil War And Spanish-American Veterans Were Present

Special Memorial services were conducted at the Methodist church by Rev. A. W. Gauger, last Sunday morning. The church had been especially decorated for the occasion with flags and flowers and the Service Flag of Klemme was displayed in front of the church auditorium to the rear of the pulpit.

Reservations were made for the various patriotic organizations of Klemme, and places of honor were reserved for Mr. Lew Lewis, Civil War Veteran, H. F Jost, Spanish-American Veteran, Gold Star Mothers and Fathers, American Legion, Legion Auxiliary and Boy Scouts.

Special music was given by a mixed quartette, composed of Mr. Emil Patet, Supt. M. F. Penrod, Mrs. P W. Johnsen and Mrs. A. W Gauger.

Rev. Gauger molded his morning sermon along patriotic lines and the pre-memorial thought occupied a prominent part of his address.

The church was packed and the large gathering were greatly interested and impressed with the service.

KLEMME WINS GAME SUNDAY FROM COULTER

Lost Game At Corwith Memorial Day By Two Points

The Klemme base ball team has played even this past week by wining one game and losing one.

In the game here Sunday Klemme had soft pickings when they trimmed Coulter 5 to 0.

They did not fare as well over at Corwith Memorial Day when they were defeated by two points, score 4 to 6 in favor of Corwith.

The locals will play at Rockwell Sunday, after which they have three home games lined up.

CAMP FIRE GIRLS ENJOYED A SPRING HIKE

At their last meeting the Ta Ta Pochion Camp Fire Girls decided to have a hike Sunday afternoon. Lela Bachman and Blanche Gimer were to blaze a trail to anywhere they wished to go, and Nova Koerner and Ethel Barz were to find the trail for the rest of the girls.

At 1:00 o'clock Sunday afternoon Lela and Blanche started out. At 2:00 o'clock the rest of the girls left town. The trail was blazed very plainly and it was not hard to find our way. It finally led us to a place 3 miles south of town. A little while after we got there we roasted weiners and marshmallows, and ate the rest of the lunch we had taken along. After we had played a few games the Guardian awarded beads to Nova Koerner and Blanche Gimer After this we decided to go home. We sang songs all the way until we got to Klemme. Then we decided to take another hike very soon.

FIRE DESTROYS BUILDING AT FAIR GROUNDS

Early Morning Blaze At Britt Destroys Floral Hall

Floral Hall, the largest building on the Fair Grounds at Britt, was completely destroyed by fire last Thursday morning at about 2:30 o'clock.

The building cost about $10,000 and was partly covered by insurance.

GIRLS' CLUB SHORT COURSE

A number of 4-H Club Girls from Hancock County are planning on attending the club Short Course at Ames during the week of June 12. Practically every club in the county will have representatives in attendance.

This is the annual Short Course which has formerly been held in January. The attendance got so large that it was necessary to have the boys at one time and the girls at another.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Dr. G. T. Natson, superintendent of our hospital in Sioux City, will be with us next Sunday morning and will speak both in Klemme and Liberty. He will have a message of interest to all.

Our E. L. will have a social at the Parish House on Friday evening at 8:00 o'clock.

All boys and girls of seven years and over are eligible to our Bible School which will begin next Monday at 9:00 o'clock in the Parish House.

Mr. and Mrs Alfred Merkel's little four year old son was operated on for appendicitis at the Mercy hospital at Mason City last Thursday night. At this time the little fellow is making a fine recovery.

Mrs. C. G. Waterman underwent a major operation for toxic goitre at the Mercy Hospital Saturday morning. A this writing Mrs. Waterman is making a good recovery and reports are that she is feeling fine.

Mrs. A. G. Koerner and daughters, Dolores, Valeria and Nova, and Blanche Gimer were Mason City visitors last Thursday and stopped for a visit with Mrs. C. G. Waterman at the Mercy Hospital.

Miss Viola Freie and Mrs. Marlin Croner and daughter, Dorothy, drove to Mason City Tuesday morning to bring Mrs. Lena Schroeder and daughter Adella home from the hospital where they had been to have their tonsils removed.

For Memorial Day Mr. and Mrs. Tom Blank entertained a number of relatives at their home. They were Mrs. Henry Mauss, of Rake, Iowa, and her daughter, husband and children, also of Rake, and another daughter of Mrs. Mauss, and her son Raymond; Mr. and Mrs. Worthy Usher of Rowan; and Tony Ahrenkeil and family, of Goodell.

CLOSING EVENTS OF SCHOOL YEAR

PICNIC AND COMMENCEMENT CLOSE SCHOOL YEAR

Annual Picnic Held At Larsens In East Part of Town This Year

Klemme schools closed Friday when two events were staged. The first was the annual school picnic held this year on Larsen's lawn east of the Reformed Church. Those in charge had everything well arranged and there was plenty of everything to eat for the big crowd.

In the evening the annual Commencement Exercises were held and both the Senior Class and the pupils of the Eighth Grade received Diplomas at the close of the address.

Rev Grant, of Nashua was the speaker for the occasion and gave a wonderful talk, his topic being, "Signs." His address was interesting and instructive and contained a lot of good points. It was one of the best addresses ever given at a commencement in Klemme.

Supt. Penrod gave brief talks to both the Eighth Graders and the Graduating Class, in which he welcomed the Eighth Grade into the Klemme High School and then awarded them diplomas. In his talk to the Seniors, Supt. Penrod urged them to continue their studies if crowded was the auditorium. that all might make a high mark in the world.

President A. D. Gimer of the local school board, addressed the graduating class and gave them a few good, sound pointers. He then presented them with their diplomas The exercises were well attended, in fact many had to stand up, so Monday, June 4th, is the date f Class of 1928. we congratulate you!

SHERIFF'S SALE

County Savings Bank vs. D. E. Keat and Evaline Ellis Keat.

NOTICE IS HEREBY GIVEN, That by virtue of a General Execution issued out of the office of the clerk of the District Court, in Kossuth County on a judgment rendered January 25th, 1927 Term of said Court, A. D. 1927 for the sum of Ten Thousand Three Hundred Forty Two & 69-100 Dollars debt, and Three Hundred Twenty Seven & 61-00 Dollars costs, in favor of County Savings Bank and against D E. Keat & Evaline Ellis Keat and to the Sheriff of Hancock County directed, I have levied upon the following described property, to-witt:

The North Half (N½), Section Eleven (11), Township Ninety-Six (96), North Range Twenty Six (26) Hancock County, Iowa.

NOW, THEREFORE, Public Notice is hereby given that I shall, on the 14 day of June 1928, at 10:10 o'clock A. M., at the front door of the Court House, in Garner, in Hancock County, offer and sell at public outcry, to the highest bidder for cash, all the right, title and interest that the above named Defendants had on the 25th day of January A. D. 1927, or now have in and to the above described property, or so much thereof as is necessary to satisfy said execution together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 15 day of May, A. D. 1928.

E. P. HANSON.
Sheriff of Hancock County, Iowa
(Pub. May 31, June 7, 1928)

Mr and Mrs. Chris Jacobs, of Garner, and daughter, Mrs. C. J Papousek, of Belmond, were visiting in Klemme Tuesday afternoon.

Mr. and Mrs. Harold Gruetzmacher and baby, of Tecamah, Nebr., came Wednesday for a few days visit at the F. Gruetzmacher home. They drove up from Iowa Falls where they had been visiting with her folks. Harold will return to Tecamah as he has two or three bands to look after at Tecamah and near by towns, this summer.

1—Unveiling a monument in Copenhagen to Danish seamen killed during the World war. 2—Patrick J. Farrell, Democrat, appointed by the President a member of Interstate Commerce commission. 3—Column of United States marines at Peking where they are guarding the American legation.

NEWS REVIEW OF CURRENT EVENTS

President's Veto of Farm Relief Bill Arouses Excited Comment.

By EDWARD W. PICKARD

VETO of the McNary-Haugen farm relief bill was so fully expected that the only surprise was caused by the extreme vigor and strong words of the President in expressing his disapproval of the measure. "It embodies," said Mr. Coolidge, "a formidable array of perils for agriculture which are all the more menacing because of their being obscured in a maze of ponderously futile bureaucratic paraphernalia."

The six "major weaknesses and perils" of the bill the President listed as follows:

1. Its attempted price-fixing fallacy.
2. The tax characteristics of the equalization fee.
3. The widespread bureaucracy which it would set up.
4. Its encouragement to profiteering and wasteful distribution by middlemen.
5. Its stimulation of overproduction.
6. Its aid to our foreign agricultural competitors.

These features, the President said, "by no means exhaust the list of fallacious and indeed dangerous aspects of the bill, but they afford ample ground for its emphatic rejection."

Appended to the veto message was the opinion of Attorney General Sargeant which concluded: "I feel bound to advise you that the act in question, if approved, would violate the Constitution of the United States, in that legislation having for its main purpose the control of the price of food in the interest of the producer is not authorized by the Constitution; in that, if congress possessed the power to do the things attempted by this act, it could not delegate it, as it is legislative in character; in that it vests in those not officers or agents of the United States the power and duty of participating in appointments to fill places in the service of the United States; in that it contravenes the provisions of the Constitution against the taking of property without due process of law."

It was agreed by all that the President's action was consistent and courageous, but there agreement ceased. Opponents of the bill were gratified with the way in which he had scotched a plan which they believe would not work; and its supporters, both in congress and among the leaders of farm organizations, were correspondingly indignant and resented what they considered his want of sympathy for the farmers and lack of knowledge of the subject.

Gov. Adam McMullen of Nebraska immediately issued a call for 100,000 farmers to march on the Republican convention in Kansas City to demand their rights. He declared the farmers could expect "no effective farm legislation from the present administration or from any candidate like Hoover, whose only claim for recognition and whose only hope of securing the Republican nomination is based on his blind adherence to the antiagricultural attitude of the Chief Executive."

Frank O. Lowden, when he learned of the veto, said only: "I have declared my position on the bill, and that is that I am for it until something is advanced that is better for the farmer."

The opinion of some prominent supporters of the measure, that the President's action greatly endangered the Republican party's chances in the Middle West were not shared by editors from that section who were attending a convention of the Inland Daily Press association in Chicago. It was admitted, however, that the veto probably would have far-reaching political consequences, and the Democratic politicians were not noticeably displeased, though they had little to say for publication.

HERBERT HOOVER, it is now known, told his supporters among the Pennsylvania delegates to Kansas City that he agreed with Secretary Mellon that Mr. Coolidge would be the strongest candidate the Republican party could name and ought to run again, and that if the President would accept renomination he, Hoover, would gladly withdraw from the contest and release all his delegates to vote for Coolidge. In Washington it is expected that Mr. Coolidge will make a new and definite statement as to the renomination before the Kansas City convention meets.

Texas Democrats administered a rebuff to Gov. Al Smith of New York when their convention voted that their forty delegates in the Houston convention should work and vote for a dry platform and a dry candidate. Gov. Dan Moody promoted this "harmony" program and defeated both the Smith faction and the radical dry group that wished to instruct the delegation against Smith by name. Moody was elected chairman of the delegation, and said afterward that as far as he was concerned it never should vote for the New Yorker. Smith adherents, however, believe the delegation will shift to Al on the second ballot.

The Republican convention of Texas was split into two, one faction instructing for Hoover and the other naming uninstructed delegates. The controversy must be settled in Kansas City.

REDUCTION of taxes, according to the bill passed by the senate last week, will amount to $205,875,000, which is only a little more than $5,000,000 above the maximum reduction first set by President Coolidge and the treasury and therefore would be acceptable to the Chief Executive. But it is nearly $85,000,000 below the total in the bill as adopted by the house. Just before the bill was passed the senate unexpectedly defeated the amendment for a graduated tax on corporations with incomes below $15,000 which was approved in the committee of the whole. By this action the aggregate tax reduction was cut down by $24,000,000. The vote on this was a tie and Vice President Dawes voted in the negative.

In conference, changes were agreed upon which brought the aggregate reduction up to about $223,000,000. The conferees consented to the elimination of the senate provision for full publicity of tax returns, which had been objected to by the President.

Thursday evening the house adopted a resolution fixing the adjournment hour of the session at 5 p. m., Tuesday, May 29.

FOR the second time General Nobile has viewed the North pole from the air. In the dirigible Italia he flew from Spitzbergen to the top of the world and, because of the difficulty in locating the pole exactly, circled several times over the region. The plan of dropping men for exploration was abandoned, but the cross given the explorer by Pope Pius was let fall onto the ice cap and the pope was notified of this by wireless. The flags of Italy and Milan also were dropped, and the airship was then headed back to its base at King's Bay.

Colonel Lindbergh has been appointed chairman of the technical committee of the new Trans-Continental Air Transport, Inc., and has assumed his duties which will have much to do with the work of organizing and placing in operation the air lines of the concern. The company is to establish air and rail passenger service between New York and Los Angeles. Lindbergh said he did not contemplate giving up other aeronautical interests and that his office was still in those of the Guggenheim fund, of which he will remain a director. He will make no transoceanic flight this year.

HEAVY fighting began last week between the Nationalist armies and the forces of Marshal Chang that are defending Peking and Tientsin, and the Southerners had the worst of several encounters, notably at Hokien, Chihli province. The main battle was expected to take place on a line between Paotingfu and Machang, nearly a hundred miles south of Peking. Chang seemed to have made up his mind to go down to defeat rather than flee to Manchuria, but it was reported in Tokyo that he was negotiating with Japan in an effort to arrange for an orderly retreat without giving battle. Japan still insists there shall be no fighting in Manchuria between the Chinese factions. The Nationalist government deeply resents what it considers unwarranted interference by Japan and may complain to the signatories to the Washington treaties. Russia also officially disapproves the Japanese activities in China.

WITHIN a few days 222 miners perished in a series of disasters in the coal fields of the United States. The worst of these was at Mather, Pa., where nearly three hundred men were entombed by a gas explosion; the dead there numbered 198. At Yukon, W. Va., another explosion resulted in 17 deaths; and a dynamite blast at the Kenvir mine in Kentucky killed at least seven.

Over in Hamburg, Germany, a tank of phosgene, one of the most deadly of the war gases, leaked and the fumes spread over a considerable part of the city, killing 11 persons, injuring hundreds and creating general consternation. The fact that the Germans were still making this war gas caused rather excited comment, especially in France, but it is explained that it is manufactured for export for the dye industry and that much of it is shipped to America.

FOES of Fascism in Buenos Aires, Argentina, exploded a bomb in the Italian consulate there, killing six persons and injuring thirty-seven. All the victims were Italian immigrants with the exception of four consulate employees. Another bomb was found in a store owned by a prominent Italian Fascist leader. The police made hundreds of arrests.

NATIONALISTS were defeated in the German parliamentary elections, losing many seats. Forty per cent of the members of the new reichstag are Socialists or Communists. The Socialists were ready to join the middle parties in forming a cabinet, demanding concessions on labor problems. The Marx center party lost seven of its sixty-nine seats and therefore could not retain the post of chancellor.

Greece's cabinet, headed by Premier Zaimis, resigned and the parliament after receiving the resignations was suspended by President Koundouriotis. Eleutherios Venizelos, former premier, agreed to form a new government.

METHODISTS in their general conference at Kansas City settled for the time being a long debated proposition by voting against the election of bishops for a limited term instead of for life as has been the rule since 1808. They also adopted, almost unanimously, a declaration stating that "we are opposed to all military training in high schools and to compulsory training in colleges and universities." An expected clash on doctrine was averted by the adoption of a report on doctrinal beliefs which, while it reiterated all the usual doctrines of the Evangelical churches, spoke a good word for independence of thought and the accepted conclusions of science. Dr. Raymond J. Wade of Chicago and Dr. James C. Baker of Urbana, Ill., were elected bishops.

ONE of the foremost scientists of the day passed when Dr. Hideyo Noguchi, bacteriologist for the Rockefeller Institute for Medical Research, died in Accra, Gold Coast Colony, Africa, from yellow fever. He had gone to Africa to study the relationship between South American and African yellow fever and contracted the disease during a laboratory experiment. Bravely he used his own illness to further his scientific study.

SECRETARY KELLOGG'S peace proposals have been accepted, with slight reservations, by the British government and its readiness to co-operate with the principal powers in a multi-lateral anti-war treaty on those lines is announced. Sir Austen Chamberlain in his note explained that Great Britain must protect her special interests throughout the world and that her existing commitments under the League of Nations and other international agreements must not be affected by the proposed pact. Statesmen in both countries believe these reservations will not be a bar to formulation of the treaty.

OLD SWORD RECALLS DE SOTO EXPEDITION

Part of Ancient Blade Dug Up in Georgia.

Washington, D. C.—Part of a rusty sword recently dug up in northern Georgia is believed to have been lost by the expedition of Hernando De Soto nearly 400 years ago.

"If this was the origin of the weapon," says a bulletin from the Washington headquarters of the National Geographic society, "it is a relic of an expedition that was a tragic mistake from first to last, and the only important accomplishment of which was the discovery of the lower reaches of the Mississippi river.

Had Helped Conquer Peru.

"De Soto had amassed a fortune by his association with Pizarro in the conquest of Peru," continues the bulletin. "He prevailed upon King Charles V of Spain to grant him the right 'to conquer Florida,' and threw his fortune into the enterprise. The whole matter was approached on the basis of the conquest of South America and Mexico. De Soto thought the present southern states of the United States constituted a land of superlatively rich Incas and planned to loot their 'temples' and 'palaces' of gold and precious stones.

"When he had wandered over what is now Florida, Georgia, Alabama, Mississippi, Arkansas and Louisiana, killing thousands of Indian agriculturalists and hunters, finding only towns of huts and wigwams and losing hundreds of his men and scores of his horses, he came to the realization that there was nothing in the region worth 'conquering.'

"De Soto's expedition was not the first to reach Florida, but it was the first to go in on a large scale, and the first to penetrate westward through the Gulf states. His best-known predecessor in the peninsula was Ponce de Leon, who searched not for gold, but for the 'fountain of youth.' It was he who gave Florida its name.

"De Soto's party, including foot soldiers, cavalry, and servants, left Havana, Cuba, in May, 1539, and is believed to have landed on what is now Tampa bay. They pushed north through swamps and forests, always harassed by the Indians and spent their first winter near the present town of Pensacola.

"'In 1540 they went into the northern part of the present state of Georgia, still fighting and oppressing the Indians and still believing that gold lay just ahead. The wanderings turned westward and southward to the vicinity of Mobile. The following winter was spent in the Yazoo valley in what is now Mississippi.

Found Mississippi Muddy.

"Soon after camp was broken in 1541, the westward-pushing wanderers came upon the 'Great River' as they named it. Paintings have represented this as something of a gala occasion, with De Soto taking possession of the stream in shining armor. In reality it was a ragged, unkempt, rusty crew of discouraged men which found its way blocked by the muddy, drift-strewn waters of the lower Mississippi, somewhere south of the present Tennessee line.

"Barges were built, and the adventurers ferried themselves and their horses into what is now Arkansas. They scouted as far north as the present situation of New Madrid, Missouri, and still finding no gold, turned westward. The next winter was spent in the neighborhood of what is now Joplin, Mo.

"No gold was found in this region, and the party turned south and followed the Red river back toward the Mississippi. They became involved in the swamps and bayous of the Red river valley, but finally won their way through to the Mississippi near the mouth of the Red. There they encamped in an Indian town, with the natives rather unwilling hosts, and prepared to build boats.

"But this was to be the end of De Soto's wanderings. He sickened, and within a few days died. His body was buried temporarily, and was then sunk, in the early summer of 1542, in the great river which he had discovered.

"After wandering westward for several months the survivors of De Soto's expedition returned to the Mississippi, built seven brigatines, and floated down the river. They first killed all their horses and dried the meat for provisions. In the frail boats, the last of the party of adventurers entered the Gulf of Mexico, and skirting the present Texas coast, finally arrived at a Spanish settlement in Mexico, near the present port of Tampico.'"

Watch Still Ticking Found Inside Fish

Cape May, N. J.—A chronometrical croaker was hauled in recently by Capt. Francis Holmes, of the Reeds Beach fishing fleet, along the Delaware bay shore here. The captain was dangling his line over the side of his boat when the croaker, a fish which noses among the clam beds for dainty morsels, bit and as he was brought up his captor could hear a distinct tick, tick, tick.

The four-pound fish was opened and inside of him was a watch, which one of the party with Captain Holmes had dropped over the side a little while before. Despite a plunge of several fathoms and its incarceration inside the croaker, the timepiece had not missed a tick.

Typical Motorist's Summer Camp.

VACATION TOURS BY AUTOMOBILE

Immense Amount of Money Will Be Spent This Year by Motorists.

More than forty-four million people, over a third of the nation, will take vacation motor tours during 1928 and will spend the staggering sum of three and a half billion dollars, according to preliminary estimates of this year's motor tourist business made by the touring bureau of the Chicago Motor club.

The Chicago Motor club's estimate for 1928 is based on a detailed study of figures for the 1927 season, with an allowance of 10 per cent increase for this year, which is about the normal annual growth in the gigantic industry of motor touring over the past few years.

Annual Vacation Movement.

Approximately forty million people, in ten million cars, took to the winding ribbons of paved highways and into the byways for their vacations last year, the Chicago Motor club declares.

"One of the most impressive and important features of the motor tourist business in 1927," says the Chicago Motor club, "was the trend away from the tourist camps and toward the hotels and tourist homes catering to motorists. The latter enjoyed a heavier business than in the previous year, despite weather conditions that somewhat handicapped the annual vacation movement. In this trend, amounting to an increase of 12 per cent in business, is seen a clear indication of the position of the resort hotel as a permanent fixture in the rest and play life of the motorists.

"The figures for last year show that 29,000,000 people in 7,250,000 cars patronized hotels and tourist homes. On the basis of last year's figures, the total of this class of motorists should soar to 32,000,000 this year.

"Figuring four people to a car and allowing each occupant an expenditure of $7.50 a day, for an average period of ten days, the army of motorists patronizing hotels and resorts would spend nearly two and a half billion dollars in 1928.

"Wandering in gypsy fashion, lured by climate, scenery and history more than 11,000,000 campers used their cars last year for vacations. The caravan numbered about 2,750,000 automobiles, including house cars fitted out for housekeeping and as trailers. This would justify the estimate that more than 12,000,000 campers will use over 3,000,000 pleasure cars to visit the great outdoors this year.

"The camper spends three times as long away from home as the hotel tourist and on a basis of $3.30 per day per person, nearly a billion and a quarter dollars will be left along the gasoline trail by this class of motorist.

"These tentative estimates for 1928 may appear large, but they are in reality conservative and are based strictly on the figures for the past few years and the normal growth that each year has brought."

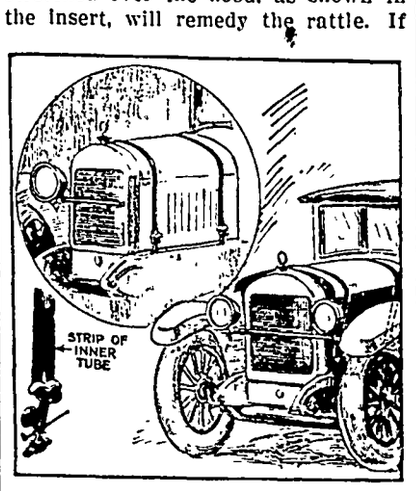
Two Important Factors.

Two factors, according to the Chicago Motor club, which handled 250,000 tours last year, are playing a prominent part in the development of America's motor tourist business, namely, the establishment of standardized motoring services throughout the country and the growing appreciation of the importance of the motor tourist caravan as a creator of community growth and prosperity. The statement concluded:

"All over the country, America is preparing for an unprecedented year in motor tourist travel. Thousands who stayed at home in 1927, due to the cool weather that hung over the nation in the summer months, plan to take to the open road during the present year and to spend more time touring."

Annoying Hood Rattle Is Hard to Overcome

Auto hoods on light cars and trucks often develop an annoying rattle which is difficult to overcome. Two long bands cut from an old inner tube and stretched over the hood, as shown in the insert, will remedy the rattle. If



Rubber Bands Cut From Old Inner Tubes Will Stop Rattle of Hood Whether Closed or Open.

the bands are cut evenly and placed symmetrically on the hood, they will not detract from its apperance. It is often desirable to open the sides of the hood to permit better cooling of the motor, and then the rubber bands will hold the hood in the open position.—Popular Mechanics Magazine.

Sixteen-Story Garage to Be Erected in Chicago

Chicago's tallest garage building, a 16-story structure, to cost $1,500,000, is scheduled for construction at 211-21 West Lake street.

With the inauguration of the non-parking regulations in the loop, interest in garage construction and in potential garage sites in the close-in North, South and West sides has received a big impetus. Lake street seems to be attracting the garage men more frequently than any other thoroughfare. Half a dozen garage projects, representing investment of several millions of dollars, are said to be in various stages of promotion along the street.

The project at 211 West Lake street is said to be backed by a syndicate. The site frouts north 100 feet in Lake street midway between Franklin and Wells and has a depth of 180 feet. The same syndicate is said to be planning a similar structure for the vicinity of Madison and Franklin streets.

Test Oil Filters, Advises an Expe

If you could see what goes on inside your automobile engine you'd be amazed at what happens to the oil.

As the oil circulates through the bearings and moving parts, it is constantly picking up fine particles of metal, bits of dirt and other abrasive material, according to research engineers.

To prevent serious wear and other trouble in the engine, this abrasive matter is being constantly removed from the oil by the oil filter.

The filter works automatically and without attention, for long periods of time; and because of its purifying action, the same oil can be used for perhaps 3,000 miles.

But remember this: That, after long use, about 10,000 miles, the filtering unit becomes filled with dirt, sludge, etc., taken from the oil, and can no longer do the job as it should.

Therefore, be sure to have your oil filter tested from time to time.

AUTOMOBILE NOTES

It takes a billion dollars' worth of gasoline to feed America's motor cars every year.

* * *

It is estimated that 500,000 passengers arrive in New York city in automobiles every day.

* * *

Registration figures show that over 11 per cent of the automobiles are in the cities of the nation.

* * *

More than two-thirds of the farmers in this country own and operate at least one automobile.

* * *

It is estimated that 17,100 gallons of gasoline produced per minute every day and night of the week is necessary to keep the supply up to the demand in this country.

* * *

More than 3,265,000 people are employed by the automobile industry. It is estimated that this number will be more than 4,000,000 during the current year.

* * *

Hard steering may be caused by improper wheel alignment. Tires will wear unevenly and too rapidly. A quick and inexpensive correction can be accomplished by any well equipped service station.

PLAYING THE GAME OF STRATEGY

(©, by D. J. Walsh.)

KENNETH FISKE was quite disconsolate as he sat on the diving raft that August morning and watched the scarlet of Nancy Lee's bathing suit on the pier. Two small boys were his companions; Billie Lee, Jr., Nancy's brother, and Small Andrew Thorpe. Ken had wanted to be alone. He had a lot to think about. He and Nancy had quarreled yesterday on the golf links; a bitter quarrel while it had lasted, and, of course, Art Thorpe, Andrew's big bronzed brother, had been the cause. Nancy had even made an attempt to unfasten Ken's frat pin, which she had worn since the June prom from the front of her sweater, but he had walked away with his clubs at the sixth hole and she had finished the game with Art.

Then last night he was prepared to apologize. There was a beautiful white moon and as he had walked from his mother's cottage to the big summer hotel where Nancy was spending the summer with her father and brother, he had planned it all. Along about the fourth dance . . . maybe, the fifth; he would give Thorpe a chance to get in two dances anyway; he would fox trot her through one of those French windows; then they would run down the steps and out on the boat pier, where he would take her in his arms, kiss her, and tell her how sorry he was. He had quickened his steps at the sound of music from the ballroom. Nancy always saved the first dance for him; she was a peach—even his mother loved her and she didn't generally like his girls. Mother was darned afraid of losing him.

But Nancy had not saved the first dance. She had it with Art . . . she had the second, third and fourth taken . . yes, he could have the fifth. The Ellis girls and Jack and Barney were motoring over about 10:30 to finish the dance and then Art was going to take them out in his boat. So a white moon did not shine down on their reconciliation that night. Ken danced twice with Nancy and then went home.

His mother called to him as he went to his room.

"Home early, son. What's the matter?"

"Nothing. Tired, that's all."

"Ken! Come tell mother. You and Nancy fussing again?"

"It's Thorpe. She can have him I'm not hanging around like a puppy for a bone."

"No, Ken, she can't have him. You know that. So do I. You know, son, 'true love never did run smooth,' so just be patient. I met Nancy down in that Armenian shop on the board walk yesterday buying an exquisite luncheon set for—your house. Cheerio, Ken, it will come out all right. Mother knows."

Mother was an understanding sort of person and Ken felt quite comforted. He even slept the night through, but was the first on the beach that morning. Nancy generally was down before 9:30. Ten o'clock came. Eleven. Then he saw her coming through the sand with her young brother. Ken jumped to his feet and went to meet them. Billie was fond of Ken and welcomed him boisterously. Nancy nodded.

"Nancy, I have been waiting since 8:30. I want to tell you something. I . . I . . ."

"You don't have to tell me anything, Ken. I'm not a child. You were very rude, very unreasonable . . very childish . . . yesterday. I am swimming with Art this morning and then we're going out in his boat. Here he comes. Billie, you take care of yourself, and remember father said yesterday you were not to swim out to the raft alone again. I can't watch you all the time. Now remember! Perhaps if Kenneth is going out to the raft you can swim along with him."

She stood poised like a young goddess, boyishly slender in her scarlet suit, short blond hair ruffled by the wind. She waved her arm over her head.

"'Lo, Art. I'll race you to the pier."

Ken had duly swam with Billie and young Andrew Thorpe to the diving raft and there he had sat while the boys dived, swam and sunned themselves. He could see Nancy and Art sitting close together on the pier, their legs swinging over the edge.

"Why don't you come in, Ken. Water's slick," Billie queried as he bobbed up above the surface and shook the water out of his eyes.

"Not feeling very well, Bill. You know, they say when a person doesn't feel well cold water may give them cramps."

"Cramps! You? Jimminy crickets, anyone who swims as much as you do in cold water won't get cramps, Ken."

An idea was rapidly forming in Ken's brain. The scarlet bathing suit and the black one on the pier seemed almost blended now. Art had always been crazy about Nancy and she had said once she thought he was very good looking, but he couldn't dance as well as Ken.

"Well, you see, Bill, I've got a stomach ache and I'm kind of afraid. Thought I might ask you to go in and get your canoe, but I remember that Nancy . . . your father didn't want you to swim this far alone. Don't know whether I can make it or not, boys."

"Aw, sure you can, Ken. C'mon. . . . Andy and I'll swim right along with you."

Ken slipped off the raft and held to it with his hands. "B-r-r!" he shivered. "Deucedly cold. Guess because I'm half sick. All right, Bill, we're off. I'll have to go slow . . . not much strength . . ."

He started off with a slow, deliberate overarm stroke and the boys went ahead of him. Billie turned around several times, concerned about his welfare. Between strokes Ken watched the scarlet bathing suit on the pier. Hello. Art was leaving her alone . . . going sailing, were they? The sail in the big white yawl was being unfurled. Nancy sat alone on the pier. Now was the time . . .

"Billie!" he called as he went below the surface . . . "I'm done for. Help! Help!"

The boys turned quickly and started back. Billie was yelling frantically, "Help! Ken's drownin'. Help! Ken's drownin' . ."

Ken came up, rolled over on his side, looked toward the pier. He saw a flash of scarlet—midair! Nancy had dived! Nancy was coming! He went down another time, came up, rolled over on his back, came up, rolled over on his back, eyes closed, and Billie and Andy, faithfully following their swimming master's instructions, took him securely beneath their arms and valiantly swam shoreward. Through half-closed eyes he watched Nancy approach . . . swiftly, surely, cutting the water like a torpedo. About fifty yards back of her Art Thorpe was following—an exhibition of the Australian crawl that would have won a championship, but the scarlet bathing suit was well in the lead . . . ten feet . . . five . . . two, and then her hands were on his shoulders, her face near his.

"Ken! Oh, Ken, darling . . ." she whispered . . . "Please, open your eyes . . . I'm sorry, so sorry . . . I want you to love me enough to be jealous . . . I love you, Ken . . . I do . . . I do . . ."

Kenneth Fiske opened one eye . . . opened two . . . reached up both hands and took hers between them, thus adding a double burden to the breathless small boys. Then he grinned . . . he laughed!

"Billie! Andy!" called Nancy. "Let go of Ken. I'll take him now. You must be tired, you brave boys!" Dexterously she took their place, Ken's head resting—for a moment—against her breast. Then her hands went to the top of his head and she pushed him down . . . down . . . down . . . He came up spluttering.

"Take that—and that—and that," she laughed. He reached up, put both hands about her neck and drew her down . . . down . . . with him. As they shot up again above the surface, he deliberately kissed her. Art Thorpe and the boys swam away . . and a noonday sun smiled down on their reconciliation.

Men of Mark Those Who Develop Ideas

Machinery for business use has been vastly improved during the last two decades. Machines are being used in ever-increasing numbers. But machines do not have brains; they cannot generate new ideas. Business is changing and new ideas that work are in great demand. These ideas have to come from men.

Ideas are really easy to get—after you form the new habit of getting ideas. One can form the habit of bringing forth ideas just as he is usually handicapped by the habit of sticking to a few old ideas. The difficult part is breaking off the old habit.

A good way to start is by what I call "priming" the mind. Your head can actually work wonders, once you get it started. And priming is a painless and yet effective way of getting up momentum. You are priming your mind for ideas if on the way home from work you think over the details of your job and then concentrate on some part—any part—and try to figure how it could be improved or eliminated. That is the first step. The next few steps are to keep reminding yourself of this problem from time to time, especially during odd moments. It is overwhelming, the percentage of people who do not even think over their work when they are away from it. They are all the more like machines for this trait, and I imagine they still wonder why they do not advance more rapidly, or why competition is creeping up on them.—Donald A. Laird, Chairman Psychology department, Colgate university, in Forbes Magazine.

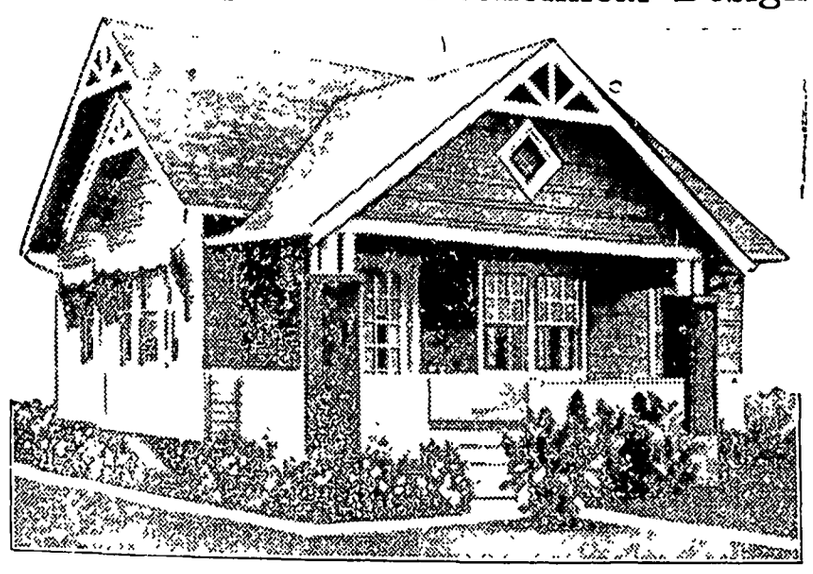
Trade in Beverages

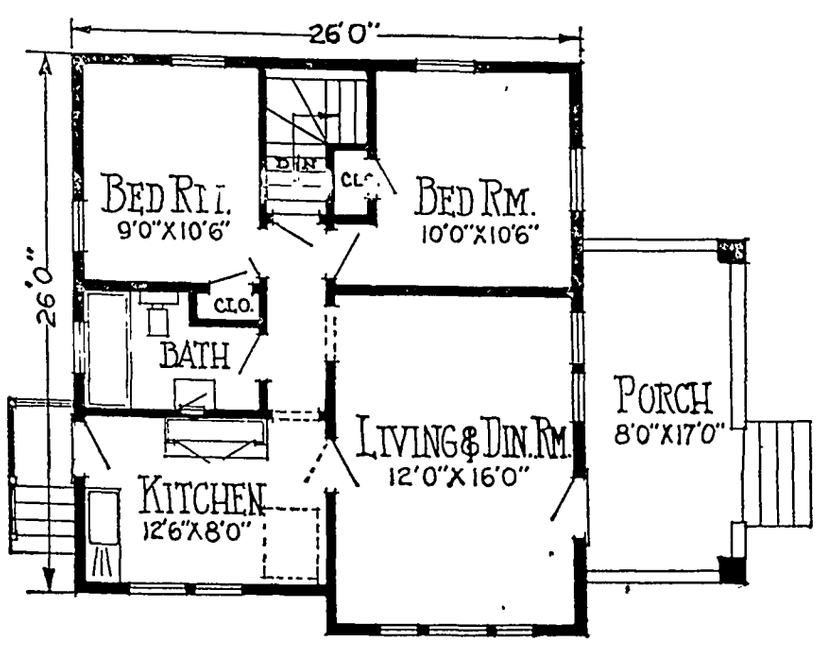
Uncle Sam traded a volume of beverages equal to a couple of small lakes with other countries last year, importing 746,652 gallons of mineral waters, 69,933 gallons of ginger ale, 559,677 gallons of lemon, lime and sour orange juices and other beverages worth in toto some $1,164,443. He sold $1,255,402 worth of wet stuff, however, Canada and Cuba being the best customers. The imports came chiefly from the United Kingdom, France and Italy.

Her Intentions Good

There was never husband so strong, or wife so weak, that his wife did not try to rule him. Always her intentions are good. She has heard all her life of the roughness of men, and their wrong disposition in everything, and desires to make her husband a better man. But if it happens that she lacks ability, or has drawn a husband who has a notion that he should somewhat direct a wife I know nothing that can be done about it.—E. W. Howe's Monthly.

Four-Room Cottage-Bungalow of Compact and Economical Design





Floor Plan.

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Here is a cottage type bungalow, very small, very compact, but offering a large amount of living accommodation at a very low cost. In the first place, being but 26 feet square, this home may be built on a small lot and still leave a comfortable margin of space, for light, air and privacy, between it and its neighbors on either side. The square plan is, of course, the most economical one possible, giving the greatest amount of floor space in proportion to the amount of wall and roof construction. And in the case of this particular house, the design is such as to take full advantage of every inch of the available space.

This is a four-room house with the living room serving also as a dining room, and arrangement which has been gaining wide popularity in recent years with the demand for better utilization of space. The separate dining room is, from this point of view, a large waste for it is used but a very small portion of the day. With the arrangement shown here it is possible to provide in this small cottage two bedrooms of a very comfortable size, and each provided with a good closet.

Between the kitchen and one bedroom is the bath, and all of the rooms open onto a central hall space which occupies but a small part of the total floor area even though it must also accommodate the basement stair.

In exterior appearance this little home is particularly pleasing. This is due, in large measure, to the roof lines which have been so handled as to avoid the flat appearance which detracts from so many small homes of this type.

Nation-Wide Movement to Bring Homes Up to Date

The old homestead is to be entirely refurnished—home sweet home is to be given a new lease on life. The old oaken bucket is to be replaced by running hot and cold water in the kitchen. Mother's daily job of scouring the lamp chimneys is to be a thing of the past, for electric globes are to supply bright light for every room. The model 1890 porch is to be replaced by a beautiful modern veranda and sleeping porch. Tiny dark rooms are to be made into big bright ones by pulling out useless partitions. And up-to-date, fuel-saving insulation, new roofing, paint and other modern equipment is to make the old place look like new and be more sanitary and comfortable than ever before.

This is the sketch of home-betterment on a national scale that was drawn at a meeting in Chicago, when 131 industrial leaders representing 44 branches of the building business founded the home modernization bureau of the national building industries. These men started this movement to bring the 22,000,000 existing homes in the United States up to date.

More than half of the finely constructed but antiquated dwellings are in the small-town class. According to George E. Piper of Chicago, who was made managing director of the bureau, the organization will "establish property values in thousands of the smaller communities, making them more attractive to new businesses, and more alluring to new residents."

"By stimulating the rehabilitation of old homes," he said, "this work will make for the reinvigoration of whole towns."

This movement, which received commendation and offers of co-operation from Secretary of Commerce Hoover and Secretary of Labor Davis, is a response to two national needs—first, that of the people for better homes; second, the need of the building industry for renewed prosperity.

Walter J. Kohler of Kohler, Wis., who was elected president, referred to work being done by the federations of women's clubs of several states. They are investigating home conditions in their communities to find out how to relieve housewives of their excessive burdens.

"These investigations have shown," Mr. Kohler stated, "that tens of thousands of American families are living in conditions no better than those of European peasants. Thousands of families, even in communities where there are water and plumbing systems, have not even running water in their homes. Thousands of fires occur every year because the houses lack the fire-safety provided by modern construction. No one can guage how much disease results from unsanitary conditions in our homes, nor what is the burden the American housewife has to bear because of lack of modern home equipment."

To correct these conditions is the primary object of the home modernizing bureau. So far as the business welfare of the country is concerned, the executive committee pointed out that there is unemployment in the building industry and that lack of prosperity in this industry is a detriment to the national welfare.

"New construction today provides neither adequate nor sufficiently regular and dependable employment for the manufacturing facilities and the labor force that constitute the industry," the committee stated. "After more than a year of preliminary investigation and testing in the field, leaders in the industry are convinced that a large, substantial and stable demand for all types of building materials, equipment and labor can be developed through modernizing the millions of structurally sound, well-located American homes already existing, and that this activity will benefit new construction."

Besides this, the movement is expected to accomplish the following things, too:

1. Stimulate new building.
2. Stimulate home ownership.
3. Modernize other types of structures besides homes.
4. Persuade public bodies to undertake necessary public works programs, including flood-control measures.
5. Preserve property values in many communities.
6. Improve social conditions, make farm homes more attractive to farm children, and reduce crime in cities.

Interior Stair Can Be a Point of Decoration

The stairway is the largest single item of interior woodwork about the average modern home.

Both from utilitarian and decorative aspects it serves probably the most important functions which any feature of the interior is called upon to perform. The architectural style of the house itself is often indicated or reflected in the design of the stairs.

Many builders in past times have apparently regarded beauty in stair work as a matter of size; the larger the newels and balusters the more handsome the work. Modern taste inclines to the smaller, more delicately molded forms which made our early colonial stairs such faithful representatives of individual craftsmanship.

SNAKE EXPERT GETS SOME ODD SPECIMENS

Makes Study of Some of Deadliest Reptiles.

New York.—Dr. Raymond L. Ditmars, curator of reptiles at the Bronx zoo, returned to New York recently after some weeks at Tela, Honduras, where he studied the bites, fangs, and poisons of some of the deadliest snakes in the Americas. He brought back stories of extracting poison from living barba amarillas, or yellow-beards, and tropical rattlers; of expeditions made through territory infested with howling monkeys, manatees, crocodiles, and reptiles of all sorts; and of taking moving pictures of the noxious jungle life.

He also heralded the approach of the steamer Tivaves, which is due in New York in a few days. In the hold of this ship are two large yellow-beards, two tropical rattlesnakes, two coral snakes, several harmless "imitators" of coral snakes, vine snakes, five green whip snakes, eight or ten giant toads, and some tree toads that sound like riveting machines.

Whipsnake Is Curious.

All the reptiles were alive when Doctor Ditmars supervised their removal to the ship at Tela. He himself went from Tela to Florida and traveled north from Miami by automobile, studying wild life of the seaboard while en route.

The strange specimens he is bringing to New York in the Tivaves will go to make the reptile house at the Bronx zoo bigger and better. Of all these reptiles the whipsnake is, perhaps, the most curious, Doctor Ditmars said. It is seven feet long, and less than a finger's breadth in diameter. The vine snake, he said, is mildly poisonous, while the giant toad—ten inches from stem to stern—exudes a noxious saliva that acts like a local anesthetic on whosover is bitten. Doctor Ditmars said he got some of this poison on his finger. He put his finger in his mouth, and his tongue was benumbed for some time.

The reptile that is an imitation of the coral snake, according to Doctor Ditmars, plays upon its appearance to make a living. It is nonpoisonous and slightly larger than the coral snake, but otherwise it is a "dead ringer" for its smaller cousin. It will wriggle up to a coral snake, make friends with it, and then proceed to strangle and devour it. Such an action may be unscrupulous, according to Doctor Ditmars, but it keeps the imitator content from the standpoint of sustenance.

What interested Doctor Ditmars above all was the yellow-heard. "We had some unusual and exciting experience," he said, "and we also learned some truly astonishing things. We saw snakes so deadly that a man goes blind a few minutes after being bitten. Even the bite of an infant of one of these reptiles—say, one a few days old—will cause death.

It is rare for the yellow heard to give birth to a litter as low as fifty Usually a litter consists of seventy-five. The barba amarilla is so called because of its bright yellow chin and throat. It grows to a length of eight feet. Doctor Ditmars captured eight yellow beards on a banana plantation.

Of the tropical rattler, Doctor Ditmars said it was more deady than its United States relative. It ejects an almost colorless poison that will paralyze the neck muscles of its victim in a few minutes. Doctor Ditmars saw many of these rattlers in pits

Doctor Ditmars told of the diananadore, a snake that is larger than the yellow-beard, which leaps at its victim and strikes him about the knee. He said he hadn't seen a diabanadore himself, but that Dr. William H Waller had.

While in Honduras Doctor Ditmars took 5,000 feet of film, thus completing his moving picture study of poisonous snakes and serums. He told of motoring through eighteen miles of jungle in ten hours to a lagoon filled with manatees and crocodiles.

Monkeys howled at the automobiles The roads were so bad that the occupants of the cars were afraid to move forward in the dark without first exploring the way on foot with coats, shirts, or trousers soaked in gasoline for flares. One automobile hit a stump and had to be abandoned and the other repaired.

Laziness Called Reason for Mechanical Progress

Oxford, England.—Lecturing to the Universities congress, Professor Burstall, of Birmingham university, told his hearers that "science is going to put into our hands the possibility of a heaven on earth.

"The only limits to what we can do lie within ourselves," he said, "but I venture to think that unless the human being makes up his mind which way he wants to go this science, instead of being a blessing will be a curse.

"Science is cutting down the hours of labor. The work of the future will be done in the most comfortable conditions for about five hours each day. Laziness is the reason for all the mechanical developments. The human frame as we see it today is incapable of any serious labor."

Multiplication

Wolcott, N. Y.—Here's a way to multiply 11 so it becomes 34. Frank Green has 11 ewes. One had triplets. The others had twins. The flock's increase was in two months.

PEAKS "SHRINK" AS FABLES FADE

Mounts Once Called Tallest, Far From It.

Jasper Park, Alberta.—Today it is a matter of common knowledge to every school child that the highest peak in America, excluding Alaska and the Yukon, is Mount Whitney, 14,501 feet in California.

Twenty years ago, when their elders were going to school, it was equally certain that the highest altitude on the continent was attained by either Mount Brown or Mount Hooker, high above Athabasca pass, in what today is Jasper National park, Alberta, but in what at that time was but a dimly known north country.

So much can fable do even for the height of a mountain. These twin peaks, which stood guard over the pass that was the gateway between the valleys of the Columbia river and the prairies to the east of the mountains, became endowed with marvelous proportions by the early travelers, unaccustomed to the spectacle of height, who passed beneath their shadows.

David Thompson, noted explorer and geographer of the West, estimated their altitude to be about 18,000 feet. In 1836 James Renwick, professor of chemistry and physics at Columbia college, communicated his belief to Washington Irving, the writer, that these mountains compared in height with the Himalayas.

David Douglas, distinguished botanist from whom the Douglas fir of the western coast receives its name, when making the overland journey about 1825, placed the height of these peaks at close to 17,000 feet. He named them Hooker and Brown after two botanists he had admired.

And so the legend persisted until close on to 20 years ago. It was dissipated by expeditions taken by Prof. Coleman of Toronto, which settled the altitude at something close to that given by the interprovincial boundary survey in 1920, namely Mount Brown, 9,156 feet; Mount Hooker, 10,872 feet. Man's zeal for precision had toppled another fond illusion persisting through the years.

Find Brains of Great Like Those of Small

Philadelphia.—The brains of the great do not vary so greatly from those of the small.

Post-mortem examination of the brains of G. Stanley Hall, eminent psychologist; Sir William Osler, for many years an outstanding figure in the field of medicine, and Edward S. Morse, widely known naturalist and zoologist, did not show striking variations from the normal, Dr. Henry H. Donaldson of the Wistar Institute of Anatomy and Biology, told members of the National Academy of Sciences here. They were, however, slightly heavier than the brains of more nearly average individuals studied for comparison.

"The variations in the form of the convolutions," said Doctor Donaldson, "may mean something but they do not explain that for which explanation is sought, for in their fundamental structure human brains are remarkably alike, and the variations in the convolutions are incidental, as the several measurements show."

North Sea Island Milk Contains Iodine Property

Wyk-on-Foehr.—The healing properties of the North sea air are due to strong emanations of salt, radium and especially iodine, and now a scientist of the Island of Foehr has established the fact that the milk of cows, goats and sheep on the North Sea islands and the coastlands also contains a surprisingly large amount of iodine. As much as 210 millionths of a gram per liter has been found in cow's milk.

Iodine is the sovereign remedy for hardening of the arteries, and milk with an iodine content is also indicated for various children's diseases. It has long been known that the inhabitants of this part of Germany are almost never afflicted by hardening of the arteries.

Wow! High Trousers With Plaits for Men

New York.—There has been comment from time to time on the popularity of high trousers, profusely plaited and short double-breasted waistcoats.

With the coming of spring the odd waistcoat is prominently mentioned, chiefly in tattersall flannel. For the extreme dresser the fancy waistcoat of the variety mentioned might be recommended as timely.

A prominent clothier, in commenting on the rather bizarre trousers the men are wearing, remarked that he would not be surprised at anything the men might do.

"A great many of us hesitated to accept the theory that the men would ever take trick trousers seriously, but they seem to have done so. They have also gone back to suspenders, a rather startling revelation in itself.

"As a finishing touch the double-breasted waistcoat offers a "daring background and is being liberally boosted by the makers of such novelties."

Two gallons of barn paint in a one-gallon can

Here's how you can paint your barn at a great saving. To each gallon of LOWE BROTHERS DERBY RED BARN PAINT add a gallon of pure linseed oil. This makes two gallons of tough, wear-resisting paint.

Don't take chances on cheap paints loaded with gasoline, mineral oil, rosin, etc. Get Derby Red when you paint your barn. It's *all* paint—and double thick! It contains 63% linseed oil when mixed according to directions. Low in price, too.

Before you paint, see us

Take up your feeding problems with Us!

North Iowa Grain Co.

How Hancock County Will Gain By

Gov. Hammill's Re-election

On the Road Bond Platform

Assessed valuation of Hancock County $30,877,080

Assessed valuation of entire state $4,405,700,146

(According to the above figures this county's assessed valuation is 0.7 of one per cent of the total assessed valuation of the state.)

THEREFORE

This county's responsibility under the proposed state bond issue, is $700,000

This liability is shown purely for comparative purposes. The state bonds will be retired by auto license fees, gasoline tax and federal aid.

On Dec. 1, 1928, Hancock County will have $405,000 in county primary road bonds outstanding.

If the state bond issue is adopted the county bonds will be called in and paid and the total liability of this county will be $700,000

Which will be an increase of $295,000 from present county bond obligations. For this increase this county will get additional road construction, including 23.2 miles of paving, under the state bond issue plan, amounting to $677,600

Thus, the gain to this county between what the county will assume in responsibility under the state bond plan, and the amount additional to be expended on roads is $382,000

How Much This County Will ACTUALLY Pay For Roads

This county registered 0.65 of one per cent of all the motor vehicles registered in Iowa last year.

THEREFORE, as the state bond issue will be paid out of monies paid in motor license fees and gasoline tax, this county will pay toward retiring state bonds approximately 0.65 of one per cent of the total, or ..... $ 650,000

To be spent retiring county bonds and building additional roads 1,082,260

THUS, the difference between the amount this county will actually pay and the amount that will be expended in this county under the state bond plan roughly figured is ..... $432,600 **GAIN**

In no event can our county lose anything by the state bond issue.

REMEMBER - -

The success of the road bond issue depends upon the re-election of Gov. John Hammill. His opponents have declared they will defeat the proposed state bond measure. Iowa will nominate a candidate for governor and lieutenant governor June 4. Vote for Gov. Hammill and Lieut. Gov. Kimball and assure Iowa a progressive road program.

The Hancock County Good Roads Committee

(By W. S. Pritchard, G. A. Bemis)

POLITICAL ANNOUNCEMENTS

For Auditor

I hereby announce myself a candidate for the nomination to the office of County Auditor of Hancock county, subject to the decision of the Republican voters at the June, 1928 primary Election. H. C. Meyer.

For Auditor

I hereby announce myself a candidate for hte nomination to the office of County Auditor of Hancock county, subject to the decision of the Republican voters at the June 1928 Primaries. Chris Jacobs.

Clerk Of The District Court

I hereby announce myself a candidate for the nomination to the office of Clerk of the District Court of Hancock County, subject to the decision of he Republican voters at the June, 1928, Primary election. Chris Johanson.

County Recorder

I hereby announce my candidacy for the office of County Recorder, subject to a decision of the Republican voters at the June primary election. Mrs. Fern Peck Katter. c

For Sheriff

I hereby announce myself a candidate for Sheriff of Hancock County, subject to a dcision of th Rpublican voters at the June primary election. E. H. Wahlrt. c

For Couty Treasurer

I hereby announce myself a candidate for the Republican nomination for the office of County Treasurer, subject to the decision of the voters at he June 1928 Primary. John Suurballe. c

For Treasurer

I hereby announce that I am a candidate for the office of Treasurer of Hancock County, subject to a decision of the republican voters at the primary election to be held June 4, 1928. A. C. HALVERSON.

For Supervisor

I hereby announce myself a candidate for the office of supervisor of Hancock County for the term beginning Jan 1, 1930, subject to the decision of the republican voters at the June 1928 primaries B L PROUTY

For Representative

I hereby announce my candidacy for the office of Representative in the Iowa Legislature for Hancock County, subject to the decision of the Republican voters at he June primary. C. H. Nelson

For State Senator

To the Voters of the 43rd Senatorial District of Iowa: Having served as Representative from Cerro Gordo County in the 40, 41, 42 sessions, from which the Voters have a record of my Legislative acts, and believing my experience gained in Legislative work as a result of my six years in the House of Representatievs would be of value in a continuance of the work, I am at this time announcing my candidacy for Republican nomination of Seator from the 43 Senatorial District, which includes Cerro Gordo, Franklin and Hancock Counties, subject to the result of the June Primaries. C. A Knutson. c

For Sheriff

For County Attorney

I hereby announce myself a candidate for the office of county attorney subject to the decision of the republican voters at the June 1928 primaries V S WHITE

Klemme is well represented at the Iowa State College at Ames and the young men from here all belong to a fraternity. A week ago Sunday the boys entertained their parents and those from here who attended were Mr. and Mrs. A. G. Koerner, Mrs. Sadie Turgasen, and F A Arnold and son, Asa.

Mr and Mrs. Frank Gruetzmacher and daughter, Glenna, and Mrs. Cushman and baby, who were visiting at the Gruetzmacher home, drove to Lake Cornelia Sunday and at that place met Harold Gruetmacher and family and Mr. and Mrs Warnock, of Iowa Falls, and all enjoyed a picnic dinner together.

The Camp Fire Girls were somewhat dissapointed that they did not receive their ceremonial gowns in time for Memorial. However, the gowns arrived this morning and will be ready for the next occasion. They are made of brown khaki and trimed with a leather fringe. The gowns are supposed to be nine inches from the floor when worn.

Paul Grange has his fish pond at the Northern Lumber Co. all fixed up for the summer. This little plot of ground on the east side of the office is a regular little park Flower beds, and shrubbery add to the appearance. The "pond" has been stocked with a lot of gold fish and an electric light has been hung up over the park and lights it all up at night

HONEST JOHN is a black Mammouth Jack and will make the season 1928 on the farm located 1½ mi. south and 5¼ mi. east of Klemme and will insure a colt to stand and suck The fee is $15. Any mare that is bred to this jack that is sold or traded, or disposed of in any way the fee will become due immediately. ALBERT GOBELI, Owner, Rt 2 Thornton, Phone 8-F31, Klemme. 2tp.

E. W. CLARK

Candidate for Nomination for State Senate

To The Voters of Franklin, Hancock and Cerro Gordo Counties:

MR. CLARK SHOULD REPRESENT YOU IN THE STATE SENATE AND SHOULD HAVE YOUR SUPPORT AND VOTE ON NEXT MONDAY, JUNE 4th.

BECAUSE HE IS Frank, Honest, Sincere and square in all dealings with his fellowmen whether in business or politics.

BECAUSE HE IS for the common people and is one of them.

BECAUSE HE IS opposed in this Campaign by those in control of large corporations and he is not supported by any corporation and will represent the people of this District with no obligations or promises to any corporation, group or ndividuals.

BECAUSE HE IS the friend of the farmer and an open advocate and supporter of the McNary-Haugen Farm Bill..

BECAUSE HE IS well qualified for the office he seeks by reason of his twenty-five years of business experience in Mason City.

BECAUSE IF elected he has pledged himself to be governed by the sentiment of this district in regard to any Road Legislation or bonds for roads as the majority of the voters may indicate by their votes on this issue to be submitted at the next General Election.

BECAUSE HE stands for equal distribution of taxes with favors and privileges to NO ONE.

BECAUSE HE volunteered and served in the Spanish-American War and spent twenty-one months with the Army in the United States and France during the World War.

BECAUSE HE has always been an advocate and strong supporter of the Woman's Suffrage.

(This advertisement is ordered and paid for by his friends.)

Work of Locksmiths Encouraged by Kings

The evolution of the lock in France may be traced in great part to the direct encouragement given to the craft by her kings. It was Charles VIII who in 1411 made it compulsory for every locksmith apprentice who aimed at becoming a master to produce a "chef d'oeuvre" lock of such degree that it would entail anything from one year to two in the making. The delicate and intricate examples that are treasured in museums are mostly drawn from the test pieces, none of which however, bears the name of the smith, though the majority are sufficiently interesting to merit a signature. The forge had little connection with such locks and none was cast in the rough Great is the ingenuity brought to bear on them in order to display some hitherto unexploited device or to break some fresh ground in ornament. For strong boxes there were contrived locks that are a miracle of intricacy.

Under Francois I, an enthusiastic patron of the locksmith, the craft reached its summit, whence it was then to decline, if not in respect of elaboration, at least in respect of true beauty and feeling. Under Louis XIII, who was so keen a lover of fine iron work that he himself toiled at the forge and in the workshop, the lock excelled in point of mechanism and ingenuity, but rapidly deteriorated from the esthetic standpoint It had reached the point where the production of puzzle and letter locks began to take precedence of locks that represented compositions of real artistic quality.

Grasshopper Vane Not Original With Faneuil

It is generally conceded that when Peter Faneuil caused a large grasshopper to be placed on top of Faneuil hall in Boston as a weathervane he did it in emulation of Thomas Gresham, who 176 years before had given his home city, London, a handsome bourse for merchants, dedicated by Queen Elizabeth as the Royal Exchange and crowned by the Gresham family crest, a gilded grasshopper. The grasshopper had been adopted for a crest by the Greshams obviously because the name Gresham is regarded as a corruption of the German word for grasshopper, "grassheim." Faneuil undoubtedly had seen the London grasshopper and liked it, so he chose it for the building he gave to Boston. The Faneuil hall grasshopper has fallen to the street three times in its 185 years' existence, once in the famous 1755 earthquake, again in 1761 when the building was burned, and finally in 1880, as a result of getting entangled with the flagpole halliards. After the 1755 tumble a demolished leg had to be replaced, and in 1880 new glass eyes, as well as horns and feet were required.—Detroit News.

Nomad Weavers

The inhabitants of eastern Asia are, generally speaking, a very ignorant class, education being almost unknown. From the top of a hill one may look down on a wide valley some 20 miles in width and observe a dozen or more black tents woven of goats' hair which are the homes of nomad weavers. These people, whose livelihood depends almost entirely on their flocks, are forced, and have been forced for untold generations to move about from place to place in search of pasturage, which is ever meager in this land of scanty rainfall. As one would expect, this mode of living has made these people a virile race, strong in body, but entirely devoid of culture.

Vinegar in History

Vinegar was first made from wine, as its name indicates, at a remote period. Biblical writers mentioned it, and Hippocrates used it as a medicine By the Sixteenth century vinegar from grapes was being produced in France for home consumption and for export. In England vinegar was first made from malt liquors, a method of disposing of ale und beer which had soured. For this reason it was known as "alegar." Although this name has long since become obsolete malt vinegar is still the standard in the British isles. It is not known just when vinegar was first made in the United States, certainly very early as a home product.

Enough Herrings for All

That great sea bird, the gannet or solan goose, requires a large amount of fish. There are not many breeding haunts in these islands, but the few that we have are wonderful bird fortresses, for the birds congregate in their thousands, occupying every available ledge on the giant cliffs they choose for their home. The gannets of Great Britain alone consume not less than 60,000,000 herrings a year, yet there appears to be plenty in the sea for them and us. If every gannet in the world were exterminated, I doubt if it would make the slightest difference to the amount of herrings captured by our fishermen.—London Mail.

He Threw a Turnip

A society woman called on a famous painter who, when necessity arose, could express himself with emphasis.

Her ceaseless chatter did not permit him to get in a word edgewise.

At length a pause to take breath allowed him to say, "We had boiled mutton and turnips for lunch today."

"What a strange observation!" the woman exclaimed.

"Well," he said, "it is as good as anything you have been saying for the last two hours."—London Tit-Bits.

First Study of Comet

The comet of 1680 was the first one whose orbit was computed on the basis of the law of gravitation. Newton made the calculations and found that its period of revolution was about 600 years. At its perihelion it passed through the sun's corona at a distance of only 140,000 miles from its surface. It flew along this part of its orbit at the rate of 370 miles per second, and its tail, 100,000,000 miles long changed its direction to correspond with the motion of the comet in its orbit.

There Was a Difference

Betty, age five, wanted a puppy and was frequently asking her father to get her one. One day daddy decided to fulfill her wish and spent one afternoon making the rounds of the pet shops, but none of the dogs seemed to suit Betty Finally they drove out to the dog pond, where there were quite a number of dogs, all shapes and sizes Petty was interested, but not in any one dog. The keeper of the pound said to her: "What kind of a dog did you want, little girl?" to which Betty replied, "I want a collie dog."

Favored Settlement

After little Jimmy had listened to his older brothers saying the Lord's prayer, he felt that he, too, had attained the age at which he might discard his childish prayer for the Lord's prayer With his mother's consent, he bravely started in. All went well until he came to the words "Forgive us our debts," then his memory failed. He considered for several moments and again bowing his head he finished with, "Forgive us our debts, and help us to pay them."

Ice Cold Pop

That's the kind you get in our new Pop Dispenser.

Every bottle is deliciously ICE COLD Any flavor you want. Come in and see this new machine work.

When you want Pop, you want it COLD, that's just what you get here!

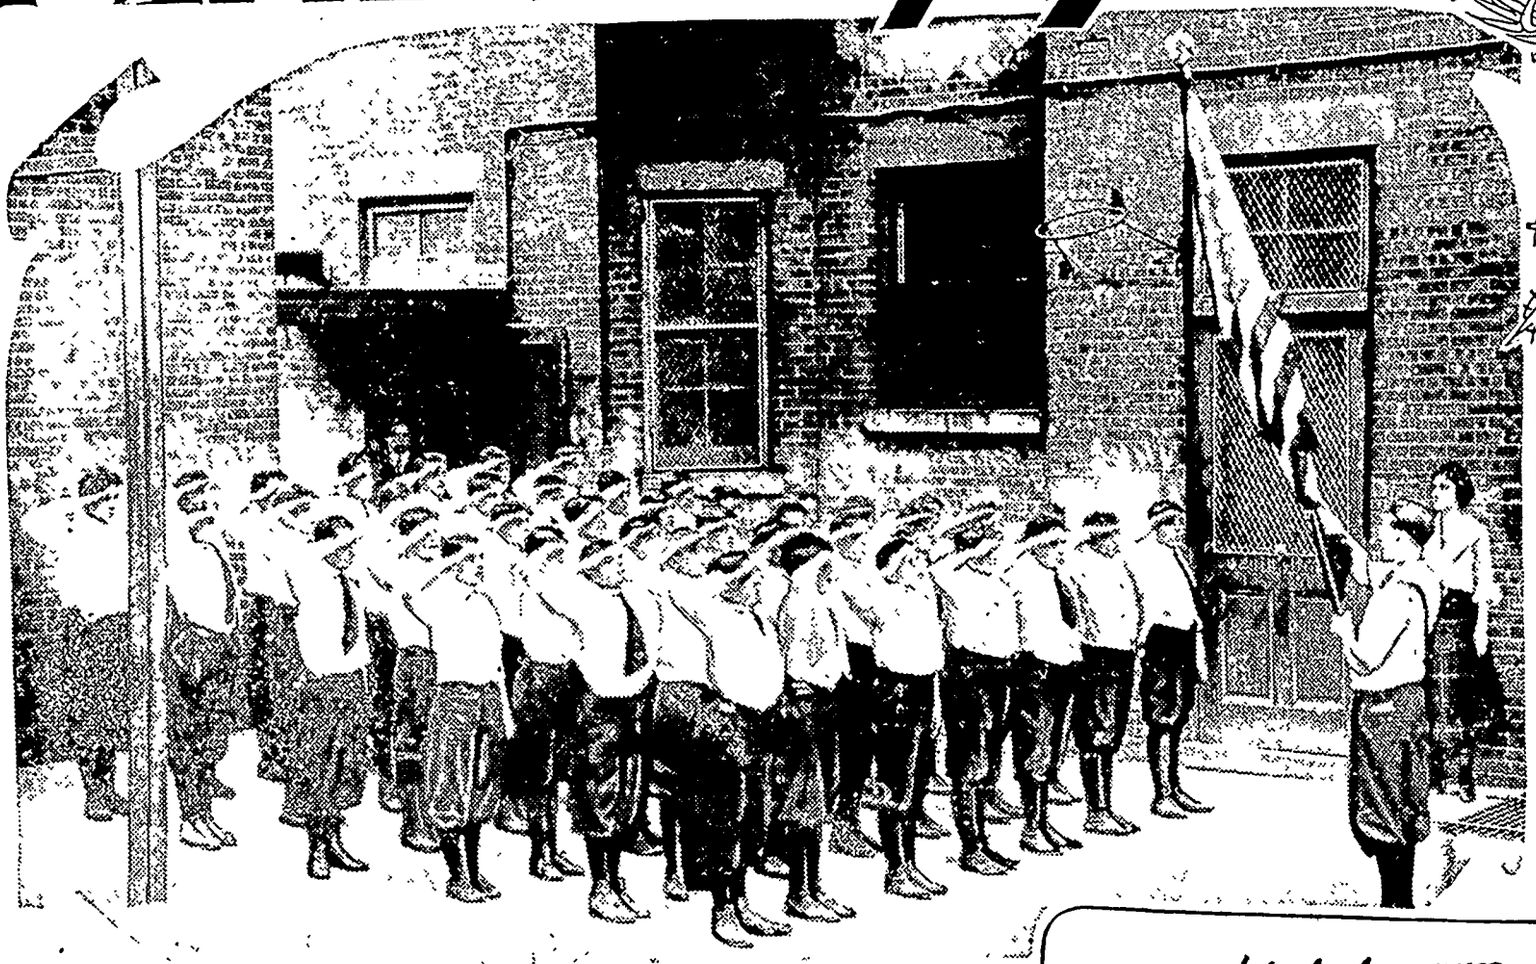
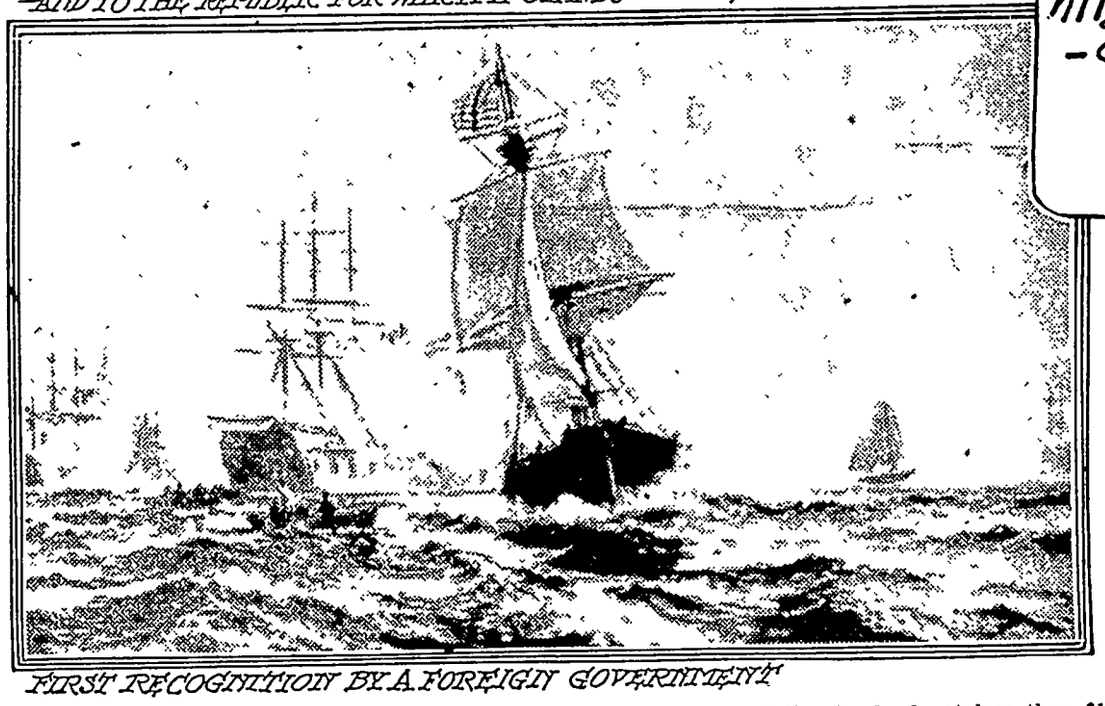
FLAG DAY, 1928



"—AND TO THE REPUBLIC FOR WHICH IT STANDS" Photo by Underwood & Underwood



FIRST RECOGNITION BY A FOREIGN GOVERNMENT

1777 June 14. Saturday June 14 1777 243

Resolved That the Flag of the united States be thirteen stripes alternate red and white, that the Union be 13 stars white in a blue field representing a new constellation.

THE ORIGINAL FLAG RESOLUTION

By ELMO SCOTT WATSON

JUNE 14 is Flag day because it was on June 14, 1777, that the Second Continental congress passed a resolution which reads:

"Resolved, That the flag of the United States be thirteen stripes, alternate red and white, that the union be thirteen stars, white in a blue field, representing a new constellation."

The original of this historic resolution (a facsimile of which is shown above), in the handwriting of Charles Thomson, secretary of the Continental congress, is preserved in the archives of the nation. The reason for the thirteen stars and thirteen stripes, as authorized in this resolution, is, of course, that they represent the thirteen colonies or original states which were fighting for freedom from England. Historians have varied in interpreting the meaning of the colors in the flag, and there have been at least 40 different varieties of symbolism attributed to the three heraldic tinctures. However, a recent investigator in the records of the State department found the following meaning of the colors: Red—hardiness and valor, White—purity and innocence, Blue—vigilance, perseverance and justice.

Flag day this year has a special significance for several reasons. Last year was the sesquicentennial of the adoption of the Stars and Stripes as the flag of the United States, the sesquicentennial of its first appearance in the face of an enemy of this country, of its first appearance on the seas, and of its first being carried into battle. This year marks three important sesquicentennials for Old Glory. They are based upon the following dates and events:

January 28, 1778: First appearance on a foreign stronghold at Nassau, Bahama islands. The Americans captured Fort Nassau from the British, and promptly raised the Stars and Stripes.

February 14, 1778: First foreign salute to the Stars and Stripes. John Paul Jones entered Queberno bay, near Brest, France, and received a salute of nine guns from the French fleet, under Admiral La Motte Piquet. Jones had previously saluted the French fleet with twenty-one guns.

April 24, 1778 John Paul Jones achieved the honor of being the first officer of the American navy to compel a regular British man-of-war to strike her colors to the now flag.

But more important still is the fact that for the first time in history there is a federal statute to prevent desecration of the flag and insignia of the United States. Every state in the Union, except one, has at one time or another passed a law to prevent such desecration, but there had never been such a federal law applying to all parts of Uncle Sam's dominions until March 19 of this year when congress passed the following bill:

Be it enacted, etc., That any person or persons, firm or firms, corporation or corporations, or other organization or organizations, who, in any manner, for exhibition or display, place or cause to be placed upon the flag, color, design, standard, coat of arms, or other insignia of the United States, or upon any intended representation thereof, any inscription, picture, design, device, symbol, name, advertisement, words, marks, notice, or token, or who shall possess, distribute, display, or exhibit, or cause to be distributed, displayed, or exhibited any flag, color, design, standard, coat of arms, or other insignia of the United States, upon which shall in any manner be placed, attached, annexed, affixed, associated, or made a part thereof, any inscription, picture, design, device, symbol, name, advertisements, words, marks, notice, or token whatever, or who willfully and publicly show open or hostile contempt for, trample upon, or otherwise deface or defile any such flag, color, ensign, standard, coat of arms, or other insignia of the United States, shall upon conviction be fined not less than $100, or imprisoned for not more than six months, or both, for each such offense: Provided, that flags, colors, ensigns, standards, coats of arms, or other insignia the property of or used in the service of the United States, or any state or territory, or the District of Columbia, may have placed thereon such inscription, names of actions, words, figures, marks, or symbols as are authorized by law or by the rules and regulations of the United States government or any department or division thereof.

Sec. 2. That the words "flag," "colors," "coat of arms," or "insignia" used herein include also any picture or representation or simulation of the same.

Sec. 3. That this act shall not apply to the use, wholly disconnected from trade advertising, of the flag, colors, coat of arms, or other insignia of the United States on newspapers, books, cards, certificates, commissions, decorations, banners, pictures, stationery for correspondence, or in or on any article or in any position where its use is purely and obviously for ornamental or patriotic purposes.

Sec. 4. That this act shall go into effect upon its passage and publication, except as to goods which shall have been made and marked and in stock at that time, and as to such goods it shall be in force six months after its passage and publication.

In fact, it is rather remarkable that our government has paid so little attention to this symbol of the nation, so far as legislation affecting it is concerned. Flag day itself has never been officially recognized by the government and there is no federal law pertaining to the manner of displaying, hanging or saluting the flag, nor prescribing any ceremonies which should be observed in connection with the flag. The only federal laws dealing in any way with the flag are the following:

(1) The act of congress of February 20, 1905, providing that a trademark cannot be registered which consists of or comprises, among other things, "the flag, coat of arms, or other insignia of the United States, or any simulation thereof."

(2) A joint resolution of congress approved May 8, 1914, authorizing the display of the flag on Mother's day.

(3) The act of February 8, 1917, providing certain penalties for the desecration, mutilation, or improper use of the flag within the District of Columbia.

(4) The act of May 16, 1918, providing, when the United States is at war, for the dismissal from the service of any employee or official of the United States government who criticizes in an abusive or violent manner the flag of the United States.

For nearly 150 years tradition and popular custom were virtually the only guides which American citizens had for the correct methods of displaying the flag and honoring it as it should be honored. However, on June 14 and 15, 1923, a National Flag conference was held in Washington which formulated a flag code and since that time the United States Flag association, a patriotic organization founded for the promotion of reverence for the flag and the ideals and institutions for which it stands, has been the leader in a campaign of education for general observance of this code. The outstanding points in this code are as follows:

The national flag represents the living country and is itself considered as a living thing. The union of the flag is the honor point; the right arm is the sword arm and therefore the point of danger and hence the place of honor.

The flag should be displayed only from sunrise to sunset, or between such hours as may be designated by proper authority. It should bo displayed on national and state holidays and on historic and special occasions. The flag should always be hoisted briskly and lowered slowly and ceremoniously.

When carried in a procession with another flag or flags the flag of the United States shall be either on the marching right, or when there is a line of other flags, the flag of the United States may be in front of the center of that line.

When displayed with another flag against a wall from crossed staffs, the flag of tho United States should be on the right, the flag's own right, and its staff should be in front of the staff of the other flag.

When a number of flags are grouped and displayed from staffs, the flag of the United States should be in the center or at the highest point of the group.

• • •

When the flags of states or cities or pennants of societies are flown on the same halyard with the flag of the United States, the national flag should always be at the peak. When flown from adjacent staffs the flag of the United States should be hoisted first. No flag or pennant should be placed above or to the right of the flag of the United States.

When flags of two or more nations are displayed they should be flown from separate staffs of the same height and the flags should be of approximately equal size. International usage forbids the display of tho flag of one nation above that of another nation in time of peace.

When the flag is displayed from a staff projecting horizontally or at an angle from the window sill, balcony or front of building, the union of the flag shall go clear to the head of the staff unless the flag is at half staff.

When the flag of the United States is displayed in a manner other than by being flown from a staff, it should be displayed flat, whether indoors or out. When displayed either horizontally or vertically against a wall, the union should be uppermost and to the flag's own right, that is, to the observer's left. When displayed in a window it should be displayed the same way—that is, with the union or blue field to the left of the observer in the street. When festoons, rosettes, or drapings, of blue, white and red are desired, bunting should be used, but never the flag.

When displayed over the middle of the street, as between buildings, the flag should be suspended vertically with the union to the north in an east and west street or to the east in a north and south street.

When used on a speaker's platform, the flag should be displayed above and behind the speaker. It should never be used to cover the speaker's desk nor to drape over the front of the platform. If flown from a staff it should be on the speaker's right.

• • •

When used in unveiling a statue or monument, the flag should not be allowed to fall to the ground, but should be carried aloft to wave out, forming a distinctive feature during the remainder of the ceremony.

When flown at half-staff, the flag is first hoisted to the peak and then lowered to the half-staff position, but before lowering the flag for the day it is raised again to the peak.

When the flag is displayed in church, it should be from a staff placed on the congregation's right as they face the clergyman. The service flag, the state flag or other flag should be at the left of the congregation. If in the chancel, the flag of the United States should be placed on the clergyman's right as he faces the congregation and other flags on his left.

CAUTIONS

1. Do not permit disrespect to be shown to the flag of the United States.
2. Do not dip the flag of the United States to any person or any thing. The regimental color, state flag, organization or institutional flag will render this honor.
3. Do not display the flag of the United States with the union down except as a signal of distress.
4. Do not place any other flag or pennant above or to the right of the flag of the United States.
5. Do not let the flag of the United States touch the ground, or trail in the water.
6. Do not place any object or emblem of any kind on or above the flag of the United States.
7. Do not use the flag as drapery in any form whatever. Use bunting of blue, white and red.
8. Do not fasten the flag in such manner as will permit it to be easily torn.
9. Do not drape the flag over the hood, top, sides or back of a vehicle, or of a railroad train or boat. When the flag is displayed on a motor car, the staff should be affixed firmly to the chassis, or clamped to the radiator cap.
10. Do not display the flag on a float in a parade except from a staff.
11. Do not use the flag as a covering for a ceiling.
12. Do not use the flag as a portion of a costume or of any athletic uniform. Do no embroider it upon cushions or handkerchiefs or print it on paper napkins or boxes.
13. Do not put lettering of any kind upon the flag.
14. Do not use the flag in any form of advertising nor fasten an advertising sign to a pole from which the flag of the United States is flying.
15. Do not display, use or store the flag in such a manner as will permit it to be easily soiled or damaged.

Bunting of the national colors should be used for covering a speaker's desk, draping over the front of a platform and for decoration in general. Bunting should be arranged with the blue above, the white in the middle and the red below.

During the ceremony of hoisting or lowering the flag or when the flag is passing in a parade or in a review, all persons present should face the flag, stand at attention and salute. Those present in uniform should render the right-hand salute. When not in uniform, men should remove the headdress with the right hand and hold it at the left shoulder.

Women should salute by placing the right hand over the heart The salute in a moving column is rendered at the moment the flag passes.

Speaking of Strikes

By RING LARDNER

To the Editor:

I made the remark the other day that I wished I was in some sort of a strike and the madam said well why don't you get into one and I said how can I strike when I haven't got no job answer me that which for once she would not.

Well, afterwards I got to thinking it over and finely I seen a way to get into the game that was by organizing a husbands union and demanding a fair trial for the married men. I talked it over with a couple other husbands whom I'm on friendly turns with them and we set down and figured out a set of demands which will first be gave to other husbands for their O. K. and then presented to the wives in the shape of a ultimatum which if each and every demand is not granted the married men will walk out on them the day before Xmas and leave them to explain to the kids why Santa didn't show up.

The demands as maped out is as follows:

1. A 20 hour Day and a 6 Day Week.

Under the present system the husband is on the job the whole 24 hrs. of the whole 7 days and even while he is asleep he can't dream nothing that don't remind him of It. The husband wants the hrs. between 8 and 12 every night for rest and recreation, and Sundays to themself for meditation and prayer somewheres away from the home.

2. The Closed Mouth.

The way it is now you don't know sooner get in the house when the owner wants to know where you was. The husband wants the right to not answer.

3. A Increase of at Least 50 Per Cent in Pocket Money.

The owners is getting bigger allowances than ever before but the husbands is still supposed to go along on the old scale though it costs 3 and 5 times as much to mingle around and where a person used to be able to get paralyzed on $10 it now takes $25 and $30 to even feel like you wanted to hear the Rosary.

4. Collective Marketing.

In rare cases, the owner consults the husband as to what would he like for dinner but they generally always wait until just after breakfast when the bare mention of food stuffs rubs the fur the wrong way and even when a husband can remember 1 of his favorite dishes at that hr. in the morning and mentions it out loud why he has his trouble for his pains you might say, as the matter will either be forgotten and hushed up before nightfall or else they tried to get it but the man at the store advised them to pass it up as it was libel to be a little ranced at this time of yr. or something.

In regards to Demand #4, while I don't like to drag in personalities however, I feel strained to say that I have been a husband for better or worse than 8 yrs. and have never kept it a secret from the owner that my 2 favorite viands was oyster cream stew and doughnuts and yet during the entire Eight Years War the no. of messes of doughnuts in our home has hardly ran into double figures of 1 thumb. In the case of the doughnuts it is generally always broughten up that lard is too expensive for lardners or doughnuts don't set good on the kids or the owner don't know if Iola can make them or not and they don't seem to be no way of finding out and if you get them from the bakery you don't know what is in them though personly I don't give a darn as long as they taste greasy and fill you up.

As far as oysters is conserned they's a version in the Psalms that says don't eat them only in months which is spelt with a r and though it goes vs. the grain for a man to speak of their wifes shortcomeings suffices to say that they's many a nice girl that was born a bad speller and just as many that can't bear the looks of a calendar around the house so for all as they know oysters may be at their zenith in July instead of vice versa.

5. The Abolition of the Birthday.

The normal husband has as many birthdays per annum as the owner but where as the husband is expected to remember the 10 of July or what ever it is and spend the equal of half a yrs. gold dues where as on the other hand the owner if they don't forget the 6 of March entirely why they buy you a book that until you have read it through you can set around evenings and pare your finger nails.

That is the demands as they will be presented to the owners as soon as the husbands can get organized and I hope, dear editor, that you are in sympathy with this movement and will urge all the husbands on your staff as those amongst your subscribers to at once join the Amalgamated Married Men of America and put a end to the humiliations to which a member of the servile sect becomes a party to the minute they are drug up to the harmenial alter and if a walk out is necessary on the date chose which is Xmas eve why I hope the owners will see the light and bow to the inevitable and not try and continue in business with a gang of scabs.

FARM STOCK

LITTERS IN 1927 NUMBER 752

(Prepared by the United States Department of Agriculture.)

1927 hog-raising contest, in swine growers in 20 states com- was won by Pennsylvania with ters that reached a weight of or more each in 180 days, ac- to Dr. C. D. Lowe, extension husbandman of the United Department of Agriculture. In- and Tennessee tied for second with 80 ton-litters each. Illi- produced 59, Texas 46, Kentucky and Minnesota 40.

sconsin produced the heaviest lit- reported, 12 pigs that weighed pounds at six months of age. lvania is credited with the litter, one of 18 pigs. A total ton-litters were produced in states.

year's results again demon- the value of well-bred hogs for production, for no litter in which breeding did not predominate ed the goal of a ton at six hs of age. The selection of sows g the ability to farrow large lit- as well as the application of im- ed practices to save every pig wed, was also an important fac- in the production of these ton- s, most of which consisted of ten or more.

eding tests long have indicated pigs make the cheapest gains "crowded" from the time they to eat until ready for market. shorter feeding period lessens the required for maintenance and re- the disease hazard. Another on for the practice of finishing within six months is that March will be ready for market before seasonal drop in prices which ally comes about September.

e experience of the 192- ton-litter ders not only proved the ad- ages of a short feeding period for ring cheap gains and in reducing ise, but also demonstrated the dis- advantage of having the pigs y for early marketing. Hog es "broke" from $2.50 to $3.50 a dredweight between September December, causing reduced re- s and in some cases heavy losses rowers whose hogs were not ready market before this period.

lthough the 1927 contest produced fewer ton-litters than were pro- d in 1926, this falling off, accord- to Doctor Lowe, is partly because the fact that many farmers sold r hogs when prices began to drop ate September. The fact that four the leading hog-producing states now giving more attention to the alled pig crop contests than to e ton-litters is another factor re- sible for the fewer ton-litters the t year. Pig crop contests are be- ing popular as a natural follow-up ton-litter work in improving pork duction, and have for their objec- the production of a maximum unt of pork from every sow in the d.

Two Horses Per Farm Is Illinois Estimate

With only enough horses being ed in the United States to main- an average of two to the farm, horse shortage looms in the near re, according to H. C. M. Case, n management department, Uni- ity of Illinois. During the past years the number of horses on ms has been cut one-third by the oduction of power machinery. In main this substitution has been nomical, he points out. However, s reasonable to believe that an av- ge of two horses for each farm in United States will not be adequate economical power supplies in the ure, he points out.

resent low prices of feed is a fac- which should encourage an in- se in horse and mule production.

Live Stock Items

Many deficiency ailments are reme- d by including forage crops in the 's ration.

* * *

ows should be in good condition gaining slightly in weight when eding season begins.

* * *

eat brine or too much salt will pigs, also old hogs. Watch where throw even the water from boil- salted ham.

* * *

ose observations of sows and pigs e many times indicated that ani- s on self-feeders look better and more thrifty than those that are d fed.

* * *

number of sows may be kept in house, but they should be in small ch groups so they will not crowd pile up.

* * *

erviceability, durability, conven- e, sanitation, comfort and safety the features to be sought in a able hog house.

* * *

addition of skim milk to a ration does not make up for the ency of the fat-soluble vitamine ite corn, which should be supple- d with tankage or meat meal.

Increase Yield With Same Cost

Two Systems Outlined for Securing More Products From Acre.

(Prepared by the United States Department of Agriculture.)

Farmers have two general ways of increasing the yields of crops on their lands, according to Dr. R. O E. Davis, of the United States Department of Agriculture, who makes the division on methods according to whether they do or do not increase the cost per acre of raising crops. An example of a cropping method that tends to increase yields without increasing costs of production is the planting of crops better adapted to the type of soil on the farm; for example, the seeding of alsike clover on lands which have not produced good crops of alfalfa or red clover because of acid soil. Rotation of crops with frequent planting of legumes is another method of increasing yields without increasing costs per acre. Still another is the use of varieties of the crops which have been improved by plant breeding These, Doctor Davis points out, are naturally the first aids to which the farmer is likely to turn in an effort to get more production from his farm. Any increase in production is to a large extent net profit.

Improved Methods.

The methods of the other class involve increased costs per acre of crop. For example, better weed control gives commercial plants a better chance in competition with the weeds, but it costs money or effort. The same applies to more thorough preparation of the seed bed and more thorough cultivation. A third and increasingly important method is the use of commercial fertilizer, which means a direct expenditure of money. In this class of improved farming methods the increased yield is not net profit. Before a farmer will turn to such methods he must be convinced or convince himself that the increased yield as the result of better cultivation or use of fertilizer will return the added expense and leave a profit over and above the added expense of growing the crop.

Increased Yields.

That farmers in following one or another or several of such methods have increased yields per acre seems to be evident from figures of the number of acres of improved land per capita, which in the decade from 1880 to 1890 was 5.7, and which declined to 4.8 acres per capita in 1920.

New Nematodes of Birds Described in Bulletin

(Prepared by the United States Department of Agriculture.)

In "Nematodes of Pathological Significance Found in Some Economically Important Birds in North America," just published by the United States Department of Agriculture as Technical Bulletin 49-T, Eloise B. Cram of the bureau of animal industry reports on eight parasitic nematodes, part of which are familiar abroad but only recently discovered in this country, and part believed to be new in science. The latter are described and names proposed. The parasites include such diverse groups as strongyles, spuirurids and capillarids, and the hosts include the chicken, turkey, domestic and wild geese, wild ducks, carrier and domestic pigeons, ruffed grouse and quail, all economically important "The finding within less than a year and a half that parasitic nematodes are responsible for such a variety of previously unrecognized pathological conditions in birds," says the author "suggests that the role played by these parasites has been considerably underestimated and that other significant forms will doubtless be found in this country if sufficient search is made for them."

Technical Bulletin No. 40-T may be obtained free, while the supply lasts, on application to the Department of Agriculture, Washington.

Agricultural Hints

Legumes are generally richer in protein and minerals than other roughages.

* * *

In very few locations is it profitable to risk the chicks without windows of some kind.

* * *

It is difficult to lay down hard and fast rules as to the proper time to plant the different products we are able to grow.

* * *

The home garden will produce more in dollars and cents than any other area of equal size on the farm. Indications point to a favorable year for gardening.

* * *

Any grower wishing to grow staked tomatoes should begin with not more than 1,000 plants the first year and gradually increase his plantings from year to year as seems advisable.

* * *

Specialists at South Dakota State college advise that corn silage is quite beneficial to lambs only if fed in small quantities in connection with a regular ration and not as the only roughage.

* * *

Allowing barley to germinate and form root sprouts seems to encourage the old hens to eat it. The best results will come when some corn is used in the ration along with the barley.

FARM POULTRY

MODERN CHICKEN MUCH IMPROVED

When you sit down to your breakfast eggs or your Sunday chicken dinner nowadays you will probably enjoy much better food than you did seven years ago. For while few of us know anything of the change, the great American hen has become a decidedly improved bird since 1921.

Thousands of poultrymen in more than half of the states of the Union have adopted standard systems for improving the breeds and eradicating disease in their flocks since Wisconsin began producing "accredited" chicks seven years ago.

"The basis of the Wisconsin plan," explains the Farm Journal, "was a breeding program whereby through culling, selection of birds of standard qualifications and vigorous constitutions, with supervision of both flock and hatcheries, high-quality flocks and chicks might be produced. The chicks thus produced were designated as "accredited" and were advertised and sold as such

"This accredited idea spread rapidly from Wisconsin and is now in operation under essentially the Wisconsin plan in Ohio, Illinois, Kansas, Missouri, Michigan, Texas, Tennessee and a number of other states. Some eight or ten more states are also preparing to put this plan into operation.

"In 1922, Connecticut adopted the Wisconsin idea, but made the blood test for bacillary white diarrhea the basis upon which flocks were to be accredited. Following the lead of Connecticut, Massachusetts, Rhode Island, New Jersey, Pennsylvania and a number of other Eastern states have built up an accredited system based on the disease-eradication plan. Washington, Oregon and Idaho are now on, or are adopting, this plan. New York has a plan that is a modification of this, with more emphasis on breeding."

Success of the plan is evidenced by the fact that Ohio, where the state poultrymen's association adopted the plan only in 1924, will this year produce 12,000,000 chicks from 65 accredited hatcheries.

Hot Water Very Useful in Preventing Chilling

If there is anything more aggravating than an old "mother" hen that refuses to hover her brood on cold, wet days, I don't know what it is, says a writer in Farm Life. But you know a dead chick more or less means nothing in life to an old Cluck, so it's up to us to give nature a lift in the way of artificial heat, when the hen refuses to do her duty.

Here's my way. Fill one-half or one gallon jugs with hot water, make a snug cover of woolen (an old blanket is ideal) to fit the jug, cork tightly, and place in a box or in the coop with the chicks. This will give off enough heat to keep the little things cozy for several hours. When necessary refill with hot water and you'll never lose chicks from chilling.

Poultry Notes

Comfortable quarters in the very earliest days means much in the future development of the chicks and the profit which they will return to their owners.

* * *

Young chicks should have no feed for 36 or even 48 hours after hatching. Corn bread, rolled oats, and hard-boiled eggs are good feeds for the first few days.

* * *

It takes 21 days for a hen egg to hatch, about 28 days for ducks, from 30 to 34 days for a goose egg, and 28 days for turkey eggs. The time may vary somewhat according to conditions.

* * *

The all-mash system of feeding chicks after the first month furnishes a satisfactory method and also allows the person handling the flock some leisure time without damaging the young birds.

* * *

Ground oats may be used for growing stock or laying hens when fed in limited quantities.

* * *

Wheat bran is largely used in all chick mashes. It is bulky but fairly digestible and has a laxative tendency which is beneficial. It is fairly high in protein.

* * *

Chicks need something green to eat. When they are out on good range they will take care of this requirement themselves. When they are housed it should be supplied.

* * *

In the building or maintaining of a high quality flock of poultry, no one factor is as important as the males heading the flock.

* * *

Buckwheat is lower in feeding value than corn, oats, or barley Further more, it is higher in fiber and lower in digestibility than these grains.

* *

When bluegrass is pastured too closely by geese, it will kill the grass out just the same as it will if bluegrass is pastured excessively close by cattle, or particularly by sheep.

Orchard Information

SPRAYS CONTROL INSECT PLAGUES

(Prepared by the United States Department of Agriculture.)

Oil emulsions, which have proved effective recently in the spraying of orchards for control of many insect pests, are now reported to be the most effective agency for killing several varieties of mites affecting fruit trees. The experiments to demonstrate the comparative efficiency of oil emulsions and other sprays were carried on by Department of Agriculture entomologists at Yakima, Wash. Emulsions were used both for dormant and summer sprays, and were found to be highly effective, killing from 00 to 100 per cent of both mites and eggs.

For dormant sprays an emulsion containing 3 per cent of oil was found to be far superior to the familiar lime-sulphur treatment. If used before the first buds separated no damage to the tree or fruit followed.

For summer sprays a more dilute emulsion proved desirable, the proportion of oil being from one-half to two-thirds of 1 per cent. This was more effective than the summer-strength lime-sulphur treatment and injured leaves and fruit less. The only other summer spray found comparable to the oil emulsion was a mixture of potash and fish-oil used either with or without an addition of nicotine sulphate. The potash and fish-oil mixture might be more desirable in spraying tender foliage, it is believed. The three species against which these sprays proved effective were the common red spider or two-spotted mite, the brown mite or clover mite, and the European red mite, the last being the most abundant in the vicinity of Yakima.

Technical Bulletin 25-T, entitled "Experiments for the Control of European Red Mite and Other Fruit-Tree Mites," has just been published by the United States Department of Agriculture, and contains the details of the spraying experiments and also the formulas used in making various sprays. It may be had by writing the Department of Agriculture, Washington, D. C.

Planting Gooseberries and Currants in Spring

In the planting of gooseberries and currants, either one-year or two-year plants may be ordered. The Poorman, Downing and Houghton are the best varieties of gooseberries to consider. The Houghton is small but very productive. Perfection, Fay, Cherry and Wilder are the best currants to pick from. These are all red varieties. The White Grape is a white variety.

With raspberries one-year-old plants are the best to use. In the case of black raspberries, order No. 1 tip plants. Tip plants are new last year's plants secured by tip layering old plants. The following varieties of red raspberries are recommended: Latham (Minnesota No. 4), Crimson Cluster, Loudon and Miller. Two good black raspberries are Cumberland and Kansas. Columbian and Cardinal are two good purple sorts.

Top-Grafting Is Useful Operation in Orchards

Top-grafted is a fascinating sport. And it really isn't a sport either, as it is coming to be recognized as a useful operation in many orchards. Sometimes a grower feels he has made a mistake in setting some variety, or possibly has set too many of a certain variety. In this case top-grafting will solve the problem and will cause a serious loss of time in the growing of a tree, providing it is started soon enough. A fellow who likes to experiment can get quite a kick from top-grafting apples. Several varieties of apples may be grown on the same tree, in fact as many varieties as there are branches on the tree.

Horticultural Facts

For a real late peach the Salway is still the favorite.

* * *

The tree that bears fruit is the one that is always clubbed—the barren one is never bothered.

* * *

The Evergreen blackberry which is grown in the West is propagated from the tips of canes as we do with the black cap raspberry.

* * *

Spraying is one of the most important factors in keeping trees alive and healthy, and making it possible for them to produce quality fruit.

* * *

No. 1 strong strawberry plants are, of course, the only kind most nurserymen handle. Senator Dunlap, Aroma, Doctor Burrill, Warfield and Bubach are good varieties for the home garden.

* * *

Given time to consider, every fruit-grower will agree that fruit-growing would quickly come to a standstill without new varieties. Breeding new fruits is work for state or philanthropic institutions rather than a business venture for an individual.

Importance of Women as Bank Depositors

For more than a century and a half the savings bank has been conducted by men and largely for men. Lately many of the conservative directors of savings banks in the United States awoke to the fact that more than half of the depositors in these institutions are women.

Up to that time, only half a decade ago, little or nothing had been done to cater to the growing army of women patrons. Even today only a small percentage of our savings bank officials know the relative proportions of their male and female depositors. The officials of one of the largest savings banks in this country, having 200,000 depositors, recently learned that 75 per cent of their accounts are handled by women, either in their own right or for some other member of the family.—Thrift Magazine.

Early to Bed Had No Charm for "Uncle Joe"

Senator James E. Watson, who is an inimitable story-teller himself, has an almost inexhaustible collection of tales concerning Joseph Cannon, speaker of the house of representatives for so many years.

One time, said Senator Watson, he was with Uncle Joe, as Cannon was affectionately known, in New York and after a meeting they strolled out in the street with a group of newspaper men. The senator said they walked until long after midnight, but that Uncle Joe insisted on walking some more. Finally one of the newspaper men asked:

"Uncle Joe, what is the greatest problem of your life?"

"Trying to find something to do between midnight and bedtime," was the reply.

Danger in the Home

Staying at home is more dangerous than walking in a great city, according to statistics published in England covering seven months.

Fifteen motor car fatalities were reported during the period, but there were 32 fatal accidents in homes These figures are not exceptional, but conform to those for last year.

The reason for these apparent paradoxes, says Tit-Bits, is that there are always more aged and infirm at home than in the streets, and these form the great majority of indoor casualties.

Most of the deaths at home, says the report, were caused by the victim falling downstairs.

His Excuse

"What is coming off?" asked a stranger in Petunia. "I just saw an old fellow come rushing around a corner, run to the fire bell and ring it like mad. What do you suppose was the matter with him?"

"That was old Bill Bachelor," replied Constable Slackputter. "Somebody told me the Widder Huggins, who wants to talk all the time about her late husband, cornered Bill and proposed to him. I reckon that was excuse enough for his actions."—Kansas City Star.

Turkish Plans Failed

Discovery of a road winding through the arid waste of northern Arabia is a grim reminder of the danger that threatened the Suez canal during the war. The roadway was built secretly by the Turks as part of their ambitious plan to capture the canal. Fortunately, the stratagem was discovered. The existence of the road was forgotten until three French motorists rediscovered it recently.

If Only—

Our faith in political prophets, which amounts practically to zero, would be increased if only they had sufficient faith in their predictions to advise pasting them in the hat.—St. Louis Post-Dispatch.

MONARCH
QUALITY FOOD PRODUCTS

set the standard. If you paid a dollar a pound you could not buy better food products than those you find packed under the *Monarch* label.

Died Near His Charge

When the curfew bell, rung for many years at Berdick-on-Tweed, did not sound as usual and the town clock stopped, people were surprised. Investigation of the unusual happenings led to the discovery of the master bellringer hanging dead in the bell loft.—London Mail.

Water in Fog

Scientists who measured the amount of water in a dense fog found that a block of fog 3 feet wide, 0 feet high and 100 feet long contained less than one-seventh of a glass of water, but this was sufficient to make 00,000,000,000 drops.

Implanted Desire

The majority of authorities consider hunger as instinct.

THERE is *nothing* quite like Bayer Aspirin for all sorts of aches and pains, but be sure it *is* genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

For County Treasurer

A. C. Halverson

To The Voters Of Hancock County:—

Ladies and Gentlemen:- I earnestly solicit your support and vote for the Republican Nomination to the office of County Treasurer.

My qualifications and character are vouched for by all who know me. My parents were pioneer settlers in this county. I was born and raised in this county. Iam interested in the welfare of the taxpayers of Hancock County. I believe in the old rule of limited terms to county offices when candidates otherwise are equal. The present treasurer has held the office of Sheriff for six years. He has held the office of Treasurer for eight years, and is now a candidate for a continued term. I believee you will agree that I am not intruding when I am.a candidate for the first time.

Thanking you for your kind consideration, I solicit your support.

Respectfully,

A. C. Halverson

Soy Beans Chick Feeds

HANCOCK COUNTY PAGEANT JUNE 15-16

BIG HISTORICAL SPECTACLE AT BRITT, JUNE 15 AND 16

Hancock Co. History Play To Be Presented By Fair Association

On the evenings of June 15 and 16, the residents of Hancock County will be entertained on a scale never before attempted in this county.

An Historic Pageant of Hancock County, covering the history of the county from the day when it was an Indian hunting ground down to and through World War days, will be enacted by residents of the city and county.

Entertaining And Instructive

The Pageant, which will be unlike any kind of entertainment ever presented here as well as on a much greater scale. is on good authority considered to be the finest kind of entertainment obtainable. Instructive yet not boresome; beautiful and thrilling yet with some meaning; it has great appeal to every type. Presented in an outdoor setting of great beauty at night, under specially blended lighting effects, with each character dressed in a specially designed costume, it forms a picture that will be remembered by everyone who sees it.

Professional Direction Secured

To insure the smooth and successful presentation of the Pageant, the Fair Board has arranged for the services of the Thurston Management, Inc., of Chicago and Minneapolis. This company has produced practically all the large and successful pageants given in the Northwest during the last ten years A large and specially costume, stage and lighting equipmentment will be used.

Preparations are being made to accomodate the large crowds expected on the two evenings of the pageant.

"ABE" LAURITSEN MARRIED AT LEHIGH, IOWA, SUNDAY

Miss Ada Friday Becomes Bride Of Popular Renwick Coach

On Sunday, June 4th, at Lehigh, Iowa, occured the marriage of Miss Ada Friday, of Renwick, to Mr. Adolph Lauritsen, high school instructor and athletic coach of the Renwick schools.

The ceremony took place at the home of the Bride's sister, Mr and Mrs. John Kelling and was attended only by the immediate relatives of the contracting parties. The ceremony was performed by Rev. Albertson, father of Mrs. E G Gary, who resided in Klemme about a year ago.

Tnose who were present at the wedding which took place at 1:00 o'clock, were Mr. and Mrs. Einar Salling, of Klemme, and Mr. and Mrs. Pooley and baby of Algona.

Following the marriage rites a bouteous wedding dinner was served. At 4.00 o'clock the Bride and Groom left on a wedding trip thru Waterloo, Rockford and Chicago, Ill, and which would terminate at Sheboygan, Wisconsin, where the happy couple will spend the summer.

The Bride is a graduate of the Renwick high school and is an accomplished young lady of a pleasing disposition and who possesses all the qualities for making the man of her choice a real companion.

"Abe," as we know him best, is a Klemme boy; a son of Mr and Mrs Einar Sailing of Klemme He attended the Klemme schools, graduating from the Garner high school and took two years of work in the Upper Iowa University at Fayette He then taught in the Renwick high school and coached ahletics three years and is highly recommended and was re-elected for another year, but declined in order to continue his college studies before entering school work again.

"Abe" is also a graduate of The Times Print Shop and during his employment here we found him to be upright, manly, honest and dependable.

After spending the summer in the fair state of Wisconsin, Mr. and Mrs Lauritsen will move to Fayette.

The Times joins with their many friends in offering congratulations and best wishes.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

The well attended services of last Sunday were enjoyed by all present. Dr. Notson preached sermons that had a true ring.

Next Sunday is Children's Day This links us up with the great educational interest of the country and especially with Christian education This will be the predominating note in our services or programs. Liberty is preparing a very good program including a cantata. This should command.

Klemme will have a varied program of song, speech, and music In both instances we will have a Baptismal service and reception of members by transfer or on confession of faith. All interested will kindly take note of this.

The Epworth League had its election of officers for the ensuing year. A fine time was enjoyed in the social hour following the election. Indications are for a successful year ahead.

The E. L. members are urged to plan for the convention to be held in Emmetsburg June 13-14 We should have several auto loads.

Our Bible schools are ging well with room for additional scholars.

CAMP FIRE GIRLS ENJOY SKATING AT LAKE CORNELIA

Being Instructed In The Art Of Marching By Ben Coobs

The Ta Ta Pochon Camp Fire Girls held a meeting Monday, June 4th at the City Park. Ben Coobs gave them instructions in marching.

During their meeting they all decided to go to Lake Cornelia to the Waller Skating Rink on Tuesday night. Buck Kluckhohn, Art Gimer and Marie Blank furnished cars and everyone of the girls had a fine time.

OFFICES WHICH WERE NOT OPPOSED

There were several offices in Hancock County which had no opposition. These we did no tabulate in the above column.

C H Nelson for Represent tive received 2621 votes Chris Johansen, candidate for re-nomination for Clerk of the District Court gathered in 2791 votes Mrs. Fenn Peck Katter, a candidate for a second term as Recorder was awarded 3098 votes at the Primary F W Zeiger was again assured the job of Coroner with 2547 votes.

HAMMILL NOMINATED FOR GOVERNOR

Governor John Hammill, of Britt was nominated again for Governor with around 100,000 votes, with Bowman in second place Hammill carried his home county by a very good margin, receiving 1704 votes, an d his opponents receiving as follows Bowman 891, Skromme 590 and Anderson 281.

BIG BATTLE ON SENATOR

Clarence Knutson of Clear Lake, E. W. Clark of Mason City and R M Hall of Clear Lake ("who also ran") provided the real entertainment in political battles in this district, composed of Hancock, Cerro Gordo and Franklin counties The battle was between Clark and Knutson, with the outcome that Clark was nominated in the district. However Knutson carried Hancock and Franklin Hall finished a poor third. In Hancock County Knutson received 1509 votes; Clark 1031 and Hall 653

On the local township ticket John H Steeman received 101 votes for constable and Chas F Busch received 85. H. L. Suckow was nominated for Justice of the Peace

There were 241 ballots cast in Ell Township. The vote was rather light, perhaps due to the good weather which encouraged farmers to remain in their fields.

FIRE DAMAGED SMOCK HOME WEDNESDAY EVENING

Water And Smoke Damage House And Furniture

About 5:50 p m yesterday fire was discovered at the Smock residence in Klemme when Mrs. Smock opened a closet door and flames shot out and quickly spread about the house.

Mrs. Smock was preparing the evening meal at the time. She was burned about the neck and back and her hair singed when the flames shot out from the closet. The fire company answered the alarm immediately and found the flames had crept up the walls making it necessary to puncture the roof and shoot water in the house from above. Much of the furniture and household utensils were greatly damaged by smoke and water. The interior of the house will need replastering and refinishing to put it back in shape.

Grandma Schroeder, Mrs. Croner and daughter Dorothy, and Mrs. Lena Schroeder and daughter, Adella, drove to Mason City Friday Mrs. Henry Barz returned home with them.

Mr. and Mrs. P. M. Wilson entertained Thursday, Mr. and Mrs. Leland Sanders of Mason City. And on Friday Harry Huntley and family of Clarion.

Louie Knoke's mother is in the Lutheran hospital at Hampton where she underwent an operation. She was not so well the latter part of the week when Louie and his wife were over.

SEVEN NEW SCHOOL HOUSES BEING BUILT THIS YEAR

Three Hancock County Schools Are To Be Of Brick Material

Hancock County is forging ahead in the matter of rural school education and the past few years have marked the building of a large number of new school houses in the rural districts.

This year seven new school houses are to be built in Hancock County rural districts.

Three new school houses, all of frame construction are to be built in Avery Township. One in District No. 2, of which Fred Bachman is the director; another in District No. 6, of which H. C. Barger is the director; and the third in District No. 8.

Twin Lake District No. 9, M. A. Oustad, director, will build a new brick school house.

Liberty Township, District No. 6 will construct another brick school patterned after the one known as the Stille School. W. L. Haberkapm is he director of this district.

Garfield, District No. 6, will also build a new brick school house. Albert Abele is the director.

Erin, District No. 2 will build a new frame school house this summer. Fred Hunsley is the director there.

Concord Township has voted to build three new schools. The new buildings will be built next year.

Harold Gruetzmacher and family returned to their home at Tekamah, Nebr. after visiting relatives here and at Iowa Falls for two weeks. They left here Sunday as Harold had a band concert Monday night.

KLEMME CREAMERY IS VERY BUSY PLACE NOW

Annual Big Rush Of Business Is At Its Highest At Plant

That the local Creamery had the foresight early in the spring to install additional machinery and new equipment now stands them in a good way as the early summer rush of business begins to swamp the plant.

At the suggestion of A. D. Gimer, buttermaker, and acting on his recommendation, the Board, early in the spring, purchased another big vat and some other necessary equipment. At this time the creamery has four large cooling vats for cream and they are taxed to full capacity every day now, and usually a run is left over awaiting its turn to cool. Had not this equipment been added the plan would be literally swamped with work However, business is picking up so brisk that even the present equipment is none too much for the May and June rush In a normal run it handles the business perfectly.

The past year a new refrigerating plant of six tons capacity has been installed. A new centrifugal water pump was more recently added The cream is run into the four vats and cooled down to 60 degrees with water. From that point the electric refrigeraing plant is used and brine runs the temperature to 7 dogrees when it is then churned. This process greatly speeds up the work.

Salling Champion Hauler

In point of service. Einar Salling is the oldest man on the job among the five cream haulers. He has developed some large routes and brings in the "champion" load of 44 cans of cream three times a week from one of his routes. Mr. Salling is therefore the high man of the truck drivers However, the other four haulers have developed some fine routes which they are increasing right along, and all the men are hustlers.

The success of the creamery is largely due to the splendid farmers we have in this comunity, who are experts in the dairy business, and who are interested in the welfare of the creamery Without them, and their loyalty to the creamery, the institution would not be a success and would not be classed as one of the biggest creameries in North Iowa.

SHERIFF'S SALE

County Savings Bank

vs.

D. E. Keat and Evaline Ellis Keat.

NOTICE IS HEREBY GIVEN, That by virtue of a General Execution Issued out of the office of the Clerk of the District Court, in Kossuth County on a judgment rendered January 25th, 1927 Term of said Court, A. D 1927 for the sum of Ten Thousand Three Hundred Forty Two & 69-100 Dollars debt, and Three Hundred Twenty Seven & 61-100 Dollars costs, in favor of County Savings Bank and against D E Keat & Evaline Ellis Keat and to the Sheriff of Hancock County directed, I have levied upon the following described property, to-witt:

The North Half (N½), Section Eleven (11), Township Ninety-Six (96), North Range Twenty Six (26) Hancock County, Iowa.

NOW, THEREFORE, Public Notice is hereby given that I shall, on the 14 day of June 1928, at 10:10 o'clock A. M., at the front door of the Court House, in Garner, in Hancock County, offer and sell at public outcry, to the highest bidder for cash, all the right, title and interest that the above named Defendants had on the 25th day of January A D. 1927, or now have in and to the above described property, or so much thereof as is necessary to satisfy said execution together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 15 day of May, A. D. 1928.

E. P. HANSON,
Sheriff of Hancock County, Iowa.
(Pub. May 31, June 7, 1928)

Frank Gibbs has been assisting in the J. N. Day store the past few days.

COW TESTER GIVES MONTHLY REPORT

COOK HAS HIGH HERD IN GARNER-KLEMME ASSOCIATION

Neiderfrank Gives Some Hints On Summer Feeding In Report

Three hundred ninety-three cows were on test in the 26 herds tested for May in the Garner-Klemme Association. 43 cows produced over 40 pounds fat. 3 cows sold for beef. The Association average based on the 393 cows on test, 356 being in milk and 37 dry:-

Average milk .. 683 lbs.
Average fat . . . . .. 25.6 lbs.

A great danger this time of the year is to depend too much on pasture alone. This year pastures are good and with feed high in price are should also be taken not to overfeed The better the care given the cow during the hot dry weather, shows it elf in the production the following winter.

The highest average for herds was made by the P. B. and G. H. herd owned by V. A. Cook, of Goodell. 15 cows in milk and one dry made an average of 1107 lbs. milk, 39.37 lbs. fat.

Emil Blumer Placed Second

Six G. S. and H. owned by Emil Blumer, all cows in milk, made an average of 1016 lbs. milk and 36.28 lbs. fat.

Ten P B. H owned by Emil Beier all cows in milk, made an average of 1030 lbs. milk and 32.91 lbs. of fat.

The mixed herd owned by H. L. Carpenter, of Garner, 11 cows in milk and 1 dry, made an average of 827 lbs. of milk and 31 59 lbs. fat.

The 18 mixed cows owned by Lee Hammond, of Garner, all cows in milk, made an average of 863 lbs. of milk and 32.01 lbs. of fat.

BIG HITCH DEMONSTRATION AT FARM BUREAU PICNIC

Annual Picnic Will Be Held June 15 At Eagle Lake State Park

Arrangements have been made with Mr. H. D. Linn of the Iowa Horse and Mule Breeders Association to put on a big hitch demonstration and horse breaking demonstration at he Farm Bureau Picnic, June 15h.

Mr Linn is an expert along this line. He will demonstrate the hitches best to be used where big horse power is needed. His horse breaking and hitch demonstrations have been given in a number of places. Mr. Linn is considered one of the best in the country in this line

A great deal of interest is being shown in this work and no doubt a great many of the Hacnock County Farmers will be present to see this demonstration. It will be put on in the forenoon beginning at 10:00 o'clock.

MARRIAGE LICENSES ISSUED BY CLERK OF COURTS

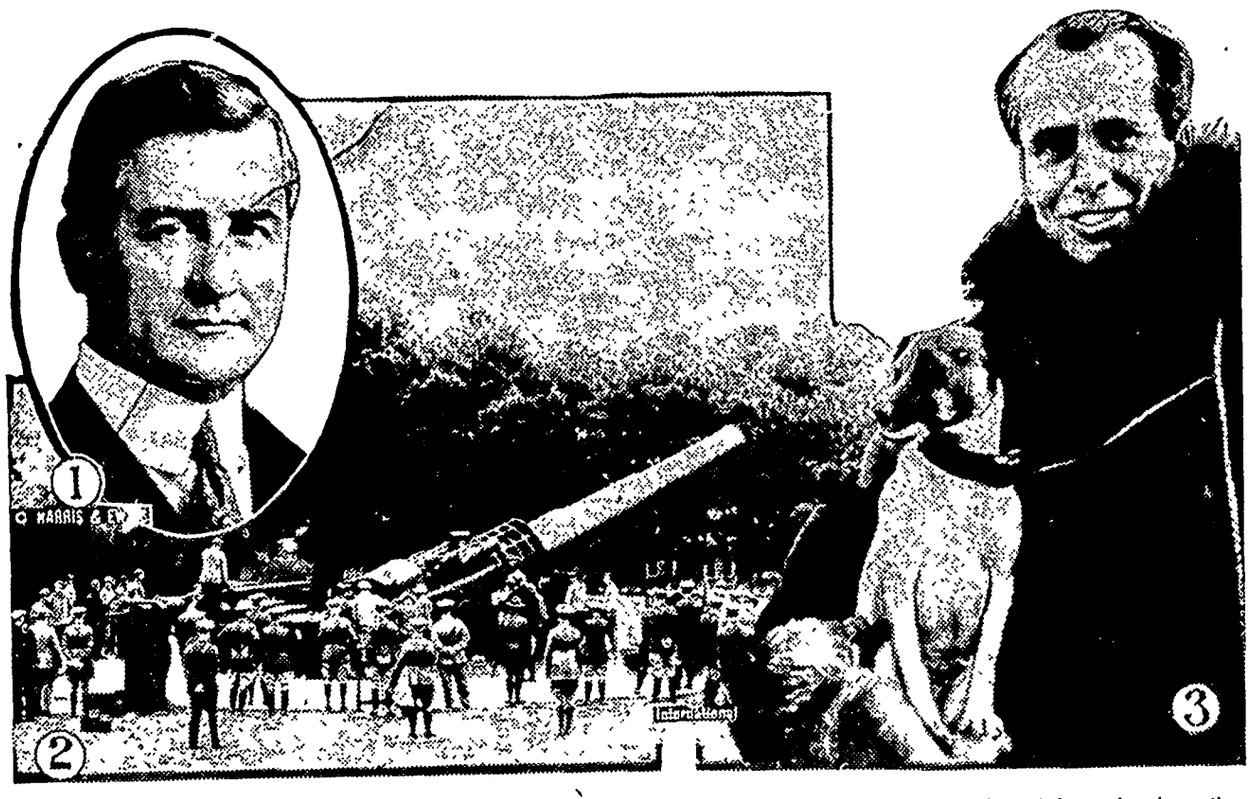
"Month Of Weddings" Gets Off On Good Start

Chris Johansen, Clerk of the District Court reports that the month of June has all the ear marks of living up to its reputation of being the biggest month of the year for marriages. June 2nd he issued one license and on June 4th two couples were granted a permit.

On June 2nd a license was granted to Walter Clearhout, Humboldt, and Florence Paine, Nora Springs.

June 4th licenses were granted to Frank D. Fisher, Crystal Lake and Ella Kohlstorf, Britt; and to Carl Gilbertson, Minneapolis and Eva Holmes, Britt.

Walter Blumer is the owner of a new Whippet Sedan, purchased of Ludeke & Houdek.



1—New portrait of Jesse H. Jones, whom Texas may support for the Democratic Presidential nomination. 2—Sixteen-inch howitzer which, in coast defense maneuvers at Fort Storey, Va., hurled 2,100-pound projectiles ten miles out over the Atlantic. 3—Gen. Umberto Nobile, commander of dirigible Italia, with his mascot "Titania."

NEWS REVIEW OF CURRENT EVENTS

Congress Adjourns, Leaving Boulder Dam Unsettled—Notes of Politics.

By EDWARD W. PICKARD

WITH a row in the senate that almost amounted to a riot, the first session of the Seventieth congress came to an end. The quarrel was an incident of the insistent efforts of Senator Johnson of California and others to get action on the Boulder dam bill. Senators Ashurst and Hayden, with the help of Senator Blease, had conducted a successful filibuster for many hours and when the senate by a vote of 40 to 35 adopted a resolution for adjournment Johnson admitted defeat. "I have made the best fight of which I have been capable," he said. "I have been whipped; but, by Heaven, gentlemen, there is another day, and somebody else may be whipped on that day."

As a matter of fact, Johnson won to a certain extent, for the Boulder dam measure remained before the senate as unfinished business and as such will have the right of way when congress meets in December.

One most important bill failed of passage because of the filibuster. This was the administration naval construction measure authorizing the building of fifteen 10,000 ton cruisers and one aircraft carrier. The army bill empowering the secretary of war to place educational munition orders with arms manufacturers also went by the board. So both the navy and the army authorities are feeling rather sad. Two other big bills that were left stranded were the railroad consolidation bill, which was on the house calendar, and the Shipstead anti-injunction bill.

Among the thousand bills passed by congress in this session were the tax reduction bill, the flood control measure, the bill settling the alien property problem, that for development of the merchant marine, and the bill for utilization of the plants at Muscle Shoals, which last named was expected to meet a "pocket veto" by the President. Other measures enacted provide for the extension of the Mississippi barge line to its tributaries, reduce postal rates, renew federal aid road appropriations for two additional years, and authorize a comprehensive forestry research program.

President Coolidge vetoed thirteen bills, chief of them being the McNary-Haugen farm relief measure. Three bills were passed over the President's veto. One of these provided for the retirement of disabled emergency army officers, another increased pay of postal employees assigned to night work and the third increased allowances for fourth-class postmasters.

IF THE leaders of the Middle West farmers can bring it about, there will be a great demonstration by agriculturists of that region at the Republican convention in Kansas City, for the purpose of forcing the party to recognize the claims of the farmers in its platform. A committee of representatives from fourteen states has been named to go there and impress on the convention that the "corn belt uprising" is more than talk and represents a serious peril to the Republican prospects in November. The promoters of this movement are nearly all supportors of Lowden, Watson or Curtis, and they are headed by M. J. Tobin of Vinton, Iowa. Talk continued of having thousands of farmers march on the convention, but the fact that real agriculturists are mighty busy with their harvesting at this time led to the belief that there would be more farm politicians than farmers in the proposed demonstration.

Naturally the Democrats were taking advantage of the situation, and Jesse Jones issued an invitation to the farmers to bring their troubles to the Houston convention. "We invite them to Houston to help write that platform (farm relief), and we will invite them to Washington to help pass the legislation that affects them," he said. "Fortunately there is a better remedy than mere revolt—namely: a fresh allegiance to the Democratic party, which is the party of the people, not of the privileged class. Marching on the Republican convention at Kansas City will be of no avail."

Democratic platform builders realize that the party declaration on farm relief now overshadows in importance that on prohibition, and the party leaders are also considering the advisability of selecting a middle westerner to be running mate with Al Smith. Among the men talked of for this honor are Gilbert Hitchcock of Nebraska, Governor Bulow of South Dakota, Senator Hawes of Missouri and Senator Kendrick of Wyoming.

JUST before it adjourned the house of representatives decided that it should investigate Presidential and congressional campaign expenditures and a committee of five was appointed and given $20,000 to conduct the inquiry. The probers named are Leilbach of New Jersey, Newton of Minnesota and Nelson of Maine, Republicans; and Ragon of Arkansas and Black of New York, Democrats. The three Republicans are credited with being pro-Hoover and some senators thought the appointment of the committee was a move to help the secretary of commerce in his campaign. This was indignantly denied by Chairman Leilbach, who said he would not tolerate any favoritism in the inquiry.

THROUGHOUT the week earnest efforts were made to find General Nobile and his crew and the Italia which disappeared in the Arctic wastes on the way back to Spitzbergen, after sending out an SOS call by radio. The base ship Citta di Milano made short searching trips from King's Bay, and landed two parties of Italian Alpine chasseurs along the north coast of Spitzbergen. The weather was extremely unfavorable for the search. Meanwhile Lieut. Luetzow Holm, Norwegian flyer, was on his way to Spitzbergen with a naval hydroplane for the purpose of making an aerial hunt for the missing explorers; and other relief expeditions were in preparation.

Disaster overtook the national elimination balloon race which started from Pittsburgh, Pa. Soon after the fourteen big bags took the air a terrific storm arose which beat down all but three of the entries. Paul Evert was killed when lightning struck the army balloon No. 3, and Walter Morton, aid on the Goodyear V, jumped to his death when a bolt hit that bag. W. T. Van Orman, pilot of the Goodyear V, made a parachute leap and suffered a broken leg.

CHINESE Nationalists captured the important city of Paotingfu in their progress toward Peking, and on Thursday Marshal Chang Tso-lin ordered his troops on the Peking-Hankow railroad to fall back to Liulho, only twenty miles southwest of the capital. At Chang's headquarters it was asserted that the Northerners had not been defeated and that the retirement was due to the defection of the Eighth corps. Information reaching Tokyo was that Chang had decided to withdraw from Peking and that part of his troops already were moving to Mukden, Manchuria. The Japanese believed the Southerners would occupy Peking very soon and that peace would then be restored because, they thought, the Nationalists would not go north beyond the Great Wall. Earlier in the week the Japanese Admiral Mudaida issued an order to both sides forbidding any naval engagement within twenty miles of specified northern China ports.

That the Nationalist government intends to retain Nanking as the capital even after Peking is taken was indicated when its political council voted to create a branch of the council at Peking. This is in accord with the known wishes of the late Dr Sun Yat-sen, but does not please the northern elements of the Nationalist party.

SERIOUS anti-Italian outbreaks occurred in Yugo-Slavia because the government was insisting on ratification of the Nettune treaty giving Italians the right to own land in Dalmatia within thirty miles of the Adriatic. This pact, in the opinion of its opponents, means that Italy would eventually control the entire Dalmation coast. The Serb police did their best to suppress the rioters, but much blood was shed and Mussolini and the Italian flag were grossly insulted. The Italians in Italian Dalmatia were not backward in retaliation, especially in Zaro where the Serb consul was beaten severely. The Italian minister at Belgrade was instructed to present a note to the Yugo-Slav government "requesting urgent satisfaction" for the attacks on Italians.

BY ORDER of Smetona and Waldemaras, dictators of Lithuania, that country has been given a new constitution, the French parliamentary system being radically changed. The President is to be elected for seven years instead of three, and parliament and the President are empowered to edit laws, confirm the budget and make international treaties. The cabinet is responsible to parliament but is obliged to resign only after a three-fifths negative vote, which also is necessary to amend the constitution. Until now, a majority vote was sufficient to oust the cabinet. The constitution also declares that Vilna is the capital of Lithuania. Vilna is now held by Poland.

MUSSOLINI is going steadily forward with his establishing of Italy's claims as the chief Mediterranean power. Last week he and Fuad Bey signed the treaty of conciliation, arbitration and neutrality between Italy and Turkey, and just before that a conference of the powers in Paris conceded Italy's claims to participation on an equal basis in the government of Tangier. The treaty with Turkey, which was strongly opposed by Moscow, is expected to give Italy important commercial advantages in the Near East; and Turkey is freed from fears of Italian aggression on the coast of Anatolia.

PRESIDENT COOLIDGE, following custom, delivered the Memorial day address on the Gettysburg battlefield before 25,000 persons gathered in the national cemetery there. Standing near the spot where President Lincoln made the immortal address 65 years ago, Mr. Coolidge uttered an earnest plea for the outlawing of war, warmly indorsing the proposals on that line made by Secretary of State Kellogg to the great powers. Though not decrying measures for national protection, and upholding what has been done and is being done by our armed forces in Haiti, Nicaragua and China, the President developed at considerable length his theory that his economic policies are more productive of preparedness for war than is the provision of large armaments. He expressed satisfaction in the fact that the United States always has been preparing, not for war, but for peace. In discussing government he took a slap at congress and its passage of the McNary-Haugen farm bill.

"The chief temptations to go beyond the bounds which the people have set arise in legislatures," the President said. "In their desire to take some action which they conceive to be in the public interest, they oftentimes manifest a disposition to exceed their constitutional authority. Such action is a larceny of power. Responsibility for it cannot be evaded by the weak plea to let the law be passed and the courts can decide its constitutionality."

Returning to Washington, Mr. Coolidge as president of the American Red Cross, laid the corner stone of that organization's new building dedicated to the sacrifices and services of American women in the World war. Chief Justice Taft presided at the ceremony and Secretary of War Davis accepted the memorial on behalf of the nation.

MERGER last week of the Dodge Brothers, Inc., and the Chrysler corporation created another huge corporation in the automobile field. The new combination has a present market valuation of about $450,000,000, and this is said to be but one step in the expansion program of Walter P. Chrysler.

CEDAR ISLAND lodge, on the Brule river 39 miles from Superior, Wis., has been selected by President Coolidge as the summer White House. The estate was offered him by the heirs of the late Henry Clay Pierce. It comprises several thousand acres, but the lodge is on a very small island close to the mainland.

AUTO LIGHTS AID TO NIGHT SAFETY

Many Motorists Willfully Disregard Legal Requirements of State.

Among the worst dangers threatening the motorists who drive at night is the lack of lights on vehicles. Carelessness, neglect and indifference are making night driving dangerous. The willful disregard by many motorists of the legal requirements for lights on automobiles is an open invitation to accidents. Outside the cities apparently little effort is made to enforce the provisions of the state traffic law concerning them.

Travelers Invited.

Minnesota boasts of its beautiful lakes, fields aud forests, proclaims its fine highways, invites travelers to come, provides recreation spots, summer resorts and camp sites for their pleasure and then by negligence exposes both its own citizens and its automobile visitors to accident and injury if they drive on the highways at night.

So far as automobiles are concerned, the uniform traffic law adopted by the legislature a year ago is specific in its lighting requirements. Two headlights, not dazzling but strong enough to illuminate the road 200 feet ahead, are required. Every automobile must have a tail light visible 500 feet from the rear.

No provision in the law is more essential. An automobile lacking a tail light is particularly dangerous. The most careful motorist cannot protect himself against smashing headlong into some blunderer who is ambling slowly along with no rear light to warn an approaching motorist, or has parked in the road to change a tire.

Law Is Defective.

The law itself is defective. It requires night lights on automobiles, motorcycles, trailers, even bicycles. But because some members of the legislature were more solicitous for the convenience than for the safety of passengers on horse-drawn vehicles, such vehicles were uot included in the general provisions concerning lighting. The unlighted wagon or buggy is as difficult to see on the road at night as an automobile. Yet it can be driven anywhere without lights, front or rear. The legislature overlooked the fact that parking regulations in the uniform traffic code cover all vehicles, not merely motor vehicles. The lighting exception therefore does not extend to horse-drawn vehicles that are standing still. It is absurd but it is true that unlighted hayracks, buggies and wagons may be driven lawfully without any light whatsoever on the highways of this state, but once they have ceased moving, the law demands a light.

Defective as they are, the automomobile lighting regulations are not enforced. Enforcement is left to local police authorities. They are not on the job. Cars with one headlight, cars without tail lights, even cars with no lights at all, are encountered on the most heavily traveled highways in the state. Minnesota needs a state highway patrol force to effectuate these elementary rules.—St. Paul Dispatch.

Early Overhauling Car in the Spring Favored

Car owners who recognize the wisdom of the modified form of spring overhauling which now prevails should know the advantage of getting into the shop early. Usually, just before the opening of good weather, there is a great rush for this type of work and the service and repair shops are crowded.

The car taken in early is assured of the type of service which results from giving the mechanic plenty of time. When the open road calls, it is an excellent iden to have the car ready to give a satisfactory answer.

Proper Type Spark Plug Is Important

Stressing the importance of using the correct type of spark plug, H. Rabezzana, research engineer, says nearly all spark plug sooting trouble can be traced to one of these causes: Wrong plug used. Motor operating at very low temperature. Long runs with carburetor choked, or partly choked. Very rich caburetor mixture. Oil pumping.

Weather driving conditions when motor is run only short distances and never attains an operating temperature high enough to burn oil and soot before it carbonizes.

Sooting and oiling trouble can often be overcome by checking and correcting conditions indicated above.

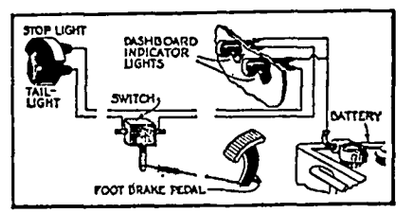
It is of first importance that the correct plug be used because a plug having insulation that is too short on the lower end will foul quickly. This is because the short insulator will not get hot enough to burn off soot and oil before carbonization takes place.

Mr. Rabezzana added that as motorists change their spark plugs after 10,000 miles, they should be sure that the proper type of plug is installed.

Dash Indicator Lights Are a Big Convenience

Indicator lights fitted on your dash will tell you whether your tail and stop lights are properly burning The wiring diagram shows how to fit and wire the indicator lights.

You can use ordinary dash lights of the type sold for automobile use, or you can get a pair of the jeweled indicator lights sold for radio use. The latter, fitted with jewels of the same



Indicator lights on your dash board wired as shown may save you from being arrested and fined for not having tail-light lit.

color as the lights they indicate, will make a neat and attractive installation. The theory, of course, is that the indicator light is in series with the light it indicates and when either of the two bulbs in such a circuit burns out, the remaining goes out as well. Instead of 6-8 volt bulbs [illegible] 3½ volt bulbs.—Popular Science Monthly.

AUTOMOBILE HINTS

The entire chassis of a car can now be lubricated for a small sum.

* * *

A nut or bolt is useless to the automobile if not kept fully tightened at all times.

* * *

When the car suddenly begins to steer hard, lack of lubrication is the first thing to suggest itself.

* * *

Signals are essential to motoring safety. Don't close all the windows of the car during wet or cold weather.

* * *

When warm weather arrives it is a good idea, and usually a money-saver, to have the spark plugs changed, the battery tested, and the ignition and lighting system checked.

* * *

Watch the upper radiator hose connection. It gives out first because it carries hotter water than the lower hose connection and hotter water is more destructive in its effects on hose lining.

* * *

The Georgia Supreme court holds that a husband cannot be held liable for damages resulting from his wife's auto driving. This does not absolve him when she drives from the back seat.

RADIO MUSIC SERVED WITH TAXI RIDE

The photograph shows the musical taxi of Frank Cowan, of Caldwell, N. J., who got the bright idea that it is just as well to serve music with a taxi ride as with a meal in a restaurant. So he installed a radio set in his cab, so located that the passenger can tune in on his favorite station. The musical taxi has been a great success.

An Evening With the Spirits

By RING LARDNER

To the Editor:

The other P. M. they was a bunch of us up in Yonkers talking about what terrible spirits you get around N. Y. now days and 1 of the birds in the party name Herb says he knew where they was some beautiful spirits and we said lead us to it and he took us down to 58 st. and 5 ave. and they was a doctor's name on the door and I said to myself this guy will probably give us a prescription that will knock us for a goal. But the doc took us in a inside room and introduced us to a lady whom they all call Medie witch I learn was short for Medium so you see the kind of spirits we got and the kind we thought we was going to get was 2 different kinds of spirits. Medie was a Medium rare blonde lady that could of lose 30 or 40 pounds and still talk back to Gene Tunney.

Well, pretty soon Medie and the doc and our party went into still another room yet where they was about 20 other guests mostly female that looked like the end of a perfect wash day. A alma mater of Oberlin colloge ast me to look at a kind of a close line that was stretched acrost the room and on it was a bunch of toys such as dolls and cooties and etc. witch Medie had told her wus for the baby spirits to play with when they got cross.

We was all put around in a circle like Yale learning their signals in the 4th quarter. I set next to Jack and his Mrs. from Yonkers and the rest of we skeptics was scattered around amidst the believers.

"Is there somebody here name it" says Medie so I says yes it was me. "This is Edward" says the spirit and Medie ast me if I had a brother Edward and I says yes. So Medie says "This is your brother Edward that was killed in a accident a long wile ago wasn't he?" So I says yes 3 yrs. ago. Then Edward said Hello there and I said hello Edward how are you and he said hello there and I couldn't refute it so he left the field with the last word and give his megaphone to a Irish comedian.

"Oh, here's Pat O'Brien" says the doc. "He is a funny Irishman that is with us every night, get his brogue."

So then Pat told a Irish story that died even longer ago than Edward, but you don't feel like razzing the spirit so everybody laughed the right amount.

Before the darkness had fell I had noticed a bird setting over to the left of me that was a countryman of Nora Holmer and now all of a sudden a spirit spoke to him in Norski and he answered back in the same strain and I never understood Norway before but as soon as these birds begin to talk I knew they was saying hello Knut hello there and etc. Pretty soon Medie turned to the live ski jumper and told him his mother was going to die. "She was all right the last time I seen her" says Ellert. "Well she is going to die" says Medie and personly I think she was right as Ellert was around 45 yrs. old and when a man gets that age their mother is seldom never trying out for the Vassar basket ball team.

"Here's a beautiful spirit, who does he want" says Medie next. "He says dear boy."

"Lots of people call me that" says Herb the guy that had broughten up there at $2.00 a crack.

"Yes it is your father and he says he was on the river once in a boat when he was a little boy and was saved from drowning and he says something about a dog. Did a dog ever swim out and save your father from drowning?"

"Well no" says Herb after a terrible pause. "But a dog barked aud roused up the neighbors and they come to the rescue."

"There that's evidential" says the doc and several female voices say wonderful.

"Shish" says Medie "is there some one here that lost their wife?"

"I did" says Jack from Yonkers.

"Hello sweetheart" says the spirit.

"Hello Kate" says Jack.

"Hello sweetheart" says the spirit.

"She must of forgot my name" says Jack in my ear.

"She is a beautiful spirit" says Medie.

A long about this time I got restless for a smoke and begin rattling cigarette paper and a new spirit whanged me on the knee cap with a megaphone and says what have you got there.

"That's Bright Eyes talking" says Medie. "She wants to know what you have got."

"Tell her I got a sore knee" I says.

"Be serious" says Bright Eyes.

Well they was a lot more of them that give us all the latest news from Over There like hello dear and hello there and hello mumma and finally Medie came to and turned up the lights and we all shoved off to 58 st.

"Well" says Herb. "Did you have a brother that got killed 3 yrs. ago?"

"No" I says "But I know a man that has a brother Edward that ought to have been killed 3 yrs. ago but what about that dog story?"

"Well" he says "Part of it is true. We use to have a dog once and he used to bark."

Then Mrs. Jack from Yonkers hailed Jack out and we all thanked Herb for taking us to where they was nothing but beautiful spirits and he says if you want the bad kind you can go to Medie evil.

TOMMIE SHOT 'EM STRAIGHT

(© by D. J. Walsh.)

THE occasion of Mr. Amos Abernathy's visit to the Dunkirk Protestant orphan asylum was a momentous one. It had been announced by Miss Smithers to the group of small people sitting in a semicircle about her.

"It means, children, that one of you will have a home—for life! Mr. Abernathy is very wealthy . . . and no children. They are going to adopt one—I do not know whether it will be boy or girl—but I rather anticipate," and she looked down at the yellow curls of small Josie, the pet of the institution. "I anticipate it will be a girl. You see they have such beautiful things in their house, boys would ruin them! Now we are going to be dressed in our Sunday clothes and we are going to sit real pleasant and when Mr. Abernathy speaks we must say 'yes, sir,' very politely. And one of you will be chosen to live in his beautiful home—"

"I ain't. I'm going in the thircus," lisped freckle-faced, toothless Tommie. "I don't want to live in his old houth. . . ."

"Not much danger, Tommie. Sit down and keep still! And tomorrow, Tommie, when Mr. Abernathy is here, if you are naughty—if you tease the girls or pinch the cat as you did when the minister was here—or if you steal any cake or your face is dirty or you don't say 'yes sir,' you will be punished. I have stood all from you I can stand. You are a naughty, naughty child and I tremble for your future. Now Josie, dear, can you remember your sweet little piece about the flowers? Maybe we can find time for you to recite it tomorrow when Mr. Abernathy is here. Stand up and begin—"

Josie endeavored to obey, but found she was fastened to her little chair with a tack through her dress and Tommie—freckle-faced, toothless Tommie was once more in disgrace.

All the small inmates of the Dunkirk orphan asylum were duly dressed in their Sunday clothes the next afternoon. Tommie's hair was slicked back with water, some of which trickled over his forehead. On account of the missing front teeth he lisped badly

"Thay Mith Smitherth—if that old bird thinkth he wanth a boy in his houth, tell him to blow away. None of uth fellerth want to be 'dopted. We're going to join the thircuth—"

Mr. Abernathy proved to be a small, thin-faced, bald-headed man, who carried a cane and wore spats. He eyed the children over the top of his glasses as he took his seat on the platform beside Miss Smithers.

"Fine specimens of youth—fine, indeed—and eighteen of them from which to chose a happy little ray of sunshine to brighten our home—I do believe, madam, that boy in the second row is making faces at me—or do my eyes deceive me?

Tommie's hands were folded and his face composed when Miss Smithers investigated. Peace again reigned.

"Would you like to hear them sing, Mr. Abernathy?"

"Ah, yes, indeed—the sound of childish voices.

And the children dutifully rendered "America," Tommie's voice above all others and sadly off-key. Mr. Abernathy glared in his direction.

"And now, Mr. Abernathy, we would like to have our little Josie speak a piece for you," and, in an undertone, "she is so beautiful."

Josie's piece over, she was called to the guest's knee and given a coin; was conversed with, her curls smoothed and finally she was enthroned on Mr. Abernathy's knee.

"I have little doubt but that she will be our choice—our little ray of happiness, Miss Smithers," said the guest when leaving. "But I am not able to say definitely until Mrs. Abernathy sees her. We shall return on Monday and er—er—I might suggest the freckle-faced boy be eliminated—such behavior might annoy my wife extremely—"

Mrs. Abernathy was as large as her husband was small. He jumped when she said "Amos" and responded quickly with "my dear."

"Miss Smithers, may I request that little Josephine recite her piece for Mrs. Abernathy—a remarkably bright child, Maria—"

Josie was brought forward and started her sing-song version of "Flowers that Bloom . . . Bloom but to Fade—" but suddenly clapped her hand to her cheek and emitted a howl. "Something stung me, it did, it did." Mr. Abernathy placed her gently on his knee, wiped away her tears and she resumed the story of the flowers that bloomed to fade. Then "pop" and Mr. Abernathy almost leaped from his chair. Miss Smithers was panic-stricken. She searched the faces all about her. Again Josie recited. Mrs. Abernathy waited serenly, her fat hands folded over her stomach.

"Very nice a—pretty child, isn't she? But rather lacking in animation, I should say. May I suggest you call in that red-haired, freckle-faced imp who just shot my husband through that window yonder with a pea-shooter? I'd like to talk to him."

Tommie was brought in, dirty, ragged, his shoes muddy from his hurried flight over freshly plowed gardens, the pea-shooter protruding from his rear pocket.

Tommie was very much frightened. He stood before Miss Smithers, head hanging, swallowing frequently. Silence reigned for a moment. Then Mrs. Abernathy spoke:

"Hello, there. Straight shot, aren't you? Did it take much practice?"

Tommie looked up and grinned. "Not much—yes'm, a lot—" he stammered. "I'm prackthin' to go into the thircuth—"

"Good! That's what I always wanted to do. Come over and sit down with me, Tommie. I think we are going to be good friends—"

Miss Smithers alternately conversed with Mr. Amos Abernathy, who sat on a bench on one side of the platform with small Josie, sweet and dainty, on his knee and with Mrs. Amos Abernathy on the opposite side of the room, with Tommie, dirty, ragged but happy, beside her.

The afternoon lengthened. Husband and wife still retained their respective charges. The other children were dismissed and were reluctant to leave the room. Small Josie yawned and nodded. Tommie went to get his new friend a drink and as he passed he gave one of Josie's curls a violent yank. She cried and he dodged behind Mrs. Abernathy's huge bulk as Miss Smithers bore down upon him.

"I do not often hold out against you, Maria, my dear—I never have—but in this particular case I choose sweet little Josephine as the ray of sunshine to brighten the home of our age. Josephine Maria Abernathy—our little daughter—"

Mrs. Abernathy likewise rose to her feet.

"And I choose Tommie—as—the well, I can hardly say ray of sunshine," and chuckled behind her fat bediamond hand. "I'll say bolt of lightning or crash of thunder that is always needed to offset too much sunshine. Thomas Amos Abernathy, our little son—"

At seven o'clock the Abernathy limousine rolled away from the portals of the Dunkirk orphan asylum. Tommie, clean faced, was on the front seat with the chauffeur. Josie was clasped in the arms of her foster father. Mrs. Abernathy reached over and patted Tommie maternally. "You shot straight, son—right into my heart."

Rodin Didn't Know He Was Modeling Saint

Rodin had no head for titles for his work and was usually indebted to friends for the names by which his sculptures were known. For instance, this is the history of his "St. John the Baptist," as told by him to Frank Rutter, the art critic, and retold by Rutter in his book "Since I Was Twenty-Five."

One morning things had gone very badly. Rodin could not get his model to take up a satisfactory pose, and having wasted several hours he gave up in despair and told the model he could go. The man strode across the room to fetch his clothes—his movement was admirable.

"Stop!" cried the sculptor, "stay as you are, and hold it."

Then he began feverishly to make a sketch. When the statue was finished Rodin had no idea but to exhibit it with the title "A Man Walking," but soon afterward in came his friend Octave Mirbeau, the critic and novelist.

"Magnificent!" said Mirbeau. "I read your purpose: It's John the Baptist, of course."

"It was an idea," Rodin naively confessed to Mr. Rutter, "and I wrote it down at once for fear that I might forget it."—Kansas City Times.

Make Pets of Crickets

The Japanese have reared crickets from time immemorial. For a long time the exportation of these crickets was prohibited under severe penalties, originally because a religious superstition against it existed among the peasantry. The imperial family has cultivated the most tuneful species, but no one but a member of the royal family has heretofore been permitted to own a specimen. The recently deceased emperor was a devotee of natural history and it is said that he sometimes amused himself by taking the key from the cricket and evolving musical exercises from its peculiarities. These little insects pass the entire day in song if care is taken to maintain their food supply, which consists of lettuce leaves, with those of the tomato, carrot and cucumber. Salt puts an end forever to the song of this curious creature.

Osnaburg

In the cloakrooms of congress there is a jolly little game in progress, the various members searching for unusual words to spring upon their colleagues. One of the words recently dragged across the Mason and Dixon line for erudition of northern statesmen is "osnaburg." Only a small percentage of the southern members were able to interpret this word. It is a stout cotton fabric of artistic qualities which is coming into popular use for portieres, window draperies and other household furnishings.—Washington Star.

Sadly Incomplete

A deed dated March 15, 1807, recently recorded on Long Island, conveys "the Valentine farm on the highway leading from Jamaica to Great Plains on the Jericho road turnpike, thence to the highway leading from Little Plains to Rocky Hill, including the buildings, orchards, gardens, meadows, commons, seedlings, trees, woods, paths, water and water courses," but gives no other description of the property or any indication of its size, and nobody knows what it is.

LIVE STOCK

BLOAT MAY KILL CATTLE OR SHEEP

Cattle and sheep sometimes die from bloating if they eat green, immature crops while they are wet with dew or rain. Bloating is caused by the accumulation of gas on the stomach or paunch, say dairymen at the State College of Agriculture at Ithaca, N. Y., who also state that losses can be avoided by simple precautions.

It is safest to not turn sheep or cattle into a rank growth of clover, alfalfa or sweet clover. If this cannot be avoided, however, the college's dairymen recommend feeding the stock some dry fodder to partially satisfy their hunger before they are turned into the heavy pasture. Changes from scant to rich pasture should be made carefully and the animals never should be allowed to gorge themselves.

When trouble occurs it is indicated by excessive swelling on the left side If not too far advanced, relief may be obtained by the formaline treatment. With cattle, a quart of a 1½ per cent solution of formaline should be given as a drench. One-half ounce of formaline in a quart of water gives a solution of the right strength. A round stick should be tied in the animal's mouth to keep its jaws open.

In severe cases, the animal must be tapped immediately at a point equally distant from the last rib, the hip bone and the backbone. The operation should be made with a trocar and canula, but a pocketknife may be used in an emergency. The tube of the trocar should be left in the opening so the gas can escape readily. The wound will heal better if it is washed with an antiseptic solution after the canula has been removed.

Animals that have bloated have been dangerously sick and they should be handled accordingly. As soon as the pain is relieved, it is advisable to give a dose of one to one and one-half pounds of epsom salts. They should be fed lightly and should have good care.

Sheep are more susceptible to bloat than cattle, and for this reason they need closer attention. A pint of fresh cow's milk is an excellent drench or formaline, prepared as for cattle, may be used except that smaller doses must be given. Sheep should be tapped only as a last resort for they recover slowly from such operations or injuries.

Dehorning Calves With Caustic Potash Is Easy

One of the best methods of dehorning cattle is the use of either caustic soda or caustic potash. These are in sticks about lead pencil size and may be obtained at any drug store. The best results are obtained if the operation is performed when the calf is from four to ten days old. The undeveloped horns or buttons are only loosely attached to the skull and look almost like parts of skin at this age, writes George W. Westcott in the Iowa Homestead.

Clip the hair over and around the horns. Apply grease around the edge of the hair to prevent the caustic from spreading and causing sores around the horn. Then slightly moisten the stick of caustic and rub it on each horn three or four times. Let each application dry before the next is applied.

The operator should wrap the caustic stick in paper with one end exposed to prevent burning his hands.

Do not let any of the caustic run down the side of the calf's head. Keep the calf under shelter if there is any possibility of rain. Should the caustic become wet it might run into the calf's hair and eyes and cause severe burns and blindness.

Live Stock Hints

Alfalfa hay is the key to success with fall pigs.

* * *

One of the chief disadvantages with rye is that it is difficult to pasture during wet weather.

* * *

Alfalfa hay will do wonders for brood sows because it is a protein feed, contains plenty of mineral and is bulky.

* * *

A sound program of care combined with the right kind of feed will bring most of the pigs through in good shape and put them on the market at least expense.

* * *

Any normal boar which has sired one or more ruptured pigs should be discarded. Such a boar will transmit scrotal hernia to his offspring, and hence tend to carry it on in the herd.

* * *

In 1926, there were slaughtered in the United States, 14,971,000 cattle. In 1927 there were slaughtered only 14,000,000.

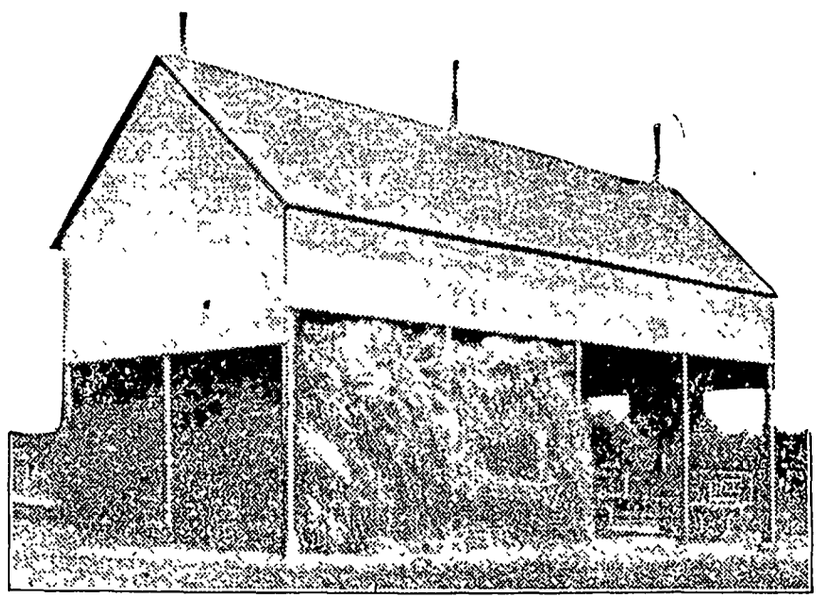
* * *

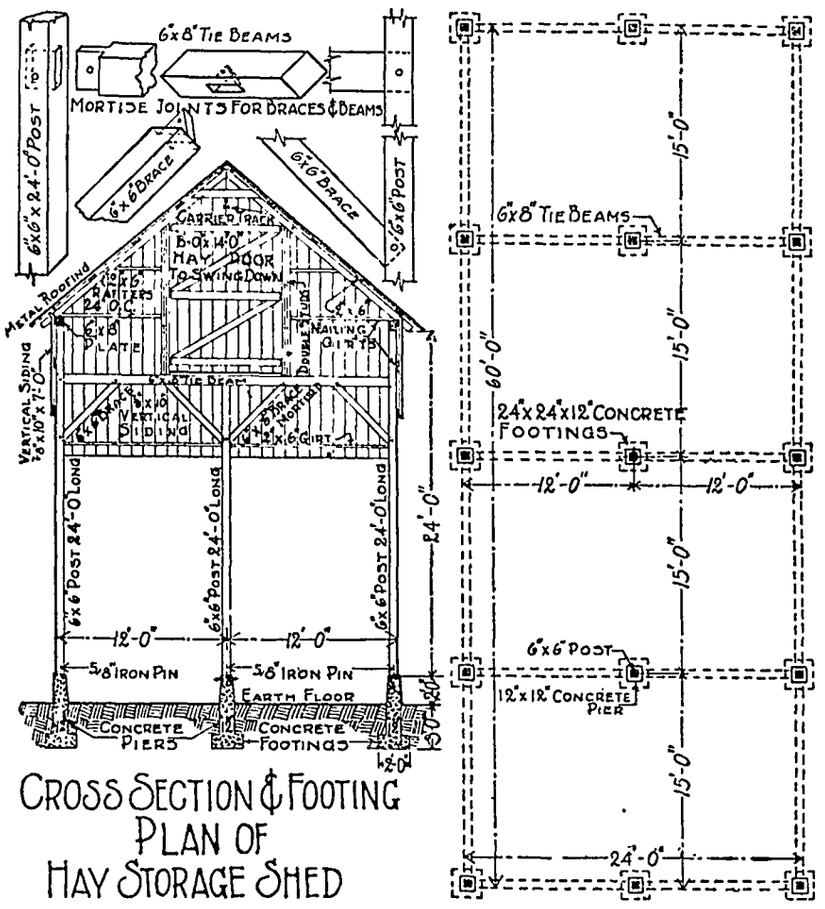
About one-third of the beef cattle marketed from the range are shipped to the feedlots of the Corn Belt as stockers and feeders.

* * *

Hogs, sheep or cattle often may be used at the busy season as harvesters. Hogging down corn is easier and often more profitable than husking and feeding in the lot.

Hay Storage Building Designed to Give Adequate Protection Cheaply





CROSS SECTION & FOOTING PLAN OF HAY STORAGE SHED

By W. A. RADFORD

Mr William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

In these days of extraordinary hay crops, the farm where large quantities of hay are produced needs storage space other than the mow of the barn. It is poor economy to fail to provide ample protection for the products of the farm as well as for its stock and machinery. At the same time the cost of such protection in relation to the value of the hay must be considered and it would be foolish indeed to provide storage space at the cost which would eat up all the profit from the crop. Therefore a weather-tight roof must be provided at a reasonable cost.

Such a building is shown in the accompanying illustration and the plan and sketches supply all the details required for its construction. This building can be erected at no great cost and at any convenient spot, most probably in the field where hay is generally grown, to avoid unnecessary hauling.

It will be noted that this is an open sided building with a steeply pitched gable roof. The steep pitch is very effective in shedding rain and snow, and the gable ends and sides being inclosed for a space directly under the eaves keeps the hay from becoming repeatedly wet from rains.

Concrete footings are provided for the six by six posts which support the roof, providing a firm and permanent foundation. The sectional view also indicates the sizes of other timbers, rafters and braces, as well as giving the details of construction. The building is 60 feet in length by 24 feet in width, giving a storage capacity of 110 tons of loose hay. Of course, these dimensions may be varied at will to meet the particular requirements of the farm for which the building is erected.

Color Can Make Drab Home Place of Beauty

More than ever before it is being realized that color can transform an uninteresting home into a place of beauty and cheer; that color can help make a room feel warm or cold; that color, wisely employed, can give brightness to a hallway that is dark or modify the effect of sunlight in a room that is overexposed.

And the base of color schemes of the various rooms is usually the floor—heretofore restricted in hue to a few variations on the natural color of the wood.

A new method of finishing maple flooring has made possible the employment of color in the floor. This uses an acid stain process developed recently by the Maple Flooring Manufacturers' association in co-operation with the industry generally.

The process may be used by any painter of ordinary skill, using the stains and varnishes recommended by the association. It imparts to northern hard maple a variety of delightful transparent permanent finishes, and their application brings out the delicate grain of the wood, creating a distinctive type of floor beauty never before achieved.

In the application of the process the stain is covered by one coat of lacquer and two of finishing varnish. Some of the colors adopted by the Maple Flooring Manufacturers' association include Spanish brown, early American, autumn brown, silver gray, dove gray, royal blue, pastel green, orchid and an ebony black.

Brick and Iron Are Home Beauty Points

Rough brick, rugged timbers and wrought iron seem to have been accorded natural affinity and are widely used for detail treatment as well as actual construction in modern adaptations of period houses. Brick panels, laid up between timbers in diapered pattern, frequently frame doorways which are hinged with wrought iron butts extending across the face of the door.

Stucco Satisfactory When Properly Mixed

Prior to very recent years stucco was generally compounded by unskilled labor and applied in a more or less haphazard manner.

In recent years, however, much research work has been carried on and much has been done by large manufacturers of building materials toward bettering the quality of stucco and toward determining the proper classes and kinds of underconstruction over which it should be applied. The result is that today there is no reason or excuse why every stucco installation should not be entirely satisfactory and every stucco building a permanent structure.

It is erroneous to assume that a good stucco material can be compounded in a mortar box by throwing together cement, sand, lime and coloring matter, as is often done. The manufacture of stucco is a difficult problem and requires modern machinery and equipment with which to grind, weigh, mix and measure the ingredients, also the knowledge of chemists and engineers who are thoroughly experienced in the business.

The ultimate answer, therefore, to the stucco question is the selection of a reputable material, the proper preparation of the underconstruction to receive the stucco and the application by mechanics who understand their business.

Contrast Is Needed in Home Color Scheme

The fewer colors you use in your color scheme the better the harmony. There should be a similarity between walls, floors and ceilings. Suppose you choose a gray-brown paper in light tones, gray-brown draperies and wood trim, a darker brown floor stain and a light buff ceiling. Your room will be monotonous in color.

You need contrast in color to get variety interest. If green-blue were used in the draperies and perhaps a repetition of darker blue in your floor covering you would then have a harmonious contrast.

POULTRY

CARE OF PULLETS WHILE ON RANGE

Just "feeding the chickens" sounds simpler than the task really is, if the chickens are to be well fed. The purpose for which the flock is being kept has a great deal to do with the matter. Rations for fattening, maintenance, growth and egg production are all different, and will also be varied according to the age of the chickens.

Twenty-one kinds of chicken feeds, all of them different in their result, and all of them suited to different purposes, are exhaustively analyzed and discussed in a new bulletin by Prof. A. R. Winter of the poultry husbandry department of the Ohio State university. The bulletin, No. 63, entitled "Poultry Feeding Stuffs and Rations," has been published by the agricultural extension service of the university.

In addition to the definitions and discussions of the various feeds, there are given six formulae for rations. Two of them are "starting and growing" rations and the other four are for laying hens. Along with the formulae for the rations there are directions for making simple and efficient feeding equipment for the poultry yard.

Two special fattening rations are suggested, one for hens and the other for young birds. For hens, a ration of corn meal, 40 parts by weight, mixed with 60 parts, by weight, of liquid milk, is suggested. For the younger birds a greater variety of grains is recommended. The formula calls for a mash consisting of 59 parts of ground corn, 25 parts of wheat flour middlings, 10 parts of finely ground oats, 5 parts of meat scrap, and 1 part of salt. This mash should be mixed with enough liquid milk to make a batter that will pour fairly easily.

Egg Production Is Cut by Uncomfortable Pens

If hens could talk, they would probably say harsh things about hot, uncomfortable poultry houses.

Ohio poultrymen are urged to keep that in mind, among other things, by poultry extension specialists of the Ohio State university in their monthly letter to farm poultrymen keeping records in co-operation with the extension service.

A hot poultry house, the specialists observe, is no place for a hen either to eat or to lay eggs.

"Open the ventilators and remove the windows; make the houses cool and comfortable," writes one of the specialists, P. B. Zumbro. "Don't expect egg production if the house is as hot as a bakeoven. Hens won't stay in hot houses long enough to consume their feed."

Another point in summer care of the poultry flock:

"Summer and fall production are greatly influenced by good green feed; old dry bluegrass or dead rye is not satisfactory. Rape is the best thing to plant now for summer pasture.

"Yard off a part of the ground around the house, and plant the rape there, allowing it to get a good start. It will provide good pasture until freezing weather."

Two other practices successful poultrymen observe at this time of year are culling the slacker hens, and getting control of lice and mites on the birds.

Best Plan to Separate Cockerels and Pullets

As the flock reaches the broiler stage the roosters and pullets should be separated, for the pullets need no forcing but will make better layers if let grow along normally, with plenty of exercise. Broilers, on the other hand, should have only enough exercise for health and should be fed a fattening ration. At the final stage the broilers should be shut in a pen only moderately lighted and fed all they will eat of fine ground corn and semi-solid buttermilk. Some prefer to use a prepared fattening mash, many of which are on the market. Green or succulent feed should be fed also. Lack of exercise causes them to fatten very fast and makes tender juicy flesh.

Duck Meat Breeds

One of the most common breeds of ducks is the Pekin breed. These ducks are white or creamy white in color and are as large as any of the breeds of ducks with the exception of one. Drakes weigh eight to nine pounds and ducks weigh seven to eight pounds. In the meat class this breed is perhaps the most popular over the United States as a whole. Pekins may be mated in the proportion of one drake to every six or eight ducks.

Prevent Chick Loss

Cleanliness is highly important in the prevention of chick losses. Always scrub the brooder floor with hot lye water and let it dry before putting in baby chicks. Clean litter, free from mold and small kernels of grain, should be used and changed often enough that filth does not accumulate. It is better to keep chicks partially confined, when provided with sunlight, than to let them out on old ground which may carr. disease germs and parasite eggs.

"...but what will it cost me to buy that car *on time?*"

WHEN you buy a car for cash, you pay the factory price plus freight, war tax and delivery charges. When you buy on time, you pay an additional charge which includes fire and theft insurance. This additional amount is known as a "finance charge."

The finance charges on General Motors cars are low because the General Motors Acceptance Corporation was organized to assure sound credit practice and low rates to those of its customers who prefer to purchase on time. The Acceptance Corporation operates the GMAC Plan of payment. The Plan is simple, fair and economical. Its large volume of business reduces costs. It is conducted to give you satisfaction and to keep your goodwill.

When you buy a General Motors car on the GMAC Plan, you pay the cash delivered price—plus only the low GMAC financing charge—nothing more!

The Plan is available only through General Motors dealers. Another reason for buying your next car—whether new or used—from a General Motors dealer.

Buy your next car on the GMAC Plan

The General Motors cars are Chevrolet, Pontiac, Oldsmobile, Oakland, Buick, LaSalle and Cadillac. Together they make up a line of 86 models, ranging in price-at-the-factory from $495 to $5500. They are the quality cars of the various car price classes.

Whatever make and model you choose—whether it be of the highest price, or the lowest—you will get a beautiful body (the closed bodies are by Fisher), 4-wheel brakes, a powerful engine, and a quality of design, materials and performance that only General Motors, by reason of its resources and its policy of continuous improvement, is in a position to give.

And the final touch in your satisfaction will come when you buy it on the GMAC Plan. The transaction will be in your interest. The rates will be low. And the dealer will not lose interest in you after the down payment is made.

HERMAN BEST PROMOTED TO MANAGER POSITION

Began June 4th As Manager Duncan Elevator For North Iowa

Herman Best, who has been employed at the North Iowa Grain Co iu Klemme for the past year and a half, suddenly fuond himself released fro mthat position and promoted to the position of manager of the Company's elevator at Duncan, beginning his new duties June 4th

For a few months Mr. Best has been in line for promotion as his business ability was recognized by officials of the Company. However Mr. Best did not realize that he was to be promoted that soon.

Frank Lackore, manager of the North Iowa at Hayfield resigned his position. Mr. Timy, manager at Duncan was transferred to Hayfield and Mr. Best was given the management at Duncan.

Herman Best spent all of last week at Sexton, as the manager at that place was ill. On his reurn to Klemme he was sent to Hayfield a manager.

Roy Smock began work at the local elevator Monday as assistant.

LIBERTY TOWNSHIP

Ray Lange is working for Quinten Stille this week.

Mr and Mrs Floyd Franklin were Garner callers Friday evening

The Oscar Carlson family were dinner guests at the Herman Bridges home Sunday.

Carl Reimer has been busy lately painting the Liberty Church building

The W. F M. S. of the Liberty Church held their June meeting in the Church, Wednesday.

Mr and Mrs Henry Ludeke and Paul visited at the Harry Gibbs home Sunday.

Mr and Mrs Arthur Schoenwetter and Ethel visited at the Wm Ax home in Swaledale Sunday.

Joe Miller has been busy for some time at the R R Lemke home doing interior decorating.

Alice Carolus is working near Britt at the home of Howard Shaeper

The Charley Bredlow and Will Suckow families enjoyed a picnic at Pilot Knob Sunday

Mr and Mrs Henry Griffen and children visited at the Beier home Sunday.

Winnifred Pollock, wife and children of Garner were callers at the Floyd Franklin home Sunday

A Childrens Day Program will be given in the Liberty Church next Sunday by the Sunday School

Miss Lucille Ludeke of Garner visited with her cousins, Ethel and Mildred Schoenwetter the fore part of last week

Mr and Mrs Keirn and the Kester young people of Garner were dinner guests at the Floyd Franklin home Sunday

Mr and Mrs. Emil Blumer and daughter accompanied by Mr. Will Kraus of Garner, visited at Colesburg, Sunday

Carl Carlson drove to Cedar Falls Sunday, taking his sister, Irene, and also Mabel Schaefer down to enter summer school at the State Teachers College.

The June Farm Bureau meeting was held Friday evening at the Center School house. A large crowd was present Mr Nutty was out from Britt and gave some interesting moving pictures, besides the program furnished by the local members

AVERY TOWNSHIP

E C Robbins was a visitor at the Fred Bachman home Thursday

Arthur Bachman spent Sunday at the Clarence Bachman home

Mrs John Bachman and children were shopping in Belmond Tuesday forenoon

Mr and Mrs Ernest Helps were visitors at the Henry Helps home one day last week

Arthur Bachman was a caller at the Walter Reed home Thursday evening

Mrs Ernest Helps was a visitor at the Clarence Bachman home on Thursday

Ed Jacobs was a business caller at the Jule Cook and Peter Trampel homes Thursday

Marvin Anderson and Walter Reed were callers at the John Bachman home Sunday.

Mr. and Mrs Chris Anderson and family were visiting with relatives at Lattimer, Sunday

Mr Hamo Beek and daughter, Minnie, were business callers at Mason City one day last week.

Mr. and Mrs. Clyde Marshall and family spent Sunday afternoon at the D A and Herb Marshall home.

Miss Eva Stokesbary is assisting with the work at the Ed. Gifford home

Henry Helps and family entertained relatives from Clarion, Iowa and Joliet, Illinois, Thursday.

Mr. and Mrs Fred Bachman and family were dinner guests at the Jake Bachman home at Goodell on Sunday.

Maxine Bachman, daughter of Mr and Mrs. Clarence Bachman spent Tuesday night at the home of her grandparents, Mr. and Mrs. Will Bachman

Mr and Mrs Will Bachman and daughter, Lela, and grand daughter, Maxine Bachman, were business callers at Mason City Wednesday forenoon

Mr and Mrs. Herman Priebe and son, Verner, Mr. and Mrs. Gilbert Schaper and son, Bennie, Mr. and Mrs Peter Trampel and family and Mrs Lubbe Albers and family, all spent Sunday at the Dick Swalve home

ELL TOWNSHIP

Miss Genola Hanson of Garner, spent a few days this week visiting at the John Bock home.

Mr and Mrs. Albert Barz and family visited at the Fred Barz home Sunday

Mr. and Mrs E C. Buentenbach and family called at the Walter Anderson home Friday evening.

Mrs Elko Buss and daughter, Alvina, called at the John Bock home Tuesday afternoon.

Stella Bock spent Sunday at the home of her friend, Miss Meta Lemke.

Cornelius Wille and William Schlawin were business callers in Garner Monday evening

Edwin Bock and Fred Van Loh of Garner, were Sunday guests at the John Bock home.

Mr and Mrs William Schlawin were entertained at the V. P. Casperson home near Miller on Sunday

Mr and Mrs. Fred Griemann were callers at the William Schlawin home on Monday evening.

Mrs. Haupt and daughter, Edith, were callers at the John Bock home on Monday afternoon.

Raymond Barz, son of Mr. and Mrs. Henry Barz, underwent a minor operation at the Mercy hospital at Mason City, Monday He is reported as getting along quite well

Mrs Fred Haupt and daughter, Edith, called at the Fred Becker home Monday to see Valentine Josten who is sick and is being cared for by his daughter, Mrs. Becker.

Mr. and Mrs. Carl Wille and Arlene, Mr. and Mrs. Henry Wille and Mr. and Mrs. C. J. Wille and family wore all visitors at the Fred Greimann home Sunday

Mr. and Mrs. Sylvan Johnson and family and Mr. and Mrs. Hio Harberts and daughter, Esther, of Goodell were all visitors at the home of Mrs Elko Buss Sunday.

Mrs. Elizabeth Senn and son Philip, and grandson, Everett, from Portland, Oregon, visited at the Lydia Bock and John Bock homes last Wednesday and Thursday. They were enroute from Portland to their home in Minnesota, having spent the winter in Oregon

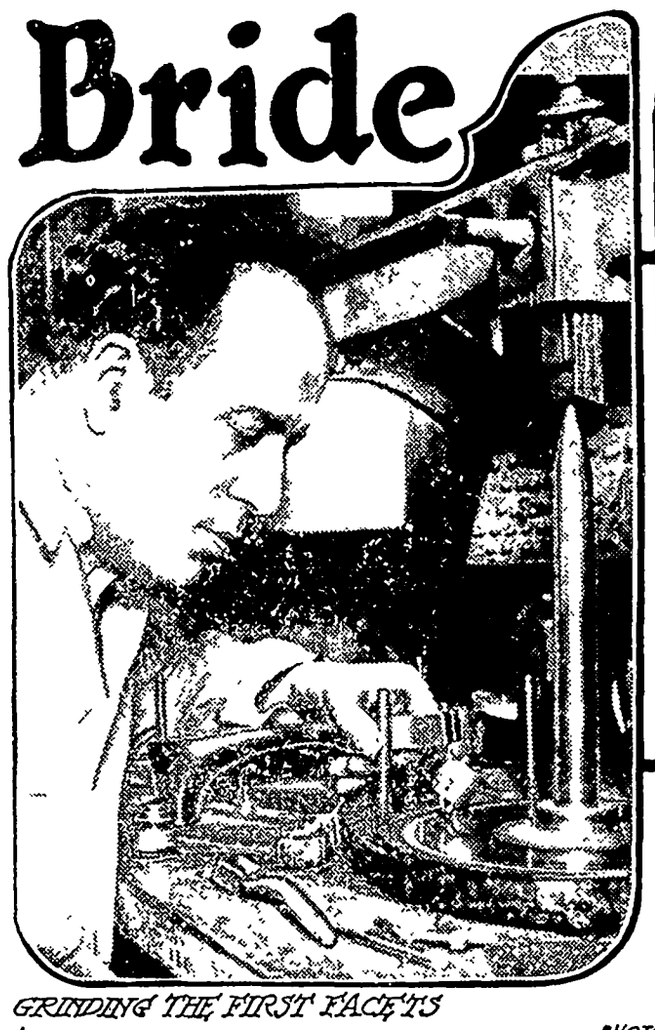
Jewels for the June Bride



GRINDING THE FIRST FACETS

ROUNDING THE DIAMOND

SETTING THE STONE

PHOTOS BY UNDERWOOD & UNDERWOOD

By LCUISE M. COMSTOCK

WHOEVER heard of a June without weddings, or a June wedding without an elaborate trousseau, pounds of rice, Mendelssohn's wedding march and a shiny ring for the fourth finger of the bride? Of all the traditions surrounding the ancient and honorable rites of marriage—and there are many, from the tell-tale ring and button in the wedding cake to prophecies of romance between the maid of honor and the best man—the tradition behind the wedding ring boasts the greatest antiquity as well as the widest practice. This fact may explain why the jewelry symbols of marriage today combine the materials we hold choicest, and are the products of infinite labor and skilled craftsmanship.

As far back as we can trace the marriage ceremony in history, through the varying customs of periods and races, we find that the ring is the one thing constant in it. This ring itself has changed, from a plain and somewhat heavy band crudely hammered out of iron to its intricate and artistic modern form; it has served as a pledge of affection and a plight of troth as well as a mark of actual union; brides have worn it on wrist and thumb as well as on the fourth finger; but it has remained a symbol of love and fidelity, and an accepted part of the marriage ceremony.

The poet Swinburne claimed that Rebekah was the first bride to wear a wedding ring. Though it more likely was an iron bracelet that Isaac gave his heaven-selected bride, the tombs of Syria and Egypt and the relics of Greek and Roman civilizations give evidence that the custom arose among the early people of Asia and Egypt and passed from them into Europe. The married woman of Egypt wore a ring set with a tiny key to symbolize her custodianship of her husband's house. The Roman matron wore a similar ring, carved with tiny knobs to represent the keys to her husband's estate, or with a seal with which she sealed the doors of the wine closets against thirsty servants. "With all my earthly goods I thee endow" is apparently as venerable a part of the marriage ritual as the ring itself.

Two thousand years ago it was customary to engrave the nuptial ring with pretty sentiments, even as it is today. An ancient Greek ring bears characters which translate "Honey," and many a bride of the classic period wore a band inscribed "faith immortal" or with the names of herself and her lover. The bride of the Roman tribune wore a ring engraved with the star or crescent that was his insignia; in the ruins of Pompeii have been found rings engraved with two clasped hands; and Martin Luther gave his bride a ring adorned with the symbols of the church.

The custom of wearing the wedding ring on the fourth finger of the hand may again be ascribed to the Egyptians. It was a common belief among them that a nerve ran directly from that finger to the heart. The Romans, who believed that this nerve was a vein, continued the practice, and there have been few deviations from it. The English maid of two centuries ago may have chosen to wear her wedding band on her thumb, but that was because fashion in her day demanded such an ornate affair that the customary finger would not carry it. The dusky bride of India wears her wedding ring on her thumb even today, but to her a ring is necessary only during the first six weeks of marriage; after that it is remelted and shaped into a more pretentious ornament.

In Egyptian, Hebrew and very early Roman literature the ring given by a youth to the maid of his choice seems usually to have been merely a pledge of love. Its use for the plighting of troth has been definitely established as early as the Second century B. C. In the Second century of the Christian era that stern churchman Tertullian berated the women of his time for wearing any other ornament than the ring given them by their future husbands. The earliest German governments provided that a check be made on those who gave engagement rings to determine that reality should succeed romance. Both Chaucer and Shakespeare mention the interchanging of rings as a promise of marriage.

The same ring served for both betrothal and marriage until a comparatively recent date; indeed, it was not until the Cromwellian era in England that the custom of buying two rings became common among those who could afford it. The trend today seems to be towards more and better rings, for it now has become common for the groom to receive a ring in a double ring ceremony, and there is considerable evidence that men will soon begin to wear engagement rings as well. While the exchange of the wedding band has long been customary in Germany and other European countries, and was for centuries an essential part of the Greek church ritual, it has received new

impetus from the modern spirit which claims perfect equality for both parties in the union.

Ovid, Roman poet of the First century, wrote of "a ring soon destined to encircle the finger of a beauteous girl, a ring having no worth except the love of the giver." He sang obviously of his beloved Corinna, and of a ring of little intrinsic value. For, until shortly after his time, rings were of iron, brass, silver, agate and other materials, but seldom of gold, and even after the First century gold rings were worn only by the wealthy. The early Italian craftsman Benvenuto Cellini wrought in gold with consummate skill, but he worked only for popes and kings. With the invention of plating processes, gold became a practical as well as the most precious metal, and was adopted universally for the wedding ring. Not until 1900 was the substantial wide gold ring replaced by a narrower and more ornate band of platinum, today considered the most durable, beautiful and malleable of metals.

The jeweler designates as an engagement ring one of which the part encircling the finger is narrow enough for a wedding ring to be worn beside it. True to its tradition, the modern engagement ring is elaborate, the original key replaced by a diamond, the paradoxical symbol of innocence and power. The modern wedding ring is either carved with orange blossoms, ivy or oak, or set with tiny diamonds.

Diamonds are pure carbon—sort of sublimated white coal. Being carbon, they have a grain like that of wood, which is, to the jeweler, their most important characteristic. For the grain of the diamond, technically described as its lines of cleavage, allow this substance, which is so hard it can be cut only by another diamond, to be manipulated in a way otherwise impossible.

Diamond cutting was once a tedious process, the rubbing of two diamond surfaces together by hand until the proper planes were attained. The angular chunks thus eliminated were wasted, whereas the modern method of cutting by machine preserves them to be cut into smaller stones.

It was by perfecting a diamond-cutting machine so accurate that the minute stones used so much today in stone-paved jewelry, often so small that it takes from 100 to 400 of them to make up a carat in weight—and an ounce requires 151½ carats—that New York city, about the time of the World war, succeeded Amsterdam, Holland, as the diamond cutting center of the world. Even though modern machinery is almost fool-proof, so that one man can superintend as many as 20 machines at once, diamond cutting is still a laborious process, in which the slightest miscalculation may mean disaster and in spite of rigid economy almost 60 per cent of the original stone is lost. The rough stone must first be subjected to expert examination to determine its greatest possibilities. Once the lines of cleavage have been decided upon and flaws located, the expert scratches on the surface with another diamond the lines on which it should be split. The cleaver next adjusts his steel wedge along these scratches and strikes upon it with a mallet. Upon the direction, force and snap of his blow depends the future value of the stone.

Thus roughly lopped into the shape, the diamond is cemented to the end of a metal "tong," thus fixed beyond the possibility of vibration, the tong is clamped into the arm of the sawing machine adjusted to operate for only the required distance, and the cutting begins. A disk of phosphore-bronze, the hardest metal alloy known, measuring .004 inch in thickness, revolving some three thousand to four thousand times a minute and charged with olive oil and diamond dust, bites slowly into the stone. It takes such a saw an entire day to work through one carat of diamond, as far, about, as across an ordinary pencil lead. The smaller facets are ground off on a horizontal disk of iron, charged with oil and dust embedded in this comparatively soft metal to offer friction and revolving two thousand four hundred times a minute.

Platinum settings are made to fit a particular stone. Platinum comes to the jeweler in a "button," so called because of the rounded shape given it by the crucible of Hessian sand in which the hot metal is cooled, or rolled out in a thin sheet. Platinum for rings is again rolled between two wheels grooved to allow square openings between them into rods approximately as thick as the band of a ring; it is with them the craftsman works.

The rod is first bent round around a mold of a prescribed finger size. For a wedding ring it is soldered together with palladium, a kindred metal, which melts at a few degrees less than 3,300 degrees Fahrenheit, the melting point of platinum. When the setting is wider than the band, it must be built up of another piece of platinum, fixed in place on the band with wires and soldered securely. The ring is rounded and openings are made with a saw, no thicker than a horse-hair, held taut between the ends of a brace the shape of a flattened U. When a "box" opening must be made for a stone, a hole is bored through the metal and the saw strung through. The craftsman is guided only by his eye, a pair of tongs for measuring the stone to be fitted and the artist's design on tissue or celluloid before him.

The modern diamond-set wedding band is grooved all the way around, the bottom of the groove perforated to allow an opening for the bottom of each stone. The finest of our modern engraved rings are also hand-made, carved out with a mechanical, perpendicular bore that is guided by hand.

When the ring has been washed in water and polished on a rapidly revolving buffer, it is ready to be set. The smaller stones are "beaded" into the box opening prepared for them by four almost invisible but nevertheless secure projections pushed down over them from the surrounding platinum. When the stone is large it is set in fine claws, so that it may stand alone in its beauty and reflect light from as many sides as possible, and is set off only by a body guard of smaller stones set with geometric simplicity in the shank of the ring. Such a ring, and an accompanying wedding band set with stones to match, are the June, 1928, version of these age-old symbols of love and marriage.

Around Orchard

PREPARE GRAPES WELL FOR MARKET

(Prepared by the United States Department of Agriculture.)

"Preparation of Eastern Grapes for Market" is the title of a new bulletin issued by the United States Department of Agriculture which discusses the harvesting, packing, and handling methods employed with success by commercial growers in the various producing sections.

Types of field trays, picking benches, packing tables and containers are described in detail. Proper methods of picking the grapes, packing into baskets and loading cars are also discussed. This bulletin contains many illustrations covering the various operations from the field to loading the grapes into cars. Attention is called to the fact that the enormous expansion of the grape industry, particularly in California, has resulted in such keen competition in the marketing of juice grapes that many growers of eastern grapes are turning with renewed interest to the greater development of the table stock trade.

The bulletin points out that eastern grapes formerly sold for table stock have been largely diverted from that market. The greater ease in meeting the comparatively low packing requirements for juice stock has reacted unfavorably upon general packing and handling practices, with the result that comparatively few growers have been attempting to meet the demands of the fancy table grape trade. Rough handling of this highly perishable crop causes crushed and bruised berries which soon become moldy and decayed, especially in warm weather.

It is also pointed out that the development of the table stock trade depends upon the grower putting up a good quality pack. Good quality fruit is often spoiled by careless handling practices. Careful handling of this commodity must begin in the field and be continued through the various operations of packing, hauling, and loading into the cars for shipment.

Copies of this publication, Farmers' Bulletin No. 1558-F, may be secured free of charge, upon application to the bureau of agricultural economics, United States Department of Agriculture, Washington, D. C.

New Insect Is Injuring Apple Crop in New York

A new insect of apples appeared in western New York last summer. It is the apple and thorn skeletonizer, and it was responsible for the browning and blighting of the foliage which was so noticeable along the highways, especially in unsprayed or poorly sprayed orchards.

According to authorities of the experiment station at Geneva, the insect is new in New York, although it is well established in Europe. It was first discovered in the United States in the lower Hudson River valley in 1917. It has since spread up the valley to Albany, eastward into Connecticut and Massachusetts, and westward in New York. Last season was the first one in which the injury was extensive enough to attract attention.

The apple is the preferred food plant of the skeletonizer. The caterpillars feed almost entirely upon the upper surface of the leaves. When full grown, they are about half an inch long, yellowish green in color and are marked with tiny black spots. Three generations usually develop between June and October. The first brood causes the most damage. In cases of severe injury, the fruit is often poorly colored and undersized, and in cases of complete defoliation the succeeding year's crop may be lost.

The skeletonizer may be killed readily by applications of arsenate of lead. Trees which receive the regular apple spray schedule throughout the season usually suffer little if any injury from this pest.

Young Trees Pruned at Planting Time Is Best

Young trees should be pruned back at planting time. The top growth is headed back to form a balance with the roots which have been reduced at digging time at the nursery. Two general methods may be used in shaping the tree: (1) the top may be formed with three to five main branches of equal importance, or (2) the top may be formed with a central leader and with several secondary branches. In either case the branches should be well spaced and evenly distributed around the tree. Care should be taken to pick out limbs with strong crotches, if possible. The straighter the limb comes out from the trunk, the stronger is the crotch.

Spray Material

The amount of spray material per tree that may be required, will of course depend on the size of the trees. A tree fifteen to twenty years old will require from 10 to 20 gallons or even more for the four sprays. The actual cost of material per tree, plus cost of labor, will range from 40 to 75 cents per tree. Growers who wish to use dry lime-sulphur instead of the liquid lime-sulphur, should use three to four pounds of it in place of each gallon of the liquid lime-sulphur.

SHEER FROCKS AND SHEER HATS; SUMMERY STRAWS MAKE BOW

A Fashionable Costume.

DEPARTED is the hour of glory for the "boyish" vogue. Fickle fashion has decided that women must again look feminine and lovely. The whole style stage is set for just that—a summer of picturesque and enchanting modes.

Sheer frocks, with fluttery silhouettes, big drooping brims, portrait hats, to be explicit, her raiment lace-laden, beribboned and beflowered, parasols, fans, jewels and all the bewildering fancies which play to "vanity fair"—thus does fashion solve milady's "what-to-wear" problem for now and until further notice.

When it comes to the styling of pretty dainty sheer frocks, fine knife plaiting is playing a most generous part. Tiers expressed in the plaited ruffle effect are fashion's favorite treatment for skirts. If the tiers be scalloped, as here pictured, the theme is all the more fascinating.

Many women who do their own sewing are delighted with the idea of the plaited skirt. By taking their material to the plaiter and the hemstitcher, they find, at the cost of a few cents, their frock takes on that cachet, which removes the stigma of looking "homemade." With the material for the skirt plaited, the rest of the making of this dress is a simple matter which the home sewer need have no hesitancy in undertaking.

A fichu neckline like the one shown here is also suggested to the woman who makes her own clothes. This styling is very smart and being quaintly feminine, tunes in with the summer program for soft and graceful silhouettes.

Speaking of necklines, a great deal of attention is being paid to them this season by fashionists. If not a scarf, then a capelet is often made of the same material as the dress.

Note the exquisite transparent hat which tops this frock. 'Real summery picturesque millinery, like this, is one of the exquisite joys of the present-day mode.

The much heralded and the much-hoped-for vogue of the straw hat has arrived, and it is all that fancy pictured it in matter of exotic beauty and feminine charm.

The best of it is the return of summery straws brings with it a revival of brims, and brims mean the getting away from the recent almost stereotyped little hat which for so long a time reigned supreme. With the reappearance of brims, comes new and varied silhouettes which declare that from now on the persistent skull-cap types are not going to have it all their own way.

Considering that it is summertime, and that brims are "in" again, likewise summery straws, it would seem that the world of fashion is about to experience a season of "real millinery."

There is a wonderful variety of straws registered on the immediate millinery program. At this moment it is the new linen-like smooth surfaced types which are receiving most attention. These are variously called sisol, bakou, ballibuntl, and, of course, bangkoks are included. Contrasting these exotic smooth straws, is paillasson, a type of coarse weave and one which is proving very successful. Add to this list leghorn, hair, and tuscan, also soft yedda bodies, and one gets an idea of the infinite variety of straws which enter into the styling of milady's summer chapeau.

The models pictured are all of the smooth-surfaced type, the sort that women of smart fashion are wearing for sports or informal daytime occasions.

Some Summery Hats.

A very handsome black ballibuntl is shown at the top. It has three large flat asters in coral, beige and old blue, made of narrow ribbon.

Below to the left is a sisol straw in natural color. It looks almost as if it were made of linen, although it is really straw. Note the interesting turn-back fold at the front brim.

The bangkok sailor is smartly trimmed with a band and plaitings of tri-colored ribbons.

The black manila straw to the left is trimmed with grosgrain ribbon edged with velvet. A huge chou of plaited malines forms a flower-like ornament.

The group concludes with a handsome black ballibuntl straw, with an arrowlike ornament piercing the crown.

JULIA BOTTOMLEY.

Farm Fires Take Big Annual Toll

Need for Research Into Common Problem of Spontaneous Combustion.

(Prepared by the United States Department of Agriculture.)

Loss of a hay barn through fire caused by spontaneous combustion at the very time the barn and the hay in it were standing in three feet of water was one of the specific examples cited by David J. Price of the United States Department of Agriculture, as indicating the need for extensive research into the problem of what is commonly known as "spontaneous combustion," particularly of agricultural products such as hay, and other cattle feeds. Mr. Price, who is the engineer in charge of such studies in the bureau of chemistry and soil, included a discussion of this problem in an address at Philadelphia, recently before the insurance department of the Wharton school of finance and commerce at the University of Pennsylvania.

Feeds for Winter.

In New England the dairy farmers require a considerable supply of hay and other feeds for the winter feeding of their herds. Much of this hay is stored in bays reaching from the floor to the roof of the dairy barn. In the striking and unusual illustration he cited, the barn was located in the region flooded in Vermont last fall. Flood waters entered many barns, and in this one wet the hay to a depth of 17 feet. As the flood waters receded intense heat production followed in the mass of wet hay. "Spontaneous" heat production began in the lower layers, Mr. Price said, "and the hot gases rising through the stacks caused strongs drafts or "flues." The moisture thus carried upward condensed in the cooler parts of the hay or in the air above, wetting the hay in the immediate area. So many of these drafts existed in some piles that the hay was thoroughly soaked. Temperatures in typical "flues" ranged from 110 to more than 165 degrees Fahrenheit. This barn experienced the height of the flood on Friday morning, November 4, and burned late Monday afternoon, November 7. Much heating was observed on Sunday and Monday a distinct odor of charring was noticeable.

Immense Yearly Loss.

"This was only one of many fires during last year caused by spontaneous combustion. This combined with unknown causes results in approximately $60,000,000 loss each year to the farmers of the United States, and accounts for more than one-third of all the annual farm loss of $150,000,000.

"In the national fire bill of $570,000,000 loss to the nation, spontaneous combustion ranks fourth in the causes of fire, and is exceeded only by losses resulting from lightning, defective flues and heating apparatus, and matches and smoking."

Apple Now Necessity

Once regarded as a luxury, the apple has become a necessity. Its bulk makes it of as much proportionate value as a food as do its juices. Malic acid, that great germ destroyer, is the most prominent of its acids, but its phosphates are of equal value in keeping liver, stomach, and intestines in healthy activity. A raw apple eaten at night before retiring, followed by a glass of water, is one of the oldest prescriptions for health and beauty, providing a pleasant laxative—preventing the necessity of medicine—and keeping the complexion clear and beautiful.

Nicotine Kills Aphids

A good thing to use to kill aphids is the nicotine in tobacco. In using nicotine washes or sprays against these little pests you must not be content with spraying but once. Spray your plants two or three times, because if only a few aphids are left they will soon multiply. Use a sprayer that makes a fine mist which will reach all parts of the plants that are being attacked. In the case of vine crops, you should also spray the under surfaces of all leaves.

Agricultural Squibs

Sweet clover requires a firm, solid seedbed with just enough loose soil on the surface to get the seed well covered.

* * *

Asparagus beetles might prove troublesome, but are easily controlled by spraying the plants with arsenate of lead.

* * *

Hill up the corn before it gets too tall. This is old-fashioned gardening but it hasn't been improved upon. The corn needs hilling. Don't let anybody beguile you from this task.

* * *

A good way to scoot your garden along is to save all the poultry manure, mix it with dry earth, and broadcast over the rows. When it rains and washes this richness down to the roots, how the stuff does shoot up!

* * *

Lettuce must grow fast to be crisp and tender. There's nothing better to speed it along than a little nitrate of soda—about two ounces to 20 feet of row, put in the drill or alongside the rows. Don't get it on the plants—it will burn them.

Fine Chance for Him to Try Out "Nesting"

In the general office of one of the public utilities there is a young woman, well past sixteen, unmarried, who takes a motherly interest in all her fellow employees and never misses an opportunity to "horn in," in a pleasing way, in their personal affairs. This habit has become so fixed that some of the young women take it as a source of annoyance and consequently enjoy putting one over on her. However, recently she succeeded in turning that trick herself. One of the complaint men was passing through the office and in her high shrill voice, that carried throughout the room, she called: "Oh, Mr. ——, come over here, you are just the man I want." Her face turned crimson as she heard giggles from all parts of the room. Mr. —— also suffered his moment of torture as he stood in the midst of a group of giggling women. Turning to the office manager, he said: "I wish you would quiet that bunch of giggling hens," to which the manager responded, "Why not try putting them on the nest yourself?"—Indianapolis News.

Reason Probably as Good as Many Given

The season of conventions, political and otherwise, is at hand, and the desire to become a delegate and enjoy the many pleasant privileges without personal expense is entertained by many. The impulse is not a modern trait by any means. Once when the Wesleyan ministers of England were choosing delegates to attend the annual conference at London, many of the members put forth all sorts of frivolous reasons why they should be chosen. Among the seekers for the privilege was a venerable member who, at a meeting, rose, and said:

'Mr. Chairman, I wish to attend the meeting of conference in London. My years would perhaps entitle me to the privilege, but I waive that, as I have another reason as strong as many of those already given by my brethren, and that is—I want to set my watch by the clock in St. Paul's!"

Motorman Was Dozing

A lone woman passenger entered an electric car scheduled to leave a junction point at Concord, N. H., shortly after another had pulled away. The other left but her car still stayed. All the other cars had left by the various lines. The motorman sat on the stool but minutes passed and the car did not move. Finally she could stand it no longer and spoke sharply to the motorman. He jerked back as if an explosion had occurred. "Thank you, madam," he exclaimed, "I'd gone to sleep"

Fawn's Foster Mother

Mrs. E. Cooper, who lives on a homestead bordering the Glacier National park game preserve, is visited every morning by a fawn that leaves its mother in the forest, to nurse the cow while Mrs. Cooper is milking. The mother deer patiently waits for the fawn at a safe distance and appears to be contented to allow this relay relief furnished by the cow. The cow offers no objection and Mrs. Cooper generously "spares the milk" because she likes to pet the fawn.

His Stand

"This 'ere permiscuss parking of cars anywhere and everywhere has got to stop!" sternly said Constable Slackputter of Petunia.

"There is only one car in sight besides mine," returned the offending motorist. "You wouldn't call two cars in a block 'promiscuous,' would you?"

"I wouldn't, har? By gosh—when I say a thing is permiscuss it's permiscuss, whether it is or not!"—Kansas City Times.

Cables to Cut Rocks

A long steel cable, drawn at high speed and fed continually with wet sand, cuts through solid rock in a new type of quarry saw. Tiny grains of sand, dragged across the rock face, serve as abrasives to groove it at a rate hitherto unknown.

Desperate

Will was sent by his mother with a note to the clinic doctor, which ran: "Please will you do something to Willie's face. He's had it for a long time and it's spreading."

Complete Triumph

"I won the prize in a beauty contest!" boasted the young thing.

"Whom did you beat?"

"Every one in the contest, including the pneumonia germ."

Worse Than a Bore

"A knocker never drove anything home," an exchange remarks.

Except, possibly, his guest.

How He Left Her

English Magistrate—How did your husband desert you?

Wife—I threw him out of the house.

How Much Water Should Baby Get?

A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight-pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast-fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle-fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty-cent bottles contain thirty-five doses.

Don't Sleep Well? Have Backache?

That tired, depressed feeling may be Nature's warning to watch your kidneys. And the sooner you heed that warning the better it may be for you.

Perhaps your kidneys and liver need help in eliminating body poisons. Why not do as thousands of others have done—try a bottle of Warner's Compound. This safe, pleasant-tasting remedy is made from Nature's own herbs, and for more than 50 years it has been helping men and women back to health, according to their own letters.

Your druggist knows Warner's Compound! It costs little, but your health is priceless. Buy your bottle today, and feel yourself start back on the road to health.

Sold by all druggists. Sample free.

Warner's Safe Remedies Co., Rochester, N.Y.

SECOND COUNTY T.B. TEST TO START SOON

CATTLE OF COUNTY TO BE RE-TESTED FOR T. B.

Three Years Have Elapsed Since Last County-wide T. B. Test

Dr. E. G. Dunn has been sent to Hancock County again to start testing cattle for Tuberculosis. It has been almost three years since the county was accredited and it will be necessary to test every herd again before the first of December in order to keep the county on the accredited list. Plans are being made by the State Department of Agriculture to do this and Dr. Dunn is here to start the work. A number of the larger herds and dairy herds will be tested some time soon and some time this fall a number of Veterinarians will be employed in the county and testing work completed.

It will be encouraging to the cattle owners to know that the 5 er cent clause has been taken off and that the indemnity payments will be more satisfactory than they were in the previous tests. The indemnity paid by the state and government will not exceed $75 on a grade, or $125 on a purebred, however, the salvage price received may increase the amount received for reactors. The basis of payments for losses are made on two-thirds of the difference between the salvage price and the appraisal price.

THREE IN COUNTY GRADUATE AT AMES COLLEGE

AMES, June 14, Special.—Three students from Hancock county were among the 465 who received degrees at the annual spring commencement at Iowa State College Commencement services were held last week. President R. M. Hughes delivered the address.

The students from this county who received degrees are:

Ray C. Iverson, Britt, bachelor of science in forestry.

Vincent I. Scharlach, Corwith, bachelor of science in architectural engineering.

Earl B Dahl, Britt, bachelor of science in electrical engineering.

MARRIAGE LICENSES ISSUED THE PAST WEEK

A license to wed was granted at the County Clerk's Office at Garner June 7th, 1928, to Robert Anderson of Britt, Iowa, and Flora McNabb, Britt, Iowa.

The couple were married by Rev. C H. Van Metre on the same date at the Methodist Parsonage at Garner.

Carl Heiden, coach and teacher in the Klemme schools the past year, has asked the Board to release him from his contract that he might take a better position as manual trainer in a Sprinfield, Ill. school. The Board is trying to secure another young man to take the position here and release Mr. Heiden.

Drs. Missman and Zinn conducted a tonsil clinic at Dr. Missman's office last Thursday morning. Dr. Carlson of Mason City performed the operations. B. A. Reemtsma, Mrs. Clarence V. Johnson and Ruth Wellemeyer all had tonsil operations.

The Central States at Garner purchased the former Garner Trust & Savings Bank building for their office, and are remodeling it and are moving in.

NEXT SUN. IS ANNIVERSARY AT M. E.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Last Sunday was a day long to be remembered by all present in the several services It will be especially remembered by some as a red-letter day in their life. God's spirit was manifest among His worshippers and there was a mingling of joy and of earnest endeavor and consecration.

Nine were received into church membership by transfer and on confession of faith. Another class will be received into fellowship in the near future—some are in preparatory classes now.

Ten little folks were consecrated to God when the sacrament of baptism was administered. May they all grow up to useful manhood and womanhood!

The Bible school pupils played no small part in making the local service inspirational by their special songs So well was their part performed that they have been requested to sing again on the coming Sabbath day.

The Children's Day program in Liberty church and especially the pageant "The Light of the Word,' was well given and well received By special request they will put this pageant on in Klemme next Sunday evening. These young people have gone to much work to render this beautiful pageant and should have a full house to greet them.

Next Sunday is Anniversary Day in a double sense for us as people and pastor By vote of the recent General Conference in Kansas City the day is to be observed as the 225th anniversary of the birth of John Wesley the founder of our church And, by happy coincidence is just 30 years since the pastor started his ministery A special program is in the making for this occasion A glad welcome awaits all to these services.

In our plans for the coming week lets have our District Picnic in mind It will be held in Algona on next Tuesday, June 19. Watch for posters giving detailed information. This is for all members and friends of our church Let us have a 100 per cent attendance.

Our memorial service at the cemeteries, tho not as largely attended as hoped for, was impressive and appreciated by relatives and friends of the deceased pastors.

A departure from the usual Children's Day program was the sending of flowers to our aged and shutins In Liberty a committee functioned, while in Klemme girls from our Bible school were the good cheer messengers.

A BIRTHDAY PARTY

Sunday was the birthday anniversary of both Mrs. Wm. Bell and Mrs. Harry Buss and to properly observe the occasion friends and relatives gathered at the home of Mr. and Mrs. Wm. Bell where a big dinner was served in honor of the ladies The afternoon was spent in visiting and having a general good time and many lingered for the evening also Those present were as follows. Mr. and Mrs. Wm. Bell and sons, Jeff, Russell and Kenneth; Mr. and Mrs. Fred Bell and daughter, Julia Jane; Mr. and Mrs. Harry Buss and sons, Merlin and Harlan; Mr and Mrs. Wm. Lassahn; Mr. and Mrs. Lew Lewis; Mr. and Mrs. Walter Reed; Mr. and Mrs. Benn Coobs and son, Melvin; Miss Esther Harberts Mrs. D. P. Anderson baked the birthday cake and which was greatly enjoyed.

ELL TOWNSHIP LADIES HELD FOLLOW-UP MEETING

The Ell Township Farm Bureau ladies of the south half, held their follow-up meeting Friday afternoon June 8th, at the home of Mrs. Albert Barz. The subject being, "Feet, Shoes and Hosiery."

The ladies enjoyed a very profitable as well as a pleasant afternoon. A fine lunch was served by the hostess.

MADE FAST TIME IN NEW FORD ON TRIP TO TEXAS

517 Miles Made In Eleven Hours On 19 Gallons Of Gas

That the new Ford can stay with any of them was demonstrated by Mr. and Mrs. Walter Pritchard and daughter, Marion, of Garner, on a recent trip to San Antonio, Texas.

Mr and Mrs. Pritchard and their daughter, Marion, left Des Moines n a Ford Tudor Thursday, May 24, and arrived at Dallas, Texas Friday afternoon, May 25th at 5:30 p. m., approximately 1,000 miles. The first day they covered 517 miles in 11 hours, using 19 gallons of gas.

Just figure that up and see what a high average speed was made.

Mrs. Pritchard, mother of our Ford Dealer, John Pritchard, went to San Antonio to represent Mrs. Lakey, National President of the Federation of Womens Clubs of the United States at their conventon.

The return trip home will include a visit to the Republican National Convention at Kansas City.

FREE COUPON OFFERED FOR BAYSIDE BALL GAME

Manager Wants North Iowa Fans At Ball Park Next Sunday

Bayside Amusement Park, Clear Lake, now has a salaried base ball team aud Charles Ritz, operator of he park, is the promoter. All games will be played on the Bayside diamond and the team will be known as the Bayside Cubs. Harold (Bud) Fisher, coach of athletics at the Clear Lake High School, is the manager The first game, since the new team has been organized, will be played Sunday, June 17th, on the Bayside diamond and the Manly nine has been chosen to give the Cubs a taste of fast competition.

Clip Out Free Coupon

Charles Ritz states that he has one of the best teams in northern Iowa and is going to give fans some interesting games. He wants to acquaint ball fans with the type of games to be played at Bayside from now on. Consequently, he is using a coupon in the Bayside ad in this issue of The Times, and it is good for one free admission to the diamond Sunday The game will start at 3 o'clock. He expects to have a big crowd to witness the first battle. "Submarine" Morgan, a North Dakota product, will do the pitching for the Cubs and Ken Mercer, former Simpson College star, will catch. The entertainment at Bayside Park Sunday will also include professional band concerts, free movis, roller skating and the fun concessions.

SEWING CLUB MET WITH MISS EMMA GOLL

4-H Club Girls Have Interesting And Instructive Meeting

Saturday evening, June 2nd the 4-H Sewing Club of Ell township met with Miss Emma Goll, with 16 members present. The usual business meeting was followed by a program of talks. Bernice Weaver gave an interesting talk on "Attractive Summer Dresses," Marjory Stewart gave a health talk on "The Care of the Feet." Mildred Hampel gave a talk on "Manners and a Club Girl's Relation To An Older Person." The rest of the evening was spent in cutting patterns under the leadership of Mrs Chas. Griffen. Delicious refreshments were served at the close of the meeting, by the hostess. The next meeting will be June 16 at the home of Charlotte Greiman.

FORMER KLEMME FOLKS NOW MARRIED

Klemme friends will be interested to learn of the marriage of former young people of this community, which took place recently.

Miss Glethal Wilson and Mr. Earl Timbrook were married June 8th.

Miss Louise Dell and Mr. Russell Wilson were married June 9th.

COUNTY F. B. PICNIC TO BE BIG EVENT

FARM BUREAU PICNIC FRIDAY OF THIS WEEK

Eighth Grade Graduation Will Be Held In The Morning

Plans have been practically completed for the big Farm Bureau Picnic to be held at Eagle Lake State Park, Friday, June 15th.

The program will start at 10:00 a. m. and the entire forenoon will be given over to the Eighth Grade Graduation exercises in charge of J. R. Baggs, County Superintendent of Schools, and the Multiple Hitch and Horse Breaking demonstrations in charge of H. D. Linn of Des Moines.

The afternoon program will begin at 1:30 and will consist of music and speaking The main feature of the program will be the address of Mrs. Chas. Sewell, chairman of the Women's Dept. of the American Farm Bureau Federation. Community singing will be lead by Rev. Van Metre of Garner. Other musical numbers are being arranged for the program.

A program of sports will be put on for the children.

A refreshment stand will be operated on the grounds the same as each year where refreshments can be purchased at a reasonable price

Th attendance at the Farm Bureau picnic has always been large. Prospects are that this year, considering the fact that the Eighth Grade Graduation exercises will be given and also other important numbers on the program, that the crowd will be larger than ever before.

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10:00 a. m. English service.
11:00 a. m. Sunday school.

The Bible Class will meet Tuesday evening. Junior Choir Saturday evening.

Bible School will continue two more weeks.

Mrs. P. M. Wilson planned a very successful surprise party for her daughter, Gladys, Tues. eve last week, it being her birthday. A number of friends from Clarion had been invited and spent the evening at the Wilson home. At a late hour delicious refreshments were served, and a beautiful decorated cake was cut for the occasion.

Buster Jorgenson, accompanied by his parents and Dr. Missman and son Byrnes, went to the Mercy Hospital at Mason City Saturday morning where he had his tonsils and adenoids removed. Buster made a quick recovery and went back on "full feed" Monday.

Grandma Schroeder, Mrs. Lena Schroeder and daughter, Adella, Mrs. Marlin Croner and daughter, Dorothy, accompanied by Mr. and Mrs. Arthur Baumeister, of Caldonia, Minn., drove to Ames Friday. Miss Adella remained there to attend sumer school for a few weeks.

Five of the Klemme Camp Fire Girls, Irene Johnson, Valeria Koerner, Thelma Kluckhohn, Gracka Quandt, and Nova Koerner, will take part in the Hancock County Pageant. Marie Blank, their leader will accompany them.

Mr. and Mrs. J. N. Day took their son, Dorance to Belmond Tuesday evening where he played in Miss Thorman's recital. Miss Gertrude Ely held a recital the following evening and today both teachers will leave for St. Louis to study music under a famous instructor.

Mrs. Fred Musfelt entertained the following ladies at a party at her home Tuesday afternoon: Mrs. Aug. Lau and daughter, Minnie: Mrs. Croner and Dorothy; Grandma Schroeder; Lena Schroeder and Mrs. Wes Schuldt.

SEVERAL NEW BRICK SILOS BEING ERECTED IN VICINITY

Will Be Improvement On Several Farms Near Klemme

Quite a number of brick silos are to be built on farms near Klemme within the next few weeks.

A car load of silo blocks arrived the other day, 119,000 lbs., being one of the heaviets car loads reported for some time by agent M. O Barr of the Rock Island. This car contained material for silos to be built on the A G. Koerner place the Herman Stromer farm and also on the Fred Klinge farm.

Herman Priebe will erect a new silo on his place.

Edwin Josten hauled out silo blocks to his farm yesterday.

Fred Schlichting joined the list and will have erected a new silo on his place close to Klemme.

MORE KLEMME LOCALS

Kermit Koerner accompanied by two other young college men from Ames College, left Sunday for Cortalane, Idaho, where the boys will enter a twelve week's training camp and study forestry first hand. The boys are traveling in real collegiate tyle, selecting for their transportation "Bobbie Carr's" ancient flivver touring car They went by way of the Black Hills and got as far as Mitchell, S. D. the first day.

Mr. and Mrs. William Greene, parents of Mrs. Henry Ludeke, son Neil and daughter, Wilda, of Boscobel, Wisconsin, drove here Friday for a week end visit at the Ludeke home. They returned to Boscobel again Monday.

Mr and Mrs. Arthur Baumeister, of Caldonia, Minn., came Thursday eve for a couple of days visit with their aunt, Grandma Schroeder They were married Wednesday and were on a honeymoon trip to Nebraska.

Mrs. P. M. Wilson and daughter, Gladys, drove to Clarion Sunday afternoon, where Gladys joined a party of girls enroute for a week's camping near Boone.

Rev. A. W. Gauger and family drove to Charles City last week to attend the funeral of Rev. Gauger's neice. Carlyle Gauger stayed at Rudd to help his uncle on the farm during the summer.

Dr. Missman took Mr. and Mrs Martin Jensen and their oldest son to Hampton Wednesday afternoon. where the boy was examined. That evening an operation for appendicitis was performed.

Rev. A. W Gauger drove to Hampton last week to bring his daughter, Marie home. Going there he drove a zig-zag course and made a number of calls. Miss Marie will teach at Hampton again next year.

Mr. and Mrs. Paul Mueller and baby and Mr. and Mrs. Chris Reiebo of Garner, drove to Windom, Minn., Saturday and returned Sunday evening, of last week.

Ed. Jacobs and family, accompanied by Ed's grandmother, Mrs. Rolf of Garner, drove to Canton, S. D., Sunday, returning again Monday evening.

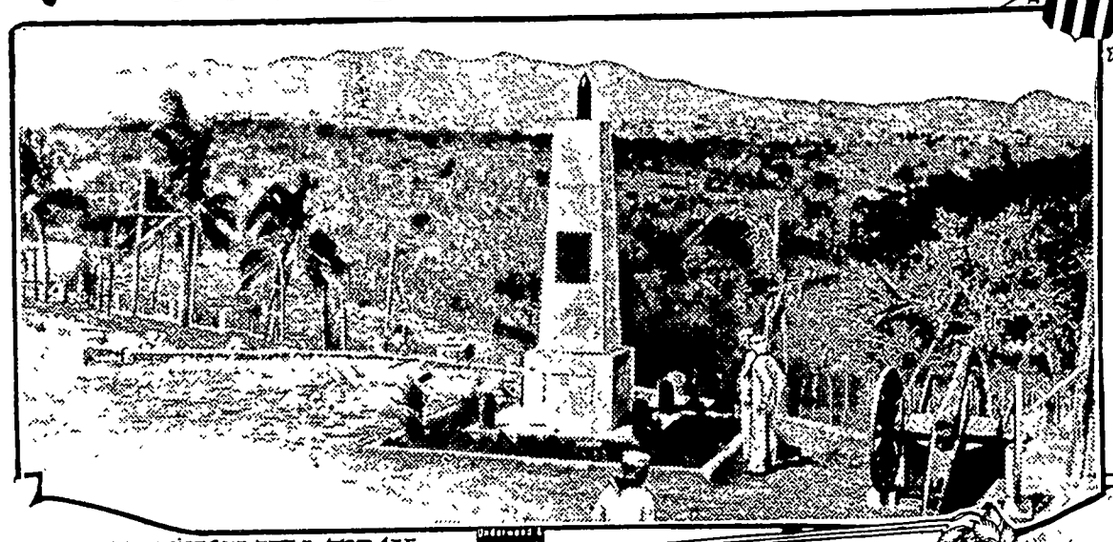
Lew Sampson wishes to thank his neighbors and friends for the nice flowers they have brought him the past week, and for other kindnesses shown him.

Henry Freie and daughter, Viola, Eunice Braund and Geo. Lawhorn enjoyed dinner Sunday evening at the Lou Davis cottage at Clear Lake.

Dr. Zinn accompanied Mr. and Mrs. Clarence Kluckhohn to Mercy Hospital Monday morning where Clarence had a minor operation performed on his nose.

Valentine Josten is under the weather this week and is being cared for by his daughter, Mrs. Fred Becker, and a special nurse. A little rest and Val. wil be o. k.

Thirty Years Since San Juan Hill



SAN JUAN HILL TODAY

ROUGH RIDER STATUE, PORTLAND, ORE

COL. ROOSEVELT AND GROUP OF ROUGH RIDERS

GENERAL WHEELER AND STAFF

By ELMO SCOTT WATSON

THIRTY years ago there took place on a Cuban hillside a battle which has become a classic in American history, not so much because of its magnitude, in terms of numbers engaged and casualties suffered nor because it was in any sense a "decisive battle" in history, but because it was fought by one of the most picturesque body of troops that ever served under the American flag. For July 1 is the thirtieth anniversary of the Battle of San Juan Hill in the Spanish-American war and the famous charge and victory of the Rough Riders, commanded by Col. Theodore Roosevelt. This engagement was one of the most dramatic in that short war and it made a national hero out of the Rough Rider leader and eventually helped put in the White House one of the most picturesque Presidents the United States has ever had.

Although known officially as the First United States Volunteer cavalry, the public promptly christened them the Rough Riders. At first the men of the regiment resented that name, but finally adopted it themselves and made it even more unforgettable with their battle cry of

Rough, tough, we're the stuff,
We want to fight and we can't get enough.
Whoop-ee!

Unless it be in the French Foreign Legion or perhaps in the fictional "Musketeers" of Dumas, the Rough Riders have had no counterpart in history. No better description of this unique outfit has been written than the following by Wilbur D. French, who was one of them:

Twelve hundred as separate, varied, mixed, distinct, grotesque and peculiar types of men as perhaps were ever assembled in one bunch in all the history of man. Millionaires, paupers, shyster lawyers, cowboys, quack doctors, farmers, college professors, miners, adventurers, preachers, prospectors, Socialists, journalists, clerks, Mormons, musicians, pugilists, Jews, politicans, Gentiles, Mexicans, professed Christians, Indians, West Point graduates, Arkansas wild men, baseball players, and one—possibly two—Democrats. (All except the possiblo two were straight Republicans.) Mix the above and add some forty civilian officers. And they came from every state. Aged, as we reckon time, from eighteen (witness Archie Tuttle, Safford, Ariz.) to fifty years from time of birth, but some thousand years old in deviltry and wisdom.

Garbed in the various habilliments of the fashions of the time. The esthetic in their dude rags, standing collars and patent leather shoes, as well as hard-boiled hats. The millionaires in Fifth avenue duds, to which add a wagonload each of soil soled leather trunks and hat boxes. The cowboys in chaps, high-heeled boots and spurs. The miners and down-and-outers in soiled and ragged blue denim overalls and jumpers. The musicians brought with them their drums, guitars, fifes, cornets and violins. The gamblers, dice, cards, faro, and crap layouts. I remember seeing a few Bibles.

And to command this hard-boiled outfit were two "eastern dudes!" Both were Harvard graduates—Leonard Wood and Theodore Roosevelt. Roosevelt, then assistant secretary of war, had from the beginning of our dispute with Spain over her conduct of Cuban affairs, been insistent for intervention. So when congress authorized the raising of three volunteer regiments of cavalry from among the wild riders and riflemen of the Rockies and the great plains, Secretary of War Alger, mindful of Roosevelt's career as a North Dakota ranchman and hunter, offered him the command of one of these regiments.

But Roosevelt replied that if Alger would make his friend, Dr. Leonard Wood, colonel, he would be content to go as lieutenant-colonel. Wood, then medical adviser to the President and the secretary of war, was an army surgeon who had served with General Miles in the campaign against the Apache Indians and had been awarded the Congressional Medal of Honor for brilliant service in the Southwest. The secretary agreed to Roosevelt's proposal and the appointments were made.

In such an organization, composed of men who were, as Roosevelt himself characterized them, "soldiers ready made, so far as concerned their capacity as individual fighters," especially did the problem of discipline promise to be a serious one. For these Westerners, who composed the bulk of the regiment, had their own ideas of military formality and their general attitude in that respect is well illustrated in the following incident, among the many which are given in Herman Hagedorn's "The Rough Riders," as related by one of their number, N. A. Vyne:

Just before embarking for Cuba the ammunition for the Colt's machine guns had not reached the regiment and a trooper was sent to the quartermaster for it. General Chaffee happened to be there and the trooper, seeing that he was a high officer, rode to him and said:

"Say, Colonel Wood wants the cartridges for them machine guns a heap pronto. We're goin' aboard the ship."

Chaffee exploded and bawled him out severely and said:

"Don't you know enough to be a soldier? Why don't you dismount, salute and stand at attention till I notice you?"

"I hain't no soldier," replied the trooper indignantly. "I'm a Rough Rider!"

After a period of training at San Antonio, the Rough Riders were ordered to entrain for Tampa, Fla., where they would embark for Cuba. There the regiment suffered a bitter disappointment, for when the orders came for the expedition to Cuba it was learned that only 8 troops of 70 men each were to go (the total strength of the regiment then was approximately 1,000 men) and that their horses were to be left behind. So the "Rough Riders," probably as fine a body of natural cavalrymen as had ever been assembled under the American flag, set forth to win their laurels in Cuba fighting on foot!

They arrived in Cuba in time to take part in the fight at Las Guasimas on June 24, 1898, where a force of about 1,000 dismounted cavalry, partly regulars and partly Rough Riders, defeated nearly twice their number of Spaniards with a loss of 16 killed and 52 wounded. Of the killed seven were Rough Riders and they were buried in a common grave—"Indian and cowboy, miner, packer and college athlete—the man of unknown ancestry from the lonely western plains, and the man who carried on his watch the crest of the Stuyvesants and the Fishes." Soon afterwards, Colonel Wood succeeded General Young, who was stricken with the fever, as commander of one of the brigades in the cavalry division, commanded by "Fighting Joe" Wheeler, the famous Confederate veteran. This left the Rough Riders in command of their lieutenant-colonel, Theodore Roosevelt, and gave him his chance to become the "hero of San Juan hill."

Just as it is true that the Rough Riders did no riding, rough or otherwise, in Cuba, so it is true that their historic "charge up San Juan hill" did not, as a strict matter of fact, take place up that hill at all. The real "charge" of the Rough Riders was up Kettle hill, near San Juan hill, and the only mounted Rough Rider in that charge was Colonel Roosevelt. So the myth of "500 men on horseback standing in their stirrups and galloping along, shouting to one another like polo players, as they charged up San Juan hill," which has been often repeated needs to be corrected.

The right wing of General Shafter's army (of which the Rough Riders were a part) began its advance against Santiago on the morning of July 1. Exposed to the fierce heat of the sun and under a heavy fire from the artillery, the infantry and the sharpshooters of an invisible enemy, the cavalry division lay for some time before the heights in which the Spaniards were entrenched awaiting orders to move forward. "Throughout the morning the situation grew worse, but the nerve of the men did not give way, and American individual initiative rose to the boiling point," writes Carl Russell Fish in the volume, "The Path of Empire" in the Yale University Press "Chronicles of America." "Realizing that safety lay only in advance, the officers on the spot began to take control. General Hawkins, with the Sixth and Seventh regulars, advanced against the main blockhouse, which crested a slope of two hundred feet and the men of the Seventy-first New York Volunteers joined promiscuously in the charge." His account continues:

To the right rose Kettle hill, jutting out and flanking the approach to the main position. Facing it and dismounted were the First and Ninth Regular cavalry, the latter a negro regiment, and the Rough Riders under Colonel Roosevelt. The Tenth infantry was between the two wings, and divided in support of each. A battery of Gatling guns was placed in position. The Americans steadily advanced in an irregular line, though kept in some sort of formation by their officers. Breaking down brush and barbed wire and sheltering themselves in the high grass, the men on the right wing worked their way up Kettle hill, but before they reached the rifle pits of the enemy, they saw the Spaniards retreating on the run. The audacity of the Americans at the critical moment had insured the ultimate success of their attack and they found the final capture of the hill easy.

The longer charge against the center of the enemy was in the meantime being pressed home, under the gallant leadership of General Hawkins, who at times was far in advance of his line. The men of the right wing who looked down from their new position on Kettle hill, a quarter of a mile distant, saw the Spaniards give way and the American center dash forward. In order to support this advance movement the Gatlings were brought to Kettle hill and General C. C. Sumner and Colonel Roosevelt led their men down Kettle and up San Juan hill, where they swept over the northern jut only a moment after Hawkins had carried the main blockhouse.

But even though Hawkins and his regulars had been the first on San Juan hill, there was "honor enough for all." The charge of the Rough Riders with Roosevelt at their head up Kettle hill had been a gallant one and of the 490 Rough Riders in this engagement, 89 were killed and wounded, the heaviest loss suffered by any regiment in the cavalry division. Many more were doomed to die, either from Spanish bullets or from the ravages of disease, before their period of service was over. But when it was, their commander was able to pay this tribute to their record in his book:

In less than sixty days the regiment had been raised, organized, armed, equipped, drilled, mounted, dismounted, kept for a fortnight on transports and put through two victorious aggressive fights in very difficult country, the loss in killed and wounded amounted to a quarter of those engaged. This is a record which is not easy to match in the history of volunteer organizations. The loss was but small compared to that which befell hundreds of regiments in some of the great battles of the later years of the Civil war, but it may be doubted whether there was any regiment which made such a record during the first months of any of our wars.

Today San Juan hill is a national park, having been made that by a decree of President Machado of Cuba last year. A monument tops the hill as a memorial to the gallantry of the Americans who faced the storm of Spanish lead there thirty years ago and helped the Cubans win their freedom. But the Rough Riders have another memorial in their own land. In the heart of Arlington National cemetery is a plot of ground known as the Rough Rider plot and there stands an imposing monument which bears the insignia of the First United States Volunteer infantry and upon which are inscribed the names of the three engagements in which this regiment engaged—Las Guasimas, San Juan and Santiago.

The headstones in the Rough Rider plot carry such historic names as Capron, O'Neill, Kane and Luna; Hall, Carr, Tiffany and Huston; Hamilton Fish, Jr., first sergeant of Troop L, who was one of the early casualties in the Battle of Las Guasimas; Lieut. Thomas W. Hall and Maxwell Keyes, both adjutants, and First Lieut. James R. Church, who acted as regimental surgeon during most of the campaign of the Rough Riders. Corp. George H. Doherty, Sergts. Henry Haywood and Marcus D. Russell, Race H. Smith, Yancy Kyle, Henry J. Haefner, William T. Santo and Oliver B. Norton, battle casualties all, also are there.

And only last year another headstone was placed in this historic spot. It is a simple wooden marker, bearing the words "Leonard Wood, Maj. Gen. U. S. A."

Orchard Information

RIGHT LOCATION FOR VINEYARDS

The best location for commercial vineyards is along the shore of a lake or river. This is because the large bodies of water affect the temperature of the surrounding land, delaying the warming up in spring and retarding the cold of fall; they thereby afford protection from late spring frosts and from those of early fall, according to the New York State College of Agriculture at Ithaca, N. Y.

The outstanding development in vineyard management during the past few years, says Professor Joseph Oskamp of Cornell, has been in fertilization and pruning. Vineyards making unsatisfactory growth can be improved in vigor and production by annual applications of nitrate of soda. This, applied at the rate of about a third to a half pound to a vine, scattered broadcast in the rows when the new shoots are four or five inches long, gives good results.

The kniffen system of pruning and training vines has distinct advantages with vigorous growing varieties such as Concord. This system requires less skilled labor and less actual work for the whole season. It allows easy cultivation and the vines do not need to be tied during the summer.

The trellis for this method of pruning has two wires on the posts, one about three feet and the other about five feet from the ground. The posts should be eight feet long and should be set twenty-five feet apart, leaving room for about three vines between each two posts.

Proper Care for Spray Hose Is of Importance

There are many years of service in a good spray hose if it is given proper care, but in many cases the hose is never thought of until it is needed. It is then often found to be useless because the rubber has become dry as a result of the hose hanging in a dry shed and when pressure is applied, the hose bursts, writes J. Marshall Porter in the American Fruit Grower Magazine. Also, a good hose is often made useless because mud bees have built in it.

It is a good idea when you have finished with the sprayer to take the hose off and run clean water through it to clean the spray material out thoroughly. Then make a small wooden plug for each end to keep the bees out, coil the hose into a small roll and hang in the cellar, where there is just enough moisture to keep the dry rot from destroying the rubber.

It takes only a few minutes to do this, and one hose treated this way will outwear five that are left on the sprayer in the dry shed.

Sprays and Dusts Quite Irritating to the Eyes

A few years ago self-boiled lime-sulphur was the universal spray for peaches and Japanese plums. Today the dry-mix sulphur-lime spray and sulphur dust have largely replaced the self-boiled spray, says the Indiana Farmer's Guide. Self-boiled sulphur, even though it was messy and required a great deal of time to prepare and use, possessed one advantage over the newer materials. It caused no great discomfort to the user.

Both the dry-mix spray and sulphur dust are irritating to the eyes. It is not unusual for the user of either to suffer considerable pain unless goggles are worn, and goggles are an inconvenience to the operator, especially when spraying.

After one has used either dry mix or sulphur dust, he should before washing scrub the eyelids and eyebrows lightly with a soft brush. After washing use sweet milk in the eyes. A small eyewash cup is necessary.

Horticultural Facts

The two factors which influence the size and vigor of a strawberry plant the most, consequently the yields, are food and water.

* * *

Cultivate strawberries as you would any garden crop, by keeping down weeds and loosening the soil about the plants.

* * *

The marketing of fruit has become a big, complex problem. It is now a world-wide business in active operation throughout the year.

* * *

Don't neglect spraying the orchard because you are afraid of spray residue. Better have sound fruit with residue on than no fruit or worthless fruit without.

* * *

Spraying rigs are somewhat of a big subject. A good one is as important as the right spray. It need not cost a great lot for a small orchard. But get one that will deliver the spray in a fine mist. That's what does the work.

* * *

The cost of grafting is still a serious handicap to the method coming into practical use. Indications are, however, that cheaper methods will soon follow, and in the meantime, grape-growers are urged to give the method a trial on a small scale.

THERE Is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Document of Old Date

John W. A. Green, register of deeds of Exeter, N. H., has received a deed dated April 11, 1760, which is the oldest document to be recorded during his term as register. The deed conveys 30 acres of land in Hampton from Peter Johnson to Josiah Moulton for the sum of £2,755. It has the legal seal and reads in the thirty-third year of the reign of George II, king. The document was found in tracing a title and it was discovered that it had never been recorded.

Latest in Seaplanes

In three minutes a tiny new French airplane, said to be the smallest in the world, can be assembled piece by piece on the deck of a floating submarine and made ready for flight. It is reported to rise from the water in nine seconds and a few minutes later to attain a height of 200 feet. This kind of plane will be carried by every submarine in the French navy.

Art

"What is the difference between a violinist and a fiddler?"

"About four inches of hair."

Feature

"What are they featuring in this film?" "A million-dollar expense account."—Louisville Courier-Journal.

Retrospection is sure to be sweeter than revisiting the old scenes; they, somehow, fail you.

One Secret of Beauty
Is Foot Comfort

Frequently you hear people say, "My feet perspire winter and summer when I put on rubbers or heavier footwear—then when I remove my shoes my feet chill quickly and often my hose seem wet through." In every community thousands now use Allen's Foot-Ease in the foot-bath daily and then dust the feet and shake into the shoes this antiseptic, healing powder. Full directions on box. Trial Package and a Foot-Ease Walking Doll sent Free. Address, Allen's Foot-Ease, Le Roy, N. Y. In a Pinch, Use Allen's Foot-Ease

FARM STOCK

EDING HOGS TO AVOID SOFT PORK

red by the United States Department of Agriculture.)

e so-called soft-pork problem—the g of soy beans, peanuts and oth- ftening feeds, to hogs in such a that a firm carcass will be pro- d, and involving factors aside feed—is gradually being solved. stigators of the United States De- ment of Agriculture, co-operating several state experiment stations, just published the second bulletin the subject, known as Department etin 1492-D, "Some Results of Pork Investigations, II."

tablishment of the fact that soy s, as well as peanuts and other s, have a softening influence on has made the soft-pork problem of nation-wide importance. Soy s have a wider adaptation, are uced in greater quantity, and are sed in pork production to a great- xtent than any other recognized eding feed.

gs fed mainly on soy beans, pea- , rice polish, rice bran, or mast, ersily produce a carcass that is or oily. Soft or oily hogs are dif- t for the packer to handle. The er prefers to sell firm pork prod- to his customers because they their shape better, cut up better, present a more attractive appear- . Lard from soft hogs often is uch consistency that it will not ten even in the refrigerator. As a lt, farmers suffer a reduction in e of soft hogs averaging about 2 s a pound.

is of importance that means be sed for feeding these valuable s in such a way that they will pro- e a firm carcass. Such factors as sex, type, rate of gain, initial ght, thrift, previous treatment and ed, are regarded as having more ess bearing on the nature of the found in the hog carcass. Many binations of these factors with erent rations have been tested with ative results. In other words, the stigators have formed numerous clusions on what not to do in feed- for firm carcasses. Such results valuable in solving the problem.

e favorable conclusion recently ched, however, is that soy beans ed with a supplementary ration of per cent of shell corn, with or with- minerals, self-fed to pigs starting eights of 115 pounds and over and ing gains of approximately 40 to pounds through a period of from to eight weeks will produce firm asses in the usual case provided a sequent gain in weight is made on with tankage 1.5 times the gain viously made on the soy bean—2.5 cent corn ration.

was also concluded that soy beans ed with a supplementary ration of to 2.5 per cent of shelled corn and h minerals self-fed to pigs starting eights ranging from 25 to 85 nds and making gains of approxi- ely 40 to 75 pounds through a iod of from eight to ten weeks pro- e. In the usual case, carcasses of tisfactory degree of firmness when ubsequent gain in weight of 125 nds or more has been made by the s on corn with tankage.

copy of the bulletin may be ob- ed from the United States Depart- nt of Agriculture, Washington, D. C.

pecial Feeding Place Assists Little Pigs

ittle pigs should have a special ding place from which the sows e excluded. This special pen, called reep, need not be elaborate. It ould always be clean. It is easily vided, inexpensive, and is a very irable feature of swine raising ipment. It may be the alley or an ra pen in the hoghouse, or can be de of woven wire fence set around r posts in pasture.

creep should be so located that little pigs can run in and out at , helping themselves to shelled n, ground oats, from which the ls have been sifted, or middlings. ere feeds may be provided in feed- or low troughs. A fairly thick p of middlings and milk may be fed. ther skim milk or buttermilk may be d. Frequent changes from sweet sour milk should be avoided. oughs should be kept clean.

eeding nursing pigs in creeps, says rk A. McCarty of the animal hus- dry division of the University of nesota, lightens the load on the in the latter part of the nursing iod, brings the suckling pigs along dily and uniformly, and makes ning a very simple matter. At ning time the sows will not be so down, but will be ready in a t time for market.

Pasture for Hogs

here is not a great deal of profit pork raising if the breeder does use some good green pasture dur- the spring, summer and fall. Costs also be reduced by feeding some legume hay such as alfalfa dur- the winter months. Hogs can be duce 15 per cent more cheaply the grain ration is supplemented forage crops than by the dry lot ng method. This percentage is the difference between profit and in swine raising.

Cleanliness and Feed for Calves

Two Important Points in Successful Raising of Dairy Animals.

(Prepared by the United States Department of Agriculture.)

Cleanliness and proper feeding are absolutely essential in the successful raising of the dairy calf, says J. B. Shepherd, associate dairy husbandman of the United States Department of Agriculture, in Leaflet No. 20-L, "Care of the Dairy Calf," just issued by the department. Many small disturbances of the calf's stomach and digestive system which hinder growth and development are caused by unclean pens, bedding, feed pails and feed. Proper care exercised in keeping the pens clean and well supplied with dry bedding, in washing and scalding the pails after each feeding, and in removing discarded feed from the feed boxes each day will aid materially in giving the calf a good start.

Whole Milk for Calf.

During the first two weeks the calf should have whole milk, preferably from its mother. Six to nine pounds of milk daily for the first week, divided equally into three feedings, is sufficient for the average-size calf. This amount may be increased by three pounds a day during the second week if the calf is doing well.

A few calves are raised on whole milk, but it is usually too valuable to feed. Calves do nearly as well on skim milk, and most calves are raised on this feed. If fresh skim milk is not available, dried or powdered skim milk may be fed instead, or the calf may be raised on so-called calf-meal gruels. Although calf-meal gruels are not quite so satisfactory as skim milk, fairly good results will be obtained by proper feeding.

Beltsville Calf Meal.

A good meal devised by the bureau of dairy industry and known as the Beltsville calf meal consists of 50 parts, by weight, of finely ground corn, 15 parts linseed meal, 15 parts finely ground rolled oats, 10 parts dry skim milk, and one-half part salt.

To prepare it for feeding, mix to a smooth consistency with an equal weight of cold water. Then add 8 pounds of warm or boiling water for each pound of dry calf meal used. Stir thoroughly until well mixed and allow to stand for several hours. Warm to 100 degrees Fahrenheit before feeding. Mix only enough at one time for one or two feedings.

The best results from feeding calf-meal gruel are obtained by substituting it very gradually for whole milk after the calf is four weeks old, taking at least four weeks to complete the change from milk to gruel.

Other factors essential to success in raising the dairy calf during the first six months of life are discussed in this leaflet, a copy of which may be procured by writing to the United States Department of Agriculture, Washington, D. C.

Care for Quince

The quince naturally grows in a dwarfish or bush form. However, if plants are too thick there is no objection to cutting off a part of the old shoots near the ground and lightly cutting back the inside-growing branches of the ones that remain. This will materially reduce the amount of wood and assist in rejuvenating the plants. A light application of nitrate of soda or sulphate of ammonia would also be helpful but one must guard against fire blight which is more troublesome on rapidly growing plants.

Keep on Spraying

The fruit growers must not falter in their spray application if midsummer and fall are to bring in abundant crops of high quality fruit. If the midsummer applications are neglected, much of the benefits which should have been derived from early sprays will be lost and the pests will gain a foothold that will make them more difficult to control. Persistence as well as thoroughness is a requisite in good spraying.

Agricultural Hints

Don't be fooled by poor seed. Test it.

* * *

Be sure to keep the weeds down, and the garden well cultivated to conserve moisture.

* * *

Manure should be applied as cheaply as possible. This is accomplished by spreading it during the dull seasons of the year.

* * *

An application of manure to a meadow before a cultivated crop or before a black summerfallow will reduce the trouble with weeds.

* * *

Arsenic, the poison in spray materials, is not a violent poison to warm-blooded animals and small amounts cause no serious injury.

* * *

Winter rye makes a good fall pasture. Usually hogs can pasture until rape is ready If they are taken off in time a grain crop can be had the same season.

* * *

For a small garden the best way to head off those pestiferous striped cucumber beetles is to make box frames covered with mosquito netting, to set over the hills.

Telephone Directory vs. Encyclopedia

By RING LARDNER

To the Editor:

They seems to be a few people in the United States that still thinks we wasn't justified or something in declaring war ou Germany, but I guess these birds would feel different if they stopped to think that it was a German that invented the telephone and if Louvain and the sinking of the Louisiana was a crime, what about the invention of the telephone which comes from the 2 Greek words tele, meaning far off, and phone, meaning sound and maybe it is on acct. of me liveing in Great Neck which isn't far from the Sound why maybe that is why the telephone service isn't so—well you know.

When a man stops to think that the telephones are invented by a German, why you can't help but believe the rest about them tor inst. inventing tear gas and etc. but not only that but it also shows how vs. democracy they was when they invented something that nobody but only the leisure class can use because for inst. I and you could not never afford it even if we only figured our time ou 10c per hr. which nobody gets as little as that now days only the president of Harvard college or a soldier or something. For inst. if I am out here in Great Neck and want to talk to somebody in N. Y. City why it wouldn't only cost me about $2.00 to go down there and see them why if I telephoned it would be 30c for the call and 2 days to put it through and if I worked on a 8 hr. basis on 10c per hr. why that would be a total of $1.50 for the 2 days that it took for them to put the telephone call through where I could go down and see them and get back in 3 hrs. or some such figure.

But in the case of the leisure class, it's different as the only real work they half to do the whole yr. around is make out their income tax blanks which only takes 3 months to figure out how they can beat the gov't. and if it was not for the telephone they wouldn't know what to do the rest of their time where as now when they get tired of poker and bridge and etc. and have got a few days left on their hands why all as they half to do to kill a couple of days is try and get somebody on the telephone.

But I don't want my genial readers to think this crabby article means that I don't hold no brief for the telephone company. On the other hand, if it was not for a German inventing the telephone why they wouldn't of been no American inventing the telephone directory which is the greatest institution we got left here from a amusement pt. of view.

The telephone directory has never been gave the credit it deserves and personly I have got 1 regret in life which is that I didn't keep all the telephone directories which was ever gave to me as it would save me from buying a cyclopedia which costs $29 a case which opposed to a telephone directory that don't cost nothing if you ever get it and has got 8 or 9 times as many names in it and besides that the names in the cyclopedia is 90% dead compared to the names in the telephone directory which is only 80% dead when you try and call them up.

I also wished I could bring 4th a modern vol. to prove my assertions, but unfortunately the only telephone books I got in the house is the latest one from Great Neck where you already know the number of the grocery store and the butcher shop and the taxi cab Co. and Mr. Quan who loans you money and also the N. Y. City telephone directory of May 2, 1917, and I suppose if I live here a couple more years they will give me a October book of 1917 and keep me up to date.

So I will half to prove my point if any by quoting from the N. Y. City telephone directory of May 2, 1917, as follows as they say:

In the first place it says that usefull information can be found on Page 17. So you turn to Page 17 and the first thing that strikes you in the eyeball is a ad that says we sell artificial limbs that fit. Well, suppose that some morning you was to wake up and have a craveing for a artificial limb that fit you and you didn't know how to go about it to get one and they was not no telephone directory in the home why here would you be at? You would half to call up and ask for information which is another word for practical joke and they would finely give you a firm that sold artificial limbs that didn't come near fitting and you would buy 1 and half to walk down the st. all out of kilter and people would look at you and make you feel like a fool.

On Page 22 they give you information for telephone users which they don't claim is usefull but it says you can call information free of charge and also the Co. wants criticism but it should always be made by telephone, why by the time you reach the party it would be 3 or 4 yrs. later and the management would of changed.

All told, it looks to me like the telephone which was made in Germany was enough excuse for us fighting them where as the telephone directory which was made in America is a work that ought to go down in history like "Huckleberry Finn" or "Casey Jones" or something.

P. S. The book also says that they have got rest rooms for operators but don't say nothing about rest rooms for birds that call up.

Whale Once High in Favor as a Delicacy

The scientists who returned from the Antarctic in the famous Discovery—after two years investigation into the secrets of the whale's life—have been more interested in what the whale eats than in the whale itself as an article of food Yet, at one time in England, the flesh of the whale was esteemed a luxury and always appeared in the menus at royal banquets.

The whale, the sturgeon, and the porpoise were, in fact, regarded as royal fish, to which private individuals had no right except by special grant from the crown Even then, some portion was often reserved for the king.

The tongue of the porpoise, like caviare, was considered a special delicacy, and when Henry I—whose death from a surfeit of lampreys shows him to have been an epicure where fish was concerned—granted the bishop of London the right to all porpoises taken on his territory, he specially excepted "the tongue, which I have retained for myself."

The whale and the porpoise are not the only fish which have been eclipsed by the vagaries of taste. The herring, too, which is said to be now waning rapidly in favor, was not in early days considered too cheap a dish to set before a king. The city of Norwich used to render annually to the king 24 pies of the first fresh herrings of the season.—London Tit-Bits.

Arkansas Cotton Gin One of Earliest Made

Rambling about the Ozark mountains, an artist of Little Rock, Ark., discovered an ancient cotton gin, said to be one hundred years old and one of the oldest of its tribe. Constructed on the same principle as the roller gin and other more modern improvements, this historic ginning device differs from later structural variations only in capacity It literally represents the infancy of cotton ginning Its construction is that of a box without a top. One end is open, while the other end is fitted ingeniously with two rollers, one on top of the other. Between these cylinders the cotton was fed by hand. The opposite or eccentric motion of the half inch hickory rollers, which are fitted so closely as to gin the cotton, is secured by the belting of the wheels on each side of the open end with the wheels at the ginning end

Turning of a wooden handle at the open end fitted to one of the wheels operates the device. The wheels are bigger at the open end of the box and are connected to the smaller drum by cotton cords.

The "Seven Seas"

Col. G E. Gerini in his "Researches on Ptolemy's Geography of Eastern Asia" traces the expression "seven seas" back to Indian and Chinese legend. From the "Puranas" Colonel Gerini has made the following list of seven seas: Sea of Salt Water, surrounds India, Sea of Sugar Cane Juice, surrounds Burma; Sea of Wine surrounds the Malay Peninsula, Sea of Clarified Butter, surrounds the Sunda archipelago; Sea of Milk, surrounds Siam and Cambodia, Sea of Curds and Whey, surrounds southern China; Sea of Fresh Water, surrounds northern China and Mongolia. It is apparent, therefore, that the idea of the seven seas is of considerable antiquity and the original list may be older.

Valuable Oil

Cod-liver oil has long been popularly employed in northern Europe in rheumatic and strumous diseases. It was first brought to the notice of the profession generally by German practitioners and had acquired great reputation on the continent before it was used to any extent in Great Britain At Manchester, in England, it was employed by the medical profession in the treatment of chronic rheumatism and gout as early as 1766, but it was not until the appearance of the treatise of Professor Bennett of Edinburgh, 1841, that it came into general notice in Great Britain and the United States.

Death Double Victor

Death was twice a victor in a mighty battle between two deer for the supremacy of the forest range in Montgomery After the antlers of the deer became locked the two pulled and tugged until one fell with a broken neck Then the winner prepared to leave the scene to take up his leadership. He was unable to shake his antlers loose from those of the defeated foe. The body of the dead deer was dragged for many feet until the living one dropped from sheer exhaustion. Death overtook it in the form of starvation and exposure.—Boston Globe.

"Digger" Indians

"Diggers" was a name given to a number of tribes of North American Indians in California, Oregon, Idaho Utah, Nevada and Arizona, which speak widely different languages and comprise a number of distinct linguistic stocks. The name is used especially to designate the Bannock, Piute and other Shoshonean tribes known to use roots extensively for food and who are hence "diggers" (In English); but it is a coincidence that the terminal syllables "dika" and "tika" are common in Shoshonean band and tribal names.

NEWS REVIEW OF CURRENT EVENTS

Four Aviators Make Flight Across Pacific Ocean in Three Big Hops.

By EDWARD W. PICKARD

CALIFORNIA to Australia by airplane in three hops! For the first time the Pacific ocean has been traversed by the air route, the great feat being accomplished by two Australians, Capt. Charles Kingsford-Smith, war ace, and Charles T. P. Ulm, and two Americans, Harry W. Lyon and James Warner. Their machine was the monoplane Southern Cross, once used unsuccessfully in the Arctic regions by Captain Wilkins.

In constant communication with the mainland and with vessels by radio, the airmen made the flight to Hawaii without much trouble. The worst part of the trip was the next hop, nearly 3,200 miles to the Fiji islands, and during this they ran into repeated storms that were most skillfully dodged by Kingsford-Smith, the chief pilot. This was the longest overseas flight ever made, and if they had been forced down before reaching Suva the only possible places to light without disaster were two coral atolls in the Phoenix group 1,866 miles from the starting point in Hawaii. As is was they landed safely at Albert park, Suva, with only 30 gallons of gas left in the tanks, having made the hop in 84 hours and 33 minutes. Whites and natives of Fiji joined in giving the flyers a rousing welcome. After a brief rest the plane was flown to Naselai beach for the take-off for Brisbane, Australia, 1,762 miles away, the route taking the airmen through a region of frequent storms, south of the Loyalty islands and New Caledonia. From Brisbane they were to fly to Sydney, 500 miles to the south.

Sydney newspapers printed the report that Captain Kingsford-Smith was on the brink of insolvency and started a campaign to raise a fund for him. When the trans-Pacific flight originally was planned Kingsford-Smith sought the aid of the Australian government and it was promised. Advance payments purchased the plane and the flyer came to the United States. There followed the disastrous Dole flight from Oakland to Honolulu in which seven lives were lost. The Australian government withdrew its support and urged Kingsford-Smith to return home. He refused and continued plans for the California-to-Australia flight on limited resources and finally obtained backing from Allen Hancock, millionaire oil man of Los Angeles. But even with this backing the flyer faces financial ruin.

During the week there were reports, based on alleged radio messages, that Nobile and the dirigible Italia were on Franz Josef land east of Spitzbergen. Search for the missing explorers was continued by the steamship Hobby, by Lieutenant Holm, Norwegian aviator, and by parties of Alpine chasseurs. The Italian department of aeronautics was in communication with Captain Wilkins, hoping to induce him to join in the hunt by air.

SO FAR as the Republican national committee was concerned, Herbert Hoover was given nearly all the contested Southern delegates in the hearings conducted at Kansas City. The contests, however, it was stated would be carried before the committee on credentials and possibly before the convention. In the committee hearings the secretary of commerce won 65 out of 73 contested delegates, his most impressive victory being in the case of Texas in which he gained the entire delegation. By conservative estimates this brought the total number of Hoover votes to 472, the majority necessary to nomination being 545. The experts then figured that Mellon with his 79 Pennsylvania delegates could put Hoover across the line—if he chose to do so. The con- for the South Carolina delegation, was for Lowden, was withdrawn overites.

politicians gathered in ny expressed the opinion that Senator James Watson of Indiana or Senator Charles Curtis of Kansas would make a good vice presidential nominee. Some Hooverites especially favored Watson for second place, figuring his nomination would "pull the stinger of the corn belt."

Farmer crusaders of the regions surrouding Kansas City were preparing to move on the convention city in considerable numbers, by automobile and train, and many of them wore badges on which was printed this amended version of the Hoover slogan: "Who but Hoover? Anybody."

ACCORDING to the partial report of the senate campaign fund committee, total expenditures in behalf of the various Presidential candidates to date have been only $731,087. Of this sum the Hoover expenditures have been $380,822. Frank O. Lowden is credited with having spent $60,922.90. The committee found $579.50 has been collected and expended by the supporters of Vice President Dawes. The expenses of Governor Smith of New York, leading Democratic aspirant, were $121,471.04. Collections to the Smith fund amounted to $120,911.40. The Reed preconvention campaign fund amounted to $41,430.64. His expenditures are listed at $38,752.79.

GEN. JOHN J. PERSHING made a rush trip from Paris to Cherbourg and jumped aboard the Leviathan for the United States, and both in New York and in France the report was circulated that he was called home hurriedly by friends who were starting a boom for him as a dark horse candidate for the Republican nomination for President.

MARSHAL CHANG TSO-LIN, Northern war lord, gave up his dictatorship and abandoned Peking to the Nationalists. With his household he fled to Manchuria and just as his train reached Mukden it was bombed presumably by Nationalist agents. Some soldiers were killed and Chang himself was so badly injured that his recovery was considered doubtful.

The Nationalist troops gradually occupied Peking while forces left by Chang and those of the foreign legations strove to prevent disorder. General Hsi-shan, for years known as the model governor of Shansi province, was appointed garrison commander of the Peking-Tientsin area and at once began the work of reconstruction and development. The Nationalist government asked the immediate evacuation of American troops from Tientsin, where the United States has maintained part of a regiment since the Boxer rebellion. In Washington it was stated that our government could not comply with the request at once.

PASSING upon two cases arising in the state of Washington, the Supreme Court of the United States has ruled that evidence of prohibition violations obtained by wire tapping is admissible in a criminal proceeding and that a conviction resulting from such evidence is not a violation of the constitutional guarantee against "unreasonable search and seizure." The question was decided by a five to four ruling. Chief Justice Taft wrote the majority opinion. Justices Holmes and Brandeis, in dissenting opinions, scathingly denounced the placing of judicial sanction upon the commission of a crime to detect crime. Justice Butler also filed a dissenting opinion and Justice Stone announced he concurred with the views of Justices Holmes, Brandeis and Butler.

In holding wire tapping did not amount to a search and seizure within the meaning of the fourth amendment to the Constitution, Chief Justice Taft said that while this amendment might have a proper application to a sealed letter because of the constitutional provision for the Post Office department and because such a letter is in the possession of the government it could not apply to communication by wire.

UNCLE SAM proposes to get a lot of money from Henry M. Blackmer, the wealthy Denver oil operator who fled to France to avoid the Teapot Dome inquiry. Income taxes, interest and penalties aggregating $8,498,935 have been assessed against him and tax liens filed in Denver and New York federal courts. Also writs of attachment against any property held by or for Blackmer were filed with 22 companies or individuals, including all financial institutions in which Blackmer is believed to have accounts. In New York city they were also served upon banks with which he did business.

Only a part of the tax, interest and penalties assessed against the oil man was understood to be for his alleged profits in the Continental Trading company, an adjunct of the Teapot Dome case.

LITHUANIA'S assertion, in her recently adopted new constitution, that Vilna is the capital of the country was denounced before the League of Nations council by Poland when the council opened its fiftieth session in Geneva. Foreign Minister Zaleski submitted a copy of his note of protest to Kovno in which he asserted this could only envenom the Polish-Lithuanian relations. Lithuania's claim, he said, had no juridical foundation as Poland's rights over Vilna were definitely established by the Vilna and Polish diets and by the ambassadors' conference in 1924. It was not believed this session of the council would do much business as both Briand of France and Stresemann of Germany were absent on account of illness.

VIENNA received reports, seemingly authentic, that Ahmed Bey Zogu, President of Albania, was getting ready to proclaim a monarchy with himself as the king. He has had a stormy career, fighting with the Democrats and Liberals and once being wounded by an assassin. In December, 1924, he led a successful revolt against Bishop Noli's rule and next month was appointed President by the national assembly. He is only thirty-four years old and besides being President has held the offices of premier and commander in chief of the national forces.

PREMIER MUSSOLINI took a good deal of wind out of the sails of his detractors by the restraint of his annual address before the Italian senate. His hearers were especially interested in what he might say about the threatening situation in the Balkans, but the Duce cut out all violent talk and made a plain offer of friendship to Yugo-Slavia. Then dismissing the idea of enmity, he declared Italy could not wait forever for Yugo-Slavia to settle its domestic problems, and warned that treaties would be no good anyway if a friendly, moral atmosphere between the two peoples was not developed. He ridiculed the prediction made by a former Yugo-Slav minister that war soon would break out between the two countries, ending with a peace signed at Venice. He had nothing to say concerning the disputes with Austria about Upper Adige, but announced that a treaty would soon be signed with France that would settle all outstanding differences between the French and Italians.

Mussolini spoke at some length about the astonishing growth of the United States in wealth and world power. He said he had no complaint to make against American immigration restrictions and the Italian quota, though deploring the reasons which prompted that legislation. "As for the naturalized Americans of Italian origin," he continued, "they are American citizens and therefore foreigners so far as we are concerned. We limit ourselves to hoping they will continue to be proud of their Italian origin."

ATLANTIC CITY having abandoned its annual beauty contest, the "international pageant of pulchritude" held in Galveston attracted the attention of those who enjoy such affairs Selected beauties from many states and a number of foreign countries gathered in the Texas city, and paraded along the sea wall. Miss Ella Van Hueson, the entrant from Chicago, was first chosen as "Miss America," and then, being adjudged the most pulchritudinous of the whole lot, was crowned "Miss Universe." She is twenty-two years old, tall and slender, with long, dark brown hair. The other prize winners in their order were the girls from France, Italy, Colorado, West Virginia, Canada, Luxembourg, Ohio, San Antonio and Tulsa.

AUTO ADJUSTED TO ITS DRIVER

One of the Newer Trends in Building Motor Car Here and Abroad.

Making automobiles that are adjustable to the individual driver, instead of compelling the driver to adjust himself to an uncomfortable position in the car, is one of the newer trends in motor-car construction, both in America and abroad.

More than comfort is involved in a correct position. Sitting in proper relation to steering wheel, clutch pedal, brake pedal and controls, means freedom from fatigue and, even more important, safety in driving—for only when the driver is in proper position can he quickly and efficiently operate the controls.

Means of effecting a comfortable driving position formerly was available only in the costlier cars; now a new brougham offers an example of what has been done in the lower-price class.

Variation in Position.

A total variation of five inches in the position of the driver is provided by adjustments in the clutch and brake pedals and also in the front seats. The rubber pedal pads are mounted on substantial bars that are clamped into the clutch and brake levers proper, and these clamps allow a variation of the pedal position totaling two inches.

The adjustability of the front seat, in a fore and aft direction, totals three inches. The two adjustments, in combination, thus allow a total change amounting to five inches. The driver having unusually long legs can drop the pedals two inches and move the seat all the way back, and have five inches more room than a man of opposite build, who will raise the pedals all the way and adjust the seat in its extreme forward position.

Made to Suit Driver.

A combination of adjustments can be made to suit the stout driver. He can move his seat back to give him ample space between steering wheel and cushion, and raise the pedals to keep them in easy reach.

Relative position of front seat and pedals is of prime importance. If there is too little room, the driver will be sitting in a cramped position and will be unable to operate the brake pedal with maximum effect.

When the brake pedal is fully depressed, the driver's leg should not be extended to the utmost—there should be additional thrusting power in reserve, to exert greater pedal pressure if required.

Engine Trouble Often Is Traced to Spark Plugs

When an automobile engine misses at high speed or in climbing hills, the trouble can often be traced to the spark plugs, according to H. Rabezzana, research engineer.

Much of this trouble, he says, is due to the use of improper type plug or spark plug points being set too far apart, or because the plugs are simply worn out.

The gap between the points should not have more than .025 inch clearance or .020 inch in high compression engines.

As spark plug trouble is often mistaken for valve or piston ring trouble, the proper thing to do before making repairs is to have the plugs inspected, which will save unnecessary expense, the engineer says.

Here Is Way Jaywalker Is Cautioned in China

The Chinese system of educating jaywalkers might help in this country, according to the public safety department of the Automobile Club of Southern California.

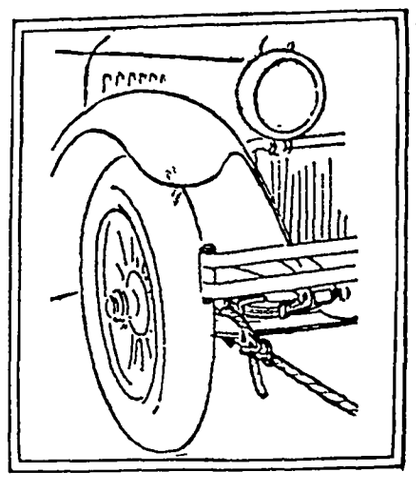
The club quotes the following admonition to the public in China:

"Now the swift motor car and the street car are just like tigers and if you do not obey the policeman's signals you will not live to grow and acquire many sons, but will be killed and your sons, too, so that your ancestral tablets will be untended. The road is like a tiger's mouth; from its center keep away."

Towing Ropes Attached to a Disabled Machine

If you have to have your car towed, or you are going to tow somebody else be careful where you attach the tow rope or you may do your car or the other fellow's a considerable amount of harm. Do not attach the tow rope to a bumper, radiator guard, or, in fact, anything else but the main structural parts of the car, such as the front axle, cross members, etc.

When your car is to be towed the best place to hook on the tow rope is the front axle. This will have to be done on the side near the steering knuckle as the front apron will prevent the rope from being hooked on



How to Attach a Tow Rope.

in the center. Be sure that the rope is hooked on the same side of the towing car as it is on your front axle so there will be no tendency toward a cross pull.

When you are towing another car you can sometimes use the rear axle, but generally there are parts in the way that prevent. In this case attach the rope to the rear spring horns, the rear cross member or even around the shackles.

Do not use the rear bumpers or spare tire bracket. Always start gently when towing a car and always signal the car following in plenty of time when you are going to stop.—Cleveland Plain Dealer.

Better Performance at Less Cost From Old Cars

How to get better performance at lower cost from motor cars that are several years old, is told in a paper just prepared by H. Rabezzana, research engineer, and known as one of the country's foremost authorities on the internal combustion engine.

To quote Mr. Rabezzana:

"Some engines after they become old have a tendency to 'pump oil.' The reason is that the rings no longer fit tightly. In many cases even new rings are of little value when the cylinder itself is ever so slightly 'out of round.' Sometimes the amount of oil that gets into the chamber is so slight that it cannot be detected as oil, but appears as a thick, or gummy soot upon the head of the piston, or on the spark plugs.

"How to keep such motors running well has long been a problem with repair men. In nearly every instance, new plugs are fouled up within a short time after installation.

"As a remedy, carbon-proof spark plugs of the correct type are the most logical plugs for engines that have a tendency to foul the spark plugs. These plugs also are desirable for cool engines.

"They have what is known as a carbon-proof insulator, with a series of high-temperature fins girdling the lower end. These fins quickly attain sufficient heat to burn off any deposits of soot or oil, thus offering effective resistance to carbon troubles."

AUTOMOBILE ITEMS

A spare fan belt should be carried in every car.

* * *

In Stockholm, says a dispatch, traffic officers carry swords. The idea sounds as if it might be worth importing.

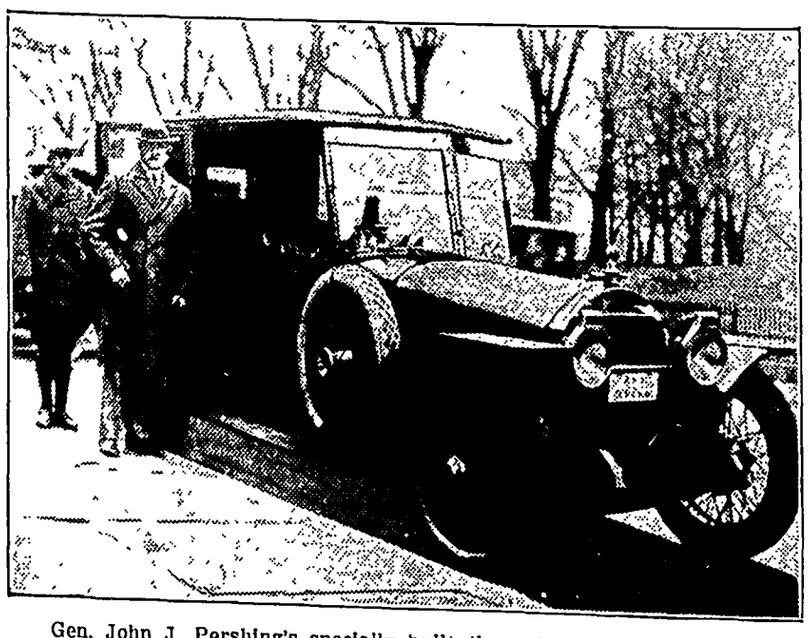
* * *

The exact holding power of each brake is easily determined, and an absolute equal adjustment may be made.

* * *

The average modern man tries to perform the difficult feat of keeping his nose to the grindstone and running an automobile at the same time.

PERSHING'S CHARIOT IN SMITHSONIAN



Gen. John J. Pershing's specially built limousine, which roared through the mud of shell-torn roads in France, is about to end its days in the quiet security of the Smithsonian museum. The photograph shows General Pershing with the car.

Phonograph Records Faces

J. L. Baird, inventor of television, has found a method of making phonograph records of faces, the Associated Press reports.

When the image of a person or object is transmitted by Mr. Baird's method of television certain sounds can be heard in a wireless receiver. Thus, according to the inventor, "some faces sound like a gargle, others like a shout."

Ring in a Potato

Thirty years ago a young woman when digging up a potato patch, lost her wedding ring. Recently one of her sons was turning over the soil when he dug up an old hardened potato with a curious wasp-waisted appearance. Examination showed that it was wearing a ring round its middle. It was the woman's long lost wedding ring, as was proved by the date and initials engraved on it.

The judgment of Solomon was great but he never tried to umpire a baseball game.

The silence of children conceals a lot of things they now.

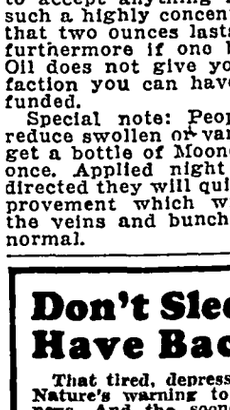
WOMAN WAS ALL RUN-DOWN

Helped By Taking Lydia E. Pinkham's Vegetable Compound



Evansville, Ind.—"I am writing to tell you how grateful I am that there is such a medicine as yours for sale in our stores. I could hardly drag around. I was all run-down. I have taken 12 bottles of Lydia E. Pinkham's Vegetable Compound so far and am going to take it until I am well. My friends notice the change in my appearance and my husband said today that I am looking so much better and he wants me to continue taking it. I hope to help all women who are run-down and suffer from nervousness by recommending your medicines"—Mrs. VICTOR N. SCHLENSKER, 44 Hazel Avenue, Evansville, Indiana.

Puts An End to Bunion Pain

No Need to Suffer Another Day

There is one simple yet inexpensive way to reduce inflammation of swollen toe joints and help get them down to normal and that is to apply Moone's Emerald Oil night and morning.

Ask any first class druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces lasts a long time and furthermore if one bottle of Emerald Oil does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of Moone's Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal.

Don't Sleep Well? Have Backache?

That tired, depressed feeling may be Nature's warning to watch your kidneys. And the sooner you heed that warning the better it may be for you.

Perhaps your kidneys and liver need help in eliminating body poisons. Why not do as thousands of others have done—try a bottle of Warner's Compound. This safe, pleasant-tasting remedy is made from Nature's own herbs and for more than 50 years it has been helping men and women back to health, according to their own letters.

Your druggist knows Warner's Compound! It costs little, but your health is priceless. Buy your bottle today and feel yourself start back on the road to health.

Sold by all druggists. Sample free.

CARTER'S LITTLE LIVER PILLS

JIMMY'S GRATEFUL REMEMBRANCE

(© by D. J. Walsh.)

MY'S conversion really dated om that memorable day when a ughty and audacious lady had temerity to call him a barImagine! A barbarian! Jimould never forget that. Had she him a "chump" or a "fat-head" ould have understood, but "barwas beyond the scope of his hension. He had but a vague tion of the true meaning of the but he was positive that it was ible thing to call a repectable garage mechanic. And the in- epithet was entirely uncalled

lady had driven up to the garage coupe, and in a cold and imperatone of voice demanded that the be equipped at once with new bands. Jimmy cheerfully comwhistling blithely as he set to In a short time the job was ed and he turned to the lady. ll done, ma'am," he announced. e's your old brakebands. Better them along with you; they're as as new yet."

en why did you take them off?" manded, frigidly.

ecause you told me to," answered y. "You didn't tell me to look us over; you just said to put on bands so I did."

t I thought the old ones were ing," she insisted.

ope, must be something else e. I'll look and see."

Jimmy set to work again, and located and adjusted the fault. the lady was peeved and rebuked in no uncertain manner. Finally burst out:

y, do I look like a bowser? w out your clutch, lady; you're lo'."

d it was then that the lady had upon him, and with all the ering scorn her voice could com- said:

gh, what a barbarian! What an barbarian!"

my was stumped for an answer, the lady had stepped on the self- and was already under way ere recovered sufficient wits to yell her:

w, so's your old man."

om which it will be seen that y was an adept at slang. As a r of fact, he took considerable in his command of slang exions, and reveled in the argulive powers with which it en- him. No debatable subject was eep or profound that Jimmy ld squelch his opponent with a well-chosen slang phrases. Did his ent wax eloquent and quote unitionable authorities or swamp him th an avalanche of facts and tics he would soon emerge triumt by simply smiling and saying: 's your old man." And that ed everything. There could be no er to that.

t, withal, Jimmy was really an st and likable young man. He simply fallen into a condition eminent educators have defined ip lazy." However, he was never to let irksome trifles annoy him eng, and as the bright summer progressed he put the haughty with unseemly wrath entirely out s mind and cheerfully meditated the fishing trips he had in view. uneventful week passed and Jimwas vexed. For no apparent reathe word "barbarian" recurred to ind from time to time, and for first time in all his twenty-two he became acutely aware of his rable lack of schooling. At last rrived at a firm decision. He go to the public library that night and look in the "diction or the "book-ionary" or what they called the big book that told bout those high-class words. And ely would he find out just what arian" meant, but he'd learn a f those high-sounding words hims so that in the future no "fresh " could humble him with a mere

mmy had passed the public library times. Its imposing architecture him with a certain awe and he ed it best to array himself in his Sunday suit for the occasion. seven o'clock he mounted the stone steps and a moment later himself amid a veritable nightof books. They hemmed him in l sides, thousands of them, tier tier. Big books that leered at slender books that froze him, fat rous volumes that glowered at contemptuous small books that ly ignored him; a bookish chasm rrors. Jimmy was about to reis steps when he heard a sweet ine voice at his elbow.

uld I be of any assistance to

turned and beheld a radiant vi- in a fluffy summer dress. Laughrown eyes, a clear complexion, , crowned by a brown mass of hair. No wonder he became y confused.

hy, yes—no, that is—I was just g for the dic-diction—" he stamhelplessly.

, you want the dictionary," she . "Right over here." And she ed him to a stand that supported massive volume. "If you have pecial etymological problems we lots of fine reference books," she ded.

o, thanks, ma'am," Jimmy re- In what he conceived to be a of nonchalance.

The girl left him, Jimmy opened the great book of random, fixing his eyes unseeningly upon the center of the page. When a suitable length of time had elapsed he intended to close the book quiet casually and saunter out of the door. But, in a short time his vision cleared and he stared intently at the words before him. He was among the R's. There was "rennet," "renounce," "renovate," "renown," and a thousand more. He slowly read the definitions. Good heavens, what a mint of words! And he had been content to go through life with but a few slang phrases at his command.

That night a new resolution was born in his mind. He would utilize the advantages that the library offered to acquire the education that had been denied him by the untimely death of his father. But it was not only a fervid impulse toward learning that prompted this worthy resolution. There was a more primitive urge—the brown-haired girl. She was assistant librarian, and Jimmy took a keen delight in her presence, in soliciting her advice and opinions in matters pertaining to books.

As summer passed and the days grew shorter with the approach of winter, Jimmy haunted the library almost every night. The bookish atmosphere imparted a subtle air of refinement to the brown-haired girl, which set her quite apart from every other girl he had ever known. To his deep gratification she proved real friendly and showed a genuine interest in his studies. And under her expert guidance his learning showed a steady progress, books had become his friends and new worlds had opened to him.

Jimmy had made some discreet inquiries and had learned that Ruth Anton, the assistant librarian, was the daughter of Professor Anton, of the state university. As a consequence he was profoundly awed. Just to think—the daughter of a real college professor. Why, he might even be an instructor of English. At the mere thought Jimmy threw himself into his studies with more fervor than ever, and progressed by leaps and bounds.

The long bitter winter passed, and blue birds and bursting buds heralded the approach of summer. It was on a warm Sunday afternoon in early spring that Ruth and Jimmy had their first ride together in Jimmy's flivver. They were driving slowly over the pleasant country roads. The conversation, which had been general, soon assumed a more personal aspect.

"Your father," ventured Jimmy, "must be a man of great learning."

"Why do you say that?" the girl asked.

"Because they don't put 'Prof.' in front of a man's name without a good and sufficient reason," Jimmy answered.

Ruth smiled with understanding.

"You've evidently been misinformed," she replied. "Dad is merely physical instructor in the college gymnasium."

Jimmy gasped, and the girl continued:

"You see, dad was quite an amateur athelete in his younger days. Later he took a course in the National School of Physical Training, where they turn out physical trainers with a degree of 'prof.'"

Jimmy gave a vast sigh of relief. He had dreaded meeting Ruth's father, having visioned him as an intellectual giant with a massive forehead. But now came the realization that "Prof." Anton's education was probably even inferior to his own. The thought gave him courage to press further attentions upon Ruth.

That was a happy summer. There were fishing and boating trips, and motor outings into the beautiful country places. And the friendship of Jimmy and Ruth had grown into a deep and lasting love.

And now there is little more to tell. In the autumn they were married. That happy occasion was two years ago, and a few days ago Jimmy was appointed editor of the American Garage Gazette. He ascribes his success to two women. One of them as Ruth, whose inspiration has never waned. The other is a proud and haughty lady who once upbraided him for needlessly changing brake bands. He made careful inquiries to learn her name and address, and upon his appointment as editor he sent her a box of beautiful flowers with a card, upon which was written:

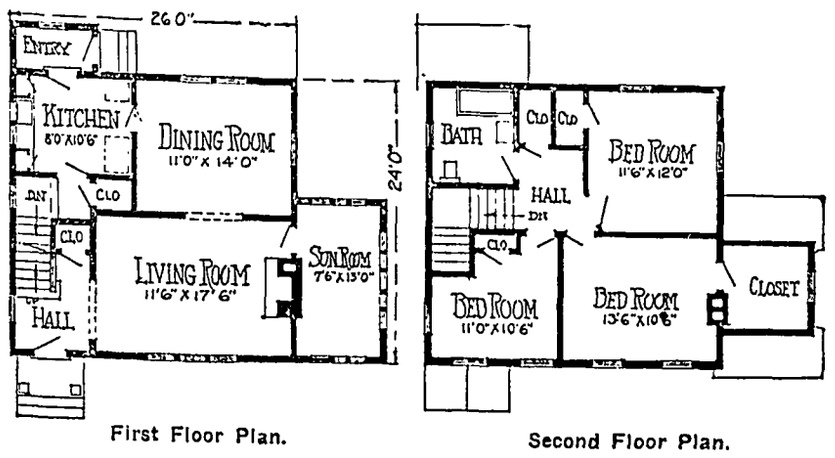
"With grateful remembrance, from a 'Barbarian.'"

Anglo-Saxons Mixture of Numerous Peoples

The term "Anglo-Saxon" is a collective name given by historians to various Teutonic or German tribes which settled in England, chiefly in the Fifth century, and ultimately merged with each other and the races which preceded them to the island. Among them were Angles, from the district of Algeiln in Schleswig-Holstein; Saxons; and Jutes, from Jutland or Denmark. Their languages were closely related Teutonic dialects which are now not spoken, but which have a sturdy descendant in the modern English language. Anglo-Saxon, or Old English, is its basis. Norman-French, Latin, Greek and other languages have contributed to it.

The Welsh are, in the main, the modern representatives of an ancient Celtic people which occupied the southern part of Britain. These sought the remoter regions of the island when the invaders came. They are far from being an unmixed stock, however. The name Welsh is akin to that of an old tribe of Gaul. It entered the Germanic tongues with the meaning of "foreign."—Exchange.

Thoroughly Modern Six-Room Home Follows Colonial Lines in Exterior



First Floor Plan. Second Floor Plan.

By W. A. RADFORD

Mr William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

On the basis of exterior appearance, this two-story gable house would be described as a colonial, and it is evident that, thus far at least, the designer followed the example of our early New England ancestors. The form is simply rectangular with a similar addition at one end providing for the sun room demanded by present-day standards and with a small lean-to addition at the rear sheltering the service entrance.

The walls are treated with the conventional lap siding, laid with wide exposure and painted in a light color in true colonial style. The entrance also adds its share to the colonial effect with its pleasing classic lines. The French doors which admit one to sun room from outside are a departure which in no way detracts from the harmony of the whole. It should be noted, too, that the style has been well preserved in the design of the garage which may be seen at the rear, a wise measure is producing a really satisfactory residence.

But the moment that one steps inside this home the colonial impression is lost for there is no central hallway, that very essential feature of the true colonial design. However, the arrangement is one which will appeal and the prospective home owner need not feel that anything has been sacrificed by this departure. Six rooms and bath are provided, as well as a sun room opening off the living room and connected with it by a French door.

This living room occupies the entire front of the house with the exception of the space required at one corner for the entrance and stair hall. At the rear are the dining room and kitchen, while above stairs will be found three large bedrooms, all provided with closets and one with an enormous closet which should delight the housewife who is ever in need of storage space.

Equipment of Kitchen Must Be Up to Date

In a recent house-planning contest in which 6,000 "ideal" plans were submitted the judges were unanimous in their report that the kitchen is the most carefully studied part of each plan.

As a matter of fact, the average housewife spends 76 per cent of her waking hours each day in the "engine-room" of the home. No wonder she is willing to forego a Queen Anne front if she has to pay for it by having a Mary Ann back.

Ideally, the kitchen should have a central location in the house, for easy access to all other parts. And in order to save miles of walking during the preparation of the thousand meals each year, it must be as small as consistent with the equipment which must be placed there—a minimum of, say, 100 square feet for the average home.

One of the most effective means of cutting down needless steps is the proper "routing" of the day's tasks by the arrangement of permanent equipment and labor-saving devices.

The before-meal work must progress along a path that does not cross and recross itself, and the after-meal work should travel along a similar short, direct path.

Those same plans also indicated what the judges referred to as "the tremendous demand for built-in features." The walls were fairly lined with permanent furniture. Built-in equipment which folds up is especially popular, as it has the added advantage of leaving the floor space free between times.

The ironing board which folds up into the wall has become an indisputable part of every housewife's plans. A close second is the folding breakfast table to which we draw up the gayly painted Windsor chairs when the waffles are ready. Both of these are to be had ready-made in desirable sizes through lumber dealers. The ironing board, especially, occupies such small wall space that it can be put into practically every kitchen.

But when planning the house-that is-to-be it is well to go into the matter of fold-ups and other permanent furniture in advance, and make our plans conform to the standard sizes in which these things are available. This foresight will save unnecessary cost.

Sanitary finish and appearance of the kitchens is a sine qua non. That does not necessarily require that everything be painted a flat white, like a hospital. Sunshine is a germicide. too—one of the best. The kitchen ought to have plenty of windows, with cross ventilation if at all possible. The matter of making the kitchen attractive and cheerful while making it sanitary is one of the most important subjects to consider

Built-In Space for Auto Now Is Popular

It is becoming more and more the custom to conceive of the home as a correlated assemblage of all the different factors of house and grounds, rather than to plan individual features without reference to the others.

During the last ten years the motor car has made it necessary to include the garage in the architectural scheme or plan, and the garage is being increasingly incorporated as an integral feature of the house.

Considerations of heating and lighting, as well as economy in construction, tend to favor the in-built garage. Placing the garage in the basement greatly simplifies the installation of heating, water and electric lines, all of which are necessary to proper care of the car. Then, too, the in-built garage permits of putting the family car or cars away wtihout leaving shelter to reach the house.

It has been frequently found that hot water or steam heating pipes, even when heavily insulated, waste a great deal of heat when run to a detached garage from the main house system. A separate heating unit for the garage is usually made rather expensive by the necessity for protection from inflammable fumes.

The increasing tendency toward full utilization of basement space, which is known to cost as much a cubic foot as the rest of the house, recommends the installation of the modern two-car garage in the basement, heretofore usually devoted to the storage of useless cast-offs which were a constant fire menace and breeding place for diseas germs.

New Interior Doors Will Neither Crack Nor Warp

Interior doors that will not warp or crack are undeniably desired features in the home. The type which answers this is the reinforced door; that is, "a door built within a door." This process combines strength with good looks, as the outer part of this door is finished in a good quality close-grained wood, adaptable to all forms of painting or finishing.

Interior decorators are now giving close attention to doors to see that they are painted in colors that will harmonize with the rest of the decorations in the different rooms of the house. The reinforced type of door, although a little more expensive to buy, is really cheaper in the long run. Once put in place, it may be forgotten.

It is never necessary to shave them down to take care of warping or swelling, as is often found necessary with a cheaper door.

The "door within a door" type is made in a one-panel door which has the graceful proportions demanded in modern interior decorating practice.

POULTRY

RAISING TURKEYS IN CONFINEMENT

America's great holiday bird is getting ready to strut again in the Middle West just as his proud ancestor did years ago. The wild gobbler was once monarch of the feathered family in the woods that stretched up and down the Mississippi valley. As he disappeared from the timber, turkeys were brought into the barnyard and an attempt was made to tame them so they could be handled as chickens are today.

But disease drove them out. Then came the apparently erroneous theory that turkeys were delicate and could not be raised successfully unless they were given an open range where they could get plenty of exercise and catch grasshoppers and bugs. That theory has been disproved.

It is now known that turkeys can be successfully raised in close confinement. This may change the entire system so that in the future the laying, brooding and marketing season can be greatly lengthened. Turkeys may eventually be produced almost the year around and be brought in fresh from the farm every month in the year. Instead of turkey raisers marketing practically all of their surplus birds at Thanksgiving and Christmas holiday seasons, as they do at the present time, they will be able to furnish fresh ones winter and summer

The production of squab turkeys, weighing from eight to ten pounds, on a year around basis may be developed in the future. It is at least made possible through the use of artificial incubators and brooders and the development of the confinement method of handling the birds. Breeders will have to change the laying habits of the turkey hen just as the poultrymen did with the chicken hen.

June Chicks as Easily Reared as Early Birds

June-hatched chicks are no more delicate than those hatched during the early part of the year, although some poultry-keepers think they are.

What makes them more difficult to rear without loss in ninety-nine cases out of a hundred is that they are run over ground that has been occupied by broods of chicks for months past.

You'll find the June chicks go ahead without mishap if only you'll give them a piece of fresh ground—ground that hasn't been used for any kind of fowls for four or five months. If you haven't much space you'll maybe find this difficult to manage, but failing grass land there is no reason why you shouldn't turn them out onto a piece of "turned" soil.

Test to Find When Eggs Will Become Fertile

A test conducted in Canada shed some light on the question of how soon after the male is introduced eggs become fertile. In this test five days after the introduction of the male half the eggs were fertile. On the seventh day 70 per cent of the eggs were fertile, and the per cent of fertility remained fairly constant at this figure.

Another test was conducted to see how long the eggs remained fertile after the male was removed. For the first four days 70 per cent were fertile. On the seventh, half of the eggs were fertile. On the tenth day after the removal of the male all were infertile.

Poultry Facts

Ask your county agent about the confinement method of growing chicks.

* * *

Feeding and housing of hens are the most important factors affecting the hatchability of eggs.

* * *

As a whole grain in the scratch feed, wheat is a very useful feed. It can be ground and used in the mash with good results.

* * *

If a turkey hen settles upon a suitable place to make her nest she should not be disturbed, but it is best to remove the eggs every day, leaving a china egg in the nest.

* * *

All notions of the warm house should be abandoned and a house built along lines that will furnish the best shelter.

* * *

As soon as the ducklings are all hatched, pick up the hen mother by the feet, hang head downward and ruffle the feathers before dusting well with insect powder.

* * *

Cannibalism among young chicks usually starts either from idleness or lack of a proper ration. Be sure chicks are fed properly and then keep them busy at all times.

* * *

Fine sand is best for the floor of the brooder house. The sand should be clean, sharp and sifted for young chicks.

* * *

Overcrowding the young chicks will cause heavy losses. Each four chicks should have at least one square foot of floor space in the brooder house.

* * *

Toe picking and cannibalism are common poultry worries. The cause is crowding too many chicks together under one hover, or an unbalanced ration—lack of protein and green stuff.

DAIRY

RAISING HEIFER CALF FOR DAIRY

In many sections of the country, where fluid milk is sold and where the T. B. test and scarcity of suitable replacement stock have brought the matter to a head, the raising of heifer calves has become an all-absorbing and important problem to the average dairyman.

On dairy farms where whole milk is sold the feed necessary to raise calves becomes a big problem. T. E. Woodward, superintendent of the United States bureau of dairying experiment station at Beltsville, Md., at the recent annual meeting of the Delaware Holstein-Friesian association, gave some pertinent information on this subject that should prove valuable to dairymen all over the country. He said: "In raising dairy calves I would use skim milk where it is available. The selling of whole milk, however, is not a real objection to the raising of calves, as a calf can be raised on a total quantity of 300 pounds of milk, if the proper milk substitutes are used, and this amount of milk will be given by a good cow during the first ten days of her lactation period.

"A number of calf meals have been tried out at Beltsville, the most successful of which are those that contain animal protein, such as skim milk powder, dried buttermilk, or blood meal. Our experiments tend to show that the milk powders seem more efficient than the blood meal.

"A good calf meal can be made up as follows: Fifty parts of finely ground corn, 15 parts linseed oil meal, 15 parts ground rolled oats, 10 parts skim-milk powder, 10 parts dried blood flour and one part salt. The use of this meal can be started when the calf is about ten days old and can be gradually increased in amount fed, at the same time proportionately decreasing the amount of milk used, until at the age of fifty days the calf will be getting all meal and no milk."

According to Mr. Woodward the above system would be practicable for most farmers in sections where whole milk is sold, and would remove the biggest objection to the growing of their own replacement stock. It is considered that the latter practice is the most satisfactory for keeping the herd free of disease and for building up the production of the herd.

Sterilize All Utensils to Keep the Milk Pure

The thorough sterilization of all utensils in order to keep milk pure is pointed out by W. E. Krauss of the Ohio experiment station in a recent newspaper bulletin. Although only a relatively small number of bacteria are present in milk as it comes from the cow, it is at once exposed to a number of sources of bacteria, the extent of which depends largely on the care in handling and on the utensils used.

In the past, hot water, steam and sometimes just sunshine have been relied upon to sterilize equipment. Steam is very effective when properly used, but many dairies are without a supply. Scalding hot water is effective as a sterilizer, but it must be scalding hot.

Recent efforts to develop chemical sterilizers have been successful and there are now a number of good chemicals on the market.

Among the chemical sterilizers, the chlorine group stand out as suitable. These are nonpoisonous and do not leave an odor. All chlorine sterilizers contain a certain amount of loosely combined chlorine. It is this available chlorine that destroys the bacteria, the effectiveness of the sterilizer depending on the amount of available chlorine present.

Since chlorine sterilizers are unstable they are supplied by manufacturers in concentrated form. They are diluted with water for rinsing, dipping or spraying utensils, after they are cleaned.

Contamination of Milk in Many Different Ways

Bacteria find their way into the milk from various sources. Some may come from the udder itself, where they grow in the milk cisterns and ducts. The greater number, however, come from the dust of the air, the dirt from the udder and flanks, from the milker, and from unclean utensils. Disease-producing bacteria may get into the milk from cows having such diseases as tuberculosis, or from people who handle the milk, who may theselves have contagious diseases or who have been taking care of patients afflicted with such diseases as typhoid fever, diphtheria, and septic sore throat.

Avoid Bad Odors

When the milking is done while the cow is digesting her feed the butter made from the milk is more likely to be tainted with undesirable flavors, especially when the cow has been on thin weedy pasture, pasture in which garlic is present, or when fed moldy or stale dry feed, cabbage, turnips, strong-odored fermenting silage, or other feeds that impart their characteristic odors to milk. This may be obviated by milking just before feeding.

Get It Here !

Another Fresh Stock Of Candy and Nickel Bars just arrived for you kids!

CIGARETTES—All Popular Brands

Just ride in your "Camel" and you'll say its a "Lucky Strike" when you smoke a "Yankee Girl." You can pay for it with "Old Gold."

MALT—ALL KINDS

If you hanker for a cool, refreshing drink try our Malt. We carry ten kinds in stock. Special pricse on case lots!

HIGLEY'S FAMOUS ICE CREAM

We have installed a new electric ice cream cooler and carry a variety of flavors. None better than Higleys—Try it.

Stille's Cafe

Hank Sez:

"We carry a full line of all kinds of CHICK FEEDS, and we don't mean maybe." "I'll say you can get your Coarse Chick Feed here, too."

"I just told the Editor to cut out that ad on Mor-Gain Pig Meal. The farmers got coming in so fast it kept us humping to get out the orders. Yep! We still have some left for you and will try to keep enough on hand to meet the demand!"

"It will pay you to buy Flour now as it is going much higher. Our Flour was bought some time ago and we filled the big warehouse. The present supply will be sold at the same old price!"

"Occident Flour and Mother's Best are the brands we sell. We don't know of any better."

North Iowa Grain Co.

Summer Foods

Right now we are specializing on foods for summer days. We aim to carry a complete line of foods that will appeal to you at this time of the year.

MAKE YOUR OWN COLD DRINKS

Mix your own cool, refreshing drinks at home by using our Fruit Syrup which comes in a variety of flavors. A pint of syrup makes a gallon of delicious drink.

FRESH FRUIT EVERY DAY

Strawberries, Pineapples, Oranges, Bananas, Lemons, Apples and Cantaloupes are fresh here every day. Buy your berries or pineapples by the crate—they are low in price this ya and it will pay you to can this choice fruit.

BAKERY GOODS

Week end specials of Fresh Cakes and a variety of Bakery Goods for your Sunday dinners. You will like our kind.

OTHER TIMELY ITEMS

A full line of Cold Meats, Pickles, etc. for picnic lunches. New potatoes now!

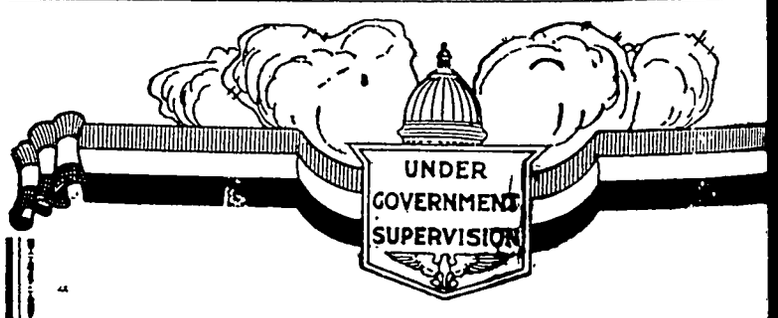
"THE FARM SERVICE STORE"



A Sly Fellow

A sly, old fellow was Tom Jones. Hard-working, honest, saving——but no faith in any one but himself. He placed his savings in an old teakettle which he hid n the corn field. Then, along came a tramp. Countless numbers today bank their hard-earned funds in the old teakettle of indifference, without thought of the tramps of senseless buying who often discover its hiding place. Place your money in a safe place. Save it at this bank.

4,000 ATTEND THE FARMERS PICNIC

WAS ONE OF LARGEST PICNICS EVER HELD IN COUNTY

Demonstrations Were Instructive To Farmers Present

It has been estimated that 4 000 people attended the Hancock County Farm Bureau Picnic held at the Eagle Lake State Park on Friday, June 15th. This was one of the largest Farm Bureau Picnics ever held, acording to County Agent L T. Nutty. The attendance in the forenoon was much larger than ever before because of the Eighth Grade Graduation Exercises and the horse breaking and hitch demonstrations.

The graduation exercises were in charge of J. R. Baggs, County Supt of Schools. One hundred fifty-five eighth grade pupils were given their certificates. Rev. D. J. Lewis of Garner was the principal speaker.

The colt breaking and multiple hitch demonstrations were in charge of H. D. Linn of the Iowa Horse & Mule Breeders Association. This was pronounced one of the best demonstrations ever put on. Mr. Linn is an expert in his line and surely is capable of teaching the best methods of colt breaking and hitching of big teams. He showed the best way of hitching 4, 5, 6, and 8 horse teams.

The main feature of the afternoon program was a talk given by Mrs. Chas. Sewell of Indiana, the Chairman of the Women's Department of the American Farm Bureau Federation. She has been active in Farm Bureau work for a number of years. She is a farm woman and still lives on a farm in Indiana. Short talks were given by H. V. Caldwell, President of the Farm Bureau and Mrs. Ernest Schubert, County Chairman of Womens Work Some good old time music was given by J. J. Hrubes of Britt and Henry Meyers of Woden. The solos by Fred Missal were enjoyed as usual. The Duncan Band furnished a good band concert during the noon hour and also after the speaking program was completed. Community singing was led by Rev. Van Metre of Garner.

In the Kitten Ball contest, the team from Twin Lake and Avery township claimed the championship honors and are willing to meet all comers next year. They played with Woden and the score was 4-2 in favor of Twin Lake and Avery. The second game was with Britt and they won again by a score of 6-1.

FRIENDS SURPRISE MISS BOCK ON HER BIRTHDAY

About Twnty Young People Gather To Make Merry At Bock Home

Monday evening at 8.00 o'clock about twenty people gathered at the home of Mr. and Mrs. John Bock, east of Klemme as a surprise party on their daughter, Miss Stella, who that day was celebrating her twentieth birthday anniversary.

Miss Bock received many beautiful gifts from her friends

The evening was spent in playing games and having a general good time, after which delightful refreshments were served to the merry-makers. The lunch consisted of sandwiches, pickles, coffee, strawberries, cake and brick ice cream. The birthday cake was beautifully decorated and the ice cream bricks had the number "20" imprinted on them.

Those present were. Mr. and Mrs. Fred Bell and daughter, Julia Jane, Edgar, Gail and Alvina Buss; Edith Haupt; Adella Kuhlmann; Harvey and Marvin Barz; Mr. and Mrs. Walter Rosendahl; Meta Lemke; Carl Bohn; N. E. Brear and Edwin Bock.

IOWA FARMS GROW LARGER AND ALSO FEWER

Contrary To General Belief Farms Are Not Being Divided

Des Moines, June 21.—Continuing the tendancy of recent years' consolidation of farms in the purely rural areas has more than offset the subdivisions around the cities during the past year, according to reports of assessors just tabulated and released by the Weather and Crop Bureau of the Iowa Department of Agriculture.

The number of farms reported on January 1, 1928, was 210,108, which is 1,529 less than in 1926, or a decrease of 0 7 per cent At the same time the average size of a farm in 1927 was 162.3 acres or an increase of nearly .9 acre over 1926. The average size of farms ranges from 121 acres in Linn county to 204 acres in Lyon county.

The total acreage reported in farms January 1, 1928, was 34,110,-172, which is far above the Government census of January 1, 1925, yet 64,675 acres less than the assessors reported on January 1, 1927.

Adverse spring seeding conditions in 1927 caused 195,739 acres of land usually in crops to lie idle which is 76,901 acres more than in 1926, or an increase of about 65 per cent. However, this is a very small per cent of the land in cultivated crops, which in 1927 totaled 21,298,051 acres. The waste land in farms amount to 301,832 acres, which is an increase of 35,691 acres over 1926, due mostly to the adverse spring weather above referred to.

SPECIAL ATTRACTION AT BAYSIDE PARK NEXT SUNDAY

Trained Animals Will Please The Children At Resort Park

Next Sunday, June 24th, Purcell and his educated horse, Peter Pan, will be at the Bayside Amusement Park, Clear Lake. This trained animal will be presented in a program of unusual stunts and tricks which will be the opening act on the free attraction bill, afternoon and evening. Another act will include a group of highly trained monkeys and dogs in more than a dozen fetes and tricks such as high diving, rope jumping, tight wire walking and so on. At three o'clock Sunday, the Bayside Cubs, an all-salaried team, will play the Dougherty nine on the Bayside diamond. Manager Ritz claims that it will be a real ball game such as was staged by the Cubs and Manly last Sunday. Musical concerts and free movies will also be provided for the Park visitors next Sunday afternoon and evening. Two public dances will be held at Bayside next week, Monday and Tuesday, June 25th and 26th. Thompson's Collegians of Des Moines will furnish the music for both nights.

KLEMME COUPLE MARRIED THURS.

KLEMME YOUNG FOLKS WED AT MASON CITY

Dolores Koerner And Levi Ridder Married Last Thursday

Miss Dolores Koerner, daughter of Mr. and Mrs. Albert G. Koerner, and Levi Ridder, son of Mr. and Mrs Fred H. Ridder, both of this place, were married at Mason City last Thursday forenoon, June 14 by Rev J F. Boeye, pastor of the M. E Church, at his parsonage at 116 North Washington avenue. They were attended by Mr and Mrs. S. A Harvey, of Clear Lake, sister of the groom and her husband.

Following the ceremony they returned to Klemme where a wedding dinner was given in their honor at the Koerner home. Following the dinner the newlyweds left on a trip thru the Black Hills, the Yellowstone and other points of interest in the West where they will camp and tour until their fancy turns them homeward

On their return they will establish their home at Manly, Iowa, where Mr. Ridder recently purchased a billiard parlor which he will operate.

Both of these young people grew up in this comunity and attended the Klemme schools.

The Times joins with the many friends of this young couple in extending best wishes and congratulations.

MARRIAGE LICENSES ISSUED THE PAST WEEK

Four Couples Granted License To Wed In Hancock County

Four couples secured marriage licenses from Clerk of the District Court, Chris J. Johansen, the past week

On June 14th, 1928, Cecil Griffith, Kanawha, and Pearl Gorton, Kanawha, secured a marriage license. The same date a license was also granted Alrich Burm and Annie Albers, both of Buffalo Center.

The following day, June 15th, the former day's record was again established. On that date Leo Powers and Velma Brown, both of Mason City were given a license to marry. Later in the day Earl Junker and Pearl Langland, who came all the way from South Dakota to get spliced, were given a marriage license. The couples who secured permits the 15th were married by Rev. Walsh.

KLEMME FOLKS ATTEND M. E. PICNIC AT ALGONA

Rev. and Mrs. A. W. Gauger and son William, and seven or eight families from Liberty township and quite a number from Garner, drove to Algona Tuesday to attend the big Methodist picnic held at the fair grounds.

Sports of various kinds began at 9:30 A. M., and the speaking was held in the afternoon beginning at 1 30 and addresses by Dr. Roy Smith of Minneapolis and Dr. Ralph Ward, of China were enjoyed.

Music was furnished by the Algona Band.

BABY BEEF CLUB TOUR OF HANCOCK COUNTY

Tour Was Postponed One Day And Will Be Held Wednesday

The Baby Beef Club Tour will be held Wednesday, June 27th, instead of Tuesday, June 26th, as was announced before. The tour will begin at the J. M. Townsend farm west of Britt at 9:00 a. m. All members of the Club will be visited during the day.

ENJOYED VISIT IN GERMANY

MR. AND MRS. GEO. ALBERS RETURN FROM LONG TRIP

Related Many Experiences In Old Country Visit

Mr. and Mrs. George Albers got back home here Sunday morning, after an absence of ten weeks, six of which were spent in Germany where they visited relatives and old friends whom they had not seen for nearly forty years.

The trip across was made on the steamship Roosevelt and a couple of days of exceedingly stormy sea was encountered. However on the return trip which they made on the ship George Washington, a vessel 850 long and 100 feet wide, nice weather and a calm sea was enjoyed all the way home.

Mrs. Albers has some brothers and sisters who live in Germany, and both Mr. and Mrs Albers have a number of cousins there, and it was among them that most of their visit was made During their six weeks stay in Germany they did not spend more than one day at a place so they covered a lot of territory. They made use of automobiles for transportation and found many cars of American make there, such as Fords, Buicks, Chyslers, etc. The popular German make car seemed to be one called an Opel.

Mr Albers says he saw a few airplanes in Germany, and in England a lot of sea planes. Every driver of a car must pass an examination and is a licensed driver, one point where they are ahead of the car owners here.

Mr. Albers related many interesting customs which time nor space does not permit us to quote, but we mention a few.

It is the custom everywhere to serve tea as soon as visitors arrive. They use black tea and Mr. Albers said he consumed more tea than his stomach could conveniently hold.

He remarked that the people are all very polite and accomodating and tried in every way to make the visit enjoyable.

Mr. Albers says the people of Germany hold the Uunited States in high esteem and look to this country as a model and are rapidly adopting American ways of living and doing business. They hold no bitterness whatever toward the U. S. as a result of the war, but on the other hand rather look up to America. As to conditions in Germany, the country is in poor condition in a financial way, but the people are making the best of it and are trying to be happy and contented and show a fine spirit all the time.

In most ways they are a hundred years behind our time, except in their schools and churches. They have very fine churches and schools and are strict in these matters. Mr. Albers described a church they visited which history claims was built nine years after Christ and the minister in charge told them many interesting facts about it.

The world is not so large after all, according to Mr. Albers, for at Leer he found a picture of Mr. and Mrs. W. F. Pavey of Klemme.

Asking him a number of questions we were told that he saw no chewing gum in Germany and was unable to buy ice cream, but was told that in certain parts of Germany ice cream could be purchased.

Music is highly developed in the country and Mr Albers says he always enjoyed the evenings when the young people would gather and sing and play. He remarked about one impromptu "orchestra" which gathered one evening, consisting of a mandolin, a snare drum and a comb covered with paper, and the music created was wonderful and soon the whole gang was singing at the top of their voices.

A visit to an old aunt of Mr. Albers proved interesting. The lady lady was 84 years old and told of many interesting, and sometimes, sad and touching experiences.

People in Germany are not afraid of walking and one day a lady 59 years old walked a distance further than from Belmond to Klemme just to pay them a visit, and remarked it was nothing at all to walk that short a distance.

Mr. Albers described a project he saw where they were re-claiming sea land by building huge dikes in the sea and where they pumped the soft earth from the sea over the dikes a distance of at least six U. S. miles and the land thus re-claimed is used for farming.

He described the trains as mere toys, and although they ran about every half hour, they were slow in travel and it was far more convenient to use cars to travel. In fact he claimed had it not been for automobile transportation he and Mrs. Albers would not have seen much of the country.

Most of the houses, and even the stores in the cities are one story affairs. The streets are very narrow. However, the buildings are all constructed of brick or stone and many are hundred of years old, but in fine condition. Although the exterior looks old and worn, the inside of the houses are spotless.

Dairying is the chief industry of the country and the dairy herds are the finest Mr. Albers has ever seen He says are best dairy cattle look like scrubs compared to Germany's dairy cattle. They have built up a wonderful art in dairying of all its branches.

An interesting part of their trip home was taking on board at Cherbourge, 325 American soldier from Pennsylvania, who had spent Memorial in France. He says they were fully equipped and were a fine lot of men.

Mr. and Mrs. Albers were happy to return to the good old U. S. A. and said they do not care to again return to Germany, even for a visit, and would not live there on any condition. However, they enjoyed a wonderful time and the people all were exceedingly courteous to them and make their visit a most pleasant one. Although Mr. and Mrs. Albers were strangers to many they were soon made acquainted and Mr. Albers says they certainly made a lot of friends the short time they spent in Germany.

Most of the people they talked to, and especially the younger folks, expressed thatt he main ambition was to come to America if they ever could.

Mr. and Mrs. Albers brought back with them some sovenirs, a silver tea sets, gold lockets, jack knives, and two wine bottles containing a carved ship with sails set, on the inside, a difficult piece of art to execute.

We welcome them back to the U. S. A!

SOME STRAWBERRY DESERTS HINTS FOR YOU TO TRY

Delicious When Combined With Whipped Cream Or Gelatine

In strawberry season most folk find strawberries and cream a delicious combination, but it is sometimes desirable to add a bit of variety in combining these and here are two methods suggested by Miss Lucile Horton of the Home Economics Division, Iowa State College. One is to make strawberry ice cream and the other is Strawberry Bavarian Cream. The recipes follow:

Strawberry Ice Cream

1 quart thin cream
1 cup sugar
1 quart strawberries

Wash andh ull berries. Sprinkle with the sugar. Let stand 1 hour. Mash and rub thru a strainer. Add the cream and freeze.

Strawberry Bavarian

1 tablespoon gelatin
1 cup strawberry juice and pulp
2 tablespoons lemon juice
3-4 cups sugar
1½ cups whipping cream
¼ cup cold water

Soften the gelatin in the cold water. Place over hot water until dissolved. Mix strawberry pulp and juice with lemon juice and add gelatin mixture. Add sugar. Stir thoroly and place in a refrigerator(or pan of cracked ice and water) until partly thickened. Then fold in the cream which has been beaten until stiff. Pour into a mold or pile lightly into a glass serving dish. Garnish with whole strawberries.

BOY SCOUT HAVE OVERNIGHT CAMP

KLEMME SCOUTS ENJOY FIRST NIGHT CAMPING OUT

Beautiful Sight Selected At Goodell Woods For First Camp

The Klemme Boy Scout Troop, about twelve in number, under the leadership of Rev. Calvin Grosshuesch went to Goodell Woods, and selected a likeable spot east of the Bielefeld place where they erected tents last Thursday afternoon and spent their first night out of doors in real woodsman style. C. A. Larsen provided transportation both to and from camp for the boys, tents and equipment.

Each boy brought along his eats for supper and breakfast and cooked his own grub in the open. Several boys satisfactorily completed their second class scout test in building a fire in the open, using not more than two matches and with material picked up in the woods. Many of the boys built their fire with but one match Scout Turgasen acted as patrol leader during camp.

At the evening council fire the boys were visited by Dr. and Mrs. W. F. Missman and Mr. and Mrs. R. A. Jorgenson and son, Buster. The visitors brought along a liberal supply of p p corn which was rapidly consumed by the Scouts.

"Watches were kept thruout the night and each boy, in company with one other had a taste of guard duty.

The Boys all agree they have learned more of camp life by their night's experience and returned to Klemme the next morning more wise in the ways of the woods than before and found that one needs a surplus of covers for outdoor sleeping.

WILL WIDEN BRIDGE EAST OF KLEMME SOON

Bridge In Present Condition Danger To Travel Over

Recently residents of Ell township and vicinity petitioned the county for a wider bridge east of Klemme on the new county road near the Albert Barz farm.

The cement bridge was constructed was then wide enough for the road Since the new county road has been built the bridge is not as wide as the road and consequently the abutment or rail of the south side of the bridge now projects up above the road and nearly in the center. In this condition it is of quite a danger, especially should strangers travel that way at night who could easily hit the rail and a serious accident result.

The matter has been referred to County Engineer C. F. Merten, who advises that he will prepare plans for an extension to the bridge and the work will be let at the next bridge letting.

BIRTHDAY SURPRISE PARTY FOR MRS. WESSELS

Sunday being Mrs. Leppo Wessels birthday a number of relatives and friends gathered to surprise her. Accordingly, all brought well-filled baskets of good things to eat and at the proper time set a large table out in the yard under the apple trees and enjoyed a well cooked dinner.

Mrs. Wessels was also pleasantly surprised when she was presented with many fine gifts.

Those present were: Mr. and Mrs. Wm. Wenz; Martin Peterson and family, of near Ventura; Mr. and Mrs. Will Roswag, and Mr. and Mrs. Ben Roswag from near Garner; Mr. and Mrs. Anton Nelson, and family of Miller. Fred and John Wessel of near Klemme came home to spend the day and help with the birthday celebration. All present report a very fine time.

LIVE STOCK

DRENCHING LAMBS AND BREEDING EWES

Stomach worms get in their deadly work with lambs during hot weather. During July, August and September, these young animals should be drenched with the bluestone treatment every few weeks. The treatment, according to Prof. R. S. Curtis of the North Carolina State college, consists of 1 per cent solution of copper sulphate thoroughly dissolved in water and given at the rate of two ounces per dose. This is approximately one-third the amount in a common bottle of soda water and this can be used as a safe guide in drenching. The older sheep should receive a somewhat larger dose but there is not the same danger of worms in the old sheep as in lambs, states Professor Curtis.

All the lambs for market should be sold early in July, leaving only the ewe lambs which will be saved for future breeding.

"Sheep growers should keep in mind that if they are to have an early lamb crop, the mature ewes must be bred in July," says Professor Curtis. "Late lambs are never profitable. They fail to develop properly in hot weather and finish at a time when the market is low. Ewes should be bred to lamb in January and February."

Professor Curtis states that any breed of sheep will breed early if properly handled. The lamb should be removed in early July and the ewe turned on fresh pasture with little grain fed to her. She will soon gain flesh and will breed easily. A ewe losing in weight will not breed, according to experimental tests.

Sows With Paralysis Given Faulty Ration

Many brood sows with their spring litter develop paralysis, that is, they go down in the back and are unable to get up. This condition is caused by failure to feed the sow a complete ration.

Her ration has been deficient in minerals and, due to the heavy demands for the developing litter as well as for the making of milk to supply them after birth, she withdraws calcium and phosphorus from her skeleton, with the result that she develops this condition, which is always serious and many times fatal.

The bones become soft and are easily fractured. If treatment is begun in time and there has been no fracture of any of the bones, recovery will take place in from three to six weeks.

The treatment of this condition consists of supplying the deficient minerals and for this purpose the best method is to take 100 pounds of tankage and add to it 15 pounds of bone meal.

One of By-Products of Dairyman Is Veal Calf

Packers are accused of saving everything but the squeal of the hogs. These by-products supply the incomes that turn their business into one of America's greatest industries. One of the by-products of the dairyman is the veal calf. With a little more attention given to the production of the proper kind of a veal this by-product can be made to bring to the farmer a good income.

This again is the old story of producing what the consumer wants and is willing to pay for. Veal is still classed as a luxury. It is the production and use of luxuries in America that makes this country the envy of all others. It is not often that the farmer can have the privilege of producing high-priced luxuries. Veal and calf livers are classed as luxuries and to be continued in that class they must be placed on the desired quality basis.

Live Stock Items

Give stock access to salt.

* * *

Corn silage usually produces over twice as much gain on cattle as does sorghum silage.

* * *

Pigs will consume enough alfalfa if good quality hay is kept in a rack where they can help themselves at any time.

* * *

Wormless pigs are the profit makers in the hog-growing business. The runty pig never has been profitable; it never will be.

* * *

Brood sows need exercise. They also need alfalfa in the ration. If the alfalfa is fed in a rack placed some distance from the place where the sows sleep, they will get both exercise and alfalfa.

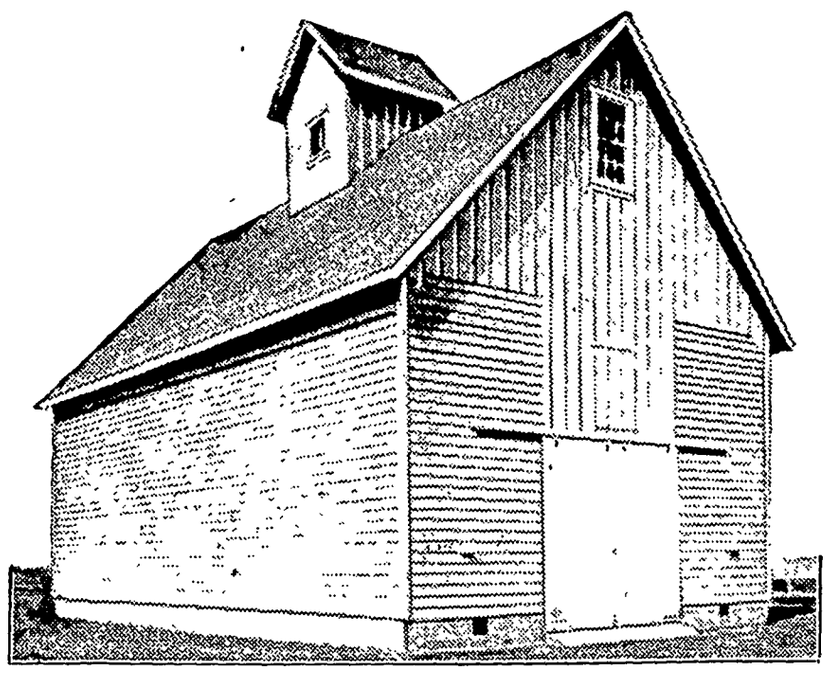
* * *

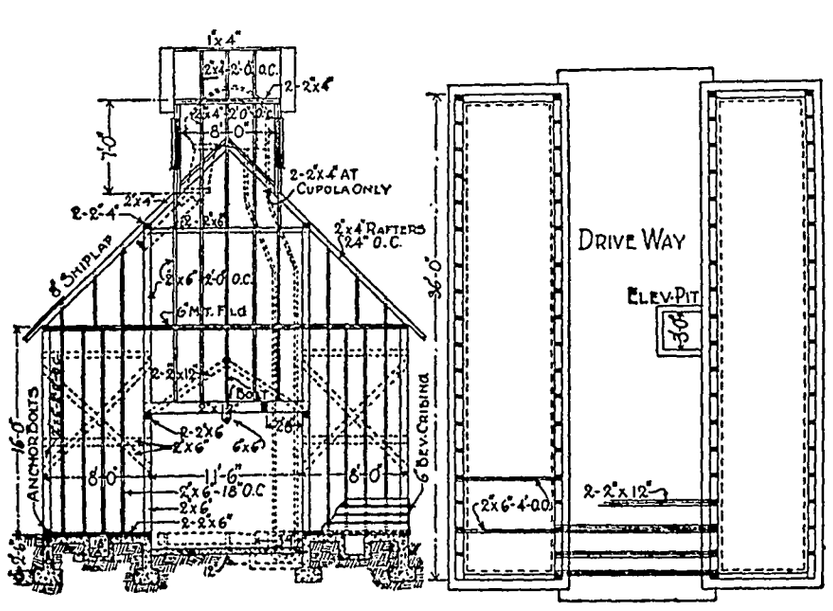
To insure a big pork crop plans must be made and precautions taken long before the pigs are farrowed. The surest plan is to start with the sow some months before farrowing, especially for spring pigs.

* * *

Grain alone is a poor feed for brood sows. Experiments have shown that sows fed only ear corn farrowed weaker, smaller pigs, sometimes with injury to themselves, than did those that were fed some alfalfa or clover hay and a little tankage along with the corn.

High Corn Crib With Elevator Saves Labor in Storing Crops





By W. A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Better prices for grain this year make it all the more important that the farm have a good building to house the crops in. Here is a design for a high cornerib and granary which is equipped with a power elevator. This building is 28 by 36 feet. On either side are cribs for the ear corn, each 8 feet wide and through the center runs a driveway, 11 feet 6 inches wide. Over the drive are the bins for small grain.

The sides and ends of the crib sections of the building are constructed of open siding so as to permit the circulation of air which dries out the corn and keeps it in good condition throughout the winter. Where the bins are located is a tight wall construction with the floor and sides of the bins consisting of matched, finished lumber.

One of the principal features of the building is the power elevator located in the center of the driveway. This elevator carries the ear corn from the dump to a swivel spout in the cupola. The spout may be turned so that the ear corn is thrown into either one or the other of the two cribs. Such an elevator is a labor-saver and cuts the cost of storing the crop.

Readers who are interested in building such a cornerib and granary as this can secure blue-prints of the building free by asking for them.

In writing state the size of the building wanted or give the capacity in bushels desired. Just address your letter to R. D. Radford, Editor of Better Farm Buildings department, Farm Mechanics Magazine, 1827 Prairie avenue, Chicago, Ill.

Built-In Units Mean Modern Type of House

One of the first things to do in buying a home is to make sure that it contains the indispensable built-in conveniences, advises E. J. Welsh in the current issue of Your Home Magazine.

Of course every housewife and even most men know enough to look at the closet space, but, according to this authority, there are other built-ins that are really just as necessary, particularly when the floor space is limited. If the house does not contain them they can be easily added, he says, even if it is an old house.

"The kitchen features," he writes, "should include a liberal amount of cupboard room, comprised of both shelves and drawers, perhaps also a sliding breadboard and a cabinet or disappearing ironing-board. A work table, quite handy when an extra table is demanded, is another built-in feature that is popular with housewives. This folds up into a small case when not in use. In the dining-room, corner china cases add beauty to the room and are very practical. For the small home, a dining alcove takes up no more than one-fourth as much as a dining room and still it has all the accommodations necessary for a family of three or four.

"In the living room or library, both architectural and decorative beauty is added by built-in bookcases."

Other built-in conveniences suggested by the writer in Your Home are dressing tables, telephone cabinets, medicine cases and linen cases. He concludes, "A good rule to follow in selecting built-in items is to choose such designs that you know will not go out of style. A well-designed article is a joy for all time, and the older it gets the more beautiful it grows."

Easily Renewed

Almost all the smaller articles about the house may be given a new lease of life and the affections of the housewife by a few coats of paint or of the new brushing lacquers. Careful preparation with sandpaper and adherence to instructions in use of the finish will assure a good job.

Folding Beds

Folding door beds, which pivot into closets when not in use, are now available in period designs, both in double and single types. Some of the new beds have coil-type springs greatly increasing their comfort.

Masonry Home Can Be Built Dampness Free

Care must be taken, in the home of masonry construction, to prevent the possibility of penetration of dampness, with its destructive effects on interior plaster and wall decoration.

In brick construction the quality of the bricks themselves and the inclusion of a waterproofing compound in the mortar mix are the governing factors. With reasonable attention brick construction is made impervious to moisture.

Hollow tile offers good resistance to dampness, but the same provision for dampproofing the mortar must be made. Where concrete block is the material used, the block should be of known quality, made with an adequate amount of portland cement and clean sharp sand. Certain types of stone are entirely unsuitable to exterior use because of a high rate of absorption, and the quality of any stone used in construction should be carefully guarded.

Peeled wall paper, mildew, ugly blotches on painted plaster and other unpleasant consequences wait upon the owner of a masonry home in which no provision has been made for waterproofing.

Stone Chimney Adapted to Any Type of Home

About the chimney of stone there is always the appeal of things which are a direct product of nature.

In such material, the chimney will blend with the color and texture of almost anything else. As evidence of this, we see stone chimneys used on houses of stucco, brick and wood.

Like all other chimneys, that of stone requires an adequate footing of concrete, placed on firm, tamped ground or stable stone. This should extend well below the frost line.

Good portland cement mortar should be used for the joints, and the flues should all be lined with fire-clay lining, preferably in round shape to insure proper draft. All framing woodwork should be insulated from the chimney by asbestos or metal.

Window Shades

There, where the light comes in, the beauty of the whole room begins. And fully exposed to the light itself are the window shades. Three things are essential in window shades—long wear, harmony with the room, color and furnishings and smooth, precise operation.

POULTRY

SEPARATE SEXES WHILE YET YOUNG

When the cockerels in a poultry flock reach a live weight of from one and one-fourth to two pounds each they should be separated from the pullets and put on a different range or in another inclosure. This will aid in the growth of both the pullets and cockerels, according to the poultry men at the New York State College of Agriculture at Ithaca. They explain that the pullets will be less crowded and will thus have a better chance to eat and grow.

The cockerels fight less and grow faster when they, too, have less competition in their range area and roosting quarters. They should have a shelter house, preferably among trees, to insure shade and open air roosting places. To raise vigorous males for breeding purposes the cockerels should be grouped together by size and vigor; all should have large range areas, with feed hoppers and water troughs in at least three separate parts of the range so that there will be less chance for intimidation and consequent undernourishment for the smaller birds.

In choosing cockerels for breeding or for market, begin the selective process as soon as the birds begin to show marked sexual characteristics. The time may vary according to breed and feed, but for leghorns they may be selected first at from six to eight weeks of age, and from ten to twelve weeks in the heavier varieties. The earlier the market cockerels can be separated from the rest for crate fattening, the better, because the price by weight for broilers decreases with the season faster than the birds can put on weight.

Broilers Bring Profits Now Only When in Prime

New Jersey poultrymen having surplus cockerels to dispose of as broilers are finding that there is little or no profit in them unless they are in prime condition.

Because farmers in all parts of the country are getting rid of their excess young male birds during May, June, July and August, the market offers only moderate prices. Birds in poor or only fair condition are sold at a loss.

"Observation has shown," says C. S. Platt, assistant poultry husbandman at the New Jersey experiment station, "that the poultrymen who have their broilers always in prime condition and ready to sell at a moment's notice, make the greatest profits through their ability to take advantage of favorable turns in the market. These men start with young chicks and by proper feeding and management endeavor to get rauid, uniform growth. No finishing is necessary. From the time the birds are first large enough to sell as broilers, until they are finally sold, they are in prime condition."

To cause this favorable growth poultrymen keep the birds confined and feed them a special ration.

Laying Mash Suggested by New York Station

An egg is a pretty complicated thing, and the hen that makes it needs a lot of material of different kinds, especially if she is going to do herself proud and make you a profit by a big year's output.

The ingredients commonly used in egg-laying mashes, says the New York agricultural experiment station, are wheat bran, wheat middlings, linseed oil meal, corn gluten feed, corn meal, ground oats, alfalfa meal, meat scrap, fish meal and dried buttermilk feed.

Of course you don't use all of these materials at the same time, but you need several. The Cornell mash, for instance, which has become so standardized that dealers are putting it on the market already mixed, consists of "equal parts by weight of wheat bran, wheat middlings, corn meal, ground oats and meat scraps."

The above mixture makes a pretty good growing mash, too, except that rolled oats or oatmeal may be used in place of the ground oats. Bone meal or lime is also usually added.

Size of House

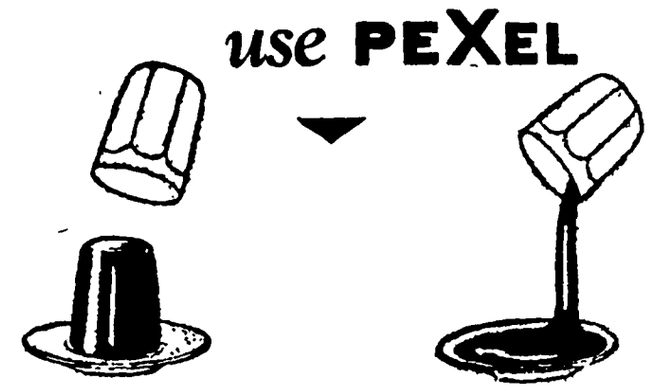
Most authorities recommend a poultry house 16 to 20 feet wide facing the south with single slope shed roof, or one 20 to 25 feet wide with low double roof. Half-monitor poultry houses are not very popular because of the large amount of waste space at top. From three to five square feet of floor space per fowl is recommended, depending on type, with four square feet as a good working rule. For a house 16 feet wide, this would mean four fowls per foot length.

Poultry House Floors

Poultry authorities differ as to best floor for poultry houses. Important things are freedom from dampness, cold, drafts and dust. Double wood floors with heavy paper between are much used and very good, except that they are short-lived and do not keep out rats. Dirt, gravel or sand-clay floors are dusty and harbor rats and are hard to keep clean. Cement floors are satisfactory when properly made. Foundation walls should extend 12 to 18 inches [illegible] the ground.

The new rule for making jelly jell

use PEXEL



always this — never this

PEXEL will surprise you with its speed and economy in making jelly. Does not change the color or flavor of your jams or jellies

USE any fruit you wish—the one that failed before. Add Pexel to the juice and bring to boil. Then add sugar. Bring to full boil again. Skim. It's finished. Pour into glasses. You've made the most delicious jelly in all your experience—*and it will jell by the time it is cold.*

In addition to making jelly jell, Pexel is economical and saves time. Cuts out the long boil. Makes more jelly because fruit juice, sugar and flavor don't go off into steam. Time and fuel are saved. Countless tests show that Pexel repays the 30c it costs from one to three times.

Pexel is different too! Made entirely from pure fruit. Tasteless, colorless, odorless—absolutely. A powder—not a liquid. Keeps indefinitely. Equally effective with bottled fruit juices or unsweetened canned fruits.

Get Pexel from your grocer. Only 30c. The recipe booklet in every package gives easy-to-follow directions and accurate tables. The Pexel Company, Chicago, Ill.

A few examples of how much jelly Pexel makes:

4½ cups strawberry juice, Pexel, 8 cups sugar make 11 glasses jelly.
4½ cups raspberry juice, Pexel, 8 cups sugar make 11 glasses jelly.
6 cups currant juice, Pexel, 10 cups sugar make 14 glasses of jelly.
4½ cups grape juice, Pexel, 7 cups sugar make 10 glasses of jelly.

new

Electrical Prospecting

The method of electrical prospecting for minerals, which is now being employed in northern Manitoba, consists in the detection and measurement of the electrical currents that are spontaneously generated within certain types of ore bodies. These currents are due to the chemical action of ground waters on the metalliferous minerals present in the ore. The best of these are not as good conductors as pure metals, but their conductivity is of the same order of magnitude, as there is a tremendous difference between the sulphides and the ordinary rock-forming minerals; in other words, in the country rock outside little or no indications are obtained, whereas on the metalliferous ore body there are very strong indications indeed.

British Empire Largest

The British empire covers more territory than any other country in the world, comprising 13,226,749 square miles. France and her colonies comprise 5,870,461 square miles.

Here's Speedy Relief From Bunion Pains and Soft Corns

Get a two-ounce bottle of Moone's Emerald Oil (full strength) today. Every well stocked drug store has this, with the distinct understanding that your money will be cheerfully returned if it does not reduce the inflammation, soreness, and pain much quicker than any remedy you ever used.

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the inflammation is gone.

And as for Soft Corns a few applications each night at bed time and they just seem to shrivel right up and come off.

No matter how discouraged you have been with pads, shields, or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—the combination of essential oils with iodine and other antiseptics so mixed that thousands of bottles are used annually for reducing varicose veins.

Every good druggist guarantees the first bottle of Moone's Emerald Oil to end your foot troubles or money back.

...DS OF CAR BEFORE STARTING ON TRIP

Typical Canadian Summer Camp.

...touring, the summer pastime ...tions, is pleasant directly in pro... to the manner in which the ...erforms, in the view of officials ...American Autlmobile associa... It is estimated that 44,000,000 ...s will take annual vacations ...ear on the open road.

...close relationship between the ...re of the tour and the condition ...e car should suggest to every ...ective tourist the wisdom of see ...at the car is performing at its ...before the trip begins," says a ...ent.

...ttery, generator, distributor, ... plugs, valves, carburetor, fuel ...system, clutch, transmission, dif... ...ial, crankcase lubricant, oil fil... ...teering mechanism, brakes, tires ...g system, and wheel bearings are ...ults chiefly recommended by the ...A. emergency road service ex... for attention before a tour. Sum...ing the probable services that will need, the statement lists:

...ttery—Remove corrosion from ...nals and inspect connections to ...that they have not been eaten ...e acid. Replace suspected con... ...ons. Coat terminals with vase... ...or grease. Fill cells to recom...ed level with distilled water.

...nerator—If device is not auto...ally controlled as to output, have ...ging rate reduced for the tour. It ...lishes the load on the generator, ...e turning on the lights serves no ...r purpose than to keep the bat... ...from becoming overcharged, ...h is not so likely as generally be...ed.

...stributor—Clean and adjust ...er points. Apply a thin film of ...e to the cam.

...ark Plugs—Clean and check ...s for condition and clearance. ...acement, if the plugs have seen ...ar's service, is generally advis...

...ives—It will pay to have the valves ground if this has not been done for 7,500 miles, regardless of the gasoline one uses. Valves must seat properly for efficient engine performance. For the tour, it is not wise to adjust them too closely. This means quick valve deterioration and poor performance. Look sharply for burned exhaust valves during the grinding process.

Carburetor—Clean strainer at bottom thoroughly. If mixture is suspected of excessive richness, have it adjusted by an expert.

Fuel Feed System—Drain taps at bottom of main gasoline tank and vacuum tank. Blow out the feed lines.

Clutch—If the release bearing is not the self-lubricating type, take up one turn on the grease cup, the commonly used substitute. Be careful not to turn down the cup so far as to get grease on the plates. Slipping of the clutch is sure to follow.

Transmission and Differential—Drain and flush case and housing and fill up with fresh lubricant.

Crankcase—Drain out old oil, flush with light oil, and refill with the normal—not heavy—lubricant unless the car is accustomed to that grade.

Oil Filter—Inspect the cartridge or straining unit. If it has seen 10,000 miles of service and is the nonclean-able type, buy a new one.

Steering—Check for wear, looseness, or binding, and lubricate thoroughly. Hours at a wheel that works hard are exceptionally fatiguing and dangerous.

Brakes—Check for wear on linings and positiveness of equalization. Strange roads and high speeds call for perfect brakes.

Tires—Don't tempt fate with tires that are badly worn. Wear out the old ones in day-to-day service, not on the tour. Higher speeds call for higher tire pressures. From three to five pounds over the normal is essential.

...W TO OPERATE ...RAKES ON AUTO

...ift to Low Gear When ...escending Steep Grades and Prevent Wear.

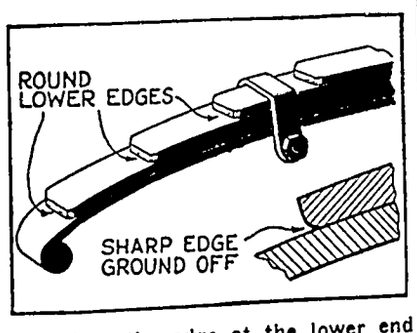
Round Spring Edges to Prevent Bumpy Motion

Sometimes springs will wear in such a way that the car will ride with a peculiar bumpy motion. This occurs when the shorter leaves are formed so that the edge gradually wears a sec-



Rounding the edge at the lower end of each leaf of the spring will prevent wearing away a depression in the leaf below and preserve smooth spring action even when riding over large bumps.

tion of the leaf below it. When the wheel strikes a bump slightly larger than normal the edge of the spring is forced to ride up over the corner of the depression worn in the lower spring. The cure for this is to round the sharp edge at the lower end of each leaf as shown in the illustration. —Popular Science Monthly.

AUTOMOBILE NOTES

A man can be excused for falling from grace as he has acquired the detour habit in his travels.

* * *

If the battery cables are corroded, the full capacity of the battery cannot reach the ignition system.

* * *

Certain types of alloy pistons wear rapidly, and if replaced at the proper time an expensive overhaul job may be prevented.

* * *

Lack of lubrication makes new cars grow old rapidly. Rattles and squeaks mean that springs and spring shackles are being neglected and require attention.

* * *

The speaker made some remark about 3,100 revolutions per minute and it turned out that he really was talking about a new automobile and not Central America.

* * *

Automobile concerns spent $35,000,000 for advertising in 1927 and with local auto advertising the total is in excess of $50,000,000. This is exclusive of the jokes and casualties.

Whaling Fleet Has Thrills

Thrills a plenty were experienced by a fleet of Norwegian whalers in the Antarctic seas during the season that has just closed. Within an hour 41 icebergs were sighted, one of them being several miles long and 3,000 feet high. During one severe gale the wind carried away the whale that had been lashed to the mother ship, and a smaller vessel was compelled to cast away the two whales it was towing. For a time there was danger that the waves would throw one of the whales on top ot the vessel. One whale caught was 125 feet long and yielded 175 barrels of oil. The total yield of oil for the season was valued at $2,500,000.

Who wants the leaders of his party to be so noble as to give the other fellows an advantage?

The man who boasts of being a cynic is usually more foolish than dangerous.

A boy's "first love" is a pup.

Don't Make a Toy Out of Baby
-Babies Have Nerves-
By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily Beyond that, being handled, tickled caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset better give him a few drops of pure harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper Leading physicians prescribe it for colic, cholera, diarrhea, constipation gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Intellectual Economy

"This book is a best-seller," said the persuasive salesman.

"I won't buy it. My friends will rejoice in telling me what's in it."

Sixth sense must be the sense of glory. People who have it like to lead processions, etc.

Eagle Makes ... Hustle ...

Old Baldy, venerable eag... of Dresden Mills Birddom, has... for the fishing season, and if he ...lows his custom of many years wi... remain until it is over. His majesty does not fish himself, but lets the hawks do it for him. Every day he goes in from Aina, where he has his temporary abode, perches high in a grove of elms and pines that commands a view of a pool just below the falls at the site of an old mill.

When this feathered tyrant sees one of his humble subjects make a catch he swoops down in such a terrifying manner that the hawk drops his fish without a fight and before the fish has had time to fall back into the pool Baldy has it in his clutches. He takes it back to his perch, makes it fast against the branch with his talons, gnaws off the meat, and then the crows come and take the leavings. The pool is on the premises of John Cate, who has seen the incident repeated many times.—Kennebec Journal.

Wave Theory Backed

The wave theory for explaining all the forces of nature has triumphed completely over previous conflicting theories, says Capt. T. J. J. See, professor of mathematics in the United States navy and government astronomer at Mare island. Not only are such actions as magnetism, gravitation and electro-dynamics explainable as "waves in the ether," but even surface tension, cohesion, adhesion, capillarity, chemical affinity and explosive forces are shown, he asserts, to be waves, and "thus the internal mechanism of atoms, electrons and etherons lead to the wave theory as one of the final triumphs of science in 1927."

Floating Memorial

Four hundred miles out on the rolling Pacific the steamer President Lincoln sighted a boat filled with flowers. Although plainly many days old some of the geraniums were resplendent with color. It is supposed the boat was launched Memorial day at some port of the Pacific coast in honor of the sailors and mariners who gave up their lives in past wars.

Father and son, both admirals, one being ninety-two years old, and the other sixty, attended a veterans' club dinner in England recently.

That a "bad egg" is hard-boiled doesn't improve him.

Liberty News Notes

(Special Times Reporter)

Otto Lemke and wife were callers at the R. R. Lemke home Thursday.

Frank and John Miller visited at the Oscar Carlson home Thursday.

"Red" Carlson was a Belmond caller Wednesday morning.

Emil Beier and wife went on the tour put on by the cow testing association Wednesday.

Mr. and Mrs. Clarence Bredlow returned Thursday from their trip in Illinois and Wisconsin.

Oscar Carlson and Buz helped Ed Schoenwetter with his plowing Saturday.

Jennie Bridges of Klemme was visiting at the Oscar Carlson home the first part of last week.

Mrs. Wayne Whitney of Britt is visiting her daughter, Mrs. Will Lemke this week.

This vicinity was well represented at the Farm Bureau picnic Friday. Several families going up to spend the day.

Kermit Stille and Agatha Stieman were at Mason City Tuesday enjoying the varied attractions put on there that day.

Miss Mabel Smith, daughter of Chas Smith, of Mason City, visited at the Elmer Schaefer home the first of the week.

Mr and Mrs Will Lemke and family drove to Mason City Tuesday to see the Big Anniversary Parade and to do some shopping.

Mr. and Mrs. Emil Beier, Floyd Klotzbach, Emil Blumer and family drove to Algona Tuesday to enjoy the M. E. Picnic.

Mr and Mrs R. R. Lemke drove to Cedar Rapids and Iowa City Sunday to get their son, Walter. Walter has had his tonsils removed since school closed and was unable to return before.

A miscellaneous shower was held at the home of Chas. Bredlow Tuesday afternoon in honor of Mrs. Clarence Bredlow Several ladies were present and had a very social time.

Mr. and Mrs Frank Bredlow and family, Mr. and Mrs. Aug Kropp and family, Mr and Mrs Herman Gast and family, Albert Lange and family, the Tanner girls and the Abele family and "Bub" Gates attended the M. E Picnic at Algona Tuesday.

Mrs. Martin Jensen returned Monday from Hampton where she had been with her son, Elmer, since his operation last Wednesday. Elmer is doing nicely. The tube and stitches were removed Tuesday and he is on the road to a rapid recovery.

The young men of this vicinity had a big time Friday night when they charivaried Mr. and Mrs. Clarence Bredlow. They traced them up to Ben Reimer's but found them gone as Mr and Mrs. Reimer and the Bride and Groom had driven to Britt to see the Historical Pageant. But during their absence they got nicely concealed and when the family returned and got nicely settled in the house, the boys outside let loose and gave them a fine concert of varied music.

Binder Twine

We are getting a car load of BINDER TWINE and we want oyur order at once. By doing this you can save yourself some money and can take it right off the car.

We are not going to stock up on Twine and so this is your chance to save money and at the same time, help us! Just phone in if you are too busy to see us.

POULTRY & CHICK FEEDS

We handle the well-known and tried GLOBE POULTRY FEEDS of all kinds. We have a good supply on hand and can supply you with Growing Mash, Chick Starter and all other kinds. None better than GLOBE.

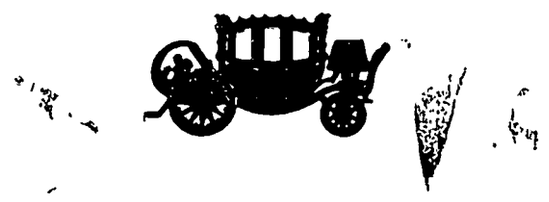
All these closed cars have FISHER BODIES



THE mechanical performance of General Motors cars is tested and proved on General Motors' 1,245-acre Proving Ground. Before any new model is put in production, it must pass more than 135 different tests for power, speed, durability and general performance.

As to the appearance and comfort of General Motors cars, we invite you to be the judge. Every closed body is built by Fisher—the largest builder of automobile bodies in the world. The experience and the vast production of the Fisher Company mean more beauty, more comfort, and more luxury than you will find anywhere else at corresponding prices.

We invite you to check, on the coupon below, the cars that appeal to you most. Complete literature will be sent to you, without any obligation.

CHEVROLET — 7 models, $495 to $715. Bigger and better than ever before. 4-wheel brakes. More powerful engine. Luxurious Fisher Bodies. New hood. New Duco colors. *Also* truck chassis; ½-ton, $395; 1-ton, $495.

PONTIAC—7 models, $745 to $875. Lowest-priced quality "six." New models improved from radiator to tail-light. 4-wheel brakes. Bodies by Fisher. New GMR cylinder head. Increased power. Duco finish.

OLDSMOBILE—7 models, $925 to $1085. Fine quality car at moderate price. Redesigned and improved by General Motors. Longer, roomier, more powerful. Fisher Bodies. 4-wheel brakes.

OAKLAND—7 models, $1045 to $1375. The All-American "six." Smooth, powerful engine. Longer, lower and more beautiful bodies by Fisher. 4-wheel brakes. Every convenience. New Duco colors.

BUICK — 16 models, $1195 to $1995. Largest value in Buick's history. Beautiful low bodies by Fisher. Getaway like an arrow. Vibrationless beyond belief. 6-cylinder "valve-in-head" engine. Duco finish.

LASALLE—16 models, $2350 to $2975. Beautiful car of Continental lines. Companion car to Cadillac. V-type, 90 degree 8-cylinder engine. Marvelous bodies by Fisher. Striking Duco combinations.

CADILLAC—26 models, $3295 to $5500. Standard of the world. Famous 90-degree V-type 8-cylinder engine. Sumptuous bodies by Fisher and Fleetwood. 500 color combinations to choose from.

Klemme News

Mrs R W Elder went to Hampton hospital last week Wednesday to have three teeth extracted Since then she has no been so well and was forced to go to bed for a few days However, at this time she is again much better.

Mr and Mrs. Ed Jacobs and son, Elwyn, accompanied by Joe Miller, left Sunday morning by auto for Maquoketa and vicinity where Mrs Jacobs and son visited while Ed and Joe drove on next morning to Chicago on business. All will visit relatives and friends in eastern Iowa before returning to Klemme the latter part of this week

Mrs J N Day planned a birthday dinner Sunday for her son, Dorance who was on that date 12 years old In honor of the event she invited for dinner Mr and Mrs Wm. Smith and Miss Mabel, Byrnes Missman and Buster Jorgenson Needless to say the boys exercised a paddle to the tune of twelve well delivered spanks on a tender portion of Dorance's anatomy, but to recompense him with any injuries they presented him as a sort of balm, a fine Boy Scout knife Mrs Day had the table nicely decorated with pink and white and adorned by a large heart shaped chocolate cake with white frosting and pink edcorations In all the dinner was a fine success, and we know of at least three boys who were bulging with happiness and a big dinner

Jay Griggs and daughter, Mae were Forest City callers Monday Mae had quite a serious operation for the removal of her wisdom teeth Dr Colby did the work

RAIN STOPS COUNTY PAGEANT AT BRITT SATURDAY EVE

Play May Again Be Presented A Hancock County Fair

The historical pageant which was given at the Fair Grounds at Britt Friday evening drew a crowd of about five hundred paid admissions Those who witnessed the spectacle were enthusiastic and said it was a wonderful presentation of Hancock County's History.

The play was to be given for two nights and had not the weather interferred no doubt Saturday night's crowd would have been a record breaker, but the unsettled appearance of the weather kept many from attending However many ventured out Saturday evening to see the big pageant, but when the play was about half finished rain descended and drove the people home.

Those in charge may decide to again put the pageant on as an attraction at the Fair in the fall. If this is done it should prove to be a good drawing card

4-H SEWING CLUB MET WITH MISS CHARLOTTE GREIMAN

Girls Were Taught How To Make Four Kinds Of Seams

The 4-H Sewing Club of Ell Twp held their meeting at the home of Charlotte Greiman on Saturday, June 16th, with thirteen members present

The business meeting was composed of two interesting talks; one was on "The Care Of The Shoes," by Lydia Pearson; the other was "The Improved Shoe," by Nellie Stromer A very interesting demonstration was given by Mrs. Griffen on seams. She taught the girls how to make the four different seams. They were also taught to hem velvet or any heavy material She also taught the girls how to care for clothing

Delicious refreshments were served by the hostess.

The next meeting will be held at the home of the Hampel girls on June 30th.

1—Herbert Hoover and the man he hopes to succeed. 2—The Republican national convention in session. 3—Senator Fess delivering the keynote speech.

NEWS REVIEW OF CURRENT EVENTS

Nomination of Hoover by Republicans Outstanding Event of the Week.

THE Republican national convention focused the attention of the country for at least five days of the week. The nomination of Herbert C. Hoover as the Republican candidate for the Presidency, a foregone conclusion before the doors of the convention hall were opened to the delegates, left the proceedings largely a matter of routine, except for the battle over the platform.

The outstanding feature of the convention, seen in retrospect, was the Hoover control of the proceedings. It was supreme, but it was a mannerly, orderly control. No rough stuff. Opponents of the Hoover majority were courteously given ample opportunity to present their side of the questions at issue and no restraint was put upon the delegates when their enthusiasm burst into long and noisy demonstrations, as it did particularly when the nominations were made.

The agricultural plank of the platform, as expected, launched the big fight of the convention. A determined fight on the plank presented by the majority of the committee was made by the western farm leaders.

This plank, formulated after two days and nights of labor in the committee, ignored any mention of the controverted equalization fee of the McNary-Haugen bill, but pledged every assistance in the reorganization of the farmers' marketing machinery. It proposed the creation of a farm board with power to set up farmer owned and controlled corporations to prevent and control surpluses through orderly distribution.

Facing an admittedly losing fight the farm leaders battled on earnestly and at great length, submitting only when the majority of the delegates voted approval of the committee report.

A no less earnest but less time consuming battle, and also a losing one, was waged on the prohibition plank which advocated observance and vigorous enforcement of the Eighteenth amendment.

For the first time the radio made the proceedings of a national political convention available to people in all parts of the country. Other conventions have been broadcast, but never before was there a hook-up of broadcasting stations so distributed that anyone with a receiving set anywhere in the country could hear the entire proceedings.

PRESIDENT COOLIDGE on Monday night gave his semiannual report on the business of government as it has been handled during the last few years and outlined his policies for the next six months before a gathering of the department heads in Memorial hall, Washington.

"It has been my endeavor," he said, "so to manage the national finances as to secure the greatest benefit to the people. I have rejoiced in keeping down the annual budget, in reducing taxes, and paying off the national debt, because the influence of such action is felt in every home in the land."

The people, he said, must furnish their own prosperity. It cannot be handed down to them by the government. And when they have it they must rise above it in spiritual outlook.

"Prosperity," he said, "is only an instrument to be used, not a deity to be worshiped."

Reviewing the condition of industry and trade since 1921, he said:

"Stabilization and a feeling of security have been the primary factors in the great upward swing of American industry and commerce since 1921."

The tax question, he declared, has been approached from the angle of requiring no more from the people than necessary to operate the government efficiently.

"The revenue acts of 1921, 1924, 1926 and 1928," he said, "when fully operative will reduce taxes by approximately two billions of dollars a year as compared with what would have been collected if the act of 1918 had remained in force.

"It is inconceivable that in such a short space of time the government could cut its tax rates to such an extent. Yet that has been done. Millions of individuals in the lower brackets have been entirely stricken from the tax rolls. Personal exemption for individuals and heads of families have been greatly increased.

"Preferential treatment has been given to earned income. War taxes and nuisance taxes have been repealed. Business has been freed of many hampering and uneconomic restrictions. The prosperity of today can be attributed in a large measure to the lessening of the burden of federal taxes.

"The reduction which has been made in the national debt since July 1, 1921, has contributed much to the ability of the government to lessen taxes. That reduction at the end of this fiscal year will amount to approximately $6,327,000,000. The total debt will then be $17,650,000,000. It is one-third paid. The total saving in interest over all that period will amount approximately to $950,000,000. The reductions in the debt required by law for the same period total $3,296,000,000.

"By the end of this fiscal year we will actually have applied to debt reduction $3,031,000,000 more than required by law. That represents what was saved from national revenue. These, together with refunding operations which converted securities bearing high rates of interest into securities having lower rates, represent a perpetual saving in interest of $274,000,000 a year.

For the current fiscal year, which closes in a few weeks, the President said there would be a surplus in excess of four hundred million. Estimates are being prepared for 1929 and 1930. On this he said:

"Taking into consideration the legislation enacted during the last session of congress, we find that for 1929 our receipts will be about $3,707,000,000 and our estimated expenditures $3,801,000,000. These estimates might seem to forecast a deficit. We must not have a deficit.

"The cost of government in the United States, federal, state and municipal, in 1921 was $9,500,000,000. In 1925 it had increased to $11,124,000,000. During that period the national government had reduced its expenditure by two billions.

"The necessity of keeping expenditures within receipts, the importance of continuing our pay-as-we-go policy, cannot be overemphasized. This primary limitation on estimates is the first step toward the continuation of that policy in 1930. It means that there will be no latitude for expansion where expansion is not made compulsory by new law or by conditions that leave no choice. In preparing your preliminary estimates for 1930, which you will submit to the budget bureau by July 15 next, you must keep this in mind."

"WELL, he ought not to be so hard to beat," was the only comment of Gov. Al. Smith when informed of Hoover's nomination as the Republican candidate for President.

EARL KLINCK, former right-hand man of the klan dragon, D. C. Stephenson, was convicted by a jury in the criminal court at Indianapolis of being accessory in attesting a false affidavit. Conviction carries a one to three-year prison term. Klinck appealed.

Klinck, once a policeman at Evansville, was Stephenson's personal bodyguard. His present predicament followed an attempt to have indictments returned against Tom Adams, crusading anti-klan publisher at Vincennes, and Boyd Gurley, Pulitzer prize editor of Indianapolis, following presentation of a forged affidavit to the federal grand jury at Indianapolis last fall.

UNITED States District Judge Thomas B. Thatcher of New York dismissed the federal suit in equity against the Standard Aircraft corporation to recover $2,394,438.48, which it alleged had been illegally paid in settlement of war air contracts. A counter claim of the defendant for an additional payment of $142,000 also was dismissed.

The case included testimony from former War department officials and officers of the airplane company, which during the war had held contracts for aircraft for the government totaling about $11,000,000.

THE elimination of President Coolidge as a candidate to succeed himself caused a tremendous crash on the New York stock market Monday. Prices broke from 2 to 25 points. Not since the hectic record-breaking session of March, 1926, has the exchange experienced such wild selling. Marked recovery in prices was shown later in the week.

PRESIDENT AND MRS. COOLIDGE have settled down for the season at the summer White House on the Brule river in Wisconsin. After a two days' delay in vacation departure, due to the illness of Mrs. Coolidge, the Presidential party left Washington Wednesday night. Mrs. Coolidge had improved greatly, was cheerful and anxious to get started on the journey. The offices of the White House staff have been established at Superior and the President is expected to motor to that city when business requires his attention.

The President is being guarded by regular troops from Fort Snelling, Minn., who are camped about a quarter of a mile from the lodge.

THE price of educating a public school pupil has more than doubled in the last 15 years, it is shown by figures compiled by the federal bureau of education. In 1913 the cost was $38.31, and the present figure is $102.50.

Expenditures for public school buildings have almost doubled since 1920, with the peak being reached in 1925 when $433,000,000 was spent for new buildings. In 1926, however, the annual expenditure for public school buildings decreased $22,000,000, indicating, the bureau said, that construction had overtaken the shortage caused by the World war.

The bureau attributed the increase in school expenditures to the decreased purchasing power of the dollar and the general improved school facilities.

THE Baltic bitterness, resulting from the unsettled dispute between Lithuania and Poland, remains as the only danger to European peace, was the opinion expressed generally as the council of the League of Nations ended its fiftieth session at Geneva.

Council members made no attempt to conceal their chagrin that the body had found itself unable to liquidate this quarrel. The basis of the dispute is the Polish possession of the city of Vilna, former capital of Lithuania, and recently named anew, in the constitution of that country, as the seat of its government.

Members of the council separated with the feeling that the Baltic situation will be either better or worse by September. If the latter proves to be the case, the whole controversy is likely to be thrashed out before the general assembly of the league.

ROBERT W. STEWART, chairman of the Standard Oil company of Indiana, was acquitted by a jury in the District of Columbia Supreme court in Washington on a charge of refusing to answer questions of the senate investigating committee regarding Continental Oil company bonds. Stewart specifically was accused of violating section 102 of the criminal code, which makes it mandatory that witnesses before congressional committees answer questions pertinent to the subject of inquiry.

ONE of the most picturesque figures in the woman suffrage movement, Mrs. Emmeline Pankhurst, died in a nursing home in London, England, at the age of sixty-nine. Death came after a comparatively short illness.

Mrs. Pankhurst was the first militant suffragist in efforts to obtain the vote for women, millions of whom are now enjoying the privilege of casting their ballots at parliamentary elections as a result of the work of her and her supporters. This early work was often done at great personal risk.

Number of Apple Trees Declining

No Shortage of Fruit Has Developed and Production Increases.

(Prepared by the United States Department of Agriculture.)

Although the number of apple trees in the United States has been declining since 1910, no shortage of apples has developed and commercial production is increasing. The crop of 1926 was the largest produced in many years. This apparent paradox is explained by an increased output per tree and by the fact that the reduction in the number of trees has taken place largely in scattered family orchards and in the less favorably situated commercial areas. Apple production for the market has been increasing materially in some areas through better orchard management, better selection of varieties, and increased bearing capacity resulting from an increase in the age of the trees.

Decrease in Trees.

For each 100 trees in the country in 1910, there were 70 and 64 respectively in 1920 and 1925, according to the census. In round figures the decrease from 1910 to 1925 was about 79,000,000 out of a total of 217,000,000 trees reported in the former year. The significance of this decline is modified by the fact that in the box apple region of the Mountain and Pacific states no less than 55 per cent of the trees were not of bearing age in 1910. By 1920, the percentage of nonbearing trees had fallen to 13, and the same percentage is reported by the census for 1925. It would be a distinctly unfavorable augury for the apple industry had plantings from 1910 to 1925 been large enough to prevent a decline in the proportion of trees not of bearing age.

Present conditions in the apple industry are in marked contrast to those that prevailed eighteen years ago. In 1910 there were 15,000,000 trees not of bearing age in the box apple regions of the Mountain and Pacific states. As these trees came into bearing, the producing capacity of the region increased enormously. In 1920 the region had 175 trees of bearing age for each 100 reported in 1910. From 1920 to 1925, however, the number decreased and in 1925 stood at 151 for each 100 trees of bearing age in 1910.

App'n Tree Planting.

In recent years plantings of apple trees have been to a large extent in the eastern apple region and have been chiefly concentrated in the commercial areas. Most areas of heavy concentration of trees are now in regions adjacent to the larger consuming centers, although there are important areas in the West which, because of favorable natural features, successfully produce fruit far from consuming markets. In the states north of the Cotton Belt and east of the Great Plains, farm orchards are fairly evenly distributed. In the western states, scattering of trees throughout extensive areas, in the manner typical of the farming regions of the East, is not found.

Satisfactory Means of Eradicating Cutworms

If one cutworm in the garden cut only one plant and ate that plant, the damages would not be so very great. But the worm is not satisfied with one plant. It usually follows one row and cuts as it goes. In this way one cutworm will do a great deal of damage.

The cutworm is nocturnal in its feeding habits. It usually starts to feed late in the afternoon and continues throughout the night. The knowledge of this habit is very essential when the worm is to be poisoned.

Two satisfactory control methods are: first, place a collar of cardboard or tar paper around each plant. This should extend to a depth of two or three inches in the soil. The second method of control is probably the most satisfactory. This control is the use of poison bait. The bait should be scattered late in the afternoon, at feeding time, and near the plants. The poison bait consists of wheat bran, 25 pounds, paris green, one pound, and three oranges or lemons. This material should be thoroughly mixed and brought to a consistency of a thick dough by adding a low-grade molasses, with water when necessary.

Short Farm Notes

The silo stores feed in one-third the space required by hay in the barn.

* * *

For the first week, baby chicks should have liquid skim milk instead of water.

* * *

Alfalfa contains the protein needed to balance the silage while the silage supplies succulence.

* * *

Sweet clover should be used as a green pasture crop and as a soil builder rather than for the production of hay or silage.

* * *

The ideal incubator cellar or room is one in which the air is constantly changing without varying perceptibly the temperature of the room itself.

* * *

No stalks remain in the way of farm implements and none are left in feed racks and mangers to be thrown out and wasted when feed is stored in a silo.

ORCHARD GLEANINGS

TELLS VALUE OF APPLE VARIETIES

Discussing the profits obtained from various varieties of apples grown in western New York, G. P. Scoville, professor of agricultural economics at Cornell, said Baldwin and Rhode Island Greening pay the best; McIntosh sells the best, and Duchess, Hubbardson and Russet paid least. Professor Scoville quoted figures and statistics obtained from a study in 1917 to 1926 on 176 fruit farms near Newfane and Olcott in Niagara county, speaking at Farm and Home week at the New York State College of Agriculture at Ithaca.

"Baldwins yielded 176 bushels an acre, Greenings 172, and Twenty-ounce was third with 160 bushels to an acre. The lowest yielders were Hubbardson with 119 bushels, and Russet and Spitzenburg each with 133 bushels an acre," he said.

The Baldwin was also the most regular bearer from 1918 to 1926. "It may be true that the Baldwin tree tends to bear in alternate years, but there were enough trees bearing every year so that it was the only variety whose annual production per acre always exceeded 100 bushels in each of the nine years," said Professor Scoville. The yield of the Greening, on the other hand, was the most variable from year to year, being 61 and 19 bushels an acre respectively in 1919 and 1921. It tends to bear more heavily than Baldwin in the big crop years and very light in the off years.

Among the young trees the better yielding varieties were Wolf River, Greening and Baldwin. These were the only varieties that yielded over two bushels to a tree for trees 10 to 29 years old. McIntosh averaged 1.65 bushels a tree. Delicious took more than three trees to yield one bushel.

"The best selling variety was McIntosh; it netted the grower $1.29 a bushel above the cost of the container for the years 1922 to 1926 inclusive. Northern Spy and Jonathan were second and third and averaged $1.13 and $1.01 a bushel. Greening averaged 77 cents and the Baldwin 72 cents a bushel. Duchess was the poorest seller and returned the grower only 58 cents above the cost of the package, and the Russet brought back only 62 cents.

"The best returns an acre for trees over 20 years old were obtained from Northern Spy, Greening, King and Baldwin when one considers the yield and price for the past five years. For trees 10 to 29 years old the best returns were obtained from Wolf River, McIntosh, Greening and Twenty-ounce.

The lowest returns an acre for trees over 20 years old were secured from Duchess, Hubbardson, Russett and Wealthy. The return from an acre averaged only about two- thirds that of the Baldwin and Greening.

Blackcap Raspberries Helped by Bee Swarms

A patch of blackcap raspberries, planted in 1922, never had borne us more than three pints of fruit in a single season. Sprays, fertilizers, pruning, and similar treatments had been used to stimulate production without success; and during the summer of 1925 we discovered our trouble to be due to deficient pollination.

Several remedies for this condition were suggested by local horticulturists, but late that fall we bought two swarms of bees, and placed the hives near the berry patch.

It took $3 worth of sugar to help the bees through the winter, but when the vines bloomed the following spring, the little fellows got busy and that year we had a normal crop of berries, says an Ohio writer in the Successful Farmer. They spread the pollen thoroughly among the different vines, and so solved our problem without further effort on our part.

Besides making our berry crop a success, the bees stored up enough surplus honey to last us for several months, and this repaid us well for our bother and time.

Cultivation Necessary for Black Raspberries

From the fact that the black raspberry is a shallow rooted plant, level or very shallow cultivation should be practiced. By all means keep the disk out of the raspberry patch, unless it is in the hands of a very careful workman. If the plow, disk, or harrow is run deep enough to cut off the horizontal feeding roots, the leaves of the plants will take on a yellow appearance, appearing as though they were diseased, and the crop will be almost worthless. More damage can be done by deep cutting implements than one can imagine, and, therefore, their use is to be discouraged in caring for black raspberries, the reds also.

Brown Rot Harmful

Peaches, cherries and plums are ruined by a fungus disease known as brown rot, if they are not sprayed shortly before ripening time. The spores, or "seeds," of this rot live over winter on dried or "mummied" fruits which may be found now hanging to the trees or on the ground under them. A measure of preventing the spread of this infection is to pick and burn all "mummied" fruits found on peach, cherry and plum trees and under them.

ECT HOOVER ND CURTIS TO EAD THE G. O. P.

ublican Party Names oth Candidates on the First Ballot.

For President:
ERBERT C. HOOVER

For Vice President:
CHARLES CURTIS

By EDWARD W. PICKARD

nvention Hall, Kansas City, Mo.—y extricating themselves from a ation that was admittedly embar-ing, the Republicans in national egion nominated Herbert Hoover President on the first ballot, and ed under him a platform so skill- devised that no faction in the , save perhaps the wets, could use for serious complaint. Most he aggrieved farmers of the Mid- West, even though they did not n what they had asked, seemed ccept the agricultural relief plank good grace and to concede that G. O. P. was alive to their troubles could be relied upon to help them iven another four years in control he national government.

hat farm plank was pronounced xperts to be one of the smoothest es of political carpentering seen any a day, and the craftsmen who ged and planned it believe it will ly stand the strain of the national mpaign.

Hoover's most threatening competi- for the nomination, Frank O. Low- withdrew his name before ballot- began because he believed the con- tion had not met the farm problem rly and squarely. His pledged votes re scattered across the board. The er aspirants stuck but the result been assured for many hours. On first and only ballot, Hoover scored votes. Despite his withdrawal, wden was second with 74, and Sena- Curtis and Senator Watson fol- ed with 64 and 45, respectively. nator Norris was voted for by 24 dicals, and Senator Goff by 18 West rginians. Seventeen delegates voted President Coolidge, 4 for Vice esident Dawes and 1 for Charles ans Hughes. Five were recorded as voting. On motion of Governor nlen of Kansas, the nomination of erbert Hoover was made unanimous.

With Hoover and the platform put er, those in control of the conven- on's actions, having a full realiza- on of what they had done, selected harles Curtis for second place the ticket. Then, completing the cessary business of the convention, e delegates adjourned and left for me with the conviction, often ex- ssed in words: "We have a good cket, a good platform—and a fight our hands for victory in Novem- r."

It is quite true that the disgruntled aders of the many farm organiza- ions, who failed to put the equaliza- on fee feature in the platform, said ey would never vote for Hoover, at they would go to the Democratic nvention in Houston to get what ey wanted, and that they and their llowers would bolt the Republican rty. It is also true that the radical oup headed by Senators Norris, La- Follette and Nye talked about bolting, s was expected. But the wise poli- icians could see no real indications a third party of the disaffected.

Putting Hoover Across.

Nomination of Herbert Hoover was ot accomplished with any especial nesse or delicacy of treatment. It as done by mere force of numbers. rom the start only the remote pos- ibility that President Coolidge might e drafted and consent to run again stood in the way of the secretary of commerce, and when, the night before the convention opened, apparently authentic information came that Mr. Coolidge really would not again be a candidate, and Andrew Mellon was forced by Bill Vare to advise the Pennsylvania delegation to vote for Hoover, all doubt of Hoover's victory vanished. The so-called "allies," the supporters of Lowden, Curtis, Watson and Goff, declared they were not yet beaten and that they would carry on the fight to the bitter end, but their assertions were half-hearted and their faces were glum. Privately they admitted that all hope was gone.

Visitors found a beautiful city, reasonably pleasant weather, fine hotels and other desirable things, even if they didn't find much to stir them to wild enthusiasm. The victors themselves were comparatively calm and repressed, which may have been due to their advance confidence that they were going to be the victors.

It was all very businesslike.

Opening the Big Show.

More than 12,000 delegates, alternates and spectators were seated in the auditorium when, promptly at eleven o'clock Tuesday morning William M. Butler, national chairman, called the convention to order. The calcium lights in the photographers' gallery flared into action, the cameras clicked, and Bishop Partridge of Kansas City was led forward to deliver the invocation. Then Mme. Schumann-Heink took her stand before the array of "mikes" on the speaker's stand and sang "The Star-Spangled Banner."

"All will now stand while the official photograph is taken," announced Chairman Butler.

"No, no," yelled a camera man with a megaphone, "all sit down and keep still."

So they all sat down and blinked pleasantly at the calciums—all except Mr. Butler, who scowled at this revolt against his authority.

Followed the tedious reading of the official call by Secretary Roy O. West of Chicago, the almost equally tedious remarks by Chairman Butler on behalf of the national committee, and then Senator Simeon D. Fess of Ohio, long before selected as temporary chairman, was formally elected to that high honor, and was escorted to the platform.

Senator Fess is an accomplished public speaker and had taken great pains in building his speech. But no one expects anything more than eloquent platitudes in a keynote address, and no one was disappointed. The Ohioan set forth at great length the good qualities of Republican doctrine and the good accomplishments of the Republican party, and he did not neglect to mention the supposed fallacies and failures of the Democratic doctrine and party. His audience listened with a good deal of apathy. There was applause when he first mentioned Secretary Hoover, and cheers greeted the naming of great Republicans of the past. But at no time did anyone show a desire to grab a standard and march through the aisles.

Two Slips by Senator Fess.

Mr. Fess delivered his address without manuscript and made numerous departures from it as given in advance to the press. In naming the heroes of Republicanism he omitted all mention of Theodore Roosevelt because, as he explained that evening, he was temporarily disconcerted by a flashing of the spotlights just as he reached that paragraph. Another omission by the senator from the printed copy of the address was responsible for the loss of what severe critics called the only intestinal stamina in the entire production. As written, Mr. Fess had this to say concerning enforcement of law, meaning especially the prohibition law:

"No backward step can be tolerated upon whatever pretext which would permit a noisy minority to exploit the great mass of our population. It is not a question of tolerance or of liberty, but of life, both individual and national. The Republican party is ready to call the roll on this false doctrine masquerading under the mask of liberty. It is ready to sound the moral tocsin against the present campaign of a noise-making minority whether in the interest of business profit or mere human indulgence."

The fact that he left out this paragraph was noted with surprise but the omission didn't matter because the press of the country carried the address as furnished it in advance.

Committees on resolutions, credentials, rules and permanent organization were named and after some further routine business the convention adjourned to Wednesday morning. The afternoon and evening were busy times for the committees, especially the one whose duty it was to build the platform. Innumerable planks were submitted, by farmers, drys, wets, women and dozens of other groups or individuals, and all were given due consideration, even the proposition of Dr. Nicholas Murray Butler of New York that the party declare for repeal of the Eighteenth amendment. Of course that plank didn't have a ghost of a chance, although the highbrow wet made an eloquent argument, which was seconded by former Senator Wadsworth. Senator Borah already had drawn up a fairly strong dry plank and that was adopted.

Rebuffed "Farmers" Demonstrate.

Gov. Adam McMullen of Nebraska presented the cause of the farmers to the committee in a dignified plea for relief and called on officials of several farm organizations to tell specifically what they wanted. Senator Borah, who has consistently opposed the McNary-Haugen bill, said the statements on behalf of the farmers were exceedingly able, moderate and based on what he conceived to be a just cause. "I differ with them," he added, "only on the issue of the equalization fee."

By nightfall the farmers had recognized that they could not force that equalization fee issue on the committee, so they began their long-promised demonstrations designed to impress the convention as a whole. There were somewhat noisy night parades, one of which even butted into a Hoover meeting; and next morning came their big "march on the convention hall." Led by a band garbed in nice new overalls, several hundred men and women paraded the streets to the Auditorium, carrying numerous improvised signs telling what they demanded and threatening that they would never vote for Hoover. Some of these marchers were quite evidently dirt farmers, but as evidently a considerable proportion of them never had laid hand to the plow or the hay fork. They were marshaled on their way by Edgar D. Bush of Indiana, candidate for lieutenant governor.

Reaching the Auditorium, they made an attempt to "crash" the doors and perhaps a score did force their way past one of the doorkeepers, but were speedily ejected by one lone police captain. With the band playing loudly and the "farmers" shouting and singing, the procession went round and round the building trying to find an unguarded door, and then dispersed. To tell the truth, the much-advertised "crusade of embattled farmers" turned out very much of a fizzle.

Moses Permanent Chairman.

Senator George H. Moses of New Hampshire had been selected as permanent chairman of the convention by the committee on permanent organization, and Wednesday morning, after prayer by Bishop Lillis, he was handed the gavel by Chairman Fess and delivered a brief address. The report of the committee on credentials provided the only interest of this session. Days before the national committee had heard all the contests on delegates and had decided nearly every one in favor of the Hooverites. The contests were carried before the committee, with the same result. In the case of Texas there was involved a legal question and consequently the contestants called on the convention to decide. In that as in all other contests the body of delegates sustained the decisions of the committee. The Texas delegation, headed by National Committeeman Creager, was seated.

Chairman Moses, calling for the report of the committee on resolutions, was informed it was not ready, so a recess was taken until evening, and another until Thursday morning. The platform makers had been hard at work, through a subcommittee, for many hours, but had not yet arrived at a satisfactory solution of the farm relief problem.

Late Wednesday night, after long hours of discussion, the resolutions committee, by a vote of 35 to 15, adopted the administration plank on farm relief and in the morning offered it, along with the rest of the resolutions, to the convention. In this plank there was no mention of the equalization fee, but the party pledged itself to devise ways and means of remedying the admittedly serious condition that the agricultural industry faces, chiefly in the disposition of crop surpluses and their marketing. The creation of a federal farm board was advocated.

A minority report was presented, offering a plank embodying the equalization fee, and the battle was on. After a warm debate the majority report was adopted by the convention. This result had been a certainty, but the McNary-Haugen bill advocates had effectively registered their protest.

Senator Charles Curtis of Kansas swept the field for the nomination for vice president at the closing session of the convention late Friday afternoon. The senator received 1,032 votes on the first ballot, the remainder of the votes were scattered among several candidates who apparently were placed in nomination merely out of courtesy, as it was evident from the beginning that Curtis was a sure winner.

"Uncle Andy" Loses His Grip.

One of the most interesting and significant if not exciting events of the week was the "smoking out" of Andrew Mellon by William S. Vare, senator-elect. For days every one was saying "Mellon can settle it all," "Mellon holds the key to the nomination," "Wait and see what Mellon tells his delegates to do." Came Monday afternoon bringing the secretary of the treasury and his Pennsylvania delegation, and all the correspondents rushed to hear what Mellon would say. Retiring at once to his room, he sent out a statement by Senator David Reed which really said nothing at all. Anxious emissaries of Hoover, Lowden, Curtis and perhaps other hopeful ones, succeeded in penetrating to the presence, but Uncle Andy sat much like a graven image and continued to say nothing. He merely let it be known that the delegation from the Keystone state would hold a caucus Tuesday morning to determine its course.

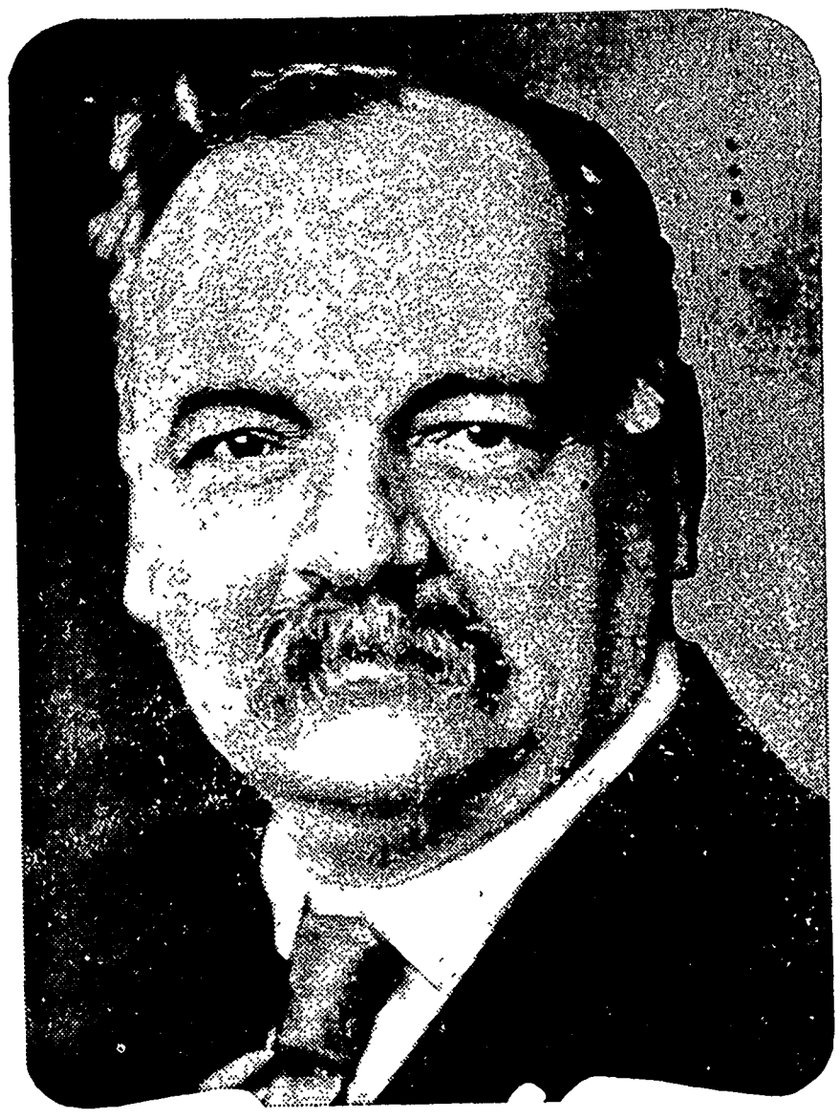
Meanwhile the wily Vare had decided that it would be a master stroke to issue a statement on his own account. So he sent out word to the news gatherers to this effect: "The Republicans of Pennsylvania, in my judgment, are for Herbert Hoover. I said in Philadelphia last month that he would be the strongest candidate the Republicans could nominate and that statement I now emphatically repeat. I shall use my influence at the caucus of the Pennsylvania delegation to have Secretary Hoover's candidacy indorsed."

It was accepted by all that this forced Mellon's hand and in fact, if not nominally, took away from him the control of the Pennsylvania delegation. At the caucus next day Mellon sat with his brother on one side of him and Vare on the other, and to the knowing he looked foolish. In a low voice he advised the delegation to vote for Hoover.

"Draft Coolidge" Dropped.

For some hours before the arrival of the Pennsylvanians and the developments noted above, there had been a recrudescence of the movement to draft Coolidge, and this pleased various elements for various reasons. But Vare's action, coupled with statements that in the opinion of his closest friends Mr. Coolidge would not consent to run, put an effective quietus on all the "draft" talk. Whether the President would send any direct message to the convention remained a moot question, but those supposed to be in his confidence believed that a definite stand for Hoover by the Pennsylvania delegation would make it unnecessary. Even William M. Butler, chairman of the national committee, when he found that Mellon could not deliver the delegation solidly, if at all, for Coolidge, definietly abandoned that favorite plan of his and prophesied that Hoover would win on the first or second ballot. He called together the Massachusetts delegates and informed them that the project to draft the President had collapsed and that therefore they were free to vote solidly for Hoover. One of the Coolidge drafters, who is credited with entire sincerity in that plan, was Charles D. Hilles of New York. During the early part of the week he was confined to his room with a slight attack of illness. Mr. Hilles had no enmity for the secretary of commerce, but he had told other party leaders that, while he could carry the Empire state against Al Smith with Coolidge, Hughes or Dawes as the Republican candidate, he could not do so if Hoover were nominated. And this opinion he did not alter.

Herbert C. Hoover



Charles Curtis

Around the Headquarters.

Curtis boomers really were the first to stir things up about the hotels so that the actual convention aspect began to appear. A group of young men bedecked with sunflowers went the rounds of the headquarters Monday rendering parodies of well-known songs designed to set forth the excellent qualities of their senator as Presidential timber. Then they went to Mr. Curtis' private room in the Muehlebach hotel and sang them all over again.

"Thanks, boys, that was fine," said the senator as he shook them all by the hand, "but suppose you go downstairs and sing. I think maybe it would do me more good."

Another of the Curtis aids was an American Indian in full war paint and trappings, who did his war dances in the hotel lobbies to the delight of the crowds.

Elaborate Lowden headquarters, scattered all over the place, were numerously peopled with busy workers who handed out masses of literature and plastered badges on all who would accept them. Chief of these badges, naturally, was one demanding "equality for agriculture," and it was worn by many farmers who nevertheless would not admit that he was irrevocably against Hoover.

Californians who were here to boost the cause of Hoover, their favorite son, made the Aladdin hotel a popular place. In the lobby and in the roof garden they served unlimited quantities of iced orange juice to all comers, the cups being passed around by handsome young ladies of Spanish type and in Spanish garb. Of course this advertised California's oranges, but it also made people think kindly of the secretary of commerce.

Hooverites Always Confident.

It must be said that no one displayed any tremendous enthusiasm about Mr. Hoover, but this probably was because his supporters believed such display was unnecessary. However, they were on the job all the time and did not neglect the movements and devices of their opponents. One day an elevator in the Muehlebach hotel went on strike and 16 men were marooned between floors for several hours. "I'll bet they are all Hoover delegates and it's a scheme of the allies," cried a Hooverite as he scurried off to Hoover headquarters with the news.

Close to those headquarters was a huge street-spanning banner bearing the words, "Lowden, the Man of the Hour." "Yeah," said a Hoover-badged stock raiser from the Northwest, "the man of just about an hour—and then he's done."

If anything disturbed the supreme confidence of the Hooverites in the hours before the convention assembled it was the statement issued by Senator Curtis immediately upon his arrival that he had come hoping and believing he would be the nominee, but that in any case he was definitely in the camp of the anti-Hooverites. This was depressing to those who had been seriously considering the plan of putting the Kansas senator on the Hoover ticket in second place.

Busy Women With Planks.

Women, hundreds of them, energetic, eloquent and efficient! They pervaded the scene during the week, some of them active for the various candidates; some for the two causes that especially interested their sex, equal rights and a prohibition enforcement plank; a few as newspaper correspondents, and many just for the fun of the thing and as much excitement as could be obtained from the convention.

None of the ladies attracted more attention than Mrs. Ruth Hanna McCormick of Chicago, candidate for representative-at-large from Illinois, and Mrs. Alice Roosevelt Longworth, wife of the speaker of the house, who wouldn't miss a Republican convention for a farm. The two are old friends, and when Alice went to a hotel instead of to the house that Ruth had rented there were rumors that they had split because Mrs. McCormick was a Lowden manager and Mrs. Longworth was believed to favor Hoover, Both, when questioned, declared the idea was absurd, that they frequently didn't agree but that made no difference in their friendship; and later they were much together. Alice was recognized wherever she appeared and it seemed she had inherited much of the popularity of her famous father as well as much of his vividness of personality and his love of life.

Five planks were brought to Kansas City by four women who represented the National League of Women Voters. They asked the party for support of the effort to obtain by uniform agreement with other nations the renunciation of war, the substitution of arbitration for war in the settlement of international disputes, and the entrance of the United States in the permanent court of international justice. They also sought approval of an amendment to the Constitution doing away with the long interval between election of members of congress and the beginning of their terms; further development of the policies of the present administration toward child welfare; government operation of Muscle Shoals, and the removal of "legal discrimination against women by specific measures not prejudicial to women's labor laws or to social conditions" instead of dealing with the subject by blanket legislation. The four women who appeared before the committee on resolutions were Miss Belle Sherwin of Cleveland, Mrs. James W. Morrison of Chicago, Mrs. George Gellhorn of St. Louis and Mrs. Herbert Knox Smith of Farmington, Conn.

City Kind to Correspondents.

Kansas City folk, proud of the "Heart of America," as they call their city, overlooked no opportunity to impress on the visitors its advantages and beauties. The newspaper correspondents always are well cared for at national conventions, and Kansas City paid them especial attention, with excellent results. They started off the week with a golf tournament at the Hillcrest club, and the mere ride out there was a wonderful advertisement for the city, for it took the writers through beautiful residential sections, along perfect boulevards and up the green rolling hills from which they could overlook the country for many miles.

"We never realized how beautiful Kansas City was," said the correspondents, almost unanimously, and it was certain they would tell something of what they had discovered in the stories they wrote.

R. M. Switzer, a veteran from Quincy, Ill., carried off the handsome trophy donated by the Kansas City Star. His score—77—was so good that no one else had a Chinaman's chance; the other boys were certain he could not be a very active newspaper man and spend the time on the links necessary to learn the game so well. Equally unapproachable, on the other end of the scale, was the score of "Bugs" Baer, the columnist. His remarkable 130 won for him the booby prize.

If the correspondents had any complaint to make concerning the Kansas City convention it was that the news was too unexciting, and that was not the fault of Kansas City.

Monday evening Kansas City staged its own spectacular feature of the week in the form of a revival of the old-time flambeau parade. The torch bearers were there in large numbers but they were by no means all of the show. Many bands, National Guard units, fire apparatus and numerous elaborate floats depicting historical scenes and personages were in the line, and at Penn Valley park, where the parade disbanded, a fine exhibit of fireworks was given.

The proverbial "solid mass of humanity" was out on Grand avenue to see this big show, and "solid" is scarcely an exaggeration, for the mounted police could hardly force a passage for the marchers down that broad thoroughfare. Memorial hill and the Union station plaza were packed to the limit. The hill itself was a gigantic grandstand, the crowd stretching back to the north wall of the impressive Liberty memorial and clinging to the parapets and buttresses above. For several hours the lobbies of the hotels were relatively deserted.

Rain and a gale of wind greeted the convention crowd when it arose Tuesday all primed for the opening session. The prospects were dismal for the sightseers as well as for most of the candidates, and raincoats and umbrellas were dragged forth. One correspondent approached a gracious lady stationed at the "information" stand in the Athletic club lobby with the brash question: "Is this rain going to stop soon?" "Oh yes," was the unhesitating reply. "Before 11 o'clock." And sure enough, it did.

On the whole, the weather was all that could be asked, and those who had deplored the selection of Kansas City for the convention city because of its supposed extreme heat in summer were pleasantly disappointed. Breezes from the Missouri river and part-time clouds served to temper the warmth and keep collars unwilted.

(©, 1928, Western Newspaper Union.)

May We Suggest

—FOR SUMMER IMPROVEMENT—

New Window Screens for your home and one of our Combination Screen & Storm Doors.

Rebuild your porch from that old fashioned kind to a modern screen, or enclosed porch which you will enjoy more.

Now is a good time to re-roof while the weather is right. We can supply you with the shingles you need—any kind!

Why not fix up your cement walk, or build a nice walk or cement drive to your garage? It don't cost much.

We have some nice garden trellis and other lawn decorators. Get one today!

Northern Lumber Co.

Threshing Coal - -

—AND OTHER SUPPLIES YOU MAY NEED NOW OR SOON

We will have plenty of high grade coal on hand especially for threshing. We have three car loads on the way now, due to arrive before threshing. Let us take care of your wants in high grade threshing coal.

COAL FOR RANGES

For your cooking range we recommend that you try our Illinois Egg, especially fine for summer cooking.

ABOUT POULTRY FEEDS

We have a lot of satisfied customers who have fine luck with our MOR-GAIN Starter and growing mash. And by the big orders we sell it certainly must be good. We ask you to try MOR-GAIN.

MAKE YOUR HOGS PAY!

You can make more money, and do it quicker by feeding your Hogs MOR-GAIN PIG MEAL. Klemme farmers report fine results since they began using it. We are selling a lot of it every day and aim to carry plenty on hand.

Try our Occident and Mothers Best Flour—none better regardless of price.

North Iowa Grain Co.

Summer Foods

Right now we are specializing on foods for summer days. We aim to carry a complete line of foods that will appeal to you at this time of the year.

MAKE YOUR OWN COLD DRINKS

Mix your own cool, refreshing drinks at home by using our Fruit Syrup which comes in a variety of flavors. A pint of syrup makes a gallon of delicious drink.

FRESH FRUIT EVERY DAY

Strawberries, Pineapples, Oranges, Bananas, Lemons, Apples and Cantaloupes are fresh here every day. Buy your berries or pineapples by the crate—they are low in price this ya and it will pay you to can this choice fruit.

BAKERY GOODS

Week end specials of Fresh Cakes and a variety of Bakery Goods for your Sunday dinners. You will like our kind.

OTHER TIMELY ITEMS

A full line of Cold Meats, Pickles, etc. for picnic lunches. New potatoes now!

Don't forget we handle American No-Corn and Full-O-Pep Course Chick Feeds.

Special For Saturday

PINEAPPLES, Broken Slices
4 No. 2½ Cans at only 84c
BANANAS, nice and fresh
4 lbs. at only 25c

Mr. and Mrs. Ely of Belmond spent Sunday at the Dr. Missman home.

Arthur Johnson returned home last week from California where he has spent more than a year.

Mrs. Carlst Reibe of Garner spent several days the past week visiting at the home of her daughter and family, Mrs. Paul Mueller.

Miss Hulda Johnson is expected to arrive home from California in the near future for a visit with her relatives here.

Mrs. P. M. Wilson and Mr. and Mrs. W. E Klingaman, of Garner, were Clear Lake visitors Sunday evening.

Mr. and Mrs. Henry Ludeke entertained for dinner Sunday Mr. and Mrs. Leonard Sampson and children.

This vicinity was visited by a heavy rain Wednesday afternoon of this week. Hail was reported to be severe around Garner and Duncan. But few hail fell here at Klemme.

Grandma Schroeder, Mrs. Croner and Dorothy, Mrs. Schroeder and Max Barz all enjoyed a visit at Mason City Friday.

Miss Mildred Johnson returned home this morning from the south where she had been assisting with Evangelistic work.

FOR RENT—First house west of Henry Freie residence. Recently remodeled. See Frank Gruetzmacher for particulars. 1tc.

A. D. Gimer and son Harl, John Bock and Mr. Stromer, drove to Rockford on business this afternoon.

Mr. and Mrs. Albert Fuller and children, of Good Thunder, Minn., visited over the week end in Klemme and vicinity.

Fred Griewe and family left for Centerpoint yesterday after visiting several days here and at Garden City, Minn.

Sumner Trumbell is enjoying his annual two weeks vacation. During that time Frank Gibbs is substitute carrier on route one.

Charles Gruetzmacher of Lime Springs, and Geo. Gruetzmacher of Garner, visited with their brother, Frank and family here Sunday.

The past week Dr. Zinn had his office treated to a coat of paint and The Times Office followed suit. Now comes F. Gruetzmacher who says he will repaint his store.

Mrs. Minnie Josten of Garner was visiting at the Gauger home Tuesday to care for the children while the Gauger family attended the picnic at Algona.

John Josten has been at the Mercy Hospital about a week, recovering from an operation. Erick Josten drove over yesterday and brot him home.

Mrs. P M. Wilson drove to Clarion today to bring her daughter, Gladys home, who has been at a Camp Fire Girls camp at Boone for nearly two weeks.

Mr. and Mrs. C. G. Waterman and Marian, and Mrs. Mary Waterman, and Mrs R. A Jorgenson and son, Buster, were at Mason City Saturday afternoon

The parsonage of the Reformed Church was remodeled last week by excavating on the kitchen and making the room thus gained into a laundry room. The house now has a full cemented basement under it.

Esther and John Fuller came last evening from Good Thunder, Minn., for a few days visit with Klemme relatives and friends Esther will remain for a couple of weeks to assist Mrs R W. Elder.

Miss Adella Kuhlman, operator at the Iowa Union Office will have a vacation and will leave the first of the week for her home at Meno, South Dakota. Valeria Koerner is substituting for her.

Mr. and Mrs. R. G. Brown, of Garrison, Iowa, and Mr. and Mrs. Albert Brown of Sheldon, North Dakota, and Mr. and Mrs. T. J. Finn of Belmond, were visiting at the A P Finn home Tuesday evening

Mr. and Mrs. F. Gruetzmacher entertained for dinner Sunday evening Geo. Gruetzmacher of Garner, Chas. Gruetzmacher of Lime Springs, and Mrs. P. M. Griesemer and Mrs. Jno. Gruetzmacher of Klemme.

Herman Best, manager of the North Iowa Grain Co. elevator at Duncan, moved his belongings to that little city Monday where he has rented a house. No, don't get excited! Herman is merely "batching it" for the present—at least.

Mr. and Mrs. Dick Bamman and sons, Le Roy, Roger and Robert, of Chicago, arrived Friday evening for a visit of a couple of months at the Mrs. Henry Schuldt home and with other relatives. However, Dick returned to Chicago after a few days visit.

John Miller of Marengo, and son Frank, of Norway, Iowa, drove up last Thursday to look after matters of business. Frank paid the Editor a short visit which we enjoyed. He says the Millers' and the Woods' are all well and happy, that farm crops are good, and that they like that part of the state.

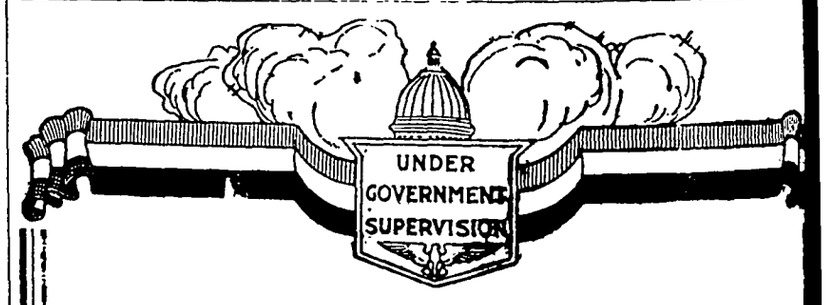
M. N. ZEIGER

Garner, Iowa



Are You A Wanter Or A Saver?

You can go through life always wanting things just beyond your financial reach. —Or you can periodically purchase those things that will round out your happiness. A part of your income deposited with this strong bank will not only pay you interest but will build up a reserve fund with which you can both satisfy your desires and meet possible emergencies. .. .. .

THE KLEMME TIMES

VOLUME 33.—NO. 4. KLEMME, IOWA, THURSDAY, JUNE 28, 1928. $2.00 Per Year In Advance—Outside of Iowa $2.50

SENIOR TELLS BOYS WHAT CLOTHES ARE NEEDED

College Boys Should Choose A Proper List Needed

What clothes for college? That's a question that many boys, just out of high school, are anxious to have answered. Here is the answer given by a senior student at Iowa State College.

Suits—One for school use, which need not be new or of latest cut, as much laboratory work is hard on clothes. If possible another suit for social functions Knickers, tuxedos, and coveralls may come in handy but need not be purchased until needed.

Headgear—Little used among college men. Some go the year round without hats, while freshmen wear the "prep cap," which is purchased after registration.

Shoes—Comfortable, first of all. Black and tan oxfords are worn. A pair of army shoes for compulsory military training. A pair of tennis or basketball shoes for physical training work.

Overcoat—Better not purchase a new one until the freshman has opportunity to see what other college boys are wearing. A topcoat for fall wear is desirable but not a necessity

Overshoes (Commonly called "galoshes")—A useful winter item.

Ties—Four of five with not too "wild" color schemes, and mo't the ready-tied variety.

Socks—Twelve to 20 pairs of serviceable variety.

Shirts—Eight or ten, preferably with soft collars. White is the most acceptable color.

Underclothing—Eight or ten suits athletic type preferred.

Bathrobe—Almost an essential.

Pajamas—Rather than nightshirts.

Raincoat—Desirable.

"The cardinal point to remember," says this senior student who has been thru the mill, "is, bring clothing which is essential at the time school starts, and let other purchases go until later."

WELL KNOWN GARNER MAN DIED SATURDAY P. M.

John Schneider Passed Away After Short Illness

John Schneider, resident of Garner for the past thirty-eight years, died at his home Saturday afternoon, following a short illness His death was due to gangrene setting in one of his limbs. Mr Schneider was a man about sixty-five years old.

For a number of years he was janitor of the grade school, until about seven years ago when one of his legs became frozen and had to be amputated Since that time he had been in the insurance business.

Besides his wife he leaves three children, one son, Raymond of Grundy Center, Iowa, another son, Paul of Los Angeles, Cal, and a daughter, Mrs. Roy Armentrout, of Mason City, Iowa

DEVISE NEW TATOOING SYSTEM FOR PORKERS

Permits Identification Of Farm On Which Hog Was Raised

A new system of letters for tatooing hogs has been worked out which will permit identifying the state, county, township and farm on which a hog was raised even after the hog has been killed, scalded and scraped for dressing at the big market centers Many counties in the state where tuberculosis eradication has been completed, or is well under way have adopted the new tatoo marking system, reports Dr K W Stouder, extension veterinarian, Iowa State College

This new marking system will give opportunity to locate readily the exact farms in each county that are producing diseased hogs, and it will give opportunity to trace stolen hogs, Dr. Stouder points out. Still another possibility is that it will provide a way of reporting to farmers on dressing percentages and on good or poor types as shown on the killing floor Also it will give a chance to check up the quality of carcasses from different feeds, feed combinations or feeding systems.

The new plan is quite simple It involves the use of five letters The first letter indicates the state, which is "I" for Iowa. The second letter indicates the county This letter is assigned, in the order in which counties are accredited as being tuberculosis-free. A bar over the letter is used for the second group of 26 counties after once going thru the alphabet. A bar under the state letter indicates the third group of 26 and a bar above and below distinguishes the counties in the final group

The third letter of the five indicates the township, the fourth indicates the section in the township and the 5th letter the farm Each section is divided into 40 acre groups —each of which is assigned a letter With this plan, the designation is placed on the land for all time. If a man moves, the designation for his hogs will change

Marks applied with lamp black and linseed oil, mixed thick and smeared on phonograph needles which have been set in metal blocks are used to make the tatoo. These marks, if placed deeply in the skin, may be expected to stay and be legible several months after they are applied.

The marks are placed on a hog's back slightly to one side of the center line and just between the shoulder blades, or at the point where the neck joins the back. If placed here, the letters are easily read after the hog is scalded and scraped in dressing.

Complete details of the tatooing system, or the mark for any particular county may be learned by writing to the secretary of Agriculture, Des Moines, or to the Extension Service, Iowa State College, Ames.

Money is no good unless we spend it; and the other fellow's money is no good to us unless he spends it with us. How's that philosophy?

The Nation's Birthday

Next Wednesday will mark the 152nd birthday of the Declaration of Independence. On July 4, 1776, the United States of America "first saw light" in Independence Hall, Philadelphia. On the date was written the Declaration of Independence, a document written for all men and for all times. It is a document that will live through the ages.

Measured by the history of the world, United States is just a kiddie in kilts. But, measured by human accomplishments and successes in effort, more has been done in the United States since July 4, 1776, than in all the rest of the world, in all the rest of history.

The Fourth of July still thrills the American heart. Patriotism is not dead, nor dying. The principals and traditions of American democracy continue to be cherished by loyal millions of men and women devoted to the noblest ideals of life.

It does the nation good to assemble in celebration on Independence Day. It is good for the children. It brings them close to the Flag and its memories. The day makes us better citizens. It is a day for enthusiasm —for the firing of guns, the exploding of fireworks, the blaring of bands and for loud hurrahs by the people.

Fly your banners, fire your crackers, listen to your oratos on July 4 for they tell the story of a free people, risen to be of the mightiest power, politically, economically, spiritually or intellectually the world knows. Just because they are all earnestly, sncerely, steadfastly devoted to the highest of ideals, man's liberty under God.

We salute the Stars and Stripes!

FORMER KLEMME MAN GOES TO WORCESTER, MASS.

Ray McConn Has General Agency With Insurance Company

CLEAR LAKE, June 28.—Mr. and Mrs. R A McConn, North Second street, will leave soon for Worcester, Mass., where the firm of Ream and McConn will be continued as a General Agency of the Mutual Life Insurance Company.

Mr and Mrs. McConn will dispose of their household goods within the next few days They expect to leave Clear Lake about July 10.

CAN BEETS WHILE THEY ARE STILL QUITE SMALL

Not So Tough And More Attractive At This Stage

Beets are best canned as soon as they are medium in size because at this stage they have developed their flavor, have not become tough and may be packed whole in jars, which makes them more attractive when served. So suggests Miss Lela Joy Bennett of Iowa State College.

The red color in beets is quite soluble and readily lost in cooking. If the tops are cut off at least an inch from the beet, this prevents some loss of color.

Put the beets in boiling water and cook as quickly as possible until tender. Pour the water off and dip them into cold water until they are cool enough to handle. Slip off the skins and trim them. Pour over the beets a sweetened vinegar made by adding 1 cup sugar to 1 cup vinegar for each quart of beets. Bring to the boiling point and boil until thoroly heated. Pack in sterilized jars and seal.

KLEMME AND DOWS CREAMERY SHIP BUTTER IN SAME CAR

Find That This Is An Economical Way Of Reaching Market

Buttermaker A. D. Gimer of the Klemme Creamery called on Mr. Art Larson, buttermaker at the Dows Greamery last Saturday afternoon.

The Dows Creamery and the local creamery ship butter in the same car, and by this method not only save money on freight but get the shipments out oftener, as they load a car every five days and by pooling their shipments in this way, get an extra half cent per pound premium over the market.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Next Sunday being nearest our National Birthday we will observe the day in keeping with the occasion. Our services will be of a patriotic nature in song and sermon. Special music is planned for the day.

Our classes in cateschism as a part of our Bible School work are continuing for a little longer. The response in the Bible story telling contest has been fine. Most of our contestants have chosen their subjects and are at work. This contest will be held in the near future.

The Liberty S. S. has plans under way for their picnic to be held on the 4th of July. The place will be announced on the coming Sunday.

Miss Hulda Johnson arrived home Tuesday from Los Angeles, California, for an extended visit at the home of her parents, Mr. and Mrs. Joe E. Johnson and family and other relatives and friends in this vicinity.

SUNDAY SCHOOLS WILL HAVE PICNIC DINNERS

Friday And July 4th Are Dates Set By Reformed Sunday Schools

Two picnics at least are ahead for Sunday schools in this vicinity.

The Klemme Reformed Sunday School are planning a program and a big picnic dinner to be held at the church park Friday of this week to begin at 9:00 a. m.

The Elltown Reformed Sunday School has set as their picnic date, the Fourth of July, and their festivities will take place at the grove adjoining the parsonage.

The Liberty Township Methodist Sunday School is laying plans for a big picnic dinner and general good time to be staged July 4th. But as to the place chosen, this matter has not been decided as we go to press.

Many others are planning family picnics and gatherings of various kinds for the Fourth.

BOY SCOUT PUBLIC PROGRAM AT SCHOOL GYM TONIGHT

Hampton Troop And Mason City Officials Will Put On Work

The public is invited this evening (Thursday) to attend the public installation ceremonies of the local Boy Scout Troop, which will be at the High School Gym at 8:00 P. M.

The Boy Scout Troop from Hampton will put on the ceremony work and Officials of the North Iowa Area Council will superintend the activities.

Parents and friends are invited. The admission is free.

KLEMME CITY WATER SUPPLY IS FOUND PURE

The Times is in receipt of a card from the University of Iowa, Water Laboratory Division, State Board of Health.

The card carries the information that an examination of a sample of water from the Public Water Supply of Klemme showed the condition of the water to be satisfactory at this time.

The Times beleives that at least every three months or even every month, for that matter, is none too often to have the water tested as to its purity.

REFORMED CHURCH NOTES

Calvin Grosshuesch, Pastor

10:00 A. M. English service.

11:00 A. M. Sunday school.

Young Peoples Bible Class will meet Tuesday evening.

Our annual Sunday School Picnic will be held Friday, June 29th The Bible School will begin the day at 10:00 o'clock with a program.

Dinner will be served at the church park.

All are invited to attend.

WILL KEEP OPEN NIGHT NEXT TUESDAY BEFORE FOURTH

Klemme Stores Will Be Closed On Wednesday, July 4th

It is customary for the stores in Klemme to remain open on Wednesday nights, but next week this will not be the case.

As July Fourth comes on Wednesday this year the business men of Klemme have signified their intention of keeping their stores open on Tuesday night, July 3rd, next week and will remain closed all day and evening, July 4th.

Keep this date in mind and do your shopping on Tuesday night of next week.

Funeral For Infant Held Wednesday Afternoon

Wednesday afternoon Rev. A. W. Gauger conducted funeral services for Donald, infant son of Mr. and Mrs. Benj. Mullin, at the Mullin home near Klemme Burial was made at Luverne, Iowa.

The child lived but a few hours after birth. Mr. and Mrs. Mullin have the sympathy of the community in their loss.

KLEMME MAN ENDS OWN LIFE TUESDAY EVENING

Clark Bredbenner Used Shotgun To Commit Rash Deed

Cark M Bredbenner, thirty-nine year old resident of Klemme, ended his own life Tuesday evening at 6:30 o'clock by discharging a single barrel shotgun which he placed in his mouth. The report was heard and Ervin Lau, brother-in-law was called and found the body in the barn across from the Bredbenner home Coroner Zeiger, of Garner pronounced the case suicide. No motive is known for Mr. Bredbenner's act.

The news of Mr. Bredbenner's tragic death was a shock to the community as the deceased was not of a despondent nature and was a happy, care-free man, good natured and and whole-hearted, willing at any time to sacrifice his own time to help those in need. The sympathy of the community goes out to his fine family in their sorrow at this time

Obituary

(By Rev. A. W. Gauger)

Mr. Clark Bredbenner was born August 12, 1899 in Berwick, Penn., being the child of Lutheran parents he was baptized in infancy and was reared in the Lutheram faith.

Until young manhood his home community was the place of his abode When 22 years of age in 1911 he came west and resided in the state of Kansas. There he remained until the fall of 1914 when he came to Klemme, Iowa, where he resided since.

Endowed with a sociable disposition he soon enjoyed a large acquaintanceship. Deceased had some commendable traits. He was ready to do another a good turn, and when himself he was kind to his ved ones.

On August 9, 1916, he was united in marriage to Miss Martha Lau, of Klemme. She ever proved a faithful and patient companion.

To them one daughter, Miss Novella, was born who along with her mother survive the husband and father Beside these he is survived by his mother and aged grandfather.

He came to his death on Tuesday evening, June 26, 1928, in Klemme, Iowa.

We assure Mrs. Bredbenner and Novella that they have the highest respect and most sincere sympathy of this entire community.

Funeral services are conducted today (Thursday) by Rev. A. W. Gauger of the Methodist Church. Interment will be in Calvary Cemetery.

COUNCIL PROCEEDINGS

Klemme, Iowa.

John Heginger, 50 loads of Gravel, hauling, labor	70.00
Henry Lau Sons, Repairs	9.20

Bills allowed.

Meeting adjourned.

A. J. KUDJE, Clerk.

The HISTORIC "BLACK WATCH"

CHARGE OF THE "BLACK WATCH" AT TICONDEROGA (Painting by Ferris)

42ND HIGHLANDERS "BLACK WATCH"

"Black Watch at Ticonderoga," courtesy Glens Falls Insurance company; "Black Watch at Bushy Run," and sketch of Black Watch uniform, from Yale University Press' "Pageant of America."

By ELMO SCOTT WATSON

OF ALL the military organizations which served in wars on the North American continent, few were more picturesque or had a more romantic history and none, probably, ever engaged in more desperate "forlorn hopes" than those which at least twice fell to the lot of the regiment officially designated as the Forty-second Foot, a line regiment in the armies of his majesty, the king of England, also known as the Forty-second Highlanders, but best remembered as the "Black Watch." The "Black Watch," according to C. M. Bomberger, editor of the Jeannette (Pa.) News-Dispatch, who has made a special study of this regiment and one of its famous battles, was organized by the king of England in 1729 with specially picked men from the Highlands of Scotland for the purpose of maintaining order in that turbulent region and in 1739 was made a line regiment, the Forty-second Foot. They were disbanded in 1748 but were enrolled again at the outbreak of the French and Indian war.

The uniform of the "Black Watch," according to a description of the grenadiers of the regiment in 1751, is described as follows: "Headdress, a grenadier bearskin with scarlet visor; white stock; scarlet jacket and waistcoat with white lace trimmings, silver buttons and buff collar and cuffs; black leather sword belt; and cartouch-box and belt; tan leather sporran; Murray of Athol belted plaid; red and white hose and black leather shoes." This was the same uniform worn by the other companies of the "Black Watch" during their period of service in America, except the headdress was a blue bonnet, with checkered border and tuft of feathers and Black Watch tartan belted plaid. The reason for the name "Black Watch" lies in the fact that the kilts were dyed in such a manner as to include the colors of a number of Scottish clans until finally it became almost black, hence the name "Black" Watch. Incidentally they were the only regiment in which the pipers wore the Stuart tartan.

Upon its arrival in America, the "Black Watch," under the command of Maj. Duncan Campbell of Inverawe, was included in the army of 6,000 British regulars and 9,000 provincial troops which Lord Pitt, the great British prime minister, was sending under the command of Gen. James Abercromby, "a heavy man, infirm in body and mind," a veritable "wooden pole wearing a cocked hat," up the historic water route of the Hudson and Lake Champlain to strike at the heart of New France and capture Montreal.

But this magnificent force was doomed to inglorious defeat and before the campaign ended the "Black Watch" was to experience a sickening and useless slaughter which was to all but wipe it out of existence. For despite the fact that the French had available only about 3,000 men to face this imposing array, they were commanded by a military genius, Marquis de Montcalm. Although Montcalm had little hope of being able to hold Fort Ticonderoga, the key to possession of that region, he prepared to put up the best resistance possible with his small force. Arriving near Ticonderoga, Abercromby's army pushed on to find Montcalm's troops behind breastworks on the crest of a small hill west of the main fort, awaiting their attack. Abercromby foolishly decided to use his superior forces in trying to carry these works by storm instead of flanking the French and laying siege to the fort or bringing up his artillery and reducing its defenses. He even gave orders that not a shot was to be fired but that the works were to be carried at the point of the bayonet.

Soon after noon one hot day just 170 years ago (July 6, 1758) the British troops advanced to the attack in three solid columns. The French waited until the redcoats had almost reached the abattis and then opened fire with muskets and cannon. As the heads of the column were swept away in that sheet of flame and the repeated volleys continued to deal death in the massed ranks, the British were forced to fall back into the timber, still under fire and still losing men at every step. When word was sent back to Abercromby of what had happened, his reply was a repetition of his first foolish order. So they tried it again and again were hurled back by the deadly fire. No less than six times that afternoon did these dauntless British and provincials march up that "hill of death" only to be cut down by the hell of gunfire which swept the slope.

Finally it was decided to make one last desperate attempt upon the extreme right of the position and the "Black Watch" was selected for the assault. History records fewer examples of dauntless heroism and useless gallantry than the charge of these Scottish Highlanders at Ticonderoga. Under a scattering fire which tore holes in their ranks they steadily advanced across the clearing until they reached the abattis, which they tore aside, cut down or got over in some way. Major Campbell was shot down but his men pressed on until they reached the breastworks and under a deadly hail of bullets sprang upon them. The French gave way at that point temporarily and another Campbell with some twenty officers and men leaped down into the inclosure. But Montcalm hurled a body of reserve troops at the breach which the Highlanders had made and those inside the breastworks were trapped. Disdaining to ask for quarter, with their backs to the wall, they fought desparately until they were bayoneted where they stood. Those on the outside who were attempting to climb the breastworks were hurled back and they retreated sullenly, carrying their wounded commander with them. As they retreated the French cheered them, for they had seen an act of deathless heroism.

Out of a thousand soldiers of the "Black Watch" who hurled themselves against the French defenses, only 353 came out unwounded. The total British loss in that slaughter pen was 1,600 regulars and 350 provincials killed and wounded. Montcalm's loss was only 400. Abercromby ordered a retreat to headquarters on the Hudson. The grand expedition which had set out from Lake George so proudly two days before had failed miserably.

One of the most interesting incidents connected with the part played by the "Black Watch" at Ticonderoga is the "Legend of Inverawe," one of the most famous "ghost stories" in all history. Here is that story as told in Parkman's "Montcalm and Wolfe":

The ancient castle of Inverawe stands by the banks of the Awe in the midst of the wild and picturesque scenery of the western Highlands. Late one evening, before the middle of the last century, as the laird, Duncan Campbell, sat alone in the old hall, there was a loud knocking on the gate and opening it, he saw a stranger, with torn clothing and kilt besmeared with blood, who in a breathless voice begged for an asylum. He went on to say that he had killed a man in a fray, and that the pursuers were at his heels. Campbell promised to shelter him. "Swear on your dirk!" said the stranger; and Campbell swore. He then led him to a secret recess in the depths of the castle. Scarcely was he hidden when again there was a loud knocking at the gate and two armed men appeared. "Your cousin, Donald, has been murdered, and we are looking for the murderer!" Campbell, remembering his oath, professed to have no knowledge of the fugitive; and the men went on their way. The laird, in great agitation, lay down to rest in a large dark room where at length he fell asleep. Waking suddenly in bewilderment and terror, he saw the ghost of the murdered Donald standing by his bedside, and heard a hollow voice pronounce the words 'Inverawe! Inverawe! blood has been shed. Shield not the murderer!" In the morning Campbell went to the hiding place of the guilty man and told him that he could harbor him no longer. "You have sworn on your dirk!" he replied; and the laird of Inverawe, greatly perplexed and troubled, made a compromise between conflicting duties, promised not to betray his guest, led him to the neighboring mountain (Ben Cruachan) and hid him in a cave.

In the next night, as he lay tossing in feverish slumber, the same stern voice awoke him, the ghost of his cousin Donald stood again at his bedside, and again he heard the same appalling words: "Inverawe! Inverawe! blood has been shed. Shield not the murderer!" At break of day he hastened, in strange agitation, to the cave; but it was empty, the stranger had gone. At night as he strove in vain to sleep, the vision appeared once more, ghastly pale, but less stern of aspect than before. "Farewell, Inverawe!" it said; "Farewell, till we meet at TICONDEROGA!"

The strange name dwelt in Campbell's memory. He had joined the Black Watch, or Forty-second regiment, then employed in keeping order in the turbulent Highlands. In time he became its major; and, in a year or two after the war broke out, he went with it to America. Here, to his horror, he learned that he was ordered to the attack of Ticonderoga. His story was well known among his brother officers. They combined among themselves to disarm his fears; and when they reached the fatal spot they told him on the eve of the battle: "This is not Ticonderoga; we are not there yet; this is Fort George." But in the morning he came to them with haggard looks. "I have seen him! You have deceived me! He came to my tent last night! This is Ticonderoga! I shall die today!" and his prediction was fulfilled.

THE "BLACK WATCH" AT BUSHY RUN (Painting by Jefferys)

When the news of the heroism of the "Black Watch" reached England the king, as a reward for their deed, renamed the regiment the Royal Highlanders. After the end of the disastrous Abercromby expedition the remnants of the shattered "Black Watch" regiment were stationed in Albany until the summer of 1763, when they were ordered to Pennsylvania to take part in the expedition which Col. Henry Bouquet was to lead to the relief of Fort Pitt, which was then besieged by Pontiac's Indians.

Bouquet set out from Carlisle, Pa., at the end of June, 1763, with a force of a little more than 500 men, composed of a detachment of his own regiment, the Sixtieth Regiment of Royal Americans, a detachment of the Seventy-seventh regiment, Montgomery's Highlanders and the Forty-second regiment of Royal Highlanders, the "Black Watch," and a detachment of rangers.

By August 5 Bouquet was nearing his goal. About noon of that day, after a forced march of 17 miles through the hot forests, Bouquet had reached a place called Edge hill, 26 miles from Fort Pitt, when his advance guard was attacked by the Indians. The two light infantry companies of the "Black Watch" went to their support and scattered the Indians. But immediately the savages came swarming back and within a short time Bouquet's little army was surrounded and fighting for their lives behind a hastily constructed defense on top of the hill.

When daylight came the Indians resumed their attack more fiercely than ever. Bouquet saw that it was only a matter of time until the fire of the enemy would cut down his force until the few that were left could not withstand the charge that was sure to come. Deciding to wager everything on one stroke, he executed one of the most daring maneuvers in history. The two companies of Highlanders withdrew suddenly from the line, retreated across the hill and entered a little ravine which ran along one side of the hill. Seeing this movement, the Indians believed that a general retreat was about to begin and came whooping out into the open.

This was just what Bouquet wanted. As the mass of savages struck the weakened line that had extended across the hill when the Highlanders left and forced it back, the "Black Watch" came charging out of the ravine on the flank of the enemy and as the kilted soldiers bore down upon them with their bayonets the Indians knew that they had been trapped. But it was too late then, for Bouquet again broke his line, threw two companies of light infantry out of the circle on the other flank and the savages were caught between the two forces. Within a few minutes Bouquet was in full possession of the field, but at a terrible cost. A total of 115 officers and men, nearly a fourth of his army, was killed or wounded. The heaviest loss was that of the "Black Watch" which had 25 killed and 27 wounded.

But they had helped save Pennsylvania. Bouquet pushed on to the relief of Fort Pitt and soon afterwards Pontiac's conspiracy collapsed. Later the "Black Watch" went on Bouquet's expedition into the Ohio country which put the finishing blow to Indian hostility and a detachment of this same regiment went down the Ohio to Fort Chartres in the Illinois country to receive the surrender of that post from the French who had not yet given it up in accordance with the terms of the treaty which ended the French and Indian war.

The regiment passed the following winter in Pennsylvania and was then ordered home. Reduced to almost a skeleton of its original strength, the "Black Watch" embarked at Philadelphia for Ireland in July, 1767. During the seven years of the "Black Watch's" service in America and the West Indies it had lost a total of 563 officers and men killed and wounded, but it had written on its banners the names of Ticonderoga and Edge Hill or Bushy Run, and those names stood for two of the most gallant deeds in all American history.

POULTRY FACTS

POULTRY BREEDS BEST FOR FARMER

Which is the best breed of poultry for the Ohio farmer?

With more than 500 farm flocks on which to base an answer to this question, flocks on which records were kept during 1926 in co-operation with county agents and the agricultural college extension service of the Ohio State university, poultry specialists at the university make this answer:

"There are several things to consider, but probably the most important is the individual whim of the farmer."

Before framing this answer the specialists examined the records and analyzed them in "Analysis of Poultry Profits, 1926," a new bulletin published for free distribution by the agricultural college extension service. Copies of the 16-page bulletin may be obtained from the county agent or the university.

Averages used in comparing breeds of poultry were drawn from records of Leghorns, Plymouth Rocks, Wyandottes, and Rhode Island Reds. Leghorn flocks constituted 59.8 per cent of those reporting, and the average size of the Leghorn flock was larger than for any other breed, indicating that Leghorns are more adaptable to large flocks.

"The Leghorns averaged 13.9 eggs more per bird than any other breed," the specialists point out. "This bears out the contention that Leghorns are better egg producers than other breeds.

"There are exceptions, however, for some of the lowest producing flocks were Leghorns. There was little difference in egg production among the three American breeds, although the Wyandottes averaged 7.2 eggs more per bird than the Plymouth Rocks.

"Cash receipts were less for the Leghorns than for any of the other breeds. This is true despite the higher egg production for Leghorns, and is largely due to increased meat receipts from hens and broilers for the American breeds.

"Total expenses per bird were slightly higher for the three American breeds. This tended to balance the labor income so that it was quite similar for the four breeds. With only 59 cents difference between the high and the low in labor income, it is apparent that there is no practical difference in the profitableness of these four main breeds."

Egg-Shell Material Is Essential for Layers

Oyster shell which is used for poultry is made by crushing the whole shells, after which they are washed three times. Following the washing the crushed shell is dried in rotary dryers, the intense heat of which destroys all foreign and putrid matter, making the shell sanitary and clean. The heating insures freedom from odor and poisonous matter.

After drying the shell is screened into two sizes, for hens and chicks, respectively. The oversized material and dust is eliminated.

The feeding of oyster shell is a good practice in poultry husbandry as the high calcium content provides bone-building material for growing birds and egg-shell material for laying hens. For this reason the material should be available in feeders at all times.

Poultry Hints

Lack of sunshine often causes leg weakness in chicks.

* * *

Overcrowding the house causes roup as well as stunted chicks.

* * *

The color of the egg shells has nothing to do with the food value of the eggs.

* * *

Eggs cannot be produced without nitrogenous food in some shape. Bones are absolutely essential.

* * *

Give the young poultry plenty of fresh air without drafts. An open growing coop will do this.

* * *

Remember that the hens which lay the golden eggs are the ones that produce them when they bring the highest prices.

* * *

A broiler is a young bird weighing less than two pounds. The best prices are received for the plump, well-developed birds.

* * *

The products of the great American hen rank fifth in our agricultural products list, and every year more people are realizing that there is money in hens.

* * *

The standard weight of the Pekin drake is nine pounds and of the Muscovy drake, ten pounds.

* * *

Many breeders sell the Leghorn cockerels when they weigh about one pound. At this size they are known as squab broilers.

* * *

When the hens stop laying they may often be started again by a change of feed, but do not give them much corn in summer, unless, of course, you have cooped them up to fatten for mar

PAVEMENTS CUT MOTORING COSTS

Tests Made at Washington College to Find Wear on Tires Over Roads.

More miles to the gallon of gas, less wear and tear on tires and a minimum of mechanical depreciation are the benefits gained by motorists who use well-paved roads, according to tests conducted by engineering schools, automobile clubs and government highway experts.

Wear on Tires.

Washington State college, in a test to determine the rate of wear on tires over various types of road surface, discovered that the average tire will go more than six times as far on concrete as on ordinary macadam.

The test results were tabulated, showing the average distance traveled before failure of one type of tire, under constant load and speed, on four kinds of road.

Macadam	5,900 miles
Good gravel	6,200 miles
Bitulithic	26,700 miles
Concrete	40,500 miles

Gas Consumption.

Gasoline consumption tests conducted by a motor-car manufacturer gave the following mileage per gallon seven types of road:

Earth	5.78
Fair gravel	7.10
Good gravel	9.39
Fair bituminous macadam	9.48
Fair brick	9.88
Good brick	11.44
Concrete	11.78

The pull required to move one ton on ordinary earth and gravel roads was shown, by the University of California tests, to be very nearly ten times as much as on concrete. Tire wear and mechanical depreciation were found to be greatly reduced in driving over smooth, hard concrete.

Great Britain Resents Display of U. S. Cars

Not so many years ago British motor car makers were inclined to look deprecatingly upon the appearance qualities of the American automobile. Today that situation has been reversed. Authority for the statement is found in remarks made before the metropolitan section of the Society of Automotive Engineers by A. E. P. Phillips, an officer of the Society of Motor Manufacturers and Trades, of London.

"You beat us all hollow in the matter of appearance," Mr. Phillips declared. "There is no question of it, and they are feeling that very much in England."

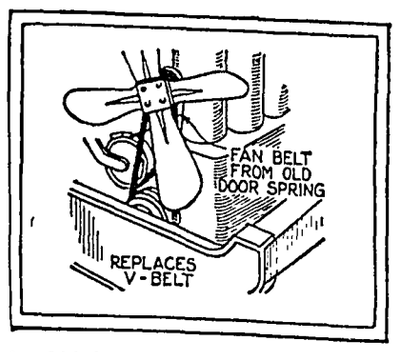
Old Tire Casings Used as Sandals in Mexico

Greek peasants and poorer Mexican workers are finding a new use for old American tires. The Greeks have substituted rubber for the laced strip of leather which formerly composed the tcharik of the villagers.

According to advices received by the Department of Commerce, at least 50,000 casings are being imported yearly by Greece, while Mexico is less dependent upon outside sources on account of the availability of used casings produced on a small scale in their own country.

Make Screen Door Spring Serve in an Emergency

While the only proper thing to do with a worn-out fan belt is to replace it with a new one, you can make a screen door spring serve in an emergency, as shown in the illustration. Two springs may be hooked together to take the place of a very long spring. Of course it is desirable to replace



An Old Screen Door Spring Connected at the Ends Will Operate the Fan Until You Can Replace a Worn-Out Belt.

the spring belt with a regular leather belt at the earliest opportunity, as the spring belt will wear a groove in the pulley if used for any length of time and the groove will cause excessive wear on the new leather or composition rubber belt when you eventually fit it.—Popular Science Monthly.

"Shoo Fly, Don't Bother Me," Autoist Now Says

The annoyance of having bugs fly into the open windows of automobiles while driving through the country will be a thing of the past, according to a resident of Baltimore, who has just received his papers from the patent office on an invention for screens for auto windows.

Bugs have not only been annoying to the motorists, but have been the cause of serious accidents by flying through the windshield and either biting or destroying the vision of the driver.

This new device is designed to keep out the very smallest objects that fly through the air. The screens on all windows are worked by the same lever that opens and closes the glass window and is operated in a way that when the window goes down the screen fills the open space.

The screen itself is made of a special material that is so designed that you can see through it very easily and will not obstruct your view.

AUTOMOBILE HINTS

The annual blowout and detour season is at hand.

* * *

Burning or warping because of improper adjustment is the most frequent cause for replacement of motor valves.

* * *

In New York state alone it is expected that the amount of money invested in automobiles by the end of 1928 will run close to $1,800,000,000.

* * *

The wild automobile driver who keeps his foot on the accelerator is protected more or less by the wise locomotive engineer whose hand never leaves the throttle.

* * *

Engine sluggishness may be traceable to a defective ignition coil. A new coil frequently increases not only power, speed and pick-up, but gasoline mileage as well.

TEST NEW AUTOMOBILE SAFETY DEVICE

An interesting invention was successfully tested in Berlin. It consists of a safety bar of rubber fixed to the front of the car, which, owing to its elastic qualities, is capable of weakening the shock of a collision even though the car is traveling at a fair rate of speed.

The photo shows (upper)—The front of a car with the new safety device and, (lower) a car which ran against a tree at a speed of 15 miles an hour. Thanks to the new safety device the car remained undamaged

Horticultural News

MOSAIC MENACE TO RASPBERRIES

Much of the difficulty in maintaining quality and yields of raspberries, particularly red raspberries, in New York, has been attributed to what is called "running out," but it has been found that an infectious disease known as mosaic is responsible. Also, it is now known that healthy stock can be kept reasonably free from this disease. Thus it is possible to grow any variety and obtain its usual yield and quality, says W. H. Rankin of the experiment station at Geneva who spoke recently at Cornell university, Ithaca, N. Y.

Mosaic spreads from plant to plant only when plant lice carry it. The lice themselves do no harm. A plant once inoculated is diseased thorughout and becomes less productive, although it may live for several years. This mosaic disease has caused growers to give up raspberries as unprofitable, so the present raspberry acreage in New York is low.

Obtaining stock from fields known to be practically free from mosaic is the first step in control. Inspecting the planting the first two years may show a few diseased plants. These should be removed carefully so that the lice are not shaken off. The roots of red varieties must be dug to prevent diseased suckers from coming up. In western New York these measures insure little loss from mosaic.

A few varieties remain free from mosaic or are little damaged by it. Such varieties are recommended, especially for the lower Hudson River valley where mosaic is difficult to control by removing the diseased plants.

Propagating Grapes by Means of Cuttings Best

The accepted and orthodox way of propagating grapes is by means of cuttings. Notwithstanding this, however, the grafting of grapes may be practiced for one or more of several reasons. Established vines of undesirable varieties in the vineyard may be top-worked to more desirable varieties. Invariably European grapes are grafted onto American grape stock in order to offset or avoid the ill effects of phylloxera injury. This is the customary practice whether the grapes are to be grown in America or Europe. The phylloxera is a louse which, during one stage of its life history, attacks grape roots. It is "100 per cent American," and was not known in Europe until after America was explored and some of our native grapes infested with phylloxera lice were carried to Europe by returning explorers. American grapes have endured its parasitic attacks so long that they have become partially immune to its injurious effects. And this immunity makes American grapes valuable as stock upon which to graft the susceptible choice wine grapes of France and other continental countries.

Pruning When Knife Is Sharp Gaining Favor

Prune when the knife is sharp is a good working rule for the orchard, believes T. J. Talbert of the Missouri College of Agriculture. If the work is done properly, it may be helpful at any time of year. Formation of main branches and the elimination of thick clusters that shade the fruit, as well as the removal of dead or badly diseased branches, may prove profitable at any time of year.

In general, the principal work should be done after the leaves drop in the fall and before they appear in the spring. At any time during the dormant season when men may work comfortably out of doors, the pruning work may be carried on with profit.

Labor is more easily secured in the fall and winter than in the spring so that large commercial orchards must prune when the labor is available. However, pruning can be done at any time before growth is fully started.

Horticultural Hints

If you want good apples, spray. Insects are no respecters of persons.

* * *

Planting for best results should be done as early in the season as the ground can be prepared.

* * *

In the case of fruit trees as well as practically all fruits in the Middle-West, spring is the best planting season.

* * *

One-year-old apple trees cut to 40 inches when set develop more branches the first year than trees cut to 30 inches.

* * *

Efficient cold storage plants with facilities for precooling, icing, and re-icing fruit have been tremendously developed in recent years.

* * *

More bearing apple orchards have been thoroughly pruned this winter than ever before. This should mean a higher percentage of good apples.

* * *

Stayman and Delicious apple trees demand well-aerated soil. The fruit becomes small after a few years when these varieties are planted upon soil that is too dense.

Garden Tractors Found Excellent

Great Labor-Saving Machine, Displacing Man and Horse Labor.

The garden tractor is a thoroughly trustworthy and intensely practical machine, and deserves the attention of vegetable growers who are looking for a way to cut production costs. That is the way D. B. Lucas of the agricultural engineering department, New Jersey state college of agriculture, Rutgers university, evaluates the device which has been on the market but comparatively few years.

Great Labor Saver.

In a statement for New Jersey farmers he says that the garden tractor is a great labor saving machine which displaces both man and horse labor, for it will do much of the work that is now done by hand and will also work nicely in vegetable crops where horses cannot be conveniently used. Also, where short working seasons make it undesirable to keep horses, the garden tractor is an immense boon.

Only an exceptional horse will work in row widths of 15 inches or less. This has led to much hand cultivation where intense production necessitates rows as narrow as 10 or 12 inches. One wheel or two-wheel garden tractors may now be had which are adapted to almost any practical condition. From one to three rows can be cultivated at one time. Shallow plowing may also be done by some of the light cultivators, but it is usually a good practice to use a standard plow and do a thorough plowing job every few years.

Cost Is Important.

The cost is an important consideration in the purchase of a garden tractor, especially when it will be used only for a small home garden. Good machines with cultivating attachments may be had for two hundred dollars and up. A thorough demonstration, in which the buyer himself handles the machine, is important in making a satisfactory selection.

Warn Shippers Against Altering Certificates

Cautioning shippers of hay against altering shipping point inspection certificates issued under the federal-state hay inspection service, either by erasure or addition, or in any other manner, the United States Department of Agriculture has just published the following facts in a recent case of this kind.

A federal-states inspector inspected a lot of about twelve tons of hay on a farm for which he issued a certificate, grading the hay U. S. No. 2 Timothy. The shipper subsequently shipped a carload of hay to Chicago, and inserted on the inspection certificate the number of the car, thus making it appear that the hay had been inspected in the car.

Examination of the hay upon arrival at destination disclosed that it graded variously U. S. No. 3 Timothy Clover Mixed; U. S. No. 2 Timothy; Threshed Timothy (not hay), and U. S. Sample grade Timothy (badly stained, musty). This seemed to indicate that there was some hay in the barn which had not been inspected and had been either negligently or improperly mixed with the inspected lot and loaded in the car.

In any case, the department points out, the addition of the car number on the certificate was improper as it imported that the hay had been inspected in the car, which was not the fact.

Soil Best Adapted for Growing Soy Bean Crop

If soy beans are planted on clean soil and broadcast at the rate of two bushels per acre, one can expect to get from two to three tons of hay per acre. Soil that will produce good corn will usually raise soy beans satisfactorily. Soil that is too acid to raise alfalfa or sweet clover will usually produce a satisfactory crop of soy beans if other conditions are good.

The ground which is sown to soy beans should be carefully worked before the beans are sown. Frequent harrowing is necessary to keep out the foxtail and similar grasses until the beans get a good start.

Agricultural Squibs

Dig a few dandelions out for your chickens. Green feed is good for them.

* * *

Limestone and inoculation are two requirements for success with sweet clover.

* * *

It requires about the same preparation to make a good lawn as it does a worthwhile vegetable garden.

* * *

The larger second growth of red clover is of particular advantage as it comes at a time when pasture is badly needed.

* * *

Anyone who has hauled manure mixed with long corn stalks knows how much trouble the stalks are. With the silo there is no such waste.

* * *

In preparing hay for market or use on the farm, a much higher percentage of the valuable leaves can be saved if the hay is baled, as the loss of leaves by successive handlings of the loose hay is avoided.

Hymn Number Proved Lucky for Gamblers

The latest big winner at Europe's premier gambling resort, Monte Carlo, says Capper's Weekly, was an Englishman, who strolled into the English chapel there Sunday morning and after the first hymn left for the Casino. As he entered the place he heard the number "32" shouted from a roulette table, then the same number shouted from another table.

It was the number of the hymn the Englishman had just heard and he decided to "play it." Starting with the equivalent of $5 he won almost every other spin of the wheel and kept pyramiding his stack until he had $5,000. This, he thought, was tempting the goddess of chance long enough.

The story of the Englishman's winnings went the rounds. The next Sunday, after singing the first hymn, almost the entire congregation left the chapel and rushed off to the Casino to back the hymn's number.

Enough of It

William F. Broening, the new mayor of Baltimore, was talking about the Churchill-Mellon controversy over war debts.

"We have forgiven the Allies over half their debt to us," he said, "but still they're not content. With argument, wheedling and abuse they hope to get out of paying the other half.

"The thing reminds me of the monopolist who said:

"'You are too hard on us. You ought to do as you want to be done by.'

"'That's just it,' said the trust buster. 'We don't want to be done by anybody.'"—Detroit Free Press.

Nobleman's Store Travels

To regain the fortune they lost as a result of the World war an Austrian nobleman and his family are traveling through their country in a combination store and home mounted on automobile trucks. When stops are made the van is quickly converted into an open-air store, with steps, display windows, balconies and gabled roofs surmounted by antlers. The home consists of a parlor, bedroom and kitchen while the trailer has space for a second bedroom.

Japanese Like Gold Teeth

The gold tooth craze in Japan is blamed for the present currency stringency, asserts H. Ishida, of Tacoma, Wash. Whenever a Japanese gets any money ahead he buys himself a gold tooth and attempts to smile broadly all the while. The shining and fascinating fashion has resulted in large sums of gold being withdrawn from the banks in exchange for paper.

Back to Old Name

Dr. Jean J. Tobias, chancellor of the Chicago Law school, announced that he is going to drop the name he has borne for more than eighty years and assume the name of his ancestor, Jean J. Du Boise, founder of the city of Du Boise, Pa. Tobias is a contraction of Du Boise, the chancellor said.

Might Have Emptied Prison

Eighteen hundred convicts easily might have walked out of the state prison at Moundsville, Va., had they known that the main gate was left unguarded for a half-hour. Alexander Evans, keeper of the gate, fell dead at his post.

Tender, Aching Swollen Feet

In Just Five Minutes Those Sore, Tender, Aching Feet Get Amazing Relief.

You probably feel like a lot of other people that about all you can do is dust some powder in your shoes or give your feet a special foot bath and let it go at that, but don't be foolish. Make up your mind today that you are going to give your feet a real chance to get well.

Go to any good druggist today and get an original bottle of Moone's Emerald Oil.

The very first application will give you relief and a few short treatments will thoroughly convince you that by sticking faithfully to it for a short while your foot troubles will be a thing of the past.

Don't expect a single bottle to do it all at once but one bottle we know will show you beyond all question that you have at last discovered the way to solid foot comfort.

Remember that Moone's Emerald Oil is a clean, powerful, penetrating Antiseptic Oil that does not stain or leave a greasy residue and that it must give complete satisfaction or your money cheerfully refunded.

Dead Ferns

Sometimes ferns that look dead can be revived by placing pots in hot water and letting stand until the water cools.

Head of Hosts

Sabaoth means armies or hosts and the expression "Lord of Sabaoth" may be translated the Lord of Hosts.

Don't Sleep Well? Have Backache?

That tired, depressed feeling may be Nature's warning to watch your kidneys. And the sooner you heed that warning the better it may be for you.

Perhaps your kidneys and liver need help in eliminating body poisons. Why not do as thousands of others have done—try a bottle of Warner's Compound. This safe, pleasant-tasting remedy is made from Nature's own herbs, and for more than 50 years it has been helping men and women back to health, according to their own letters.

Your druggist knows Warner's Compound! It costs little, but your health is priceless. Buy your bottle today, and feel yourself start back on the road to health.

Sold by all druggists. Sample free.

Herman Lauen of Meservey has purchased the old Fred Chase farm.

Mrs. W. L. Sherwood had her tonsils removed in Mason City Monday.

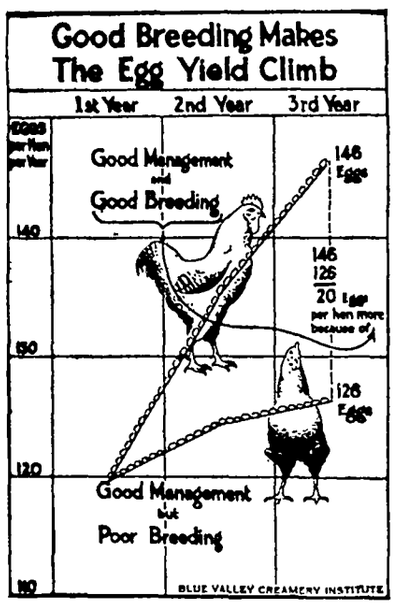
Mrs. Alec Groh and children have been visiting in Kanawha.

Mr. and Mrs. Henry Grosz of Meservey spent Sunday at the Jay Griggs home.

Mrs. V. A. Cook is enjoying a visit from her father and mother, Mr. and Mrs. Herrick, from California.

Mr. Wm. Wesenberg of California is here visiting at the home of his son, Lew and family.

Mr. and Mrs. L. W. Wesenberg and daughters returned from Wisconsin one day last week, where they have been visiting relatives.



HEN'S EGG YIELD IN HER BREEDING

Use of Pedigreed Males Insures Greater Yearly Returns From Flock.

Good management gets eggs out of hens, but let's not forget that the better-bred hen has the most eggs in her, says the Blue Valley Creamery Institute, in a list of seasonable suggestions to poultry keepers.

The quickest, easiest and least expensive way to get eggs bred into the average flock is through the use of strong, vigorous males whose mothers have trap-nest records of 250 eggs per year or better. It is now possible for any farmer to own a pedigreed male from a trap-nested, high-record mother and sired by a male whose mother also made a high record for egg laying because the prices of such males are only one-half to one-third as much as they were five years ago.

The Creamery Institute recommends farmers using only pedigreed males from trap-nested, standard-bred flocks. Such breeding flocks can now be found in practically every state. To show what such males can do in adding profits to the average farm flock, the Institute cites results secured on Missouri farms and tabulated from records sent the state colleges of agriculture. The fowls on two groups of farms had practically the same care and management. On one group of farms, average quality males were used for breeding. On the other group of farms, more attention was paid to breeding, and on these farms, after the use of better males for three seasons, the egg production per layer was 20 eggs more per hen. Breeding alone made a difference. In a 100-hen flock, according to an estimate by the Institute's experts, the value of the better males in the Missouri test added about $50 more profit to yearly returns from the flock.

Work of Locksmiths Encouraged by Kings

The evolution of the lock in France may be traced in great part to the direct encouragement given to the craft by her kings. It was Charles VIII who in 1411 made it compulsory for every locksmith apprentice who aimed at becoming a master to produce a "chef d'oeuvre" lock of such degree that it would entail anything from one year to two in the making. The delicate and intricate examples that are treasured in museums are mostly drawn from the test pieces, none of which, however, bears the name of the smith, though the majority are sufficiently interesting to merit a signature. The forge had little connection with such locks and none was cast in the rough. Great is the ingenuity brought to bear on them in order to display some hitherto unexploited device or to break some fresh ground in ornament. For strong boxes there were contrived locks that are a miracle of intricacy.

Under Francois I, an enthusiastic patron of the locksmith, the craft reached its summit, whence it was then to decline, if not in respect of elaboration, at least in respect of true beauty and feeling. Under Louis XIII, who was so keen a lover of fine ironwork that he himself toiled at the forge and in the workshop, the lock excelled in point of mechanism and ingenuity, but rapidly deteriorated from the esthetic standpoint. It had reached the point where the production of puzzle and letter locks began to take precedence of locks that represented compositions of real artistic quality.

Grasshopper Vane Not Original With Faneuil

It is generally conceded that when Peter Faneuil caused a large grasshopper to be placed on top of Faneuil hall in Boston as a weathervane he did it in emulation of Thomas Gresham, who 176 years before had given his home city, London, a handsome bourse for merchants, dedicated by Queen Elizabeth as the Royal Exchange and crowned by the Gresham family crest, a gilded grasshopper. The grasshopper had been adopted for a crest by the Greshams obviously because the name Gresham is regarded as a corruption of the German word for grasshopper, "grassheim." Faneuil undoubtedly had seen the London grasshopper and liked it, so he chose it for the building he gave to Boston. The Faneuil hall grasshopper has fallen to the street three times in its 185 years' existence, once in the famous 1755 earthquake, again in 1761 when the building was burned, and finally in 1889, as a result of getting entangled with the flagpole halliards. After the 1755 tumble a demolished leg had to be replaced, and in 1889 new glass eyes, as well as horns and feet were required.—Detroit News.

Odd Wedding Customs Prevailing in India

There are certain tribes in India the male members of which sometimes contract marriage with a tree. When a man loses two wives by death and wants to marry a third, the fear lurks that she, too, may die. So before the marriage the man is married to a banana tree or some other plant. All the ceremonies pertaining to an actual marriage are gone through, and at the end the tree is cut down and mourned over. Now the way is clear for the man's real marriage, the new wife being considered immune from evil influences.

From Bombay comes news of an extraordinary wedding ceremony at Bardoli, near Ahmedabad, the principals being a Brahmin girl and a pipal tree, the sacred fig of India.

The girl became blind through smallpox at the age of six, and her father, knowing that no one would accept her in marriage, expressed the desire, before he died last year, that she should wed a pipal tree. He advised her to stay at home all her life, dedicating her spare moments to the contemplation of Divine Providence.

A caste dinner was held in honor of the marriage, which was celebrated with the prescribed Hindu rites.

Sometimes when a suitable husband for a girl cannot be obtained, she is married to a sword, a bow and arrow, a grinding-stone, or other inanimate object. She is thus freed from the reproaches which would otherwise be showered on her by her caste people, for in India marriage is regarded as a sacred duty which must be entered into by every man and woman.

Growth of Beard Not Stimulated by Razor

Whether or not shaving makes the beard grow faster is a question that never has been definitely answered to the satisfaction of all scientists. It is the general belief among medical men and physiologists that shaving itself does not make the beard grow faster and that cutting does not increase the growth of hair.

There is a definite rate of growth in the hair of normal and healthy persons and this growth is not affected by mere cutting. It is possible, however, that shaving makes the beard grow faster for a different reason, says Pathfinder Magazine. Shaving tends to irritate the skin somewhat and causes an increased flow of blood to the shaved section Consequently there is an increase in the nourishment of the hair follicles, and this may cause the beard to grow stiffer and heavier and perhaps faster.

It is widely believed that if a man never shaved he would not have as heavy a beard as he would have if he shaved a few years and then stopped.

NEWS REVIEW OF CURRENT EVENTS

Miss Earhart, First Woman to Fly Atlantic, Gives All Credit to Pilot.

By EDWARD W. PICKARD

MISS AMELIA EARHART, Boston social worker, the first woman to make the flight across the Atlantic ocean, is being acclaimed queen of the air, or the "Lady Lindy." With Wilmer Stultz as pilot and Lou Gordon as mechanic, the young woman flew from Trespassey, Newfoundland, in the trimotored monoplane Friendship, heading for Southampton, England. After 20 hours and 49 minutes of flying through clouds and fog the aviators found their fuel supply was running low and they came down in the estuary off Burryport, Wales, 2,010 miles from the starting point. Taking on more gasoline there, they completed the flight to Southampton and after an enthusiastic reception there, proceeded to London, where they were vociferously welcomed.

Miss Earhart in newspaper articles and interviews asserts that she was in reality only a passenger on the momentous voyage, although she is an experienced aviator, and that the credit for the successful flight belongs to Pilot Stultz and Mechanic Gordon. Because of her sex it was natural that she should attract the most attention, but she resents this and insists that recognition be given the great work of her male companions, especially Stultz. Owing to the fogs and clouds it was necessary to make almost the entire flight by instruments and this Miss Earhart could not do, so she did not handle the controls at all. Stultz says they never saw the sea after going into a fog an hour out from Trespassey until they came to a fairly clear patch 75 miles east of Queenstown. Part of the time they were in touch of land and ships by the radio set they carried. The plane Friendship was originally built for Commander Byrd's antartic expedition. It will be brought back in a crate, for Miss Earhart, Stultz and Gordon planned to return by steamer after a brief visit to the continent.

Miss Mabel Boll and two companions have abandoned their plan to fly to Europe in Levine's plane Columbia. Thea Rasche, German stunt flyer, backed by Mrs. James A. Stillman, has been preparing to pilot a plane across the Atlantic but was delayed last week by court proceedings started by her former backers.

GEN. UMBERTO NOBILE and five of his crew of the lost dirigible Italia were located by Major Maddalena, Italian aviator, flying the seaplane Savoia. Small parachutes carrying food, rubber boats, guns, spirit lamps and other supplies were dropped, and Maddalena thought the marooned men might be able to work their way toward land with the rubber boats. Ten other members of the dirigible's crew still were lost—the three men who started afoot toward land after the Italia crashed, and the seven who remained with the dirigible and were borne away to the east when the gas bag rose again.

COL. CHARLES A. LINDBERGH may now be addressed as "Doctor Lindbergh," for the University of Wisconsin, which he attended for a time before he became famous, conferred upon him the honorary degree of doctor of laws.

HUBERT C. WORK, secretary of the interior, was made chairman of the Republican national committee and generalissimo of the Hoover-Curtis campaign, and Representative Franklin Fort of New Jersey was made secretary. Joseph R. Nutt of Cleveland succeeds W. V. Hodges as treasurer. The principal campaign headquarters will be in Washington, with branches in Chicago and New York.

DEMOCRATS from all parts of the country were flocking to Houston for their national convention which, it was generally admitted, was certain to nominate Gov. Al Smith for the Presidency. Senator Jim Reed of Missouri, however, had not given up his fight and professed to be confident that Smith would be "stopped" and he himself put at the head of the ticket. Gen. Henry T. Allen of Kentucky, who was commander of the American army of occupation on the Rhine after the armistice, also announced he was a candidate for the honor, his chief plank being one for temperance. Governor Ritchie of Maryland, long considered a possible choice, withdrew from the contest in favor of Smith. Franklin Roosevelt was selected to put Smith in nomination. National Committeeman Norman E. Mack of New York, arriving early in Houston, created some excitement by a vigorous attack on Volsteadism, and it was taken by some as forecasting an attempt by Tammany to put a real wet plank in the platform. George R. Van Namee, preconvention manager for Smith, gave out a much more tactful statement.

Potential candidates for the vice presidency were numerous. They included Jesse Jones, the pride of Texas; Senator Robinson of Arkansas, minority leader of the senate; Lewis G. Stevenson of Illinois, son of the late Adlai Stevenson; Evans Woollen of Indianapolis, Senator Kendrick of Wyoming, and last but by no means least, James Hamilton Lewis, former senator from Illinois.

THERE was great excitement in the Balkans following a murderous outbreak in the parliament of Yugo-Slavia, and grave results were feared. A radical deputy and government supporter, Ratchitch, fired six shots, killing two deputies and wounding four others. He was attempting to kill Stefan Raditch, leader of the opposition, and succeeded in wounding him in the stomach. The row was over the Nettune treaty which permits Italians to own land in the Dalmatian coastal plain and which was violently opposed by Raditch and his followers. It was predicted that the pact would be rejected, and also that as a result of the assassinations the conference of the little entente—Rumania, Czechoslovagia and Yugo-Slavia—would break up. This conference, in Bucharest, had planned to discuss Italy's penetration of Albania, Hungary's attempt to revise the treaty of Trianon and the Nettune treaty.

When the news of the murders reached Croatia ten thousand persons gathered in Agram to demand that the Croatian parliament be convoked for the purposing of decreeing the separation of that country from "Bloody Serbia."

CHINESE Nationalists, now victoriously established in Peking, are planning further consolidation of their control over the country. Their government has named two delegates to negotiate a compromise at Mukden by which the three eastern provinces of Manchuria, Fengtien, Kirin and Heilungkiang, would become members of the Nationalist government without further fighting. It also was announced that the Nationalist government does not intend to push the military movement to Manchuria pending the outcome of the negotiations.

The Japanese have more than 12,000 troops in Manchuria and apparently seek to establish a protectorate there. Gen. Chiang Kai-shek withdrew his resignation as generalissimo of the Nationalist armies and chairman of the military council. Foreign Minister Wang has asked the United States to agree to the revision of all treaties with China. He considers America the best friend China has. Dr. C. C. Wu, who represents the Nationalist government in Washington, said Secretary Kellogg had taken the question of revision under consideration. He also said the capital of China would be moved immediately to Nanking.

GREECE is having serious difficulties with the communists and the government declares it has uncovered a revolutionary conspiracy. Riots among strikers broke out at Kanthi and the authorities suppressed the row with severe measures. In retaliation a strike on railroads and public utilities was called and later it spread to bakeries and other industries. There were many clashes between the police and the strikers, especially at Drama where thirty were killed and more than one hundred wounded. General Pangalos, former dictator, who has been in prison since August, 1926, was carefully guarded, it being feared the strikers would try to release him.

DR. CHARLES FRANCIS BRUSH of Cleveland, inventor of the arc light, has announced the establishment of a $500,000 fund, the income from which is to be used to finance "efforts toward the betterment of human stock and toward regulating the increase of population." The fund, all of which was donated by Doctor Brush, will be known as the Brush Foundation in memory of Doctor Brush's son, Charles, Jr., who died last year.

In a statement Doctor Brush declared that he established the fund because he believes: That the threat of overcrowding the earth is rapidly increasing; that science now preserves the unfit, and that science should also improve the quality or reasonably limit the numbers of those born. "We are drifting rapidly toward the condition of China and India, where the people struggle, not for clothes, not for education, but for something to eat," Doctor Brush said.

COLD, rainy weather made last week rather unpleasant for President and Mrs. Coolidge at the summer White House on Cedar Island, northern Wisconsin. For several days they were compelled to content themselves within doors, and then Mr. Coolidge ventured out for some trout fishing in the Brule river. He caught six fish, and it was made public that he used flies, not worms. When the weather moderated the President made a trip to his executive offices in Superior. Mrs. Coolidge was recovering steadily from her recent illness but did not get out doors very often.

LOVERS of good literature are mourning the death of Donn Byrne, American-Irish novelist, who was killed near his home in Ireland when his automobile upset. Mr. Byrne, who was only thirty-nine years old, was considered one of the best writers of English of the day and his novels were especially popular in the United States. He was born in New York of Irish parents, was educated in America, Ireland, Germany and France, and was for a time employed on the staffs of two New York newspapers.

Edwin T. Meredith, who was secretary of agriculture in President Wilson's cabinet, died at his home in Des Moines, Iowa, after an illness of four months. Born at Avoca, Iowa, in 1876, Mr. Meredith began active life as a real "dirt" farmer and after leaving college he bought the Farmers' Tribune, a farm weekly, from his grandfather. Later he discontinued this and established Successful Farming as a monthly periodical. He was prominent in the Democratic party and more than once had been considered for nomination for the Presidency.

ONE of the worst earthquakes Mexico has experienced since 1912 occurred in the state of Oaxaca. It lasted 43 minutes and many small buildings and church spires were thrown down. It was feared the loss of life would be heavy.

Tornadoes were reported from many parts of this country, the worst being in Oklahoma, Indiana, Iowa and Ohio. Several persons were killed and the property losses were great.

PRINCESS HELEN of Rumania at last is legally freed from her union with Prince Carol, former crown prince. A divorce was granted her by the Bukharest courts on the grounds of "profound affronts offered and desertion." Helen was married to Carol in 1921 and their son Michael is now king of Rumania under a regency. Carol, who eloped with Magda Lupescu in 1925, did not contest the divorce.

SECRETARY OF STATE KELLOGG has invited all Latin-American republics to a conciliation and arbitration conference in Washington December 10. Mr. Kellogg and Charles Evans Hughes will represent the United States. The invitation pointed out the conference was provided for in a resolution passed at the Pan-American conference at Havana last February. Conventions adopted would be submitted to the various governments for ratification.

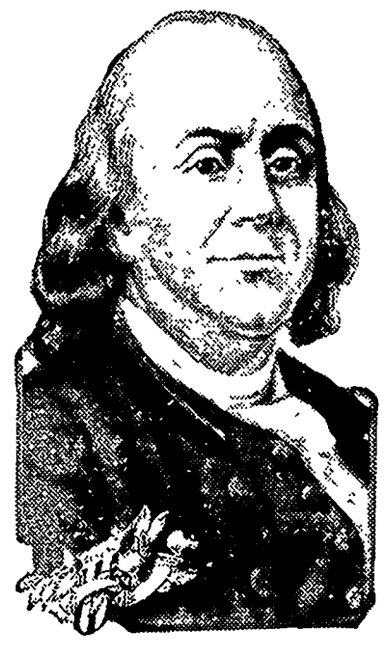
GRAVE OF "BEN" FRANKLIN ALL BUT FORGOTTEN

Last Resting Place of Statesman Said to Be Neglected.

Benjamin Franklin lies buried in Christ Church cemetery in Philadelphia. According to a story appearing in Printing, a magazine devoted to the interests of the typographical trades, both the cemetery and the grave of the "First Civilized American" are sadly neglected.

The large, flat stone which covers the last resting place of the great and versatile Ben is said to be cracked, while neighboring his grave are many crumbling and tumbling tombstones.

This is not creditable to Philadelphia nor to the craft which Benjamin Franklin honored as his vocation. It is to be hoped the condition of things will be remedied. The printing

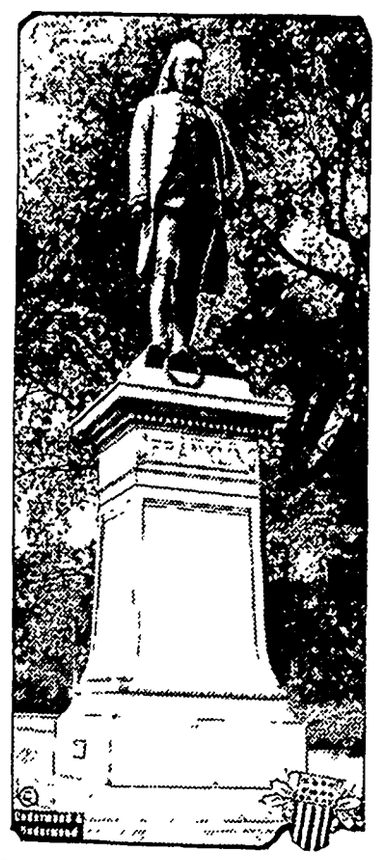


Benjamin Franklin.

trades might well undertake to see that the grave of Franklin, if not the cemetery in which it is situated, is kept in such repair as would suggest that we are not forgetful of his memory nor ungrateful for his services.

It is a simple grave, marked by a recumbent marble slab—the same slab which was laid upon it almost 140 years ago. We would not alter the simplicity. That is wholly in keeping with the character of the man, a great democrat who stood before kings in the unadorned dignity of his manhood, and by the qualities of his sincere personality and splendid intellect commanded the world's respect.

America has erected monuments to the memory of Benjamin Franklin, and a recent biography has refreshed our thought of him and deepened our affection. The attention which has been called to a neglect of his grave should be sufficient to lead to immediate steps for doing what is required



Franklin's Monument in Lincoln Park, Chicago.

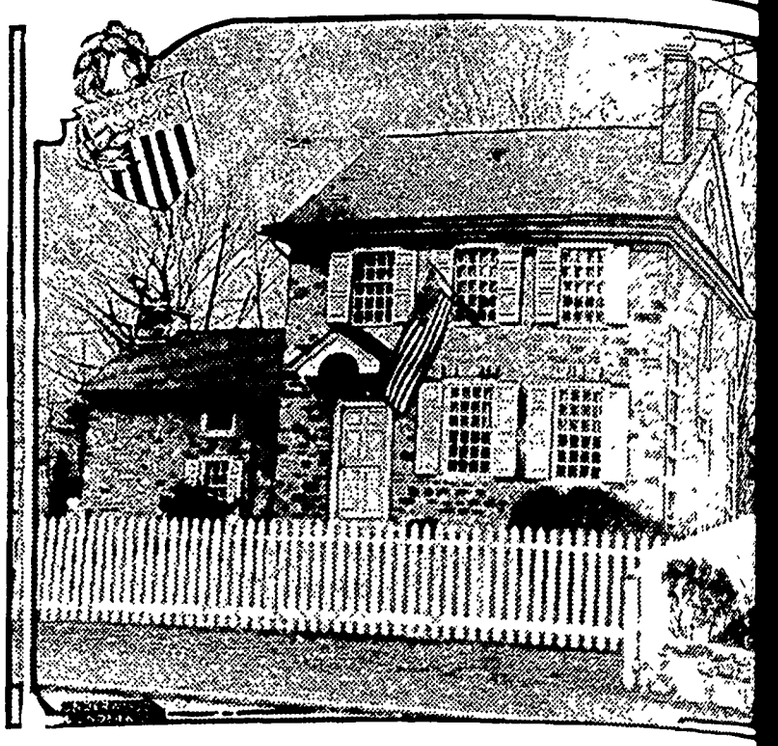
by a proper sense of respect. Philadelphia is custodian of Franklin's dust for the nation. If that city will not discharge this duty then others should assume it.

Benjamin Franklin's original epitaph, which had been kept hidden in the collection of a Chicago business man since its discovery twenty years ago, has been made public.

The inscription differs in only a few words and punctuation marks from the widely known epitaph of "Poor Richard." It follows:

The body of
B. Franklin
Printer
Like the cover of an old book
Its contents torn out
And stript of its lettering and gilding
Lies here food for worms
But the work shall not be wholly lost
For it will, as we believed, appear once more
In a new and perfect edition
Corrected and amended
By the author.

WASHINGTON'S HEADQUARTERS



Where the Great Commander Planned His Successful Campaign.

Chapel Marks Washington's Darkest Hour

"I commend the interests of our dearest country to the protection of Almighty God, and those who have the superintendency of them to His holy keeping."

It was to commemorate this prayer of Washington that the chapel at Valley Forge was erected, writes Virginia Pope in the New York Times Magazine. In the large window of the nave, with its 36 openings devoted to episodes from the life of Washington, is one in which the familiar figure is shown kneeling, just as he must have been discovered by Isaac Potts when, unseen, he heard the earnest voice interceding with the Ruler of the Universe for the safety of his beloved country. The first months Washington passed on the slopes above the Schuylkill river were the darkest in the history of the embryonic union.

The odds that had confronted him prior to December 10, when his ill-clad and hungry troops crossed the ice-filled river and made their weary way up the Guelph road to their winter quarters, had been terrific. Howe had advanced to the head of Chesapeake bay with eighteen thousand well-clothed and well-fed men, the two armies had met at Chad's ford to the misfortune of the Continentals; and at Brandywine, owing to misinformation, the English troops were soon occupying the Americans' camps. Then followed the Paoli debacle and the defeat at Germantown. Still the genius in command of the patriot army was not blind to the fact that "the enemy is not proof against a vigorous attack, and may be put to flight when vigorously opposed."

Saw Dawn of New Nation.

His optimism was not vain, for on the silent hills that now listen to the hourly chiming of the chapel bells he saw his faithful hopes begin to be realized. At Valley Forge the dawn of the new nation rose. While Washing was pleading with congress for food and supplies for his almost destitute men, Franklin was concluding the agreement with France that brought recognition to the thirteen states and made possible their union. To the right of the chapel altar, sharing equal honors with the flags of the army and navy, are the ensigns of royal France, witnesses that in the Memorial chapel the aid given by our ally across the seas has not been forgotten.

And in the window that, like a troubadour, sings of the supreme moments in Washington's life, are pictures showing the result of that most important happening of the winter of 1778. In one the General stands with Lafayette and Von Steuben watching the troops as they pass in review. Over the head of Washington floats the new Stars and Stripes.

Beautiful Interior.

The rough and unpretentious exterior scarcely prepares one for the exquisite loveliness of the interior of the little building. It stands within the site of the encampment where the brave army weathered the snows and winds of the winter of 1777-78. The arches of the cloister bays look out upon a tract now wooded where the deep depressions of the cellars, or hut holes, may still be found. Here there was a company street; along side were erected the rude stru for which such minute orders been given by the commander in —who, refusing the protection own winter quarters, waited cold in his marquee until the the log huts had been built fo troops.

Set in the wondrous scenic b of Valley Forge, with its stretches of green and its d wooded hills, the memorial symbolizes the spirit of George ington and his soldiers. Durabl stern are the rough-hewed ston the facade; no ornaments them; in the entrance porch ar breaches. A soldiers' church But under the vaulted arch th veals the jeweled interior, the tial character of the chapel is Instead of open slits for hostil muzzles there are little panes of which, like illumined strips of p ment, bear the words of George ington's valedictory prayer for people of the United States, above.

Unknown Soldier Honored.

When the late afternoon caresses the little chapel, its last greetings fall upon those ships, the Nina, the Pinta an Santa Maria, sending them on voyage of discovery over a s molten gold. Around them crow

SHALL we regard with indiffer the great inheritance which cost sires their blood because we find in t gift admixture of imperfection and e Surely there is good enough, in the c temptation of which every patriotic h may say "God bless my own, my n land."—James A. Garfield.

bold men and brave who opene way to the new land, the last of the day setting their faces a as if they foresaw the won growth of the country to which brought the light of civilization.

While great generals and note triots are immortalized in the Forge memorial, the Unknown S is not forgotten; he holds a pla equal prominence. Beneath the frame of the sanctuary arch, a head of the aisle, is the litany placed there in "remembrance o supplications of George Washi for the American people." B desk is a Continental soldier, petually standing at attention presenting arms to the altar H pears again in the niches of the carved oaken choir stalls, each o which is a silent tribute to brigades quartered at Valley Fo

On either end of one of the benches kneels a small figure i uniform of the Life Guards, tha body that fought under the "Conquer or Die." The little ba men, originally composed of V ans, was augmented by one hu from other states at Valley Forg became the model corps for the cution of the maneuvers of Baro Steuben.

The "shrine of the American ple," as President Wilson calle Valley Forge memorial, was the of one man and owes its comp to his untiring efforts. Twenty years ago Rev. W. Herbert Bu student and admirer of the cha of Washington, conceived the id perpetuating his memory in a po architecture and art. What mo ting spot than the site above Schuylkill, where he had passe umphantly through the valle despair?

LIZABETH looked down at her slubby gloves with their numerous darns on the thumb and forefinger and tried to keep the tears. Thirty years! ty years!

had tried, she and John, to the special service as near like first one they had held as pos- Every evening for the thirty they had written painstakingly diary the events and happen- the day, on church days list- hymns sung and the topic of . She otlced tonight how more competently John was the talk. And then again eyes roved about the tiny mis- room with its handful as they had that first night; maybe a more. There was Hannah with husband, who had both been there that first night, but the others all new faces. In this farming ry people came and went with ssing of the years, and when learned of the mission they came because as they themselves fre- ly said in their tactless fashion, was nothing else to amuse

n was talking to them earnestly is vibrant, low tones. They on part listened but not with any ness. The women appeared to rerlewing in their minds the tasks e morrow which must be done the tasks of today which had left over. The men were evi- sitting without any thinking at tired with the arduous work of day and wondering idly now and when the parson would finish

As for the handful of young le—their thoughts were not here l. Useless! Thirty years gone! did these people care for them or the word of God? The mis- In this forsaken country was only eeting place, a recreation. They given up their lives, she and John. —what? Nothing!

ot tears filled her eyes, scalding and threatening to run down cheeks. She fumbled unsuccess- for a handkerchief, pulling off gloves to search the better. The y years had made a difference in hands too! Large-knuckled dry- ned—they weren't the hands of y years ago, not at all! If only one cared about the mission and work. If they could have for once ld-fashioned revival meeting such he big evangelists had! But, no. e sat the people, complacent and chalant. Who was profiting by all is?

rtainly she and John had not; then, they had not expected to t. Not at all. The people had profited, not very much. Old Cal rs was just as sharp in a deal as he had ever been, every one . And the church surely had not ted, for the collections and ges were scarcely enough to keep the tiny mission. No, their had been given in vain! Her h and John's were gone now r thirty years of it and it was late now to start over again! little Elizabeth, who had now en her mother's place at the piano played so competently for the ns—her life had gone, too, for hing.

Elizabeth had never been a woman ery. Her life had been spent in comforting of others. Her Bible as familiar to her as the market ort to the broker in stocks and ds. When old Ted Carruthers had ed out his daughter that January t at ten o'clock, when little Billy ns was left an orphan, Elizabeth not stopped alone at Bible rses, although she had used those. Instead she had taken in the ruthers girl and had found a good e for Billy Means. But with abeth these had been only side es. She would have helped the ruthers girl and Billy Means ether John had been a minister, a sionary or the cashier of some k.

John had called for hymn No. 142, d as little Elizabeth started the ying the door opened and there ered a stranger. It was seldom ough that a stranger entered the e, unless John or Elizabeth, or both them, had first coaxed and pleaded. this stranger! Elizabeth put up hand to get that mistiness from eyes. Why, he was not a man of e rural community; he was a man the cities. His well-pressed and l-cut clothes did not fit in with garments in the room, nor did heavy gloves he carried in one d remind one of the gloves worn the farmers. Little Elizabeth half- ed at the click of the door, and her amazement paused in the play-

Just a moment," said the stranger. 'm not to be here long. If you let me have the floor for a mo- t?". He asked the last of John, the asking seemed to be a mat- of formula, for before John could e or refuse, the stranger had pped beside John and was talking. 'm not a church man, folks," he d curtly. "But I'm what's known a square-shooter. I've made a lot money and friends because of that. all my success I owe to these people."

ere the stranger paused and ted dramatically toward Elizabeth John. Elizabeth started; she ld not recall in all of her life ever having laid eyes on the stranger before.

"Some twenty-odd years ago," the stranger continued, "I went to a missionary meeting, dragged there by my mother. I wasn't a church-goer; I wasn't bad at all but I certainly could never be held up as any example. This evening of which I speak these two people talked to the church folk of their mission work—this," he indicated the small room with its shabby fittings. "I wasn't used to church appeals; I hadn't been to church enough. When they passed pledge cards out I was fired with desire, desire to help these people in their work out here. I pledged, ladies and gentlemen, $15 a month, to be paid the first of every month for a year."

There was a little gasp. No one ever pledged anything approximating that sum out here!

"That," the stranger continued smilingly, "was that night. The next morning I—I wasn't glad I'd made the pledge. I—I—I must confess that I was not only sorry but I was enraged—I felt that I'd been unduly pressed to make that pledge. I had not, you understand, not at all But I wasn't used to saving a cent, I hadn't even an insurance policy that would have given me the habit of thrift and saving. I resented that promise. But I kept it I found that it wasn't half as hard as I'd thought it was going to be to get together $15 a month. During the first few months I was so afraid that I couldn't make it (and that would have hurt my mother, ladies and gentlemen) that I would take the whole $15 out of my first week's money. Little by little I began saving—just because I was used to it. And those savings invested and piled up have brought me wealth."

He looked around him silently for a moment.

"I've never forgotten these people to whom I owed my start and when I was in the city where the church was having some sort of conference or other I talked to a few men, and your pastor and his wife are to have a new charge—a place where they will find the comforts of life and comparative ease—"

"No!" The voice rang out sharply in the quiet room. "You shall not take them from us! You who admit you have everything—why should you attempt to take from us the little we have?" The sharp, high voice stopped and the young woman who had spoken reddened from her unwonted boldness.

"I'm not taking them. I shan't be there. I only wanted to see them comfortable after their years of hardships here in this forsaken prairie," said the stranger.

"No, No!"

"We must have them here—they—they're part of us."

"We'll get them a decent house built—we'll even fix a nice cellar for them."

"They must stay with us—they want to stay, don't you parson?"

Elizabeth heard it all with mingled feelings of elation and astonishment. She had risen now and was standing beside John looking down into the faces of their little flock.

"You don't want to—go?" demanded the stranger.

"Not—not if they want us here," said Elizabeth softly.

The stranger looked at his watch swiftly. "Then at least you'll let me donate a car—for you two, you understand." He took a check book from his inner pocket and wrote rapidly. "This will attend to the license and running expenses for a while, and—well, most folks like a car. I've run it 1,400 miles so it's well broken in. I'm taking the train in eight minutes so—good-by, folks. And many thanks!"

The door opened and closed and the stranger was gone. He had not even given his name, but that they found on the check. There was no dullness in the room now, no darkness. Chattering filled the air and it was several minutes before they thought of opening the door to look at the car.

There it stood in all of its gleaming newness ready to take them where they chose.

"Wasn't he—wonderful," murmured little Elizabeth softly, "to give us a —car!"

But big Elizabeth and her John looked at the car through misty eyes. The thirty years had not been wasted. Nor had they been passed in vain. Their people wanted them and needed them. Again Elizabeth could imagine the babble of voices demanding that they be left with them.

And the love for them was but a reflection of their love for the mission and its work!

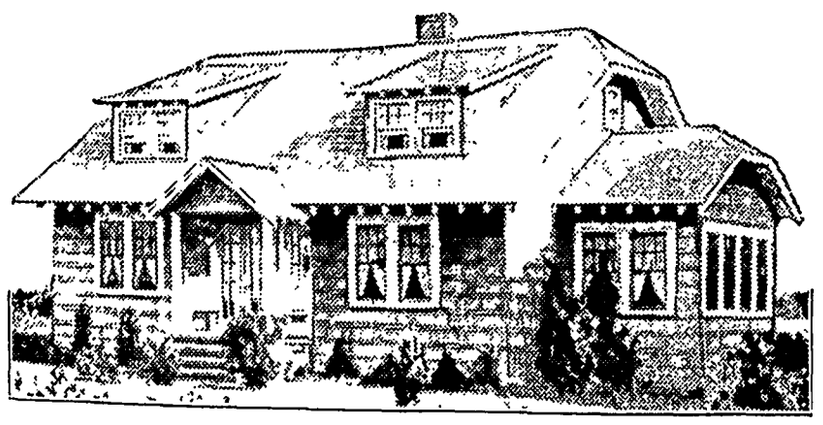
Taught Chinese Lacemaking

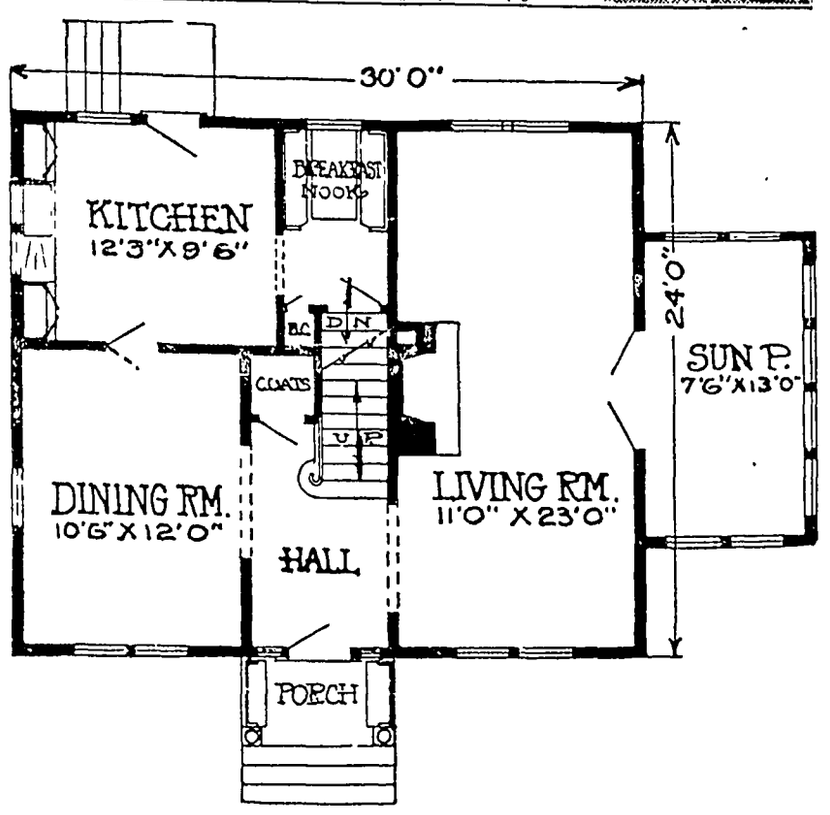
The art of lacemaking was first taught to the Chinese of the Chefoo district by foreign missionaries about twenty-five years ago. They believed that by teaching lacemaking the women and girls would find profitable employment within their own homes, and the subsequent spread of the industry has fully justified their efforts. Although first taught in Chefoo, Chi-Hsia Hsien was the first district in which lace was extensively made.

Turks and Alcohol

Though the laws of Mohammed forbid their consumption, alcoholic drinks are not unpopular among the Turkish working classes. They have long been in favor with the upper classes, even in the days when prohibition laws were so strong in Turkey that the grand vizer tried to stop foreign diplomats from importing wine for their own use.

Anybody Would Be Glad to Call This Cozy Little Bungalow Home





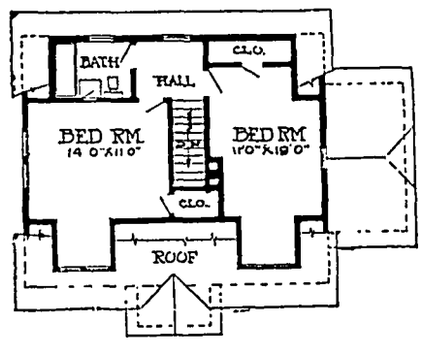
First Floor Plan.

By W. A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Here is a cozy little bungalow that almost anybody would be proud to call home. Aside from the good proportions of the house as a whole there are three things that chiefly account for its attractiveness. The roof is broken by the two front dormers and by the snubbed gables. The walls are most pleasingly covered with shingles laid in alternate wide and narrow courses. And last of all, the design is appropriate to its site and the ground about it is effectively landscaped.

Yes, this is a very charming home and for the family whose needs can be comfortably met by five rooms it should prove highly satisfactory. The first floor provides a long living room with a fireplace and off the living room a sun parlor, a dining room and a kitchen with an adjoining breakfast nook. There is an entrance and stair



Second Floor Plan.

hall between the living room and dining room and from this we can ascend to an upper room where the sloping roof admits just two bedrooms and a bathroom.

Both these bedrooms are ample in size and both are provided with large closets. Likewise good cross ventilation is possible so there can be really no objection in this case, though it is sometimes raised, to the bungalow type of house. In addition to the bedroom closets, there is a coat closet in the entrance hall downstairs and a broom closet off the breakfast nook. In the kitchen there are large built-in cabinets which afford all the storage space for household articles that is likely to be required.

Paint New House in Dry, Clear Weather

A new house should never be painted before plaster walls or wet basements have thoroughly dried out, or while the new wood is water-soaked from rains or insufficient seasoning.

The painting also should be done in dry, clear weather, never during or immediately after a heavy dew, frost or fog or when a storm is threatening. Before painting is started, all knots and sappy places should be given a coat of shellac or aluminum paint to seal in the pitch so it will not bleed through the paint later on.

The first coat is the foundation of future coatings, and the adherence to the wood of future coats during all time to come depends upon it. Considerably more linseed oil and turpentine must be used in the first coat than in succeeding coats, for the reason that the porous new wood soaks up a great deal of oil, and if an extra amount is not used, the paint film will be robbed of sufficient oil to give it satisfactory adhesive and wear-resisting qualities.

The turpentine assists in the penetration, so that the absorption demand of the wood will be completely satisfied. Where the wood is extremely soft, more oil and less turpentine is required, and where the wood is exceptionally hard or resinous, more turpentine and not so much oil should be used. This is where the experience of a competent painter is of value in diagnosing the absorption demand of the wood and the specific requirements of the surface being painted.

Tile Used for Floors, Roofs and Partitions

Lightweight and incombustible tile for use as fireproof partitions, roof-decks and floors is manufactured from gypsum and wood fiber, with about 97 per cent of the whole being gypsum and the balance wood fiber. When used for partitions such tiles are laid up very much as brick is laid up, only the mortar used is a gypsum mortar.

For roof-decks they are manufactured to special sizes, laid across the steel roof members, fastened and then are ready for any standard kind of roof covering. When used for floors, they are covered with cement topping, over which the finish flooring is applied.

Decorations Emphasize Importance of the Door

Substantial workmanship and graceful design are combined in a one-panel door widely distributed for home construction in this country in which several unusual patented features are utilized to prevent warping and shrinking. This "door within a door" construction is utilized in the manufacture of both hardwood and softwood doors of the one-panel type, veneered with species of woods which successfully take any decorative application.

The importance of the expanse represented by doors in interior decoration is being more widely recognized by specialists in the art with the general introduction of rather brilliantly colored interiors.

Attractive colors are well set off by the graceful design of the one-panel door, in which the proportion of the panel, molding, stiles and rails are carefully worked out to artistically fill the space, or mass, which the door represents. The close-grained wood of this door is well adapted to any process of painting, enameling or staining.

Insulated Home Has Larger Value for Loan

While advertising campaigns, model home demonstrations and magazine and newspaper articles have apprised the home-building public of the economies of properly insulating the dwelling, there is one aspect of insulating economics which frequently is overlooked.

Its importance is attested by the fact that building and loan associations and other home mortgage concerns will give a substantially higher mortgage percentage on the insulated house.

This is because of the fact that the insulated house will in a few years have an even greater preference over the uninsulated structure than is the case today. Insulation is being impressed upon the public consciousness as a desirable and economical constructional feature and it is believed that as time goes on more and more attention will be paid to this consideration in building.

Insulation usually costs but a few hundred dollars, but the increased value resulting usually more than accounts for the added cost.

LIVE STOCK

RAISING ORPHAN FOALS BY HAND

In case the mare dies or has no milk the foal may be raised on cows' milk, if the attendant conducts the work patiently and intelligently. Choose the milk of a cow that has recently calved, preferably one which gives milk low in butterfat, for mare's milk, while rich in sugar, is poor in fat. Sweeten the milk with molasses or sugar and dilute with warm water. Give a little of this prepared milk at short intervals from a scalded nursing bottle and large rubber nipple. Be careful to keep the bottle and nipple scrupulously clean. Add an ounce of lime water to each pint of the prepared milk and allow half a cupful of the mixture once an hour at first.

As the foal grows, gradually increase the amount of milk fed and lengthen the intervals between meals. In a few days food may be given six times a day and, later, four times daily. The foal will soon learn to drink from a pail, if allowed to suck the attendant's fingers at first.

Until the bowels move freely, give rectal injections night and morning. If the foal scours at any time give two to four tablespoonfuls of a mixture of sweet oil and pure castor oil shaken up in milk, and stop feeding milk for two or three meals, allowing sweetened warm water and lime water instead. Let the foal lick oatmeal as soon as it will eat, gradually increasing the amount and adding wheat bran. In five or six weeks some sweet skim milk may be given and the amount gradually increased daily until, in three months or so, it may be given freely three times a day in place of new milk. The foal at this age also will be eating freely of grass, grain and bran.

At all times supply pure cool drinking water. Let the foal run out in a lot or grass paddock for exercise. Accustom it to be handled daily. Feed small quantities of nutritious food often, keeping all food vessels clean, and the foal should thrive and develop well. Remember that a colt should at all times be adequately fed so as to develop it perfectly. Practically half of the full weight of a horse is gained during the first 12 months of its life. If stunted during this period the colt never develops properly; it therefore pays to feed generously.

Shipping Fever Is Bad for Horses in Transit

Horses in transit, during the course of which they are detained in yards and horse markets where animals originating in many places are apt to congregate, often contract a disease marked by a high fever, exhaustion and the development of pneumonia, writes Dr. L. Van Es in Capper's Weekly. When the animals reach their final destination, they may transmit the infection to other horses.

The disease may prove fatal if affected animals are worked or driven. The first symptom is a high body temperature. It is well to keep all horses at rest in comfortable quarters when the thermometer indicates fever. A skilled veterinarian may prevent many losses by injecting neosalversan.

Newly Purchased Hogs Should Be Segregated

All buyers of feeder hogs bringing such animals on their premises should have absolute knowledge, no matter from what source they purchase, that the hogs have been treated against cholera. In the absence of proof that they have been so treated hogs bought locally should be given the preventive serum treatment as soon as they reach destination. Under no circumstances should newly purchased hogs be placed with the original herd on the farm. They should be kept separate for at least 21 days, regardless of the origin of shipment.

Live Stock Notes

Hogs bring best returns when they are kept healthy and growing.

* * *

All the farm live stock should have access to pasture. Let the young pigs run in a clover or other legume.

* * *

When conditions are right, hogging down cornfields is a rapid and economical way of converting the crop into pork.

* * *

Proper attention to sanitation and general cleanliness about the hog barn and yards will prevent many of the losses in young pigs from narcotic enteritis, scours, sore mouth and parasites.

* * *

Brood sows should not be fed for at least 24 hours after farrowing. If fed, the sow may become restless and trample on the pigs and the little pigs may scour or acquire other digestive disorders.

* * *

Age is not a factor in the production of immunity against hog cholera. The United States Department of Agriculture finds after six years of investigation that pigs one day old were immunized as successfully as pigs of other ages ranging up to twelve weeks.

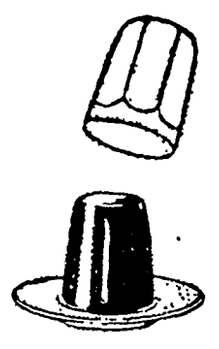
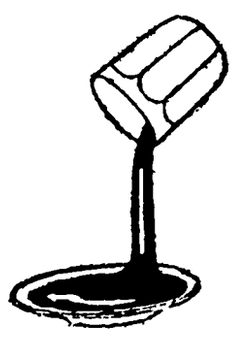
The modern way to make jelly, use PEXEL and get this



never this



JELLY failure is a thing of the past. Pexel is here. It's a 100% pure-fruit product that always makes jelly jell. Absolutely colorless, tasteless, odorless.

Pexel makes any jelly jell by the time it is cold. With it, jelly is ready for the glasses as soon as it comes to full boil. Thus Pexel saves fruit, sugar, flavor, time and fuel. Right here it repays, from one to three times, the 30c it costs.

Get Pexel at your grocer's. A recipe booklet with complete recipes, accurate tables in each package. 30c. The Pexel Company, Chicago, Ill.

For example—with Pexel

4½ cups strawberry juice and 8 cups sugar make 11 glasses jelly.

4½ cups raspberry juice and 8 cups sugar make 11 glasses jelly.

6 cups currant juice and 10 cups sugar make 14 glasses of jelly.

4½ cups grape juice and 7 cups sugar make 10 glasses jelly.

new

May We Suggest

—FOR SUMMER IMPROVEMENT—

New Window Screen s for your home and one of our Combination Screen & Storm Doors.

Rebuild your porch from that old fashioned kind to a modern screen, or enclosed porch which you will enjoy more.

Now is a good time to re-roof while the weather is right. We can supply you with the shingles you need—any kind!

Why not fix up your cement walk, or build a nice walk or cement drive to your garage? It don't cost much.

We have some nice garden trellis and other lawn decorators. Get one today!

Northern Lumber Co.

Threshing Coal - -

—AND OTHER SUPPLIES YOU MAY NEED NOW OR SOON

We will have plenty of high grade coal on hand especially for threshing. We have three car loads on the way now, due to arrive before threshing. Let us take care of your wants in high grade threshing coal.

COAL FOR RANGES

For your cooking range we recommend that you try our Illinois Egg, especially fine for summer cooking.

ABOUT POULTRY FEEDS

We have a lot of satisfied customers who have fine luck with our MOR-GAIN Starter and growing mash. And by the big orders we sell it certainly must be good. We ask you to try MOR-GAIN.

MAKE YOUR HOGS PAY!

You can make more money, and do it quicker by feeding your Hogs MOR-GAIN PIG MEAL. Klemme farmers report fine results since they began using it. We are selling a lot of it every day and aim to carry plenty on hand.

Try our Occident and Mothers Best Flour—none better regardless of price.

North Iowa Grain Co.

Summer Foods

Right now we are specializing on foods for summer days. We aim to carry a complete line of foods that will appeal to you at this time of the year.

MAKE YOUR OWN COLD DRINKS

Mix your own cool, refreshing drinks at home by using our Fruit Syrup which comes in a variety of flavors. A pint of syrup makes a gallon of delicious drink.

FRESH FRUIT EVERY DAY

Strawberries, Pineapples, Oranges, Bananas, Lemons, Apples and Cantaloupes are fresh here every day. Buy your berries or pineapples by the crate—they are low in price this ya and it will pay you to can this choice fruit.

BAKERY GOODS

Week end specials of Fresh Cakes and a variety of Bakery Goods for your Sunday dinners. You will like our kind.

OTHER TIMELY ITEMS

A full line of Cold Meats, Pickles, etc. for picnic lunches. New potatoes now!

Don't forget we handle American No-Corn and Full-O-Pep Course Chick Feeds.

SPECIAL—July & Aug. Violin, Piano lessons, 2 lessons a week, (one free) Wed. and Sat. Mildred Johnson, Klemme, Ia. 2tc.

The Ladies Aid Society of the Reformed Church met at the home of Mrs. Herman Schuldt Wednesday afternoon.

Miss Edith Anderson, of Sioux Falls, South Dakota, is visiting at the home of Mr. and Mrs. Chris Gram for a week.

Mr. C. C. Schaefer, of Marble Rock was here a few days the past week building a new fence on his farm.

Mr. and Mrs. Martin Jensen and children called on Elmer at the hospital at Hampton Saturday afternoon.

Mrs. Marlin Croner and daughter Dorothy, Lena Schroeder, and Grandma Schroeder were Mason City visitors Saturday on business.

Mr. and Mrs. E. F. Jacobs and son Elwyn returned Thursday evening from a visit at Maquoketa, Chicago, and Andrew.

Geo. Lawhorn, Henry Freie, Viola Freie and Eunice Braund spent Sunday at the John Braund home at Williams.

Earl Josten, of Harris, Iowa, was home Sunday and Monday. Earl is leading the band at Harris this summer.

Mrs. C. A. Arnold's Sunday school class of some fifteen boys enjoyed a picnic at Ventura Heights Tuesday. Mrs. C. A. Arnold and Mrs. J. V. Day accompanied them

Rev. and Mrs. W. J. Suckow are about to leave Forest City where they have resided for a number of years. Rev. Suckow was called to Alden, Iowa, as pastor of the Congregational church there.

On July 20 and 21 the Klemme Auxiliary will put on a play, "The Family Album," and in addition a six reel feature picture. Keep this in mind and watch for further particulars.

Mr and Mrs. C. G. Waterman and daughter, Marian, Mrs. Mary Waterman, Mrs. R. A. Jorgenson and son, Buster, and Mrs. C. F. Keraus were Clear Lake and Mason City visitors Tuesday afternoon.

Clarence Kluckhohn has purchased a Chevrolet sedan of the Houdek & Ludeke Co. of Garner. "Fat" is learning the mysteries of gear shifting, having been a Ford fan up to this time.

Thanks to all who are giving us news each week. We cannot learn of these items without the assistance of our readers. We want ALL the news of your friends you entertain, trips you take, or visitors at your home. Thank you!

Elmer, son of Mr. and Mrs. Martin Jensen, came home from the hospital at Hampton on Tuesday. He is making a fine recovery from his recent operation. Martin Jensen and family and Franklin Kluckhohn drove over to get him.

N. E. Brear, of Garner, last week made an airplane trip with a Lake Mills aviator to Winnipeg, Canada. Mr. Brear is taking a course in flying and has over ten hours of air work to his credit and will be able to secure a pilot's license by fall.

Joe Miller returned Saturday a. m. from his Chicago trip. While in the windy city he visited with his brother, Nick Sauer and family and with many old friends He visited also with Herman Miller, Dick Bama... and Butch Schroeder. In his younger days Joe spent sixteen years in Chicago.

Mr. and Mrs John Larson and three children visited at the J. J. Poort home at Sac City last week Saturday evening and then drove on the next day for a visit with relatives near there, rteurniug home on Monday. Miss Lenona Poort came to Klemme with them for a visit of a week or two.

Last Friday evening Rev. Grosshuesch and family packed up their supper and drove out to Mr. and Mrs. Elmer Schlei's home as a surprise for Mrs. Schlei, it being her birthday and the same date also being the 8th weddng anniversary of Rev. and Mrs. Grosshuesch. Mrs. Fred Haupt and Edith and Adella Kuhlmann were also guests.

Bill Butts and brother, Warner, of Goodell, can tell a good fish story that will hold the boys for a day or two. Last Thursday evening Bill caught an eleven pound pickerel about four rods out from the Griggs Cottage where Ye Editor beaches his boat. The fish was evidently quite hungry because he had himself stuffed with a fair sized blue-gill or crappy. Not feeling that we were that lucky on big ones we contented ourselves fishing blue-gills and pike and caught enough for a mess.

KLEMME TROOP IS INSTALLED

KLEMME TROOP AND OFFICERS INSTALLED THURS. EVE.

Investiture Ceremony Given By The Hampton Boy Scout Troop

The Klemme Boy Scout Troop and the various officers were officially installed at a public ceremony at the High School Gym last Thursday evening.

Troop No. 36 of Hampton, in charge of L. Osam, field scout executive of the North Iowa Area Council with headquarters at Mason City, put on the impressive candle investiture ceremony.

Dr W. F. Missman, chairman of the Klemme Boy Scout Troop Committee was chairman of the ceremonies Thursday evening.

Scout John Hanson of Forest City opened the program with the Bugle Call, Assembly. Mrs. P. W. Johnson lead the audience in singing one verse of America, and Rev. A. W. Gauger gave the invocation.

Scoutmasters Give Talks

Field Scout Executive L. Osam, gave a talk in which he explained the purpose of the evening's program. Soutmaster S. L. Haynes of Troop 18 of Mason City gave a fine talk on the "Aims of the Boy Scout Program." Concluding his talk he officiated as installing officer of the Troop Committee, and Scoutmaster.

Impressive Scout Ceremony

The next on the program was the installing of the Klemme Troop and the Candle Investiture Ceremony by the Hampton Boy Scout Troop For this ceremony the gym was entirely darkened and the only light was that from the candle ceremony on the stage. For this purpose a specially constructed block of wood in the form of twelve steps, six on each side was used. This was placed on a table near the back center of the stage and the entire surrounded by officials and the Klemme and Hampton Troops.

Ceremony Was Beautiful

Surmounting the twelve "steps", each of which held an unlighted candle, was one large candle burning brightly, "The Spirit of Scouting." From this candle in turn the three candles representing the Scout Oath, were lighted. Then in turn as each boy took a part the twelve remaining candles were lighted and at the same time each of the twelve Scout Laws was recited, until all of the candles were burning brightly, representing Scouting in all its light and brightness.

Following the ceremony Scoutmaster D. P. Anderson presented membership certificates to the fifteen Scouts assembled. Mr. Osam awarded the badges.

Hampton Troop 36 gave a number of demonstrations on First Aid and Signaling. The Klemme Troop gave demonstrations on Rope Tying and Knots and the O'Grady Drill.

The Flag of the United States was presented to Klemme Troop No. 56 by Mrs. Paul Grange, president of the Klemme Legion Auxiliary, and was received by Wm. Gauger, member of Troop 56.

Following the presentation of the Troop Charter the Troops gave the "Indian Benediction," followed by "Taps," by Bugler Hanson.

Klemme Boy Scout Troop 56

The Klemme Boy Scout Troop, No. 56, is composed of the Troop Committee: Dr. W. F. Missman as Chairman, E. F. Jacobs, Rev. Calvin Grosshuesch, R. A. Jorgenson and Andrew Wellemeyer. Dr. D. P. Anderson is Scoutmaster and Asa Arnold, Assistant Scoutmaster.

The fifteen boys of the Troop who were installed Thursday evening are: Byrnes Missman, Donald Turgasen, Henry Smid, Kenneth Kluckhohn, Clarence Kluckhohn, William Gauger, Alvin Keeper, Dorance Day, Asa Gibbs, Willis Busch, Raymond Schuldt, Paul Sampson, Wayne Pavey, Harold Jost, Floyd Klotzbach. Three other boys have signed up for Tenderfoot Scouts in Troop 56. Carlyle Gauger, who is working for his uncle at Rudd, will be mailed his certificate and badge. The total number of boys in Troop 56 registered at this time is therefore nineteen.

To join the Boy Scouts a boy must be between the age of twelve and eighteen.

Klemme Scouts Sign For Camp

Practically the entire troop has signified their intention of going to the summer camp at Ventura, the Camp Roosevelt, the first week in August. The camp is in charge of experienced men and the boys are taught many interesting crafts in outdoor work and handiwork of various kinds. The total cost for a weeks stay in camp is only $5 50

Parents should urge their boys to attend the camp It's the very best week's outing a boy could possibly receive

Reservations have already been spoken for by the Troop Committee

ADVISES BEST WAY TO COOK ALL KINDS OF VEGETABLES

Keep Them Nearly Whole, Use An Open Kettle; Little Water

In cooking green vegetables, if you would have them most attractive, appetizing and of the highest food value, cook them as nearly whole as possible, cook them quickly in an open kettle with a small amount of water, season and serve them immediately.

These are the suggestions of Miss Lela Joy Bennett of the home economics faculty at Iowa State College.

Although the green color in vegetables is not soluble to any great extent, it is well to leave the vegetables in as large pieces as are attractive to serve in order to preserve vitamins B and C which are water soluble, also this will help conserve the more soluble minerals —iron and phosphorous

Green colored vegetables turn to an olive or bronze green if cooked in the presence of acids. The vegetables contain volatile acids which condense on the lid and drip back on the vegetables producing the olive green color. Hence, in order to keep the bright green color, use an open kettle.

PLENTY OF VAUDEVILLE ON PROGRAM NEXT SUNDAY

Manager Ritz Says Ball Diamond Is Finest In Northern Iowa

The vaudeville program at Bayside Park, Clear Lake, next Sunday, July 8th, will include singing, dancing, comedy and novelty features. Musical concerts and free picture shows will also entertain the visitors. A crew of men hase been working on the Bayside diamond the past week. The workers have been sanding and rolling it, all the grass has been cut short and now the Bayside ball park is one on the finest in the country, according to the operator, Mr. Ritz. A ball game will be played Sunday at three o'clock The Bayside Cubs, a salaried team, has played several games in north Iowa towns, the past two weeks, and the team is in fine shape for Sunday's battle. Charles Ritz claims it will be difficult to find a team in this section that can beat the Cubs. Any team wanting to schedule a game at Bayside should communicate with Charles Ritz or Bud Fischer, Clear Lake, manager of the Cubs. Clate Thompson's Collegians, popular Des Moines orchestra, has been engaged to furnish the music for the dances at Bayside next week, Wednesday night, July 11th and Friday night, July 13th.

CORWITH BOTHERED WITH A VISIT OF GNATS

Corwith Hustler: Last Sunday evening there were billions of small gnats gathered around the electroliers and like the poor moths, scorched themselves to death. There were great clouds of them and on Monday morning there were great heaps of them on the sidewalks and in the gutter under the electric lights. They were so thick and stuck so fast to the walks that they could not be swept into the gutter but had to be shoveled off.

—General Fund—	
Expenditures estimated for 1928	$13,500.00
Income from other sources	3,348.00
Taxes to be raised	11,000.00
Expended in 1928	15,356.88
Expended in 1927	15,067 98
—School House Fund—	
Expenditures estimated for 1929	$1,000.00
Income from other sources	None
Taxes to be raised	1,000.00
Expended in 1928	2,000.00
Expended in 1927	3,400.00
Total tax to be raised for school purpose	12,000.00

Estimated tax per $1,000 of assessed value, $8.50.

PAUL GRANGE, Secy.

We Wish They Would Do This In Klemme, Too

Kanawha Reporter: Kanawha's main street was given a trial application of calcium chloride the last of the week. The chemical, which has the appearance of small lumps of salt, was spread over the street from the depot to the schoolhouse and over half blocks east and west from Main Street in the business section. A lime spreader was used for the job. This chemical is said to be effective in keeping the dust from blowing and if it will do that is a good investment and the Council is certainly justified in giving it a thorough try-out. Another application will be put on the street in a few weeks.

KLEMME FARMER BURIED SUNDAY

CHARLES MEDAUS DIED AT M. C. HOSPITAL THURS. EVE.

Death Due To Attempted Suicide By Hanging In Barn Loft

Mr. Carl Medaus generally known as "Charlie" died at a Mason City hospital last Thursday evening, following an attempt to take his own life by hanging in the loft of his barn on the farm a few miles east of Klemme last Thursday morning. The family had suspicioned his motive and before life was extinct had discovered the act, but in freeing Mr Medaus from the rafters of the barn he dropped to the floor beneath and in the fall his leg was broken and hip crushed. He did not regain consciousness. Surgical and medical skill failed to revive him.

Obituary Of Carl Medaus

(Written by Henry Baack)

Carl Medaus, a son of Mr. and Mrs. Joachim Medaus, was born on the 14th of January, 1868, at Manitowoc, Wisconsin. He was baptized in the Lutheran Church Nov 27th, 1871, and received the name, Carl Edward Gottlieb. He became a member of the Lutheran Church by confirmation April 2nd, 1882.

At the age of 24 years he left his parents and spent three years with his brother-in-law, Fred Schwartz, a farmer in Wright County, Iowa He then came to Hancock County, where he worked for two years as a farm hand.

He was united in marriage to Miss Emma Baack, of Garner, Iowa, on the 23rd day of April, 1897. The young couple spent the first twelve years on a farm owned by W. C. Schmidt in Twin Lake Township. In 1909 they bought a farm east of Klemme on which they have lived ever since. Seven children were born to Mr. and Mrs. Medaus, three of whom died in infancy.

Mr. Medaus died at the age of 60 years, 5 months and 14 days. Surviving him and mourning his death are his widow; two sons, Carl and Edwin; two daughters, Minnie and Helen; three brothers; three sisters and other relatives.

Funeral services were conducted at the Medaus home Sunday afternoon, Rev. Grosshuesch in charge.

Interment was made in the Garner cemetery.

Road Being Graveled

Kanawha Reporter: A graveling gang is now located east of Kanawha and will start work this week at the task of gravelling the road from Goodell west to the Twin Lakes. The road is now graveled from the lakes to Kanawha and the new gravel will provide a good road into town from the east in all kinds of weather.

HERE'S A NEW WRINKLE FOR KEEPING EGGS FRESH

Eggs Should Be Cooled Just The Same As Cooling Cream

Just as cream needs to be cooled immediately after it iss produced and kept cool until it is marketed so do eggs need a similar treatmen. tho this fact is not generally realized, asserts W. D. Termohlen of the Iowa State College, extension specialist in poultry marketing.

On many farms it is a common practice in preparing a case of eggs for town to go out and gather the fresh eggs and pack these immediately into the case without cooling. The fillers and flats of an egg case hold the heat present in the egg for a considerable period and this often results in spoilage by the time the egg reaches the consumer, Mr. Termohlen explains.

From now to September is one of the hardest season of the year to produce high quality eggs and every precaution should be taken to eliminate chances of spoilage. Holding the eggs in a cool place from the time they are gathered until marketed will aid, according to Termohlen. Another aid is to gather the eggs twice a day.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Services of special interest await those who worship with us next Sunday. Our morning services will mean much to us individually and collectively. Let all be present and be there on time so that we may get the fullest benefit out of the hour of service.

On Sunday evening the ones that finished the course in catechism will be publicly examined and will receive their certificates. Along with this part there will be other exercises of interest presented as a part of our Bible School work. This will be a program worth while.

On Sunday evening, July 15, our Bible story-telling contestants will present their work and receive their award according to place.

DAY'S RECORD

At the end of the day, I often pause
Consider how I've lived it,
If I have helped to bear a burden
Or lighted pain a bit.

I try to think if I have said
A kind word where I should
Or done a friendly deed or given
A good thought where I could.

It sometimes seems to me I hurry
Too much and do not stay
For a simple, tender gentle phrase
I could so easily say.

It often, often seems to me
My kind words are too few,
That kindly acts I thought of . . planned
Somehow I did not do.

—George Elliston.

Character is higher than intellect A great soul will be strong to live, as well as to think.—Emerson.

If there is virtue in the world at which we should always aim, it is cheerfulness.—Bulwer Lytton.

Our opinion of people depends less upon what we see in them, than upon what they make us see in ourselves.—Sarah Grand.

Things move along so fast nowadays that people who say, "It can't be done," are interrupted by somebody doing it.

Henry Lewis has improved his residence by having the porch on the east side remodeled. Eck Zeidler did the work.

A new ice cream container was installed at Pete Wilson's drug store Friday. The new outfit has six compartments and Pete aims to carry a real assortment of ice cream in his new Frigidaire.

DEMOCRATS ROAR AS CONVENTION NAMES AL SMITH

New York Governor Made the Party's Standard Bearer—Robinson His Teammate.

President—
ALFRED E. SMITH
New York

Vice President—
JOSEPH T. ROBINSON
Arkansas

By EDWARD W. PICKARD

Sam Houston Hall, Houston, Texas. —With Gov. Alfred E. Smith of New York as its standard bearer, and Joseph T. Robinson of Arkansas in second place on the national ticket and a reasonable amount of harmony within its ranks, the unterrified Democratic party is all set to give the Hoover-led Republicans a hot battle that will last until the polls close in the November election.

In this huge convention hall a wildly cheering throng of delegates made Al their Presidential nominee on the first ballot, and then pandemonium reigned. State standards were torn from their places, big lithographs of Smith appeared on every hand and the delegations began their joyous march through the aisles, while the alternates and the thousands of spectators stood up yelling at the tops of their voices and the bands, playing—one guess what—were drowned out by the shouting and singing multitude. Hysterical women threw their arms around one another or around the men nearest to them and wept for joy. Mrs. Al Smith and Mrs. Walker, wife of Mayor Jimmy Walker of New York, sitting together in a box, made no attempt to restrain their triumphant delight.

It was an emotional demonstration that needed no artificial coaching and pushing, and lasted a long, long time. The cockles of the hearts of every Democrat there were warmed and when order was restored every one of them resumed his seat glowing with serene confidence that the convention had picked the man who would be inaugurated President of the United States on March 4, 1929.

Platform Built for Harmony.

The reasonable harmony mentioned above was brought about by the smart work of the committee on resolutions, always the most important body in a national convention. It was no easy task this committee had, for the dry South was arrayed against the wet East, and apparently each was determined to have its own way about the enforcement plank to be inserted in the platform. The formulation of this resolution required infinite tact and patience, for though the Smith forces knew they could nominate their man, they could by no means afford to alienate the bone-dry states of the South and West.

Farm organization leaders from the corn belt, who failed to obtain from the Republicans in Kansas City what they wanted, also demanded the attention of the resolutions committee, and though the Democratic party naturally could not afford to put itself on record in favor of the equalization fee in the McNary-Haugen bill, pledges of aid to the farmers were made which, it was hoped, would capture many rural votes that otherwise would go to the Republican ticket.

Planning to make "corruption" the dominant issue of the campaign, the platform builders constructed a plank that vigorously attacked the record of the Republican administrations of Presidents Harding and Coolidge, reviewed at length the oil lease scandals and other instances of alleged misbehavior in office, and pledged the Democratic party to give the nation a clean and honest government. Campaign contributions and expenditures also came in for lively comment.

The platform roundly assailed the Republican administration's foreign policy, especially as to intervention in other American republics. The Fordney-McCumber tariff law, now in effect, was denounced as inequitable and tending to foster the growth of monopolies, but no sweeping downward revision of tariff rates was proposed. The Mellon taxation program was attacked as not based upon the fundamental principle of ability to pay.

Altogether, the platform was vigorous, snappy and notably short.

Couldn't Stop Smith.

Opponents of Al Smith, both those who wanted the nomination for themselves and those who just didn't want Smith, had less chance to stop the idol of New York than the "allies" at Kansas City had of stopping Herbert Hoover. In the first place, they were not nearly so numerous as were the allies; and in the second place, there was no such outstanding opposition possibility as was Senator Curtis among the Republicans. Senator Jim Reed of Missouri made such play for the honor as he could, insisting to the last that he could at least stop Al even if he could not himself secure the nomination. But as he was credited with being as wet as Smith the dry southerners could scarcely be expected to stand by him in large numbers. Reed's headquarters were busy places and his boosters, many of whom were women, kept on distributing documents and oral arguments. And early in the convention proceedings Senator Jim found opportunity to make one of the fiery speeches for which he is famed, assailing the Republican administration record and demanding a platform free from evasion and indirection.

Evans Woollen of Indiana, Jesse Jones of Texas, and other favorite sons, received the complimentary votes of their state delegations, but nearly all the delegates were ready to jump into the Smith band wagon when the appointed time came, and jump they did with the utmost enthusiasm.

Opening the Convention.

Conforming to the official call, the convention was called to order by National Chairman Clem Shaver at noon on Tuesday, and the preliminaries, including the naming of the committees, were gone through with. Then, in accordance with the decision of the national committee, adjournment was taken until 7 o'clock in the evening, when Claude G. Bowers of New York city, temporary chairman, delivered the keynote address. This change of hours was made partly to avoid the daytime heat and more especially so that Mr. Bowers' speech might have better distribution over the country by radio. The address of the editor, historian and scholar was well worth hearing, being breezy and lively and remarkably free from the heavy platitudes that ordinarily characterize such productions. It was what was expected from the man who created such a stir in the circles of his party by his speech at the Jackson day dinner in Washington last January.

Riddling the Enemy.

Chairman Bowers gave little time to telling in detail what the Democratic party had done in the past or what it proposes to do in the future. Opening with a ringing call to the party to arm itself for a war of extermination against "privilege and pillage," he went on to a contrasting of Jeffersonian democracy with Hamiltonian republicanism, and of the latter with Lincoln's republicanism, which he accused the Republican party of having abandoned. It now, he said, is openly following the Hamiltonian theory of government for the benefit of the wealthy and powerful.

In incisive language, full of epigram and invective, he attacked the Republican administrations of Harding and Coolidge, describing with bitter irony their alleged shortcomings and misconduct. Of course, the Teapot Dome oil scandal and allied affairs came in for a full measure of denunciation. Winding up a brief summary of what the eight years of Democratic rule from 1912 to 1920 did with an eloquent eulogy of Woodrow Wilson, he brought his great audience to its feet with ringing cheers.

Demonstration for the Farmer.

Turning to the farmer, Mr. Bowers said his portion had become one of thorns and thistles and that in seven years the Republican party had utterly failed to do anything for him. Closing this portion of his speech, he thundered: "We do not propose that the most basic of all our industries shall longer be a doormat for all the others to wipe their feet upon as they enter the Temple of Privilege." Responding with a mighty shout, the delegates and alternates sprang to their feet and, as the two bands played their loudest, pulled up the state standards and marched around the aisles for about fifteen minutes. Skeptical ones in the audience believed a demonstration at that point in the address was prearranged to impress the corn belt. Anyhow, it was impressive at the time.

The speaker directed a hail of verbal bullets at the Republican claims of having protected business from Democratic enemies and of having brought about prosperity and economy. Said he: "Mythical prosperity, mythical economy, mythical facts, mythical figures and mythical men. The last eight years may well be treated by the historian of the far future as the mythical age of American history."

Omitting from his address as given to the press a long paragraph denouncing the administration's policy of "dollar diplomacy" in Latin-America and Nicaragua especially, Mr. Bowers moved rapidly to his peroration, finishing with the words: "And we shall win because our cause is just. The predatory forces before us seek a triumph for the sake of the sacking. Their shock troops are the Black Horse cavalry whose hoofbeats have made hideous music on Pennsylvania avenue during the last eight years. They are led by money-mad cynics and scoffers—and we go forth to battle for the cause of man. In the presence of such a foe the who dallies is a dastard and he who doubts is damned.' In this connection we close debate and grasp the sword. The time has come. The battle hour has struck. Then to your tents, O Israel!"

Senator Joseph T. Robinson was made permanent chairman and near the close of a rather long speech, with one brief sentence concerning the Constitutional provision against a religious test for office, he started a grand parade of the state standards.

The committee on rules took into account the advantages of radio distribution and provided that the nominating speeches for President should be made before the presentation of the platform. Therefore those oratorical efforts were heard at the Wednesday evening session.

Smith's Victory Too Easy.

Governor Smith's name was presented to the convention by Franklin Roosevelt, who performed the same service for him four years ago in Madison Square garden. Still vigorous despite his long illness, Mr. Roosevelt made an eloquent and spirited speech that often aroused the audience to loud applause, and at its close there was a wild and uproarous demonstration that could not be quelled by the chairman for many minutes.

Nearly every state standard was in the parade within a minute, New York modestly giving the lead to others. Missourians sat pat and so did the delegates of several other states. In the Mississippi delegation there were several lively fights between the anti-Smith and pro-Smith groups. The standard was broken in the struggle and some seats were smashed before two squads of Houston policemen could quell the row. Governor Moody refused to permit the Lone Star flag of Texas to be taken into the demonstration, so Mrs. Laura Burleson Negley, daughter of former Postmaster General Burleson, found a small Texas flag and, waving it, led a small group of Texans who were for Smith. At one time most of the standards were grouped in front of the box wherein sat Mrs. Smith, and she arose to acknowledge the compliment. After 35 minutes of uproar tactful Mayor Walker ordered the New York standard withdrawn, and so order was restored.

Georgia's Favorite Son.

United States Senator Walter F. George of Georgia was placed in nomination by Judge Charles R. Crisp in a long speech in which he attacked Smith without naming him. The George demonstration was participated in by Georgia, Alabama, North Carolina, South Carolina, Florida and Nebraska, and was fairly satisfactory to his admirers. W. H. O'Brien presented the name of Evans Woollen, favorite son of Indiana; Congressman William Ayres of Kansas was put in nomination by George McGill of that state; there were several seconding speeches for Smith, the most notable being by Mrs. Nellie Tayloe Ross, former governor of Wyoming, and the convention adjourned to Thursday morning.

When the delegates assembled Thursday the Smith seconding speeches were resumed. Governor Ritchie of Maryland, who withdrew in favor of Al, was first on the list and was followed by former Mayor Peters of Boston and Andrew Nelson of Minnesota. Mississippi did not put Senator Pat Harrison in nomination, though he was scheduled to get a complimentary vote. Then Charles M. Howell took the platform and offered to the convention the name of Missouri's fighting senator, James A. Reed. This man, he said, was made to order as a candidate for the Presidency against Herbert Hoover. Howell described at length Reed's career in congress, his defense of constitutional privileges and his lifelong fight for democracy.

Demonstration for Reed.

When Howell closed, the Missouri, Florida, Oklahoma and Philippines delegations started a demonstration that was extraordinarily noisy and long continued, considering their scanty numbers. Banners, lithographs and standards were carried around the hall, and the uproar was out of all proportion to the number of Reed votes. Next to be put in nomination for the honor none of them could hope to attain were Huston Thompson of Colorado, Atlee Pomerene of Ohio, Gilbert M. Hitchcock of Nebraska, and Cordell Hull of Tennessee and then the audience was given something a little more lively in the nomination of Jesse E. Jones, pride of Houston, and the man whose efforts brought the convention to this city. Not one of his excellent qualities was overlooked, and the galleries cheered him wildly. Huge paper bags full of toy balloons had been suspended from the girders of the hall and these were torn open at the proper moment, filling the air with the gay little spheres. Houstonians are very proud of Jesse Jones and rejoiced at the opportunity to evidence that. Then, too, he is financial director of the Democratic National committee and as such has made himself popular among the delegates. So, all in all, Mr. Jones may feel satisfied with the demonstration that followed the presentation of his name. Before it quieted down the cowboy band marched in, led by a pretty cowgirl mounted on a gray mare. Chairman Robinson enjoyed this as much as anyone else but was finally compelled to ask that the "Cavalry be now removed."

Platform Committee's Labors.

The platform committee had been laboring for two days and nights and for a time serious discord was threatened over the law-enforcement plank. Gov. Dan Moody stood out to the last for an extremely dry plank, but the harmony workers won out and adopted the resolution drafted by Carter Glass, pledging the party to honest effort to enforce the Eighteenth amendment and all other laws as well. When the platform was submitted to the convention Thursday evening this plank was mildly applauded. Moody, as a minority of one on the committee, explained his stand. Governor Ritchie of Maryland, outstanding wet, told why he was that way, but neither offered a minority report. Senator Glass explained the compromise for the sake of harmony, and the platform was adopted by an almost unanimous vote. Then came the roll call of states for the selection of the Presidential candidate.

Nomination of Smith came earlier in the balloting than his supporters really desired. They felt that a victory too obviously easy might savor of steam-roller methods and tend to injure the spirit of harmony that was the true keynote of the convention. Knowing pretty well their own strength, they wished every other candidate to have his full chance. But most of the delegates were eager to fall in line for "Al" and could not be long restrained.

On the first ballot Smith lacked but ten votes of the requisite two-thirds. Before the totals could be announced a dozen delegations were on their feet, each seeking to be the one to put Al across the mark. Amid increasing disorder Chairman Robinson first recognized the Ohioans, who gave their entire vote of 48 to Smith.

The deed was done.

Music in Profusion.

Bandsmen of Houston had set themselves the task of learning to play the state tune of every state in the Union, and the pleasing result was that each delegation, as it arrived in the city, was greeted with the air most familiar and grateful to its ears, rendered by the band assigned to escort it to its hotel.

The bands made music throughout much of the day and night during the week, parading the streets and invading the lobbies of the hotels, already crowded almost to suffocation. Among the most industrious of them—and incidentally among the best rewarded—was a "one-man band" who quite delighted the throngs and who rather haunted the extensive Smith headquarters in the Rice hotel.

Then there was a cowboy band which was a part of a rodeo outfit that was giving performances at the Rice institute, and a competent Boy Scout band.

Receiving Jimmy Walker.

What the local press called the largest and most enthusiastic crowd that ever assembled at a Houston railroad station gathered to meet the special train that brought Mayor Jimmy Walker of New York and a host of other residents of the metropolis. Jimmy, who is noted for his attire, was clad in a neat sports suit of purple. The throngs at the station and the Rice hotel fairly mobbed him, and as he already was under the weather he soon retired to his room. About the same time another group of New Yorkers, numbering several hundred, arrived at Galveston by boat, completing a sea voyage around Florida and up through the Gulf.

Ample accommodations for all the visitors had been arranged by the Houston committees, but even so, some of the hotels were rather swamped. The Rice was the center of most of the activity and it was almost impossible to force one's way through its lobby. As for the elevators in this hostelry, they proved utterly inadequate and the language used about them wouldn't get through the mails. One wild-eyed gentleman from western Texas waited so long for an elevator that his patience gave out. Pulling out his pistol, he deliberately put a bullet through the center of each pane in the door of the shaft. No one was hit and no one was arrested. The authorities looked upon the incident as just a case of pleasure shooting, like that of another westerner who was moved to step out on the balcony and put a bullet through a window of a hotel down the street.

Women Many and Active.

Women's organizations, that got something of what they wanted from the Republicans in Kansas City, came to Houston also in full force and presented the same demands for planks in the Democratic platform. The two especially active and vocal groups were the National Woman's party, whose plank for equal rights between men and women throughout the United States and its possessions was presented to the resolutions committee by Miss Sue White, practicing attorney of Jackson, Tenn., and those who demanded a prohibition plank equal in strength and definiteness to that adopted by the Republicans. Another earnest group was the Women's Committee for the Repeal of the Eighteenth Amendment, which worked in conjunction with the Constitutional Liberty league to a certain extent but had its own plank. As one of their leaders explained, the women of this committee "are for temperance as Jesus Christ was for temperance, and as the greatest prophets and leaders of civilization have been for temperance. Prohibition has proved the most colossal failure in the world to-

ALFRED E. SMITH

JOSEPH T. ROBINSON

day. We want to work with so[me]thing that won't fail." This anti-[group] gained importance by its m[em]personnel, which included many [of] the social and political leaders [of] writers of the country. Elizab[eth] Marbury, national committeewom[an] from New York, is honorary chairm[an] and Mrs. Chauncey Olcott is a v[ice] chairman. Others are Mrs. Doug[las] Robinson, sister of Theodore Roo[se]velt; Mrs. Marius de Brabant, dau[gh]ter of the late Senator Clark of M[on]tana; Mrs. Kenneth O'Brien, dau[gh]ter of Clarence H. Mackey; Mrs. Fr[e]erick Nathan, head of the Natio[nal] Housewives' league; Mrs. Herbert S[a]terlee, sister of J. Pierpont Morg[an]; Anna Katherine Green, Mrs. Art[hur] Curtis James, Mrs. Alice Foote M[a]Dougall, Miss Elizabeth Stokes, M[rs.] Frederick Allen, and others of alm[ost] equal note. Their plank pledged [the] Democratic party to resubmit [the] question of national prohibition to [the] people in their state conventions [as] the equivalent of a referendum in [ev]ery state.

Woman membership in the conv[en]tion was smaller than in 1924. Th[ere] were 140 women delegates with [an] aggregate total of 783/4 votes, and [the] women alternates. No women at[e] were sent by Idaho, North Dako[ta], South Dakota, Oregon and Wiscons[in]. From Alabama, Delaware, Louisia[na], Mississippi, Nebraska, South Caroli[na] and Vermont there came women alt[er]nates but no women delegates.

Colonel Bell Was There.

There were few more spectacu[lar] figures in the convention thro[ng] than Col. Nicholas M. Bell of St. Louis, who accompanied the Misso[uri] delegation. Colonel Bell attended [the] first Democratic national conventi[on] in 1862, and he had the honor of no[m]inating Seymour when that candida[te] ran against Blair. Then, in 1884, [he] nominated Grover Cleveland, and [at] the Houston convention he brou[ght] the chair which he occupied on th[at] momentous day. His white hair a[nd] beard bristling and his eye flash[ing] with old time fire, the pioneer M[is]sourian stamped his hickory c[ane] down upon the concrete with a ba[ng] when reporters sounded him as to [his] favorite candidate.

"In other words, whom are you [go]ing to vote for?" they asked.

"You can tell the cockeyed wo[rld] that I'm not going to vote for a darned Englishman," snapped the fi[re] veteran as he was whisked away [to] his hotel.

One Pessimist Found.

Roy L. Fernal, the youthful nati[on]al committeeman from Maine, he only twenty-six years old—was [the] outstanding pessimist. Before [the] opening of the convention he asser[ted] that this is not a Democratic ye[ar] and added that if Al Smith were no[m]inated he would not have a chance [to] defeat Hoover. For the first time [in] Maine delegation was instructed—Smith. "That killed Democracy [in] Maine," declared Mr. Fernal. He [is] himself a candidate for the Uni[ted] States senatorship, but said he [did] not see how he could win in what [he] considered the deplorable circ[um]stances.

Dedicating Sam Houston Hall.

Fifteen thousand Houstonians g[at]ered Sunday in the big structure [they] had built and given to the Democrs and with dignified ceremony it [was] christened Sam Houston hall. [Mrs.] Woodrow Wilson, widow of the [late] Democrat to sit in the White Hou[se] was the guest of honor. Handsome a[nd] gracious as ever, garbed in black a[nd] white chiffon and a blue felt hat, [she] sat in the box of Jesse H. Jones [to]gether with Governor and Mrs. Moo[dy], Clem Shaver and Mr. and Mrs. Jon[es].

Jesse Jones was, despite himself, [the] hero of the occasion, for no one in [the] vast audience was ignorant of the p[art] he had played in securing the conv[en]tion for their city. So he was c[om]pelled to make an impromptu spe[ech] which was greeted with vociferous [ac]claim. Mayor Oscar F. Holcomb [then] played the gavel which the Sam Ho[us]ton State Teachers' college was [to] present on Tuesday to National Ch[air]man Shaver to call the convention [to] order. It was made from cedar o[f] tree that Sam Houston planted at [his] home in Huntsville. During the pr[o]gress of the ceremonies Bishop [Kil]led to the front of the platform [a] small, thin, baldheaded, gray m[an] tached man and presented him [as] "Col. Andrew Jackson Houston, [son] of our great hero, Gen. Sam Ho[us]ton, for whom this hall is named."

After all the speeches and pray[ers] the people were given an opportu[nity] to look over the hall. Having [the] outward aspect of a gay exposi[tion] building, its interior was arranged [to] provide convenience and coolne[ss] the convention throngs. Its sea[ting] facilities were better than in m[ost] such structures and the acoust[ics] with the aid of numerous amplifi[ers] were excellent. Decorations, w[hich] not lavish, were in good taste. On sides, huge electric fans and pl[enty] of ice water served well to offset [the] heat.

Provisions for Comfort.

Houstonites suffer from no illus[ions] as to the heat that prevails there summer time. They know it is [go]ing to be hot—and it is hot. But [the] local committees took whatever m[eas]ures they might to mitigate the [ar]idity of the days and insure the c[om]fort of the city's guests. One of [the] most efficient of these measures [was] the erection, close to Sam Hous[ton] hall, of "Hospitality House." An [en]tire city block was roofed over [and] filled with comfortable benches at which innumerable electric [fans] whirled unceasingly, and through [the] open sides of the structure s[uch] breezes as there might be pa[ssing] freely.

The American Naval Hero Who Was Killed in a Duel

By ALFRED SORENSON

IN THE United States naval "Hall of Fame" no name occupies a more prominent niche than that of Stephen Decatur whose heroic and daring deeds illumine the pages of American history and have been told in many a thrilling tale.

Born in Maryland in 1789, our hero was given the name of Stephen in honor of his father, Commodore Stephen Decatur, who not only played an important part in the War of the Revolution, but in the war with France commanded the Delaware, carrying twenty guns, and in 1800 was in command of a squadron of thirteen vessels.

It was but natural that the boy should have a longing to follow in the footsteps of his father, on whose ship he made his first voyage. When his desire for a naval life became known to Commodore Barry that officer secured a midshipman's warrant for him and started him on his adventurous and brilliant career. He began his service when he was eighteen years old under Commodore Barry on the frigate United States. It was on this ship that young Decatur became acquainted with James Barron, then a lieutenant, at whose hands he was to meet his death in a duel twenty-two years later.

The frigate United States was sent to the West Indies, and Decatur, having "made good," was soon promoted by Commodore Barry to a lieutenancy, provisionally, and the appointment was confirmed by President Adams. While on his second cruise Decatur performed an act of great bravery. A member of the crew, who could not swim, fell overboard, and Decatur without a moment's hesitation leaped after him and supported him until a ship's boat came to the rescue.

While his ship was temporarily in the harbor of Philadelphia Lieutenant Decatur was assigned to recruiting duty. Several of his men, whom he had enlisted, deserted and took service on an India merchantman. He demanded their surrender, but the first officer not only refused to deliver the deserters but grossly insulted him. Thereupon Decatur laid the matter before his father, who told him to demand an apology, and, if denied, then to send a challenge to fight. He acted accordingly, and an apology being refused he issued a challenge, which was accepted. Decatur told his friends that he did not intend to kill the officer, but would merely wound him in the hip. The duelists met in a secluded spot on the banks of the Delaware and exchanged shots. Decatur, who escaped injury, kept his word. He "winged" his man in the exact spot where he had said he would.

When the brief war with France was ended the navy was reduced, but Decatur was retained with thirty-six other lieutenants. In 1801 he was assigned to the Essex, commanded by Capt. William Bainbridge, and while cruising in the Mediterranean the ship put into the port of Barcelona for a brief anchorage. The boats of the Essex while going to and from the shore at night were halted by the officers of a Spanish ship-of-war doing police duty in the harbor. Decatur called on the proper officer and presented a remonstrance. Being treated in a most discourteous manner, he declared he would not let the matter drop. The next day he visited the Spanish ship, but was unable to find the officer who had insulted him. Upon taking his departure he left a message, couched in very hostile language, for the offending Spaniard. On reaching shore Decatur made a thorough search for him, being determined to call him to account. The officer kept under cover until the Spanish captain-general took a hand in the affair, and with the aid of Captain Bainbridge prevented a duel.

In the summer of 1802 Decatur was promoted to first lieutenant and was assigned to duty on the frigate New York, commanded by Barron, who had risen to a captaincy. The ship sailed for the Mediterranean, cruising in that sea for several months.

When war was declared against the Algerian pirates, who were raiding American merchant vessels and demanding large sums of money for immunity, which the United States refused to pay although other nations "came across" with the required tribute and thus bought the freedom of the Mediterranean, Decatur was given command of a brig and sailed to join the fleet at the scene of trouble.

It was in the harbor of Tripoli that Decatur engaged in a most perilous adventure that made him world-famous and caused his name to be duelibly written in the annals of brave deeds.

The frigate Philadelphia, running on a rock while in pursuit of a pirate vessel, was captured by the enemy, and Capt. William Bainbridge and the entire crew were taken prisoners. Captain Bainbridge managed to send from his prison an apparently insignificant letter to Commodore Preble in the harbor of Syracuse, and Preble, suspecting that it concealed a matter of importance, held it against the flame of a candle which disclosed a message written in lemon juice.

Captain Bainbridge suggested that a party of men, under trusty officers, be sent into the harbor of Tripoli and either retake, or burn, or blow up the Philadelphia, which the pirates had refloated, repaired, and manned for action.

Commodore Preble promptly acted on the suggestion and issued a call for volunteers. Decatur and other valorous officers at once offered to lead a party and carry out the plan of attack. Decatur, however, was given the command owing to his priority, and with seventy-five volunteers on his ship, the Siren, embarked in a fifty-ton ketch for the harbor of Tripoli. This little vessel had been captured from the Tripolitans a few weeks previously by Decatur and had been renamed the Intrepid. With her Intrepid crew she proved true to her name. She carried a large supply of combustibles, explosives, and cutlasses.

Under cover of the night of February 16, 1804, the Intrepid was rowed directly to the Philadelphia and made fast. Decatur gave the order to board the vessel, and his men climbed to the deck. The Tripolitans were taken completely by surprise and were mowed down, one after the other, by the Americans with their cutlasses. The onslaught was terrific and merciless. More than twenty Tripolitans were killed at the first attack. Seeing resistance useless, some of the survivors jumped overboard and were drowned or killed by the Siren's boat crew, who had followed in the wake of the Intrepid. Others hid in the dark recesses of the ship. The capture of the Philadelphia was accomplished in ten minutes, and in less than half an hour she was a mass of flames.

Decatur and his band of heroes escaped amid a shower of shot and shell from the shore batteries and returned to Syracuse harbor two days after their audacious exploit. Not one of the fearless adventurers was killed or wounded. Nelson, the distinguished English naval commander, declared it the most daring act of the age. Upon receiving Commodore Preble's report and recommendations congress rewarded Decatur with a sword and a captain's commission.

Six months after the destruction of the Philadelphia Decatur, in command of a fleet of gunboats, began a series of five attacks on the Tripoli harbor and batteries. One of the gunboats, in command of Decatur's brother, Lieut. James Decatur, engaged in a battle with a pirate craft whose commander surrendered. As the lieutenant was about to take possession the treacherous Tripolitan captain shot him in the head, and he fell back into his boat dead. Taking advantage of the stunning surprise and excitement of the Americans the corsair rowed rapidly away.

Captain Decatur, on hearing of what had happened, gave chase and soon overhauled the fugitive boat. He climbed on board with ten men and singled out the murderer of his brother. He was a gigantic Turk, but undaunted by his size and defiant attitude, Decatur attacked him with all the vigor at his command and succeeded in killing him. Thus did he quickly avenge the murder of his brother, a bright young man, whom he dearly loved.

Following the Tripoli battles Decatur was placed in command of the frigate Constitution, which became famous as "Old Ironsides," and is being carefully preserved as a glorious memorial of the pioneer navy. The next year Decatur sailed for home, and in 1808 was promoted to commodore and assigned to the frigate United States as his flagship, on which he had made his initial cruise in the service of his country.

In the War of 1812 Commodore Decatur captured the British warship Macedonia after a most desperate battle, and for this brilliant victory congress presented him with a gold medal. In 1815, when in command of the President, he encountered the Endymion off Long Island and a fierce fight followed. His men fell thick and fast—killed and wounded; his ship's spars and rigging were shot to pieces; the vessel was almost dismantled; finally her battery was silenced. The Endymion, virtually defeated, dropped out of action when other British vessels came up and prepared to put an end to the President by opening fire. Seeing that further fighting was suicidal, Commodore Decatur surrendered to the British squadron—not to the Endymion, which had been severely punished. He handed his sword to Commodore Hayes who returned it at once as a token of his appreciation of the gallant fight that the President's commander had made. Decatur was paroled on the arrival of the British squadron at the Bermudas and was sent home. A court of inquiry instead of criticising Decatur praised him and his officers and crew, the verdict being they were worthy of the highest commendation.

Five days after the peace with England was announced the United States declared war against the bey of Algiers, whose pirates had captured an American merchant ship, the Edwin, and sold the crew as slaves.

In two fiercely contested battles with the enemy's navy, whose squadron outnumbered the American fleet, Decatur captured two of the best Algerian vessels, and at once headed for the harbor of Algiers with the intention of attacking the shore fortifications. When the fleet came in sight a messenger with a flag of truce invited Decatur to come ashore to consider a treaty. He refused and insisted that a treaty, in compliance with his demands, should be immediately signed. In less than three hours it was "signed, sealed and delivered," and the American prisoners, together with $10,000 indemnity for the capture of the Edwin and her cargo, were immediately handed over.

A few weeks later the fleet sailed for Tripoli and Tunis, both having violated their treaties and obligations of neutrality. They quickly complied with the terms dictated by Decatur, who received the acclaim of all Europe for breaking up the piracy that has been so boldly carried on by the Barbary states.

Soon after Decatur's return to the United States he was appointed a member of the board of navy commissioners, his colleagues being Commodores Rodgers and Porter. It was at this time that the real trouble between Barron and Decatur originated.

In 1807 Barron was in command of the Chesapeake when she was ordered to heave to by the British man-of-war Leopard to be searched for deserters, the English claiming the right of search although there was no treaty to that effect. Barron refused the demand, but made the mistake of not getting ready for action. The Leopard fired a broadside and continued firing for ten or fifteen minutes. Twenty-two shots struck the Chesapeake, killing or wounding twenty-one members of the crew. Barron himself was wounded. The Chesapeake, owing to unpreparedness and confusion, was unable to fire more than one shot, when Barron lowered his flag. Four men, charged with being English deserters, were taken over to the Leopard, which then sailed away.

Barron was brought before a court of inquiry, of which Decatur was a member. Although the court found Barron only partially to blame for the surrender of his vessel, it sentenced him to five years' suspension. The finding as to Barron's personal conduct virtually acquitted him of cowardice in these words: "No transposition of the specifications, or any other modification of the charges themselves, will alter the opinion of the court as to the firmness and courage of the accused, the evidence being clear and satisfactory."

His sentence expired five months after the breaking out of the War of 1812, but Barron, who was in Europe, did not return to the United States until after the declaration of peace. He then decided to apply for reinstatement, but when his petition came before the commissioners Decatur refused to recommend favorable action. The principal ground of his objection was that Barron had not returned to take part in the war.

Barron, who was reinstated, took exception to certain remarks made by Decatur, who refused to retract but did everything in his power to restore the friendly feeling that had existed between them. A long correspondence followed, but Decatur stood firm. In his replies to Barron's letters he persistently denied that he bore any animosity against him. "Between you and me," Decatur wrote, "there never has been any personal difference, but I have entertained, and do still entertain, the opinion that your conduct as an officer, since the affair of the Chesapeake, has been such as ought to forever bar your readmission to the service."

This stinging rebuke sank deep into the heart of Barron, who finally challenged Decatur. They met on March 22, 1820, at Bladensburg. This small village, in the immediate vicinity of Washington, was the scene of the battle between the Americans and the British in 1814, and became a famous dueling ground. Capt. Jesse Elliott acted as second for Barron and Commodore Bainbridge seconded Decatur. Just before the duel Barron said to Decatur that he hoped to meet him in the next world, and to be better friends than they had been in this. "I have never been your enemy," replied Decatur.

The two men took their stations at eight paces, the distance being shortened two paces owing to the fact that Barron was somewhat nearsighted. At the exchange of shots both were wounded in the right hip. Decatur is reported to have forgiven Barron, but he said that he could not forgive those who had urged him to take his life. "Would to God you had said this yesterday," replied Barron. Decatur died within a few hours and was deeply mourned by the entire nation. Unswerving loyalty to his country was the outstanding principle of his life. It was Decatur who gave utterance to the famous sentiment: "My country—may she ever be right, but, right or wrong, my country!"

Barron soon recovered, and became senior officer of the navy in 1830, but never again was in active service. He lived to be eighty-two years of age, but never fully won back the respect of the public which he had once held.

How to Control Rats Is Problem

Temporary Measures Include Use of Poisons, Traps and Gases.

(Prepared by the United States Department of Agriculture.)

Rats cause losses amounting to not less than $200,000,000 each year in the United States, according to the biological survey of the United States Department of Agriculture. This enormous damage occurs in homes, stores and factories, and to a large extent on farms.

Temporary Measures.

Temporary measures of rat control include the use of poisons, traps and deadly gases. These devices merely eliminate the animals for a short time and do not in any way prevent others from reinfesting premises. Nevertheless, temporary measures are the first consideration in dealing with the rat problem. Permanent control consists primarily in depriving rats of one or both their necessities of life—food and shelter. Attention to such community rat-breeding places as garbage dumps and city abattoirs will keep down the rat population. Every community interested in preventing disease epidemics that may possibly be spread by rats should make it a point to provide for proper maintenance of dumps and similar places for garbage and refuse disposal. Changes in the construction of buildings can be effected to make them rat proof, and building codes of cities and towns can require rat-proof construction.

Effective Poisons.

Barium carbonate and red squill are effective poisons for the temporary eradication of rats. Barium carbonate has neither taste nor odor. It is mixed with various foods and, if prepared as recommended, is usually effective. Red squill has an advantage in being relatively harmless to animals other than rats. If taken accidentally by cats or dogs it acts as a powerful emetic and is thus eliminated. A small quantity of red squill will kill a rat, however, and it is therefore an ideal poison for use on farms and in many places in towns or cities where there may be danger of poisoning beneficial animals.

Calcium-cyanide fumigant has been widely and effectively used to kill rats that live in burrows in the ground, under concrete, or in other inaccessible places. It comes in powder form and is applied with a duster or blower. When the dust comes in contact with air it forms a poisonous gas. Calcium cyanide is a deadly poison and should be kept out of reach of children, irresponsible persons, and live stock.

Feeding Milk to Laying Stock Increases Yield

Liberal feeding of milk to laying stock will help to increase the egg yield and improve the quality and size of the eggs. Fertility and hatchability of the eggs will likewise be improved.

Milk feeding helps to keep fowls healthy and to prevent disease. In 1904-05 Dr. Louis Dechmann demonstrated that the mineral content of eggs could be increased, and made more desirable from a medical viewpoint by feeding the desired minerals in finely triturated form, mixed with milk curd, to the laying fowls. W. McA. Johnson, chemist and metallurgist, has also pointed out that the rare mineral content of eggs may be enhanced by feeding the fowls finely powdered minerals rubbed up in warm fresh milk and in milk curd. Also, he states, as Doctor Dechmann claimed, that "medicated eggs" are possible and that we may expect them soon.

In experimental work in feeding minerals to growing chicks, milk, milk curd, and milk powder have proved the best mediums for feeding the powdered minerals. So milk and milk products not only help keep poultry healthy and productive, but may be the means of introducing medicinal elements into eggs which, in a very agreeable manner of administration, may help to prevent or cure disease and keep human beings in good health.

Agricultural Notes

Something is wrong if young chicks are not active.

* * *

Gardening keeps down the cost of living on the farm. It's no longer just a job.

* * *

Liquid skim milk is recommended for young chicks in place of water during the first week.

* * *

Carbolineum, cresote, or crude carbolic acid make the best spray material to use in poultry houses to keep down red mites.

* * *

It is better to feed silage to dairy cows once a day over a longer period than to feed it twice a day for a shorter time if no other succulent feed can be had.

* * *

To disinfect a brooder house, scrub the floor and side walls with a strong solution of hot lye (one pound of lye to 40 gallons of water), using a stiff broom. When the floor and walls are dry, drench them with a strong disinfectant—3 per cent creolin or lysol. Treat the fixtures in the same manner.

ORCHARD GLEANINGS

BEST ARRANGEMENT OF HOME ORCHARD

Members of the horticulture class on Fruit Gardening day at University Farm, St. Paul, Minn., were told by A. N. Wilcox of the station staff that enough fruit, if properly cared for, can be produced on a half acre to supply a family of six or seven persons. There should be nine apple trees of seven different varieties set 25 to 35 feet apart, he said, and he recommended one Duchess, the standard early apple especially good for cooking; two Wealthies, the standard fall apple; two McIntosh, early winter apple of the highest quality for eating; one Fameuse, the old Snow apple; one Patten's Greening, a long keeper, and one Haralson, a red apple which will keep all winter.

Crab apples recommended for this model home orchard were the Dolgo, and either the Whitney or the Hyslop. The Dolgo is especially desirable for its jelly-making qualities, as well as for its hardiness, freedom from disease, and its appearance. Whitney and Hyslop are grown for pickling, and Whitney has the additional quality of edibility out of hand.

Plum trees should be planted 16 to 20 feet apart and should include the Underwood, Tonka, Monitor, Elliott, La Crescent, Red Wing and Waneta. These varieties will furnish fruit through a long season. The Elliott will keep longer after it is picked than any other variety. The La Crescent is a yellow plum of very high quality. The plum-cherry hybrids, which are excellent for cooking, should be planted 8 to 12 feet apart. The Zumbra and Nicollet, the latter a good substitute for the sour cherry of Eastern and Southern localities, should be grown.

Four grapevines, two each of Beta and Hungarian, should be planted. For the currant patch 12 plants of Perfection or of the new Minnesota No. 24, when it is ready, were recommended. The home orchard should also have a half dozen gooseberry bushes and 75 Latham raspberry plants. The strawberry bed should be renovated and new plants set out every year. Three hundred plants of such varieties as Premier, Chaska or Dunlap will usually keep the family well supplied.

Control Cherry Maggot by Timely Poison Spray

Cherry maggot may readily be controlled by a timely application of a poison spray, according to the New York agricultural experiment station. The first application should be made to Early Richmonds at about the time the cherries show red on one side, and the second should be applied when Montmorencys show red.

The spray mixture for sour cherries should consist of lime-sulphur two and one-half gallons, arsenate of lead two and one-half pounds and water to make 100 gallons. For sweet cherries, two gallons of lime-sulphur should be used. A 90-10 sulphur-lead-arsenate dust has also given a fair degree of control where foliage and fruit were kept well covered by repeated dusting after heavy rains.

Other helpful measures consist in the use of quick-acting contact insecticides, such as nicotine sulphate; early picking of the entire crop; orchard cultivation to destroy the pupae or resting stage of the maggot; and the removal of crop remains of all kinds. Principal reliance, however, should be placed on the arsenical sprays.

A circular giving fuller details on this question may be obtained from the New York agricultural experiment station, Geneva, N. Y.

Bacterial Spot Common Disease of Peach Tree

Bacterial spot is a common disease of the peach in Illinois, New York, Ohio, and in the southern counties of New Jersey. Infected specimens of the fruit show all the way from a few to a hundred or more rather inconspicuous brownish depressions about the size of a pinhead or larger. The skin at the center of most of these spots is broken in a short, straight or star-shaped crack. In severe infections, the spots run together, the cracks forming a more or less continuous network over the peach, says the Farm Journal.

Sprays and dusts generally used for peaches do not satisfactorily control the disease. In Illinois, spraying with sodium silico-fluoride has given good control without injuring the trees, but this spray is still in the experimental stage.

In Illinois it has been found that the J. T. Hale, Elberta, Carman and Champion are more susceptible to the disease than Hiley, Belle of Georgia, Fox and Early Crawford.

Supplement Spraying

The advisability and necessity of supplementing spraying with other measures of control, such as banding, picking off and destroying wormy apples during the season, and sanitation about packing houses, is readily apparent in those districts where experience has shown the codling moth normally to thrive in abundance. There is great need of discovering some method of control that may be used as a substitute for spraying with lead arsenate.

REFORMED S. S. PICNIC DREW A LARGE CROWD

The Sunday School picnic and program at the Reformed Church park last Friday was well attended and everybody enjoyed a good time.

The program given by the children began at about 10:15 o'clock. The picnic was given in honor of the 67 children who atended the Bible School, the age of the pupils ranging from first graders to high school students.

The program consisted of songs, and various kinds of Bible contests. Every phase of the program showed excellent training and Rev. Grossheusch, asisted by Miss Edith Haupt are to be congratulated on the fine work they have accomplished in the Summer Bible School.

At the noon hour, following the program, a great picnic dinner was served in cafeteria style. And when the long line of people had heaped high their plates with fine food, there was still plenty of every thing for another large crowd. The ladies of the Reformed Church are noted cooks, that's sure.

Because of lack of time this week on acount of the Fourth, the Times will delay until next week the list of pupils and the awards they received, this information to be published next week.

Entertained Company Of Twenty Sunday

Mr. and Mrs. Emil Patet entertained about twenty relatives at their home Sunday, both for dinner and supper, the event being a sort of family re-union of Mr. Patet's relatives. Two weeks ago a like gathering of Mrs. Patet's relatives were entertained at their home. The guests present Sunday were: Mr. and Mrs. Lloyd Sawyer and family, of Algona; Mrs. Ahrens, of Algona; Mr. and Mrs. Victor Waldek, Hayfield; Mr. and Mrs. Julius Meyer, Lilly, Letha and Lila, of Hayfield; Mrs. John Lackore and Alvin, Irene and Viola, of Forest City, and Kenneth Patet, who came with them. A good time was enjoyed by all.

NOTICE

In accordance with Chapter 318, Code of Iowa, 1927, and Ordinance No. 8 of the Town of Klemme, Iowa, all able bodied male residents of the Town of Klemme, Iowa, between the ages of 21 and 45, shall, between the First day of February and the First day of October of each year, and within fifteen days after receipt of notice of demand therefor, from the Town Clerk, pay in money to the Town Clerk as Road Poll Tax, the sum of Five Dollars ($5.00).

In the event said tax is paid prior to the First day of August following publication of this notice, One Dollar ($1.00) shall be deducted from such tax.

A. J. KUDJE, Town Clerk.

All Poll Tax will be collected by Marshall A. E. Finn or Town Clerk A. J. Kudje.

4-H CLUB MEETS

The 4-H Club of Ell Township held their regular meeting July 2 at the home of the Hampel girls. Fourteen girls were present. Helpful talks were given by Luella Goll and Ethel Barz. The girls planned a program they are to give at the Farm Bureau meeting at Cornelius Wille's home Thursday evening, July 12th. The Club will sell cake and ice cream. Everyone is welcome After adjourning delicious refreshments were served by the hostesses. The next meeting will be held at the home of Norma Wille, July 5th.

WISE WORDS

Speech is power.—Emerson.

There's no success without faith.

The best policy is a paid-up one.

The truth of truths is love.—Bailey

You must think you can, before you can.

Statistics do not tell the whole truth.

Biggest leak of a foolish mind is the tongue.

Dog barking never annoys the owner of the dog.

Some fools and their money are difficult to separate.

An outward laugh sometimes conceals an inward groan.

If one loves his friend thoroughly he will laugh at his jokes.

Average man is to be encouraged in trying to excel the average.

No man is able to see all the sides of even the simplest question.

Farmers don't much believe in smoking. Too many inflammable barns.

Waiting for something to turn up is one of the greatest obstacles to success.

Solomon had an experience that was enough to inspire him to write proverbs.

When you can't get yourself in a cheerful mood any other way, turn to the funny page.

If a man can remember two or three hymns of his boyhood and sing them, he thinks he is pious.

Where one man has been ruined by his enemies hundreds have been ruined by their friends.

Seek Specific Name for the Boy Friend

"She's my girl," is carroled by every male human heart when in love, but the girls themselves have never agreed upon what "he" is to them. Some 20 names "he" has given are listed by a writer in the Survey, ranging from the romantic but discarded "beau" to the modern "steady" "cutie," "sheik," "date," and even "boy friend." The writer, Eleanor Rowland Wembridge, makes a plea for the world to get busy and find a noble name to denote the attendant male person—a word free from self-conscious personalities, one not too humorous, apologetic, romantic, rude, rustic or in any way specific, yet one applicable "equally to Zeke the baggageman or the prince of Wales." How about it, girls? What is he to be?

Klemme News

Miss Leona Poort, of Sac City, has been visiting Klemme friends for the past two weeks, returning home last Thursday. Mr. Poort and daughter, Lenora, drove her to Fort Dodge, where Mr. and Mrs. Poort met her and took her home.

E. F. Jacobs has installed a big revolving nail rack in his store. The new outfit conserves space and enables Ed and the force to dish out rush orders on anything from shingle nails to bridge spikes.

Mr. and Mrs. Tony Ahrenkeil and son, Taalkeus, of Goodell, Mr. and Mrs. Casey Blank of Reinbeck, and Mrs. Ralph Blank, son and daughter, of Estherville, all spent the Fourth at the T. Blank home.

Today is the 66th birthday anniversary of Mrs. Anna Baack and in honor of the event her daughter, Mrs Martin Brinkman has invited in Mrs. Baack's children and their families to spend the evening with her.

Mr. and Mrs. Frank Gruetzmacher entertained the following at their home the evening of July 4th and treated them to home made ice cream and cake: Will Stille and family, J E. Stille and family, Mrs H. Schuldt and Mrs. G. Haefner.

Mr and Mrs. Fred Barz and daughter, Betty, accompanied by Mrs. Ella Tamke and daughter, Verna, of Valley City, North Dakota, drove in Monday evening for a visit with the Barz relatives and friends in this community.

Mr. and Mrs. Frank Kluckohn, Kenneth, Franklin and Carmen, and Vernon Turgasen drove to Traer, Sunday morning for a visit with the W C. Keraus family Monday they drove to Waterloo on business and returned that evening.

The Fourth this year did not look like a very promising day for a big celebration as it rained nearly all morning. However the weather cleared off at noon and the afternoon was ideal. Many enjoyed family gatherings and picnic at near by lakes in the afternoon and evening.

Mr and Mrs. C. G. Waterman and Marion, Mrs. Mary Waterman, Mr. and Mrs. R. A. Jorgenson and son Buster, and Mrs C. F. Keraus were all royally entertained at a dinner Sunday at the T. F. Mitchell home at Swea City.

Tuesday evening Mr. and Mrs. Henry Barz entertained the following. Grandma Schroeder, Mrs. Martin Croner and Dorothy; Albert Barz and family, Fred Barz and family and the following from Valley City, N. D., Fred Barz and family and Mrs. Tamke and daughter.

Art Wellemeyer was breezing around this morning and our inquiring reporter asked whither he was bound. "To Estherville," says Art, "and on business." Inquiring the nature of the mission Art said, "Just Monkey Business!" And perhaps Art is starting a zoo, who can tell?

This morning the Barz "tribe" all drove to West Bend to view the Grotto and enjoy a family picnic Those in the crowd were: Mr. and Mrs. Albert Barz and children; Mr and Mrs Henry Barz and children; Lena Schroeder; Max Barz, Grandma Schroeder, Mrs. Martin Croner and Dorothy, all of Klemme; and Will Barz and family of Garner and Mr and Mrs Fred Barz and family and Mrs Tamke and daughter, of Valley City, North Dakota

Mr and Mrs Cornelius Willie entertained quite a number at their farm home the evening of July 4th for a picnic supper Those present were Carl Wille and family, Mr. and Mrs. Paul Goll, Werner Schlawin and family, Fred Bell and family, G A. Goll and family, H. H. Thieman and family, Lew Griffen and family, and Mr. and Mrs. Wm. Schlawin All brought along their fireworks and quite a display was put on in the evening.

Rev. and Mrs. Calvin Grosshuesch and children left early Monday morning for Meno, South Dakota, in the new family Ford Coach. The trip takes them to Mrs. Grosshuesch's home where they will visit until the latter part of the week Miss Adella Kuhlmann, sister of Mrs. Grosshuesch, and little Gertrude Grosshuesch have been visiting at Meno for a week. Their plans are to return to Klemme with the Grosshuesch family.

Henry Suckow, Jr is about the only one we have heard of around here who had a July 4th accident and his was not caused by firecrackers, but by his trusty old gas buggy Henry was going east on the pavement about a mile and a half from Garner when his Ford roadster became kittish and went through a few stunts immitating a sky rocket. When the stunts were over he car reposed on its top and Henry was cooped up inside until passing cars stopped to release him from his precarious perch. Aside from a few bruises H. L. is quite O K. and the Ford can be easily repaired.

The Central States Electric Co. last week installed Frigidaire electric refrigerators in the C. A. Larsen and A. D. Gimer homes. Mr. and Mrs Wm Smith have purchased an electric range. We believe Klemme is the most up to date town for its size in the state in the matter of home conveniences. There are now at least six electric regrigerators in town and a score of electric ranges, to say nothing of all the other electric devices installed in practically every home.

WANTED—To rent, or if price is reasonable, to buy a good piano. Inquire at Times Office. 1tc

Ye Editor and family are enjoying a beautiful bouquet of roses on our table which came from Mrs. Anna Baack's flower garden. She is a lover of all flowers and has about every kind imaginable; always some in bloom from early spring to late fall Mrs. Baack has over eleven different varieties of roses, and in one flower bed has fifteen different colors of geraniums. If you want good, reliable information on growing flowers, don't bother about asking Henry Field or Earl May—why not see Mrs. Baack.

John Day and family were certainly agreeably surprised Sunday evening upon returning home from a picnic to find that John's brother, Morris Day, accompanied by George Schroper (another former Klemme man) were awaiting them. Needless to say that all sat up nearly all the rest of the night talking over old times and visiting, as the men were starting next morning to drive to their home at Mt. Plier, Idaho They had been at other points for a visit and stopped here on the return trip Both men are railroad engineers and are well known to many residents of this vicinity.

Avery-Twin Lakes News

(Special Times Reporter)

Bennie Beek is assisting with the work at the Edwin Josten farm.

Miss Anna Trampel spent Sunday afternoon with Florence Swalve.

Owen Neuhring attended a school meeting on Monday morning.

Mr and Mrs. Max Dietrich are the proud parents of a baby girl born last week Friday.

Mrs. David Schwichtenberg was a caller at the Dick Swalve home on Monday morning.

Mr and Mrs. Edwin Josten were visiting at the Alfred Schlei home Sunday afternoon.

Doc. Anderson was a business caller at the Carl Wille farm Monday.

Mr. and Mrs. Hio Harberts and daughter, Esther, spent last Sunday afternoon at the Geo. Albers home.

Ronald Tandy and Edmund Josten drove to Ames Sunday last, returning the same day.

Mr. and Mrs. Albert Etchem and family spent Sunday at the George Platt home.

Mr. and Mrs. Elmer Schlei and son, Dale, visited with Mrs Schlei's mother and sister, Sunday.

Mr. and Mrs. Herman Priebe visited at the Gilbert Schaper home Sunday afternoon.

Melvin Buseman spent a few days at the Henry Buseman home the past week.

Mr. and Mrs. Edwin Josten and Bennie Beek visited at the Fred Becker home Sunday evening.

Mr. and Mrs. Henry Buseman and sons were visiting at the Tom Roths home Friday evening.

Mr. and Mrs. Dick Swalve and family and Anna Trampel spent Sunday evening at the Geo. Albers home.

Mr. and Mrs. Herman Bruns and family and Mr. and Mrs. Adolph Schlichting and family spent Sunday afternoon at the Dick Swalve home.

FARM BUREAU WILL MEET THURSDAY EVENING

The regular meeting of the Elk Township Farm Bureau will be held on the lawn at the home of C. J. Wille on Thursday evening, July 12. A program has been arranged. Ice cream and cake will be served by the 4-H Club Girls. A small charge will be made. Everybody invited.

BANKERS PROVIDE STUDENT LOANS

American Bankers Association Completes Plan to Award 167 College Economic Scholarships Throughout Nation.

AWARDS TO START THIS FALL

Students in Agricultural Economics to Be Helped in Farm States—Will Also Facilitate Entry Into Business Life.

One hundred and sixty-seven collegiate loan scholarships will be provided by the American Bankers Association, 98 of which are now being proffered to 71 selected colleges and universities in 34 states, it has been announced by John H. Puelicher, Chairman of the Board of Trustees of the Association's Foundation for Education in Economics. The foundation fund of $500,000 was started in 1925 to commemorate the Association's fiftieth anniversary and its aim is to stimulate and aid worthy men or women students to pursue courses in banking and economics in collegiate institutions throughout the country.

The scholarship awards will be available for the scholastic year beginning this fall and will provide recipients with unit loans of $250, to be repaid on easy terms following their entry into earning business life. In several farm states, it is provided, scholarships shall be specifically awarded in agricultural economics.

A special feature of the plan in addition to its educational advantages is that scholars, upon discharge of all their financial obligations connected with their loans, will be given certificates of honorary membership in the foundation signed by the members of the board of trustees, which will be available as evidence of financial reliability for their use in starting their business careers.

Colleges Awarded Scholarships

Proffers of one or more scholarships have been made to the following institutions:

Alabama, University of Alabama, Birmingham-Southern College, Arizona, University of Arizona, Arkansas, University of Arkansas, California, University of California, University of Southern California, Stanford University, Connecticut, Wesleyan University, Yale University, Delaware, University of Delaware, District of Columbia, George Washington University, Georgetown University, Florida, University of Florida University of Miami, Hawaiian Islands, University of Hawaii, Idaho, University of Idaho, Illinois, University of Illinois University of Chicago, Knox College, Northwestern University, Kansas, University of Kansas, Kansas State Agricultural College, Washburn College, Louisiana, Louisiana State University, Tulane University; Maryland, Johns Hopkins University, University of Maryland, Michigan, University of Detroit, University of Michigan, Michigan Agricultural College, Minnesota, Carlton College, University of Minnesota, Hamline University; Mississippi, University of Mississippi; Montana, State University of Montana; Nebraska, University of Nebraska, Doane College, Nevada, State University of Nevada, New Jersey, Princeton University, Rutgers University, New Mexico, New Mexico College of Agricultural and Mechanical Arts, North Carolina, University of North Carolina, North Carolina State College of Agriculture and Engineering, Oregon, University of Oregon, Oregon State Agricultural College, Pennsylvania, University of Pennsylvania, Dickinson College, Lafayette College, Gettysburg College, Franklin and Marshal College, Allegheny College, University of Pittsburgh, Lehigh University, Swarthmore College, Pennsylvania State College; Rhode Island, Brown University; South Dakota, University of South Dakota; Tennessee, University of Tennessee, University of Chattanooga Vanderbilt University, Utah, University of Utah; Vermont, University of Vermont, Virginia, University of Virginia, Washington and Lee University, University of Richmond, William and Mary College; Washington, University of Washington, State College of Washington, West Virginia, West Virginia University; Wisconsin, University of Wisconsin, Lawrence College, Beloit College.

Plan of Operation

The general plan allots scholarships to higher institutions of learning in states where the banks have completed the subscription quotas assigned them in the foundation fund.

Institutions are selected on the basis of type of school, educational standards, geographical distribution and desire to co-operate in the plan. A scholarship committee is to be created in each selected institution, to consist of members of the faculty and a prominent banker. All scholarship applications must be mado formally through the college committees and not direct to the foundation. Three home-town references are required of each applicant, at least one of whom must be a banker. Only students of junior or higher grade in banking and economic courses are eligible and those who have also attended American Institute of Banking courses will be given preference.

Easy Terms

Scholarship payments will be given only to those whose means of education are dependent in whole or part upon their own efforts and will continue only during satisfactory scholastic standing or conduct. The loans are at five per cent beginning the first day of the second January after the date the scholar leaves school, with no interest on repayment made prior to that time. Loans may be paid off in monthly installments of $10 or more. After three installments have been promptly met payments may be placed on a quarterly basis until the loan is wiped out which must occur within three years. In cases of delinquencies, consideration will be given to special circumstances, such as ill health or unavoidable unemployment.

STRAIGHT TALKS WITH AUNT EMMY

ON BUILDING AN INCOME

As Aunt Emmy came out of the savings bank she met young George Oliver.

"Well, well," he said, "it's funny to see you coming out of a savings bank, Aunt Emmy. I thought only poor folks like me had money in savings banks—people like you just clip coupons!"

"Have you a savings bank account?" countered Aunt Emmy.

"Well, er—I suppose I haven't," he admitted. "You see, it's hard to save money when you're first married Somehow there never seems to be enough money to go 'round—let alone to put in a savings bank."

"You never will have if you don't get started," interrupted Aunt Emmy "You should make your weekly savings deposit, no matter how small, the first claim on your salary after paying your bills. I make my weekly deposit in this bank faithfully—I put away a certain sum regularly."

"You can!" Nat commented.

"It is more a habit than you would suppose," Aunt Emmy continued "Any one can do it who is willing to let other things wait. I began putting a little money in a savings bank years ago when it was no joke to save a few pennies. I remember what a wonderful thrill I got the first time I saw my interest entered in my bank book There was money that my money had earned all by itself After that it was a sort of game with me to put a certain sum in the bank, even if I had to do without things I would have enjoyed having. Now I realize what it means to keep your money busy earning all the time so I continue to put a little in the savings bank regularly and, after it accumulates, I draw some out and invest in safe securities that pay a higher rate of interest than savings All the time, you see, the money is working for me.

"Of course, when the sum is small, it earns little, but if you start young, as you and Molly are, it is almost like magic the way it mounts up after a few years—then when your savings get grown up into a real investment they earn a real income."

"I never thought of it in that light," said George.

"Try it—and see for yourself how it works," urged Aunt Emmy. "Have you ever thought how nice it would be to have a few dollars ready for use in case of an emergency? Accidents and illnesses do happen. Or suppose you had an opportunity to buy something you knew you could sell at a profit and you had to let the opportunity slip for the lack of a few hundred dollars. You and Molly would never miss five dollars a week—and if you keep at it, it will work wonders!"

"You're right, it would!" exclaimed George. "I'll talk to Molly tonight, Aunt Emmy, and see if we can't revise our expenditures."

"There would be a whole lot less family trouble and worry over money matters if every young couple did the same thing early in life," Aunt Emmy said. "'Start young,' is the magic slogan."

BANKERS PROMOTE FARM CONTESTS

Standard methods of farm administration have been made the basis of a contest by bankers of Pickens County, Alabama, as a method of bringing a farm and home program to their patrons, says the bulletin of the Agricultural Commission, American Bankers Association. A safe and profitable farm community is the goal in this work.

The farm and home program has been outlined as follows:

Standard Farm Scorecard

Total Net Income:		
Per plow	15 points	
Per worker	15 "	
		30 points
Total Diversified Income:		
Cotton	4 points	
Corn	2 "	
Poultry	2 "	
Hogs	2 "	
Cows	2 "	
Garden produce	2 "	
Dairy products	2 "	
Fruit and melons	2 "	
Miscellaneous	2 "	
		20 points
Soil Building:		
Legume crops	8 points	
Rotation of crops	8 "	
Fertilizer	4 "	
		20 points
Farm Supplies:		
Food for stock	5 points	
Food for workers	5 "	
		10 points
Business Ability:		
Farm management	4 points	
Records	3 "	
Investments	3 "	
		10 points
Home Efficiency:		
Conveniences	5 points	
Appearance	5 "	
		10 points
Grand Total		100 points

A booklet explains the contest to the bank patron and urges him to enter by securing a record book from his bank. The winner for the entire county receivos a grand prize of $100. The county is divided into districts with $75 and $50 prizes for each district.

FORAGE NEEDED IN FATTENING SWINE

Growing and fattening hogs in the summer cannot be economically done without the use of some good forage or pasture, in the opinion of J. W. Wuichet, animal husbandry specialist with the Ohio State university extension service. "An actual saving of from 15 to 25 per cent or more of the total amount of grain and protein supplements may be expected through the use of good forage, especially legumes. The economy of pork production through the summer will depend upon the substitution as far as practicable of forage crops for other feeds," ys Wuichet.

"Greatest net returns will be secured when grain is fed in addition to forage at the rate of two to four pounds of grain for each 100 pounds live weight of the hogs. When the grain feed is limited on pasture, less grain will be required to produce 100 pounds of grain, but more pasture will be required, and the time necessary to produce the gains will be longer When all factors are considered, it is doubtful whether it pays to limit the grain very much even when good pasture is available. The hog which is gaining the most rapidly is generally doing it the most economically, regardless of the amount of feed required to make the more rapid gains.

"It is frequently maintained that it pays to carry spring pigs over the summer largely on grass, and then feed them off on new corn in the fall. However, the price of hogs normally drops very rapidly at about the time new corn is available, and the extra care and feeding over the longer period, plus the lower price received, usually more than offsets the cheaper feed."

Cottonseed Meal Alone Is Unsatisfactory Feed

From the standpoint of rapidity and economy of gains, cottonseed meal alone is unsatisfactory as a protein supplement to corn when fed to hogs having free access to alfalfa hay, experiments at the Kansas agricultural experiment station indicate. However, cottonseed meal plus bonemeal, which is rich in lime and phosphorus, proved satisfactory as a protein substitute for tankage when fed under the same conditions.

A series of tests were made in winter and summer to compare tankage and cottonseed meal. The basis of each ration was corn and alfalfa hay in winter, corn and alfalfa pasture in summer. Finely ground limestone was used in the ration of one lot of pigs instead of the bonemeal in an effort to make the cottonseed meal equal to tankage, but its use was not justified by the results.

The most economical of five different rations used on pigs fattened in winter was corn, alfalfa hay, cottonseed meal and bonemeal. The gains under this ration were made at a cost of $6.17 per 100 pounds. Under the standard ration of corn, alfalfa hay, and tankage, the gains cost $6.30 per 100 pounds.

Accuracy of Scales in Weighing Heavier Loads

Scales should be tested periodically with standard test weights to the capacity at which they are commonly used, says the United States Department of Agriculture in a revision of scale instructions recently prepared by the packers and stockyards division and sent to stockyards coming under the supervision of the packers and stockyards act and to scale-testing agencies. The accuracy of scales in weighing heavy loads cannot be safely established, say the instructions, from tests made at lighter loads. It is recommended that the bulk of the test load consist of 1,000-pound weights. These weights are usually handled with simple mechanical devices.

Protein Supplement for Hogs "Hogging" Off Corn

It will usually pay to feed hogs a protein supplement or protein supplemental mixture while they are hogging off corn. Such a protein supplemental feed, as tankage alone, or any good protein supplemental mixture, can be self-fed or perhaps preferably fed at the rate of about one-fourth of a pound of the protein supplement per pig per day. It is also desirable to have a mineral mixture, such as a mixture of 40 per cent animal feed bone meal, 40 per cent finely ground limestone, and 20 per cent salt before pigs that are hogging off corn, though it is not so essential that a mineral mixture be provided for pigs pasturing corn as for pigs being fed in a dry lot.

Rape for Shotes

An acre of rape will carry between 15 and 20 shotes. When a patch is pastured heavily, it will freshen up if the pigs are taken out for a few days. Several small patches sowed ten days apart in the spring and then pastured in rotation will provide good pasture all through the season. In the northern states, rape mixed with oats and peas is a common combination. It is a crop that can be sown early or late and may be mixed with corn for hogging down in the fall.

CAR DRIVER TO WEAR HANDCUFFS YEAR

Most people object strenuously when handcuffs are applied to their wrists, but D. D. Warner of Los Angeles doesn't mind them a bit. He is so indifferent to a set of "bracelets" that he is going to have one around his wrist for a whole year. That is not all. The veteran automobile stunt driver will have the second cuff attached to the steering wheel of his car. A chain five feet long will afford him the opportunity to move around a bit. The handcuffs will be sealed with lead not to be removed until the year is completed. A radio will be carried in the sedan, which is constructed for sleeping inside, to supply entertainment for the visit to various cities in the United States.

ROAD RULES FOR MOTOR DRIVERS

All Operators Should Practice What They Preach, Says Commissioner.

"Practice what you preach," is a good rule for automobile drivers to follow, according to E. Austin Baughman, Maryland motor vehicle commissioner.

"If, when driving, one discovers a glaring fault in the operating habits of 'the other fellow,' one would immediately analyze one's own habits to see if one does not sometimes indulge in the same violation, much of benefit toward safety would result; vastly more improvement in conditions would accrue than through just laying the blame on the other fellow and letting it go at that," he said, in urging motor vehicle drivers to be sure to first "remove the beam from their own eye" before discussing the mote in "the other fellow's."

Blame Other Fellow.

"Don't make it a habit to blame 'the other fellow' until one is sure one is not at times guilty of the same type of operation," says the commissioner.

"If, when persons are inclined to criticize 'the other fellow' they would only stop for a moment and make a searching analysis of their own methods of operating a car, and apply the rule obtained thereby to an endeavor for their own improvement, in an honest effort to place their driving habits above fair criticism, accident prevention would be almost automatic in its accomplishment.

"Just as long as one attempts always to lay the blame on the other fellow and let it go at that, nothing will be achieved. On the other hand should every one endeavor to develop a spirit of fair play, an immediate improvement would be effected.

Is Critic Free?

"In listening to discussions where the 'other fellow' is condemned one cannot but wonder if the person doing the criticizing is always free from the same type of mistakes. Does he, when late for an appointment, 'step on it' and take a chance here and there? Does he, confronted with an emergency, assume the prerogative of keeping going under all conditions? Does he, when trailing a sedately moving vehicle, become irritated and cut out of line regardless of traffic conditions? Does he fail to slow down at intersections? Does he have a false sense of security engendered by many years of driving experience that makes him feel justified in driving in a manner which he would condemn in 'the other fellow?' Does he give the pedestrian an even chance to cross the highway in a dignified and safe manner?

"Self-examination will teach many drivers some surprising things about their own faults. It is a good habit to indulge in, particularly when inclined to devote all of one's energies to 'cussing out the other fellow!'"

Cause of Crashes

Inattention continues to be one of the principal causes of automobile crashes, according to leading authorities on the subject. The "one-arm" driver, who devotes too much attention to his charming companion and too little to the highway is a potential casualty. The driver who turns his head to address a guest on the back seat is headed for the cemetery.

Tighten Rules to Prevent Jaywalking

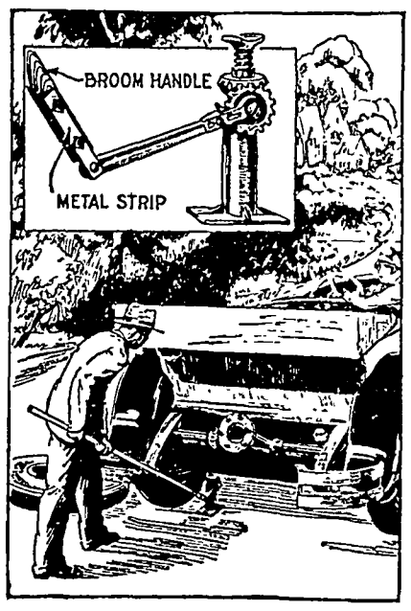
Pity the poor jaywalker in Paris.

Under a new police edict, pedestrians are forbidden to cross the street except by the shortest possible route, and only with the traffic, it is reported by the United States Department of Commerce.

Vehicular traffic also is regulated. For the first time, automobiles must stop before trolley stops and let passengers get on and off cars.

Improvised Long-Handled Jack Adds Big Leverage

A broomstick, used as shown in the accompanying illustration, makes a long-lever auto jack out of an ordinary short-handled one. All that is necessary to do is to drill a hole



Broomstick Bolted to Jack Handle Gives Motorist Considerable Leverage.

in the end of the jack handle, fasten a metal strip to the end of the broomstick and bolt the two together. The broom handle should be of such length that it can readily be stored in the car and, as it is fastened to the jack handle by means of bolts and a thumbscrew, it is quickly detachable to facilitate storing of the equipment.—Popular Mechanics Magazine.

AUTOMOBILE ITEMS

Don't drive at night without a tail light burning.

* * *

There were just as many careless drivers in the old days, but, you see, the horses had sense.

* * *

California motor vehicle registration of 1,800,000 is about 8 per cent of the nation's registration.

* * *

The state of Illinois is credited with the greatest mileage of concrete highways. There are 5,361 miles charted.

* * *

Net receipts from gasoline taxes in California last year were $22,467,083. California leads all other states in tax returns, with Ohio second.

* * *

It is claimed that Scottish children are brighter than American children, and especially in arithmetic. However, we'll wager that ours can figure ten gallons of gas more rapidly.

POULTRY

REMOVE ROOSTERS FROM HEN FLOCKS

Now that the hatching season is over and fertile eggs are no longer needed, every poultryman should remove all of the male birds from his flock. For, says O. S. Platt, assistant poultry husbandman at the New Jersey experiment station, the production of fertile eggs for market purposes is never desirable, though it cannot be avoided during the hatching season.

On many farms there is a desire to keep over some of the better cockerels and the temptation is to allow these to remain in the flock. The number retained, however, should be reduced to a minimum by careful selection. When this is done the few that are kept should be segregated. It must be remembered that a new crop of cockerels will be reared during the coming season and good, vigorous cockerels are usually better than older birds anyway.

The exception exists on those farms practicing pedigree mating. Where this is done it is absolutely necessary to keep over all of the male birds until one knows what their daughters have done. A proved male is practically priceless and as one cannot determine in advance exactly what his daughters will do it becomes necessary to keep the birds over until they have had a chance to show their ability.

Male birds that are kept should be given plenty of sunshine, green food, and yellow corn. They will not need much animal protein. A free range and whole yellow corn fed twice daily will take care of their needs until the next breeding season. If kept confined, cod-liver oil should be provided in addition to the corn and green food. One per cent in the grain would provide sufficient oil. Under confined conditions it will also be necessary to be on the watch for lice and mites all of the time. These can be kept under control by painting the roosts with a carbolineum product and by dusting the birds with sodium fluoride.

Fatten Broilers Before Sending Them to Market

Profitable gains usually will be made by broilers that are fattened for a period of two weeks before they are sold. However, one should not expect to fatten broilers for longer than a two weeks' period, as the gains will not be rapid and profits are likely to disappear. Cockerels should be separated from the pullets and confined to a small yard. A roosting shed should be provided for the fattening birds.

A satisfactory mash mixture for fattening broilers is one composed of two parts of cornmeal and one part wheat middlings. This should be mixed with milk and fed for fifteen to twenty-minute periods three times daily. A liberal feeding of cracked corn should be given late in the afternoon. If liquid milk is available, it can be kept before the birds during the fattening period and no water need be given. Plenty of water should be provided if no milk is fed.

Slow-Feathering Chicks Common in Some Breeds

"Slow feathering or 'naked' chicks are quite common in general purpose breeds, and sometimes occur in the lighter breeds," says Prof. C. W. Carrick, Purdue university. "Such chicks are usually those that lack the vigor necessary to grow rapidly but chicks may also become stunted from improper feed, chilling, or crowded conditions during the first few weeks of their lives. "Whatever the cause may be, little can be done to make such chickens profitable. If pullets, they lay poorly and are likely to be susceptible to disease. They should be marked with leg bands when five or six weeks old, and marketed as soon as they reach sufficient size, otherwise they may feather out slowly and be kept in the flock to produce similar chicks next season."

By constantly culling out these low-vitality chicks, one can practically eliminate them in the future offspring.

Good Laying Mash

A farmer who raises corn, wheat, and oats can work them into a good laying mash. It can consist of 100 pounds of ground corn, 100 pounds of ground oats, 200 pounds of ground wheat and 100 pounds of meat scrap. The addition of 2 per cent bone meal, 2 per cent ground limestone and 1 per cent fine salt will furnish minerals. Adding 50 pounds of bran to the 500 pounds of mash helps to give it more bulk, when ground wheat is used in place of bran and middlings.

Prevent Diseases

It is an established fact that most of the tuberculosis in fowls is found in the older birds. When the older birds are eliminated, the principal spreaders of tuberculosis are eliminated. Therefore the sale of birds after they have completed most of their first year laying cycle is not only the method of securing the highest production per hen but also a method of helping to prevent spread of diseases such as tuberculosis and other ailments.

Obedient to Command, "Order in the Court"

Patrons of a Los Angeles theater, seated behind a young woman who mislaid her purse one evening recently, missed a part of the photography, because the woman stood up to conduct her search for the lost article, but then enjoyed a little unintentional comedy which others missed.

It was during a court scene put on by the Vitaphone, and the court was hearing parties in a separate support action. Those seated behind the young woman were getting fidgety, when the judge rapped his gavel, and ordered, "Order in the court, sit down!"

The woman was so surprised that she sank back into her seat, and there she discovered the missing purse, where it had fallen.

Champion Optimist

This John Smith is distinguished by being a liveryman still doing business in New York, N. J., although most of his "business" is polishing up his old carriages. He is not at all impressed by the 20,000,000 motor cars in the country. There was the bicycle and look how that fad went by! "I'm over seventy now," he says, "and I've been in this business 50 years and I expect to stay in it. They can't scare me out, because I know the tide is going to turn. Just as soon as this younger generation finds out the fun there is in taking their girls out for a buggy ride, business will pick up again."—Indianapolis News.

Plea for Matrimony

Capt. E. J. King, who holds both the Distinguished Service medal and the Navy cross, and who at the age of forty-seven has just qualified as a flyer was defending marriage at the Army and Navy club.

"The Freudians and the super-realists and the bolshevists," he said, "can knock marriage all they please, but the fact remains—"

And Captain King chuckled.

"The fact remains that a bachelor only gets half as much mileage as a married man out of a pair of socks."—Exchange.

When We Two Parted

She—I suppose you know Alice married money?

He—Oh, yes. They're separated now—aren't they?

She—No—just she and her husband are separated.—Life.

Every One Else Is

Admire American Methods

England is becoming interested in the American method of raising chicks by wholesale and sending them by parcel post to poultry farms. England has many chicken raisers, but the system for sending the birds by mail and stories that 400,000,000 chickens were carried by parcel post in the past year are almost beyond the English man's comprehension.

Mark of Greatness

Maturity is always a mark of greatness whether the person possessed of it is old or young.—Woman's Home Companion.

If one is smart, no one finds it out if he doesn't talk or write.

Here's Speedy Relief for Tender, Aching, Swollen Feet

Moone's Emerald Oil Must Give Complete Satisfaction Or Money Cheerfully Refunded.

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture, you'd give anything to get relief.

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the swelling reduces.

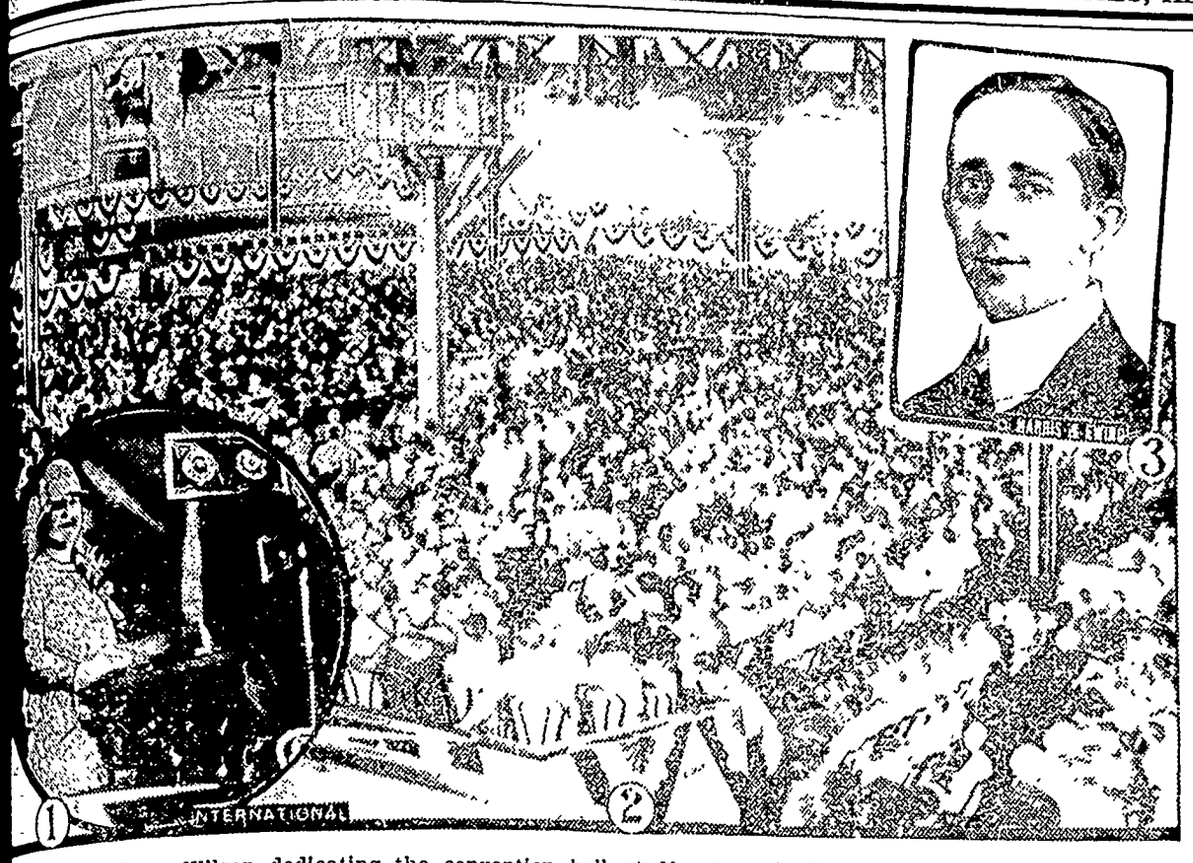
And as for Soft Corns and Callouses a few applications each night at bed time and they just seem to shrivel right up and scale off.

No matter how discouraged you have been with powders, foot baths or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees Moone's Emerald Oil to end your foot troubles or money back.

W. N. U., DES MOINES, NO. 27-1929



1. Mrs. Woodrow Wilson dedicating the convention hall at Houston. 2. Democratic convention in session. Claude G. Bowers, who delivered the keynote speech.

EWS REVIEW OF CURRENT EVENTS

emocrats Pick Smith and Robinson as Leaders and Adopt Dry Plank.

WAS all "Al" Smith at the Demoratic national convention. The nds of the New York governor had situation in hand at all times. lfred E. Smith of New York and eph T. Robinson of Arkansas were sen the standard bearers of the ocratic party in the coming cam-n.

hen the first roll call ended Smith 8½ votes short of the 733½ nec-ry to nominate. Ohio led the tches that rolled up the governor's l to 849⅔.

im Reed, Smith's outstanding rival the nomination, took the platform summoned all factions of the par-to unite in support of the nominee. he naming of "Al" Smith was ely putting the official stamp on expressed choice of a vast ma-ty of the party. The opposition ch marched on Houston with the ermination to fight the New York rnor to the last ditch soon discov-d they did not have a chance.

he tide toward Joe Robinson for ond place on the ticket started even re the convention was opened. One ot was enough.

hose who were looking for a "wet" nk in the party platform were dis-ointed. After a bitter controversy days in the committee, a plank agreed upon which declares for rcement of the Eighteenth amend-t. The plank sharply criticizes Republican administration for t is described as a failure to en-e the dry laws and also for plac-"political hirelings" in enforce-t positions, thus making of pro-ition a political football.

he platform pledges the party to blish a farm relief policy modeled the federal reserve system. Two standing paragraphs read:

Creation of a federal farm board ssist the farmer and stock raiser the marketing of their products as federal reserve board has done for banker and business man.

Credit aid by loans to co-opera-s on at least as favorable a basis the government aid to the merchant rine."

he Democratic plank does not tion McNary-Haugen nor the alization fee.

owever, it does mention the prin-e of the equalization fee. It pledges fostering and development of operative marketing associations ough appropriate government aid. n it pledges the party "to an est endeavor to solve this problem the distribution of the cost of deal-with crop surpluses over the mar-d units of the crop whose pro-ers are benefited by such assis-e."

ther high spots of the platform e:

Denunciation of Republican corrup-.

rther reduction in taxation by ting debt retirement to sinking requirements.

position of tariff duties which permit effective competition, in-nce against monopoly and at the time produce a fair revenue for support of the government.

Criticism of foreign policies of the ublican administration.

urbing of the issuance of injunc-s in labor disputes as sought by anized labor.

Condemnation of excessive campaign enditures.

velopment of the American mer-nt marine.

trict enforcement of anti-trust .

he keynote speech of Claude G. ers was an appeal for harmony a united Democracy. The fiery or from New York stirred the con-tion to wild bursts of enthusiasm he assailed the Republican party its record of eight years' adminis-tion of the country's affairs.

he permanent chairman, Senator seph T. Robinson, set off some fire-ks when he declared that there uld be no "wet" plank in the plat-. He made a plea for religious tolerance, saying "Jefferson gloried in the Virginia statute providing for religious freedom." This started one of the most noisy of the many demonstrations that marked this convention.

SECRETARY OF STATE KELLOGG has called upon the governments of 14 nations to sign a revised and final draft of his projected anti-war treaty. The text of the slightly modified peace pact, together with a covering note, has been delivered to Great Britain and her dominions, together with France, Italy, Germany, Japan and the Locarno powers.

Each of the interested governments was urged to sign on the dotted line at once and to accept the treaty as written without qualification or reservation. This government, Mr. Kellogg stated, is prepared to sign the treaty as it now stands without reservations.

Mr. Kellogg brushes aside most of the objections advanced by France and other powers and states frankly that his examination of their replies to his first note, inviting them to cooperate in the negotiation of a treaty for the renunciation of war, has revealed no reasons why they should not adhere to the final draft of the treaty at once. He described the changes in the treaty as slight.

In making public his note placing the matter of approving the latest treaty draft squarely up to the interested powers, State department officials made it known that 12 of the nations have signified, through their ambassadors, a readiness to sign the treaty at once.

France and Italy are understood to be the only nations whose representatives have displayed reluctance toward complete acceptance of the Kellogg proposal.

The confidence felt by Mr. Kellogg in the ultimate success of his peace activities is expressed in the concluding lines of his invitation.

"My government is confident," he asserts, "that the other nations of the world will, as soon as the treaty comes in force, gladly adhere thereto, and that this simple procedure will bring mankind's age-long aspirations for universal peace nearer to practical fulfillment than ever before in the history of the world."

ROBERT W. STEWART, chairman of the Standard Oil Company of Indiana, under indictment for perjury in connection with his testimony before the senate committee investigating the Teapot Dome scandal, will be tried in Washington October 8. Stewart pleaded not guilty and demanded immediate trial, but the district attorney declared that the government was not ready to proceed.

The indictment charges that Stewart lied when he told the senate Teapot Dome scandal committee he did not participate in the profits of the Continental Trading company, Ltd.

Subsequently Stewart, recalled by the committee, admitted he had handled $759,000 of the profits of the Continental company and had held them intact for either the Standard company or the Sinclair Crude Oil Purchasing company. The bonds were delivered to the Sinclair company, according to Stewart.

HERBERT HOOVER, the Republican candidate for President, will resign as secretary of commerce within a few days, to devote all his time to the national campaign. It is expected that he will visit President Coolidge at the summer White House at Brule, Wis., to turn in his resignation. He will then proceed to his home in California to prepare his speech of acceptance which is to be delivered the first week in August.

Dr. Hubert Work, secretary of the interior, who has been named chairman of the Republican national committee, is also expected to resign soon to give his entire attention to directing the campaign.

Chairman Work announced that President Coolidge will not be asked to make any speeches for the ticket and that it is not expected that he will take any active part in the campaign.

Henry J. Allen, former governor of Kansas and publisher of the Wichita Beacon, has been named as campaign publicity director.

CHICAGO'S gang killings go merrily on. The latest victim is "Big Tim" Murphy, former state representative, labor leader and mail robber. Murphy was shot down on the lawn of his home late at night by gangsters in a passing automobile. Police say the killing was the result of an internal fight for control of the Master Cleaners and Dyers' association.

PREMIER POINCARE'S bill to stabilize the franc at 3.93 cents and wipe out billions of wealth in French bonds of war and prewar issues was passed by the chamber of deputies by a vote of 450 to 22. Many of the bonds, which will be reduced 80 per cent in value, were sold in America.

The senate later voted in favor of the stabilization bill by 256 to 3, and the law is now in effect. Thus the French parliament buried the venerable old franc—the franc that before the war held up its head among the other currencies of the world at 20 cents. It was 125 years of age, having been born in the days of the first consul, later to become Napoleon I, the emperor of the French. For more than a century it flourished as one of the powerful coinages of the world. That was before the day when the nouveau riches, the dollar and pound sterling, became the aristocrats of the financial world.

Its downfall dates in reality to 1914 and the war, when the French, although wanton with the blood that poured from the open wound in the country's side, never felt inclined to tax themselves, as other warring countries did. They paid for the war with loans. Afterward they hid behind the illusion that "Germany will pay."

THE sensational mailbag robbery, involving an estimated loss of $500,000, which was discovered on the arrival in London of the mail landed at Southampton from the steamer Leviathan, is still shrouded in mystery. The mailbags arrived in London with seals intact and the robbery was not discovered until the post office officials prepared to sort the letters.

The mail was under supervision of the United States sea postal staff throughout the voyage and was landed at Southampton under strict armed supervision. It is believed certain the bags were not tampered with after they left the ship.

When the bags were opened at London it was found that the registered letters had been split open and all negotiable papers taken.

CHARGING that the Aluminum Company of America, its officers and others entered into a conspiracy to create an aluminum monopoly in this country to the detriment of others engaged in the industry, the Basch Mechine Tool company of Springfield, Mass., has filed suit in the Federal court at Boston against the company.

The plaintiff company names Andrew W. Mellon, James B. Duke and others as having participated in the alleged conspiracy, but does not make them defendants.

The bill alleges that, although Mellon resigned as a director of the Aluminum Company of America in 1920, he continued to participate in the policies and management of its affairs and has been a "dominating factor therein."

BECAUSE he issued orders to his subordinates to fire on all cars not stopping for liquor inspection, a grand jury at Buffalo, N. Y., has held Boatswain Frank Beck, commander of the coast guard station at Fort Niagara, N. Y., partially responsible for the shooting of Jacob D. Hanson of Niagara Falls. Hanson was shot early on the morning of May 6 while he was driving back to the Falls from a visit to Lewiston. Jennings and Drew, coast guardsmen, were patrolling the road on the lookout for liquor smugglers. They claim they ordered Hanson to stop and he refused.

JOHNNY FARRELL won the open golf championship by defeating Bobby Jones in the play-off of a tie by one stroke at Olympia fields, Chicago. Jones and Farrell were tied for first place at 294. The play-off was one of the most thrilling and dramatic 36-hole matches ever played anywhere. Birdies on the last two holes by both players is an indication of how stubbornly the battle was waged. Farrell, Quaker Ridge professional, after seven years of striving and disappointment won the honor which, to a professional, is worth from $50,000 to $100,000.

Chinese and Indians Alive to Food Values

Any custom that has held its own for generations usually has something back of it, no matter how little it appears to be supported by modern science, in the opinion of Hugh S. Cummings, surgeon general of the United States Public Health service.

"For a thousand years," he says, "the Chinese have prescribed the heads of powdered toad fish as a remedy for heart trouble, and now adrenalin, the most up-to-date drug for the treatment of heart disease, has been found to exist in the head glands of that fish.

"For generations the fact that American Indian hunters always chose the liver and the white men the meat when the animals they had trapped or killed were divided was quoted as proof of their ignorance and primitive development.

"Yet in the last five years the great nutritive value of liver has come to be recognized and it is prescribed in cases of anemia."

The Trouble

Sympathetic Neighbor—I hear you lost your husband. It's a terrible thing.

Widow—Yes, indeed. You know what you're losing but you don't know what you'll get the next time.—The Pathfinder.

Also Minus Socks

Storekeeper (to new clerk)—You began life as a barefoot boy, I understand?

Hiram Todd—Yes, sir; I was born without shoes.

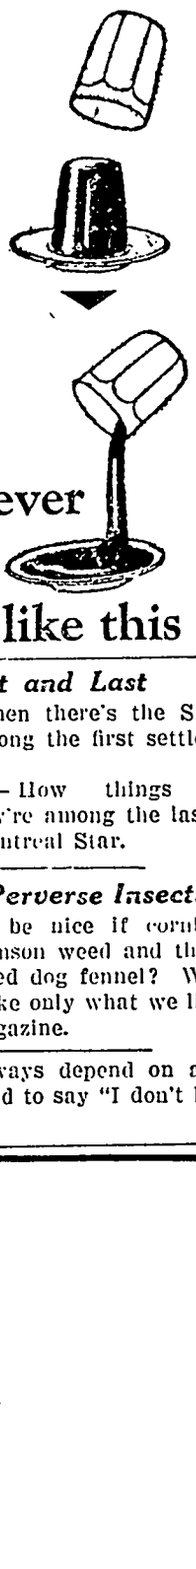
When one is extremely wealthy, how the ice melts before him in financial circles.

Jelly made with PEXEL turns out like this

MAKING jelly jell is not a new idea—but Pexel is certainly a new idea. It is tasteless, colorless, odorless! It is a 100% pure-fruit product which, in addition to making jelly jell, saving hours of time, and cutting down cost per glass, does not dilute or change the finest flavor or color.

Pexel saves from one to three times the 30c it costs. Eliminates long and tedious boiling. Saves fruit juice, sugar and flavor—and makes more jelly. Get Pexel at your grocer's. Recipe booklet in each package. 30c. The Pexel Company, Chicago, Ill.

PEXEL MAKES JELLY JELL



Shingled Cats Oust Tabby

Shingled cats from Siam replaced the old-fashioned fireside-loving tabby at the recent fashionable cat show in London. Few of the domestic animals were to be found, and the tiny foreign creature with coat of black and gold was the most popular. One of these, Dion of Allington, was declared champion of all champions and his owner said she would not take $5,000 for him.

Adversity is necessary to make a man; but it is getting scarcer.

Try not to outgrow the things that don't cost much.

First and Last

Stranger—Then there's the Smiths. They were among the first settlers in this town.

Shopkeeper—How things have changed. They're among the last settlers now.—Montreal Star.

Those Perverse Insects

Wouldn't it be nice if cornborers took to the jimson weed and the boll weevil preferred dog fennel? Why is it that pests like only what we like?—Pathfinder Magazine.

You can always depend on a man who isn't afraid to say "I don't know" occasionally.

Quick ENERGY FROM THIS wake-up food

Here is the wake-up food for breakfast! Post Toasties is rich in energy—and so easy to digest that it quickly releases its store of energy to the body.

To men and women it brings new zest for the day ahead. It gives children fresh energy for school and play.

And so convenient to serve! Just shower the golden flakes from the package into the bowl. Eat Post Toasties plain with milk or cream, or vary it with fruits and berries. Everybody loves the flavor—the natural sweetness of sun-ripened corn. Be sure you get genuine Post Toasties in the red and yellow package. Postum Company, Inc., Battle Creek, Michigan.

Our oft own relatives who were here to attend the Medaus funeral Sunday were Charlie Baack and wife, John Bruns and wife, and Mr. and Mrs. Fred Saathoff.

The Misses Adella Schroeder and Elvira Stille and Morris Greimann came home from Ames to spend the Fourth. They are attending summer school.

The Klemme Reformed Sunday School picnic last Friday was very well attended, and there were certainly plenty of good eats for everyone and lots left over.

The Ladies Aid of the Methodist Church will meet at the Parish House next Thursday. Mrs. C. A Arnold and Mrs. C. M. Gram are the hostesses.

Mr. and Mrs. C. A. Larsen and children drove to Garden City, Minnesota, Sunday for a visit with the Albert Yahnke family and will remain there over the Fourth.

Mrs. Rosie Anderson and Mr. W. Baack, of Minneapolis, came Saturday for a visit at the Martin Brinkmann home and with other relatives, and to attend the Medaus funeral on Sunday.

Summer is here at last! Sunday the thermometer bumped right up to 92 degrees in the shade. It's fine corn weather at last and most fields are more than "knee-high by the Fourth" Oats is looking good in this territory, as well as the other small grain.

For Hot Weather Cooking

Keeping your kitchens cool goes a long way to make your hot weather cooking more agreeable and pleasant on hot summer days.

We can suggest nothing nicer than one of our Kerosene or Gas Ranges. no unnecessary heat in your kitchen between meals—light a match and you are ready to cook a big dinner, or do your canning, baking or roasting.

THE NEW PERFECTION

In kerosene stoves and ranges we recommend the reliable, trouble-proof NEW PERFECTION. We have every size from a one burner to the large 4 burner style, in all assorted styles. The Perfection is absolutely safe, odorless and is easy to clean—just like a lamp.

THE COLEMAN GAS RANGE

We have them in all styles and sizes, two burner to range size—a full line.

We also carry a full line of ovens, single or double burner style; Waterless Cookers, Conserve Cookers and Steam Pressure Cookers. A full line of Perfection Wicks, burner cleaners and repairs.

383 COWS ON TEST IN G-K ASSOCIATION

REPORT OF GARNER-KLEMME TEST ASSOCIATION FOR JUNE

V. A. Cook Has High Herd And High Cow For June

383 cows were on test in the 26 herds tested for June in the Garner-Klemme Cow Testing Association. 9 cows were sold for milk, and 6 for beef 52 cows produced over 50 lbs. of fat.

Average milk, 701 1 lbs.

Average fat, 26.4 lbs.

During the present period the dairyman is confronted with the problem of allowing his production to drop or make an outlay for additional feed. The correct policy to adopt must be answered by each dairyman or by someone who knows the capacity of the cows for production "I will feed my cows as soon as threshing is over," most everyone says It is an established fact that if milk production is allowed to drop at this season of the year it will take more feed during late summer to get the same amount of production then if the cows were furnished additional feed at the present time

Twelve members in the association fed grain to their cows during June. Eight herds averaged over 1 pound of fat per day and all were fed grain Eventually, these will be the top herds at the end of the year

Cook Again Leads Association

The highest average for herds was made by the Pure Bred and Grade Holstein herd owned by V. A. Cook, southeast of Klemme 14 cows in milk, and 1 dry, made an average of 1161 pounds of milk and 40.75 pounds of fat.

Six Grade Hollsteins and Shorthorns, all being in milk, owned by E. J Blumer west of Klemme, made an average of 1064 pounds of milk, and 40 42 pounds of fat.

The Pure Bred Holstein herd owned by E G Beier, Liberty twp., 10 cows, all in milk, made an average of 1019 pounds milk and 32.-2 pounds of fat.

The Grade Mixed herd owned by Ray Ford, Garner, 16 cows all in milk, made an average of 890 lbs of milk and 32 21 lbs. of fat.

Twenty-three Grade Guernseys owned by Mechem & Sprole, Garner, all cows being in milk, made an average of 695 pounds of milk, and 32.06 pounds of fat.

Twenty-three Grade Hollsteins, owned by W. H. Greiman, Garner, made an average of 736 pounds of milk, and 31.99 pounds of fat. All cows being in milk.

Two High Cows On List

May, a Pure Bred Holstein, owned by V A. Cook of Goodell, was high cow for the month, having produced 2,121 pounds of milk and 70 pounds of fat.

Grannie, a Grade Hollstein, owned by V A. Cook, produced 2,109 lbs. of milk and 67.5 lbs. of fat. Grannie has been fresh since October 17th.

COUNCIL PROCEEDINGS

Klemme, Iowa,
June 18, 1928.

The regular meeting of the Town Council was held at the Mayor's office.

Larsen, Schuldt, Suckow, Wellemeyer and Missman, members of Council present.

Minutes of last meeting read and approved as read.

Motion made and seconded to allow the following bills:

E. Finn, Salary for May	$85.00
Wellemeyer Co., Flowers for Town Hall	3.55
Thor Smith, Shoveling Cinders	3.20
W. M. Wilson, Supplies	2.89
Jan J. Coobs, Labor	13.80
C. M. Kirkwood, Grease	.35
Harry Gram, Sand	2 50
H. Steeman, Labor	4.00
Community S. S. Co, 150 Gallons Gasoline	29.70
D. Smock, Labor	.80
Central States Electric Co., May Lights	31 58
University of Iowa, Water Test & Express	2.36
Duncan Band, Memorial Day Band	30.00
White Phillips Co., Bond Interest	210.00
Fidelity & Casualty Co., Liability Ins. for Marshall	26.00

Bills allowed

Motion made by Wellemeyer that the town purchase corners at the East end of Main Street about fifty feet deep at the corner point on both sides of the street providing that the purchase price shall not exceed $30 00 per corner. Motion seconded by Suckow.

The Mayor thereupon put the motion to a vote with the result as follows:

Ayes. Wellemeyer, Suckow, Missman and Larsen

Nays: Schuldt.

Motion carried by majority vote the Mayor instructed the purchasing committee to purchase corners and handle all details connected with same.

P M Wilson's application for the sale of cigarettes was on motion approved

Motion made that meeting be adjourned

WILL RUN EXCURSION TO BAYSIDE PARK SUNDAY

The Milwaukee railroad is going to run an excursion to Bayside Park at Clear Lake next Sunday, July 15 The special train will start at Marquette and the hundreds of visitors expected will arrive at Bayside Sunday forenoon The northeast Iowa excursion will bring the famous Decorah Band which will play concerts at the Park afternoon and evening The Winneshiek County Giants, ball team, will also be on the special train and this very successful nine will cross bats with the Bayside Cubs next Sunday afternoon at three o'clock. It will no doubt be one of the fastest and best games of the season on the Bayside diamond which is now one of the finest ball parks in the middle west The program at Bayside Sunday will also include vaudeville and free movies Three dances will be held at the Park the coming week. Monday night, July 16th, the Legionaires of the fourth district, attending the convention at Clear Lake, will dance at Bayside and everyone is invited. Dances will als be held n Wednesday night, July 18th and on Friday night, July 20th Clate Thompson and his Templar Park Crusaders of Des Moines will furnish the music.

NEW CORN INSECT IS AT WORK IN IOWA

CORN BORER DAMAGES CROPS IN LOW AREAS

The New Pest Reported To Be In Emmet County Only

A new, striped boring worm that attacks corn when it is from 6 inches to knee high has put in its appearance in devastating numbers in at least three fields in Emmet County this year, according to entomologists at Iowa State College.

This new pest, known to scientists as Luperia Stipata Morr, was first found in Iowa last year on a farm near Randall The pest, altho doing enough damage to come to the attention of farmers and entomologists for the first time last year, is one of the native borers, it has been in the state for a good many years and should be no cause for immediae alarm, explains George C Decker, one of the Iowa State entomologists, who has been studying this new pest

Mr Decker visited the Emmet County farms where the pest was reported and there he found that 1 to 2 acres in the different fields which were originally a good stand will be practically lost. However, so far the pest has been found in devasting numbers only on corn growing in low areas and in fields which were in oats or sod the previous year Usually these areas have been adjacent to a tract of prairie or have fence rows with an abundance of grasses in them.

On his way back from Emmet County, Mr Decker stopped and inspected five fields which were low and in three he found some of the new pest at work, tho not in abundance Just how wide-spread the pest may be is not known.

The characteristic indication of the presence of this new corn borer is the dying of the leaves of the central leader and heart of the plant, while the rest of the plant remains healthy If such plants are pulled and the roots examined a striped borer from an inch to an inch and a quarter long will be found to have burrowed from the crown below the ground up into the main stem The pest works entirely below the ground or inside of the main plant Sometimes the pest will have quit feeding in the plant at the time of examination and will then be found in the soil within 4 or 5 inches of the plant.

Since the new pest spends the winter in the egg state on grasses, the fall burning of fence rows and fall plowing of oat stubbles in low areas where corn is to be planted should prevent future outbreaks, advises Mr Decker

About 50 specimens of the new borer were obtained last year from the Randall field. These were reared in the entomology laboratories of Iowa State College and the adult moths and eggs secured for study.

Has Anyone—

Died?
Married?
Had a fire-
Had a baby?
Had a party?
Sold their farm?
Come to town?
Fallen into a well?
Had twins or triplets?
Moved to your section?
Fallen heir to a legacy?
Fallen from an airplane?

Well, then—that's NEWS. So send it in, please Or if you have taken a nice trip, received a visit from distant relatives or friends, held a family gathering, party or farm bureau meeting—SEND IT IN!

Dumb Waiter

Diner—Say, waiter, I'll have lamb chops with potatoes, and have the chops lean!

Waiter—Which way, sir?

TROOP NO. 56 MAKING RAPID PROGRESS IN SCOUTING

Will Go To Camp Roosevelt For A Week Of Intensive Training

Troop 56, Klemme, at their meeting Monday evening at the Parish House were put through a hard work-out in signaling and first aid work and a number of Scouts are rapidly mastering these required steps necessary, along with other tests, to become Second Class Scouts and which position several will undoubtedly attain before going to Camp Roosevelt at Ventura Heights

The course in Signaling is in charge and under the supervision of Troop Committeeman Jack Wellemeyer Troop Committeeman Dr. W F Missman gave a number of demonstrations in First Aid Work and Bandages for Scout work. This part of the work will probably be completed at the next meeting and Scouts who have mastered the art will be ready to pass tests

Scoutmaster Dr D. P. Anderson, Asst Scoutmaster Asa Arnold and members of the Troop Committee are anxious to have a number of the Scouts in Troop 56 pass all the required Second Class tests before going to Camp from July 31 to the 7th of August The Klemme Troop is one of the newest in the district but are progresing rapidly and the officers of the Troop want the boys to make a good showing in Camp.

Other requirements to become a Second Class Scout include a fire-building test, doing a mile in 12 minutes, tracking, cooking without the use of utensils Various Scouts are also working in these branches.

Klemme Scouts completing their tests will participate in a public Court of Honor at Camp Roosevelt, at which time they will be awarded second Class badges.

About half of the Troop is now in uniform and other Scouts are getting their equipment

Undoubtedly a couple of more hikes and outings will be taken before going to Camp.

Any boy between the ages of 12 and 18, of good character, is eligible to become a Scout

CENTRAL STATES INSTALLING MORE NEW EQUIPMENT

Central States Electric Company announces the installation of an additional 600 horsepower Worthington engine in its Armstrong plant at a cost of $60,000.00.

This engine is the fourth engine installed in this plant within twenty four months, giving the plant a capacity of 2100 horespower making it the largest Diesel engine plant in the state.

Demand for the Company's service has been very rapidly increasing and while the additional capacity of this engine will not be required until fall, the Company, exercising its usual forethought for assuring the public service, has installed the new engine at this time

The current generated by the Armstrong plant is used in serving about thirty towns, including the towns of Welcome, Dunnel and Ceylon, Minnesota, and Dolliver, Armstrong, Gruver, Gridley, Wallingford, Ringsted, Halfa, Fenton, Lone Rock, Burt, Wesley, Britt, Sexton, St. Benedict and Corwith in Iowa. 1tc

Fig Ice Cream

One scant cup of sugar; one-half cup mashed preserved figs; two cups scalded milk; a few grains of salt, one pint cream; three-fourths tablespoon vanilla.

Make a custard of milk, egg-yolks, sugar and salt; cool and add cream, mashed figs and vanilla. Freeze as ice cream is ordinarily frozen. Serve.

What Was The Color Of It?

"Was your barn hurt during the cyclone?"

"I dunno, I ain't found it yet."

8:00 p m. Tuesday, young peoples Bible Class.
8:00 p. m. Saturday Junior choir.

BIBLE STUDENTS WON HONORS

SIXTY SEVEN PUPILS IN THE REFORMED BIBLE SCHOOL

School Closed June 29th With Program And Picnic

In the Times last week we made note of the closing of the Reformed Bible School for the summer with a big picnic which was held at the church Park Friday, June 29th. In the same issue we stated that further details would be given regarding this fine class of sixty-seven pupils and the awards they received for their work On account of the Fourth interferring with work at the Print Shop this part of the write-up was postponed until this week.

Beginning at about 10:15 o'clock the members of the Bible Class gave a fine program and in various ways displayed their skill in quoting verses from the Bible, staging contests in locating certain verses and chapters in the Bible, rapidly quoted the books of the Bible and other memory work which showed the fine training they had received

In a Bible History Contest captains were chosen for each side who asked questions of the other side, who were required to give a correct answer immediately. The contest resulted in a tie

Next a demonstration in their familiarity of the Books of the Bible were given, finding any given book in the Bible and finding certain passages that were assigned.

Locating well known quotations of the historical part of the Bible without being told in which book to look for them, was another feature of the examination

A description of Bible Characters without giving the name and then requiring a correct answer was another feature on the program.

All of this demonstrated the ability of Rev Grosshuesch and his assistant, Miss Edith Haupt, as fine teachers in the Bible Class They are to be congratulated on the work represented by the class.

Another part of the program enjoyed was the songs by the older children which were given between the contests A noticeable feature of the singing was the fine pronunciation—a rare quality of young singers The singing was well done and showed good training.

The smaller members of the class were given letters signifying the alphabet. Each pupil gave an eight-line poem representing the letter which he held, and not one mistake was made in the entire group.

Following the program the big picnic dinner was served and which was greatly enjoyed by all The afternoon was spent playing kittenball, visiting and having a general good time. The "fish pond" again was a big feature, especially for the children. Later in the afternoon coffee and sandwiches were served.

In the evening the young people again met and had a good time Ice cream and cake were served and all decided they had a real day of it.

Students Awarded Stars

For proficiency in their Bible studies and work, stars were awarded to a large number of the boys and girls as follows:

Five Stars were given Clarence Swalve, Henriletta Christians, Milvern Barz, Ada Wille, Ethel Barz, Norma Wille, Viola Thieman, Mabel Thieman, Lida Griffen, Mitchell Beck, Ronald Barz, Sena Christians Mildred Lemke, Dale Schlei, Gladys Kothenbeutal, Mildred Thieman. Helen Albers, Norma Baack, Marie Albers.

Four Stars were awarded Johanna Albers and Harold Kothenbeutal.

Three Stars were earned by Leon Lemke, Esther Buseman, Henry Smid, Evert Barz, Francis Buseman, Erwin Neuhring, Ruby Wille, Max Barz, Leo Brinkman, Paul Thieman.

Two Stars were given Franklyn Buseman, Paul Schuldt, Melvin Buseman, Stella Thieman Earl Nuehring, Gerald Barz, Elmira Greiman, Kenneth Busch, Arlene Kraus, John Albers and Lut[illegible] Schmidt.

One Star was received by each of the following pupils: Bennie Schroeper, Paul Baack, Dena Beek, Raymond Wille, Donald Lemke, Fred Beek, Hilda Keeper, George Beck, Eldo Knoke, Harold Christians, Wilma Swalve, Lester Knoke, Alvo Bachman, Raymond Keeper, Grace Nuehring, Clara Nuehring.

CORN COST SIXTY CENTS PER BUSHEL TO RAISE

That Was Average Growing Cost On 93 Farms Last Year

How much did it cost to grow a bushel of corn in Iowa last year?

The answer is 60 cents, according to the average found on 93 farms where corn production costs were given special study by agricultural economists of Iowa State College working in cooperation with the farmers. These farms probably are above the average, so the actual state cost would be somewhat higher, the economists say.

The 93 farms were located in Pocahontas and Palo Alto counties of the cash grain region, Fayette county of the dairy section, Cedar county as representing the eastern meat producing area, Van Buren in the southern hay and pasture area and Mills county in the western grain and livestock producing area. About an equal number of farms were located in each region of the state.

Mills county had the lowest cost per bushel, 42 cents, and Van Buren the highest, $1 01. These costs were largely the result of the size of the yield, for Mills County obtained an average yield of 45½ bushels to the acre, while Van Buren farmers had slightly less than 22 bushels to the acre. The total cost of producing an acre of corn was lower in Van Buren County, or $17 87, as compared with $19 in Mills County.

The Pocahontas-Palo Alto region and Cedar County were tied for the second lowest cost per bushel, 56 cents. The Fayette County farmers had an average cost of 67 cents a bushel.

More important than the cost of growing a single bushel of corn is the cost of producing an acre in a study of corn growing efficiency, according to the Iowa State College economists, and they believe that farmers should get in the habit of thinking of acre costs. Weather conditions have a greater influence over yields, and so over costs per bushel, than over costs per acre.

The total acre costs of growing corn varied greatly on the various farms in each of the five sections of Iowa where the study was carried on. For example, in Van Buren County one man had a cost of only $13 an acre, while another man's costs were $23 an acre In Mills County the costs ranged from a trifle less than $14 an acre to nearly $27. However, the man who spent nearly $27 an acre in growing his corn obtained a yield of 54 bushels to the acre, while the farmer who put in but $14 of expense got a yield of only 27 bushels to the acre.

The best yield in Mills county was 77 bushels to the acre and this was obtained at a cost of $20.27 an acre, or at the rate of 26 cents a bushel, the lowest on any farm among the 93.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

All morning services are regular next Sunday with a welcome to all.

On Sunday evening our Bible Story Telling contest takes place. Six contestants have entered and an hour of interest is assured.

The Ladies Aid meets on Thursday of this week with Mrs. C. A. Arnold and Mrs. C. M. Gram as hostesses.

Youthful Ambish!

"Jimy," said the teacher, "what is your greatest ambition?"

Jimmie considered thoughtfully.

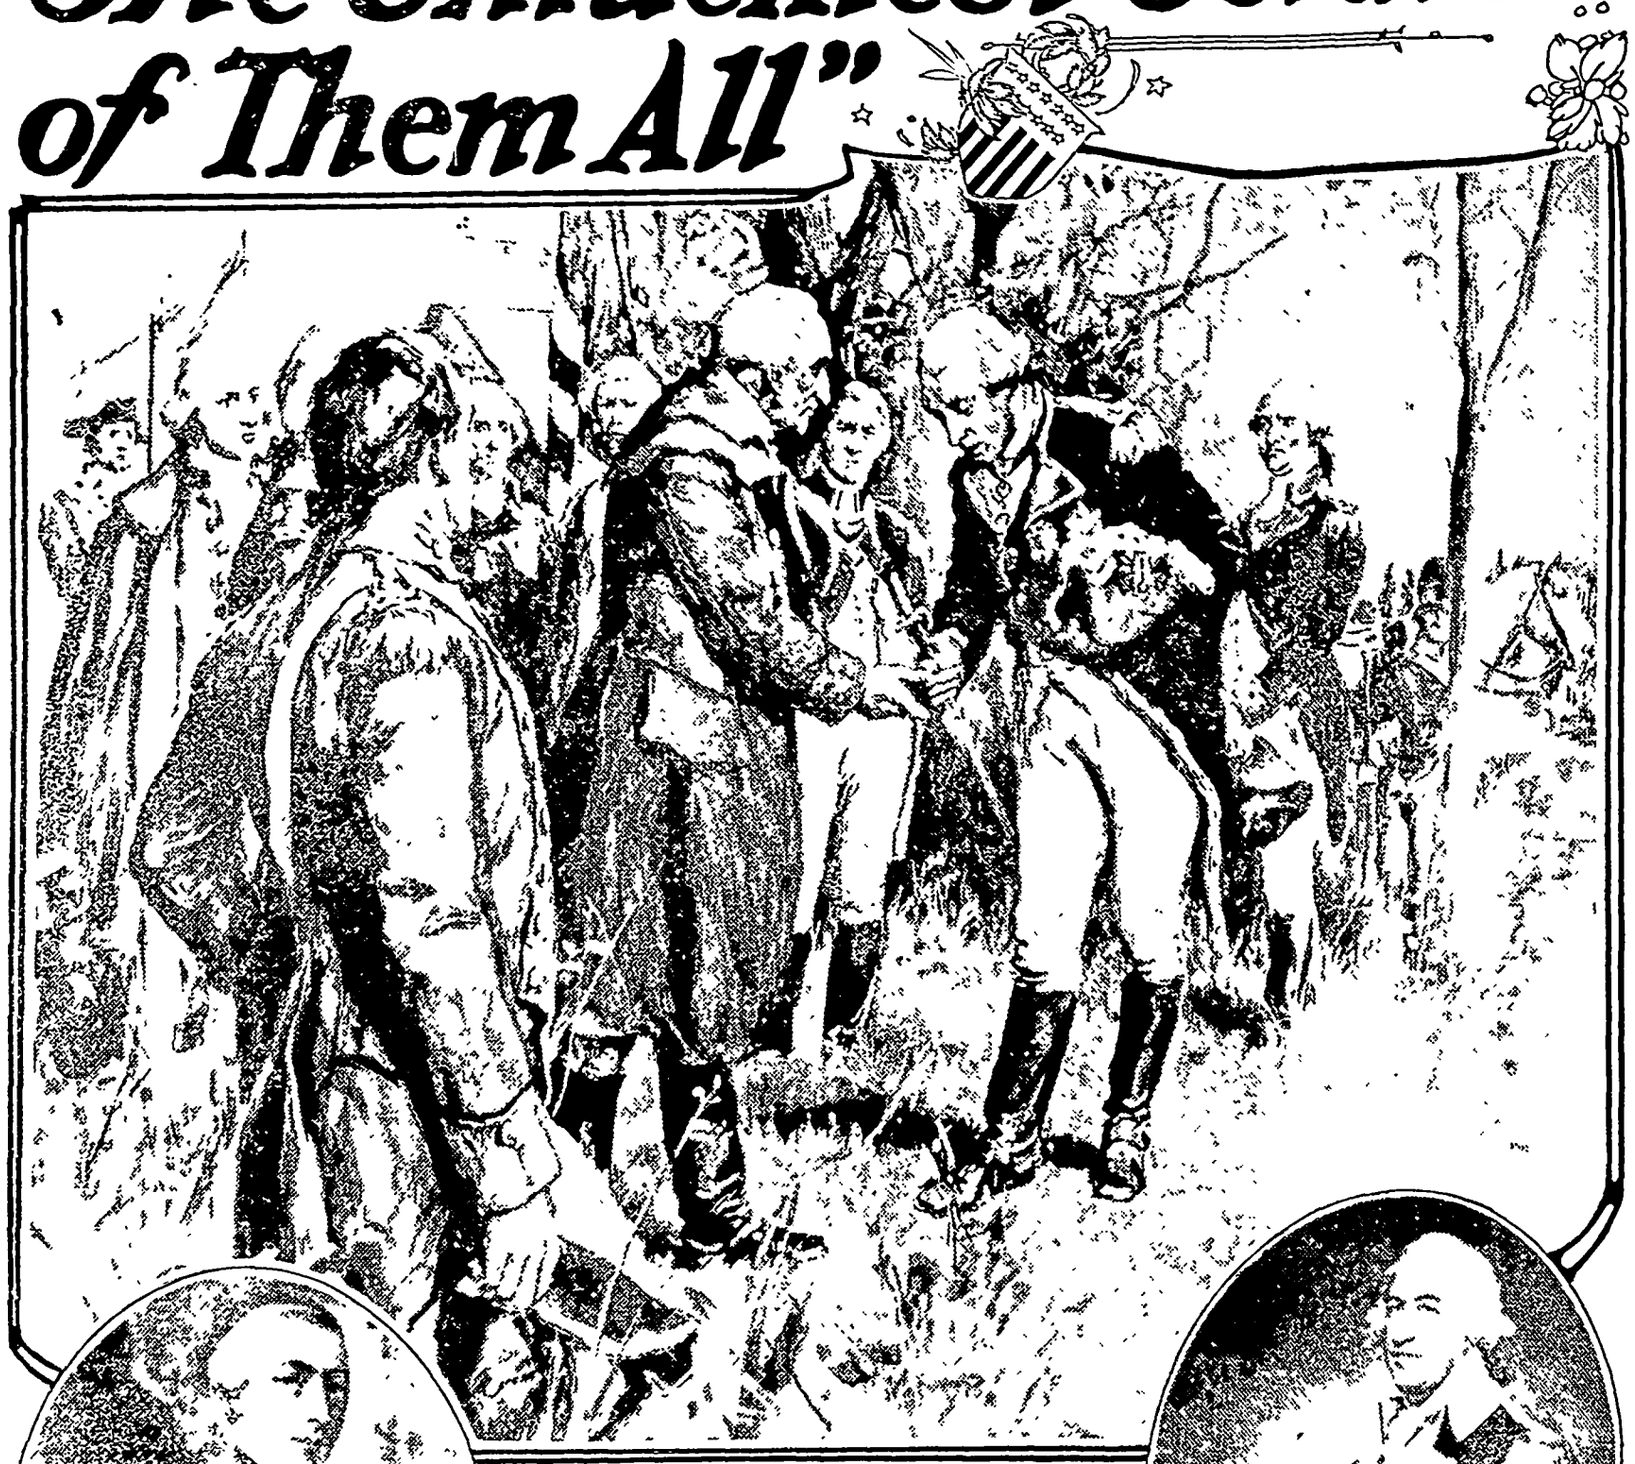
"I think," he said, 'it is to wash mother's ears."

Fur Protection

A skunk and her four baby skunks were basking in the sun when a big hound dog made his appearance.

"Children," said the mother skunk, "let us spray."

"The Unluckiest Soldier of Them All"



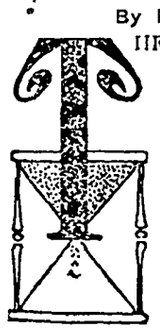
"GENTLEMAN JOHNNY" SURRENDERS
PAINTING BY F.C. YOHN

GEN. JOHN BURGOYNE

GEN. HORATIO GATES

Picture of the surrender, courtesy Glens Falls (N. Y.) Insurance company; portraits of Burgoyne and Gates from "The Turning Point of the Revolution," courtesy Houghton Mifflin company.

By ELMO SCOTT WATSON



HERE is an axiom, known to all, which reads, "Nothing succeeds like success." It is also axiomatic, although not phrased in such familiar terms, that Americans love nothing so much as a winner.

If you believe in the essential truth of the above statements, consider for a moment the cases of two generals, Horatio Gates and John Burgoyne, and figure out if you can whether their careers, either individually or in relation to each other, will prove those statements to be true. In 1777 these two generals were commanding armies which were fighting what was destined to be one of the "fifteen decisive battles of the world." That was the Battle of Saratoga, and when it was over, General Burgoyne, the vanquished, was handing his sword to General Gates, the victor, and this surrender meant that England's greatest effort to crush her rebellious colonies had failed and the cause of American independence had been saved.

That was more than a century and a half ago, but, by all the rules of the "success" axioms, the name of Horatio Gates should have come thundering down the years as one of the greatest heroes of the new Republic and the name of John Burgoyne should have long ago been lost in obscurity. For was not Gates a success and Burgoyne a failure? But what has happened? How many statues have ever been erected to the memory of General Gates by a grateful nation? So far as the present chronicler knows—none! How many Americans can tell you anything about Horatio Gates, except that their remembrance of their school histories makes his name sound vaguely familiar? How many biographies have ever been written about him? It is impossible to recall a single one!

As for General Burgoyne, of course, it would not be reasonable to expect Americans to erect statues to his memory, although it must be admitted that there might be as much reason for immortalizing his name in bronze or stone as there has been for some men it has thus honored. As for the average American knowledge of Burgoyne, possibly next to Cornwallis, he, of all the British generals of the Revolution, is best known. But most interesting of all is the fact that within the last few months there have appeared two books whose wide sale indicates that Americans are genuinely interested in Gen. John Burgoyne. They are "Gentleman Johnny Burgoyne—Misadventures of an English General of the Revolution," written by F. J. Hudleston and published by the Bobbs-Merrill company, and "The Turning Point of the Revolution, or Burgoyne in America," written by Hoffman Nickerson and published by Houghton Mifflin company.

Although both authors are military men (Mr. Hudleston is librarian of the British war office, and Mr. Nickerson served on the general staff of the A. E. F. during the World war), their books are not essentially military studies of an important and history-making campaign. Read together the two volumes do give a complete picture of that campaign, but they do much more—they give a comprehensive view of the political and social life of that period in history. But most of all, they paint an unforgettable portrait of a "lovable but luckless British commander" who, among the many varied types of soldier who fought on either side in the Revolutionary conflict, was the "unluckiest soldier of them all."

Just why this "failure" should be so appealing to Americans who are supposed to be only interested in those who win success is difficult to say. The answer may be found in some of the names that were applied to him. "Gentleman Johnny" he was called in George Bernard Shaw's "The Devil's Disciple" and "Handsome Jack" he was called by his troops because he was physically the most attractive man in the British army. He was a general only because of political pull and through the influence of his wife's family, and as a military leader he was a strange mixture of sagacity and blundering incompetence. But if he made blunders, his superiors (by courtesy) made even worse ones. If he had brought disaster upon himself by his own mistakes alone, perhaps he would not win our sympathy and regard. But since he was the victim of circumstances and of a greater bungler than himself, perhaps it is the proverbial American attitude toward the "under dog" and the "goat" that causes us to think kindly, though somewhat pityingly, of him.

Born of a good family, Burgoyne at the outbreak of the Revolution was in his early fifties. He had taken part in the Seven Years' war, serving in the Cherbourg, St. Cas and Belle Isle expeditions, during which he achieved some prominence by his capture of Valentia d'Alcantara. One important result of this military service was that here he learned the strategy of dividing his force in the face of the enemy as a "diversion," which he tried to apply in the campaign which was doomed to failure.

At the outbreak of the war he was ordered to America and had a minor part in the Battle of Bunker Hill. He won his advancement in the army by intrigue and family support and he was proud of the latter for, as he frankly said, "On any other ground I should blush to ask preferment," for he had already admitted that he considered himself "absolutely a cipher in a military light." Yet he had the presumption upon his return to England to seek the command of the expedition from Canada which was to "cut the Colonies in two" and he pulled the wires successfully enough to get it.

His plan was simple and in most respects entirely feasible. It was for his army to proceed from Quebec via Lake Champlain down the Hudson to Albany where it was to form a junction with Sir William Howe, who was to come up the Hudson from New York city and with Col. Harry St. Leger, who was to start from Oswego and sweep through the Mohawk valley, the "granary of the Revolution." One mistake he made was his plan to include in his army a force of German mercenaries and a force of Indians. He did not realize how bitterly the residents of the invaded region would resent the use of these "hirelings" from Europe and how difficult it would be to restrain the savages from atrocities against Tories as well as patriots. He was soon to be disillusioned on both scores.

But even with the handicaps under which he labored from the start, his expedition might have been successful had it not been for the fatal and unforgivable blunder made by his superior, Lord Germain, who as secretary of state for the American colonies was directing the American war. That incompetent (who incidentally had once been tried by court martial and found guilty of cowardice) wrote out the order for Sir William Howe to proceed north along the Hudson and meet General Burgoyne, but, in his haste to leave for a pleasant week-end in the country, went away from his office without sending the order. The result was that Lord Howe, instead of marching north to meet "Gentleman Johnny," marched south against Philadelphia. So Gentleman Johnny, knowing nothing of Germain's bungling, plunged on into the wilderness and all the troubles which awaited him.

Gentleman Johnny may not have thought that the pen is mightier than the sword, but he evidently considered it a valuable adjunct, for he was given to "high-falutin'" writing of proclamations which brought down upon him much derision, not only from his enemies but from his supposed friends. At the outset of his campaign he addressed a proclamation to the "rebels" which he signed "By John Burgoyne, Esq., Lieutenant General of His Majesties Armies in America, Col. of the Queen's regiment of Light F Dragoons, Governor of Fort William in North Britain, One of the representatives of the Commons of Great Britain in Parliament and Commanding an army and fleet employed in an expedition from Canada" which not only brought a gale of raucous laughter from the "rebels," but caused Walpole to call him "General Hurlothrumbo."

Next he addressed a proclamation to his Indian allies, forbidding them to kill aged men, women, children and prisoners, which led Edmund Burke to make an ironic speech in the house of commons in which he imagined a riot on Tower hill and the keeper of His Majesty's lions addressing the animals in his charge thus: "My gentle lions, my humane bears, my sentimental wolves, my tender-hearted hyenas, go forth; but I exhort ye as ye are Christians and members of a civilized society not to hurt man, woman or child.

Although Burgoyne scored what appeared to be a great success at first in the capture of Ticonderoga (it was hailed as the capture of an American Gibraltar and King George offered to make him a knight of the Order of the Bath), his troubles increased as he proceeded further south. The Indians became more and more unruly and their atrocities, culminating in the famous murder of Jane McCrea, soon showed that they were more of a liability than an asset to the British commander. When he sent a force of Hessians under Baume and Breymann to capture American supplies at Bennington, Vt., the Green Mountain Boys, maddened at this invasion by the "foreigners," rose up under old General John Stark and inflicted a crushing defeat upon this force. St. Leger was held up before the walls of Fort Stanwix and the "grand expedition" was already tottering to its ruin.

But on September 14, 1777, Burgoyne "crossed the Rubicon" (the Hudson) and there the forces of General Gates, assisted by Arnold, Morgan and Schuyler (to whom belong the credit for the victory) fell upon him and his doomed army. The end came on October 17 when Burgoyne, his supplies cut off, all hope of aid from Howe or Sir William Clinton gone and his dream of conquest shattered, was forced to surrender. The surrender scene was dramatic. As Burgoyne handed his sword to Gates he said, "The fortune of war, General Gates, has made me your prisoner." Gates with a courtly salute, replied, "I shall always be ready to bear testimony that it has not been through any fault of your excellency." And in saying that the "victor" paid a tribute to the "vanquished" which Americans have echoed since that time and which has resulted in the high esteem in which "Gentleman Johnny" Burgoyne, "the unluckiest soldier of them all," is held to this day.

PICKING THE BRIDE'S BOUQUET

(©, by D. J. Walsh.)

HUNT & HUNT often congratulated themselves on their Miss Andrews. Where could they have found a secretary so alert, so modern, so everything that was efficient? Luck—that was all. And the luck stayed with them. Other firms might envy the treasure, with her knowledge of deeds, transfers, business ratings, all at her finger tips. But hintings as to bettering herself never seemed to penetrate Miss Andrews' pretty ears—ears just peeping from modest bunches of curls.

And work! Not above tapping out her own letters, where others in her position apparently forgot all they had known of the science of word-mechanics.

And as for handling prospects!

"Like magic she does it," James Hunt would murmur in admiration as she landed some millionaire with a high-priced showy place, and had the decorators presenting their plans to the new owner before one could say Jack Robinson—supposing one mentioned such a low person in the office of Hunt & Hunt.

"I wonder if Miss Andrews was ever a girl—flapper -now, like my nieces and these other youngsters all so boyish in looks that they puzzle me. Miss Andrews is smart-looking, of course, but—well—she never had a romance, I'll swear."

Which was unkind, for all the elements of a first-class thriller were tangled up in what she called to herself the "dear past."

Romance? Miss Hunt was steeped in it. But when one pays the best tailor in town fancy prices to keep one looking businesslike, and when dark hair, a bit curly as it is, minds its mistress and stays put all day long, it must be admitted that there is little color of a romantic hue in the appearance.

Even in her own little apartment—as neat and trim as Miss Andrews—there wasn't even an incense burner to dispense that weird odor which fiction lovers imagine transports the whole room to far-off enchanted lands

No. Miss Andrews was more apt to scent her apartment with good coffee—a cup of which she enjoyed over her open fire of an evening.

But when the real story began to happen it was June and a hot June, and the coffee had been foregone for a week or more. Miss Andrews was restless and wished she could take her vacation a bit early.

"Can I be getting old? That surely wasn't a white hair there!

"I wish—I wish—dear me—what do I wish?

"I'd like to have a house with a yard. Not a lawn, but an old-fashioned yard like we had at home in Kingston. This apartment is so stuffy. And hardwood floors and rugs hurt my feet.

"Let me see—how much have I in bonds now?

"No—not enough. And I couldn't come in to the office if I lived as far as Kingston.

"Well, I may as well forget it."

Forgetting made her cross, perhaps, for she shoved Felix Shoe-Polish rudely away when he came purring after a romp with his catnip mouse.

"Go away! You ought to be out in the grass, chasing field mice, with catnip leaves in your ears, Felix! I wonder why women must work alone so long for a little bit of living money? James Hunt has had enough to retire on this five years—and I've helped him make it, but I get only a 'raise' once a year and a bonus at New Year's.

"I wish—"

What Miss Andrews wished was forgotten the next day when Mr Hunt the elder told her he wanted her to take a look at some Kingston property. Leave right away—see what kind of shape it was in. A loan on it—see if it was worth another. Set a price, and everything. She knew what to do. And here was the location.

Miss Andrews gasped She hadn't known who had bought that place.

How many years it had been since she had seen it! Just down the road from her old home. What roses had grown there—old-fashioned hundred-leaved ones. Pale and pink and with a delicate perfume which had forever spoiled Miss Andrews for heavy, heady scents.

When she arrived at Kingston and found her way to the cottage the roses were still there. Though the field of clover just over the fence had been planted in prosaic corn The roses, too, had been rudely trimmed and tied up as if some one paid to do it had hurried about the task.

The cottage was in good enough repair, though. The furniture, shrouded in covers, stood about in the same places. Over there by the window Sam's mother used to keep a great stand of ferns. Sam's mother. So there had been a Sam in Miss Andrews' life?

With a sigh of weariness and something else Miss Andrews sank down on the sofa by the fireplace.

"I should have taken a taxi at the station. The walk is surely longer than it was—let me see—how many years is it since we would stop here on our way from school and Sam's mother always had lemonade and cookies?

"It couldn't be that there's such a thing as ghosts—there's a step in the kitchen as surely as I am Pauline Andrews!"

Miss Andrews was no coward. She walked steadily to the kitchen door and asked, "Who's there?" in a voice that trembled only a little.

Something, though, made her waver and clutch at the door when she saw a real, flesh-and-blood man standing by the sink.

"I can't seem to find any scissors, Pauline, to trim these rose stems. Hold them carefully and they will not stick your fingers. Mother always knew how to take the sting out of roses—she said."

Miss Andrews turned pale, then pink, then pale again.

"It's not you, is it, Sam? Sam McCully who lived here when we went to school the other side of Kingston and whose mother always asked us in to rest on the way home evenings? Why—I heard you had gone off somewhere. You never seemed to care about the old crowd after we graduated. And I went to the city to work and the girls have all married and gone.

"I didn't know the name of the owner—Larrimore—when I came up to see the house today for my real estate firm.

"Haven't you been in Kingston either—or didn't you know the house is for sale?"

No, Sam hadn't been in Kingston and as for the house, that had gone to pay the debts after his mother died.

"You didn't know, but mother was slowly dying, even in the days she was so jolly and good to us all."

"I had to look after her—I couldn't leave her for college or business, and when you—and all the rest left, it was pretty lonely.

"I hadn't anything to offer you, Pauline—when at last I was alone, and free.

"I heard you were doing so well—such a wonderful salary. But now I've enough to buy this house back—this house where I've stolen the roses to give you from the old bush by the walk.

"I came to see the way things were left, though Cousin Larrimore, who bought it, would not disturb mother's home, I knew.

"And I saw you, Pauline, at the window upstairs. So I gathered the roses and slipped in through the pantry window—I've often done it when I stayed too late at a party—and you and I walked home too slowly.

"Then—seeing you here, I wished you'd stay, Pauline.

"I can buy the place and still have enough for a little business in Kingston. We can have enough—that's happiness.

"It won't be the city—and that wonderful office where you talk in millions every day—"

Pauline smiled happily. Then spoke practically.

"No, it will not be that old office, thank Heaven! Who wants an office when there's home—and a hundred-leaved rose right at the door?

"We'll go right down to the city and fix up the deed, and then get James Hunt to play 'father' at the ceremony. Poor man! He's going to have a new secretary, and he will not like it.

"But you and I, Sam—we're going to be folks out of a story book. Here, give me the roses—you didn't know you were picking the bride's bouquet, did you?"

But Sam was a wise man. He answered in a better way than words.

Japanese Baby Hurt by Falling Meteorite

The hitting of a human being by a meteorite is probably the rarest of all accidents, according to Dr E. E Free. Yet that is what happened, says Pathfinder Magazine, to a three-year-old Japanese baby living near Sukatu, a village northeast of Tokyo. The incident was reported to Popular Astronomy by Issei Yamamoto of Kyoto university.

At the time of the occurrence the child happened to be playing out of doors alone. Hearing a sudden cry the mother rushed out to find the infant seared across the neck as if by a hot iron. Further search disclosed a small stone in a fold of the child's dress. It was still slightly warm, which evidently had caused the burn on the neck. Transmitted to Yamamoto and examined by the scientists of Kyoto university this stone proved to be a typical meteorite, covered with the usual black crust caused by melting during its flight through the air.

The stone is only about one-fourth of an inch in length and weighs only a few grains, making it probably the smallest meteorite ever recorded. In spite of the millions of meteorites that hit the earth's atmosphere each day and burn up to make shooting stars, only a few reach the ground in only one previous historic instance is one known to have hit a human being. That occurred in 1827, when a native of India was killed by a meteorite.

Water and Cholera

Hamburg and Altona are cities that have merged into each other, like New York and Brooklyn. They still have, however, separate water supplies, both coming from the River Elbe. Altona filtered its water and Hamburg did not. A map showing where cholera cases appeared followed irregularly the line of demarcation between the part of the city that got filtered water and that which did not. It was regarded as definitely proven that filtering the Altona water made it safe from cholera carrying.

Gigantic Book

One of the books in the British museum, said to be the largest book in the world, is so tall that a man can walk behind it without being seen.

COLLAPSIBLE ARTICLES FEATURE OUTFIT

It was estimated that over 15,000,000 motorists camped along the highways in 1927 and the number will be quite larger this year. The camping outfits for 1928 are featuring collapsible articles that are compact and can be carried on the car without taking up too much room. The photograph shows a modern camping outfit—collapsible umbrella-tent, folding gasoline stove, folding tables, etc.

GET EVIDENCE TO PROVE ACCIDENT

Far Too Many Motorists Have No Idea What Should Be Done in Emergency.

"How many motorists know what to do after an accident has occurred, in which there has been damage to the cars involved, or possibly a personal injury? Far too many have no idea what to do," says a bulletin issued by the legal department of the Chicago Motor club. "The care of the injured, if any, is always of first importance, of course. The next thing to be remembered is that lawsuits are won, not by the brilliance of counsel, but by the facts as presented in the evidence; and evidence cannot be manufactured at the time of trial—it must be obtained at the time of accident. The answer to the question, 'What shall I do in case of accident?' is: 'Get the evidence.'"

Evidence Is Big Help.

The statement goes on to say that: In getting evidence, one of the best helps a motorist can have is a camera. If a camera is not part of his equipment, a good pencil sketch of the scene of the accident should be made. Witnesses are, of course, important; and in this connection it is well for the motorist to remember that a disinterested witness, a bystander, is more valuable than one of the occupants of his car, who might be regarded as sympathetic to his friend's case. It is advisable to seek witnesses in houses or in stores or office buildings near the scene of the accident.

After the names and addresses of witnesses and of the driver of the other car have been obtained, the motorist should make a note of the weather conditions and of the nature of the pavement. He should step off the distance from the curb to the point of accident; note skid marks that tell where the brakes were applied; take the name, address and license number of the driver of the other car and put it in writing; take a good look at the other driver so that you will be able to identify him in court later.

Look Out for Ruse.

"The affable driver, who admits he was in the wrong and says that his insurance company will send a check for the damages, should not be trusted. This is often a ruse used to make the injured party forget to jot down the name and address of the affable driver.

"The man who goes into court must be in a position to prove his damages. The sworn testimony of the repair man who has done the work is the best proof of damages. The Appellate court has handed down an opinion that a receipted repair bill is prima facie evidence of work done, but lacking a ruling from the Supreme court, many lower courts still require the sworn testimony of the repair man, and will not accept a receipted bill as evidence," concludes the statement.

Interesting Method Used to Determine Horsepower

A recent engineering test in a Chicago laboratory showed that an automobile engine running 20 miles an hour and equipped with spark plugs that had been in use slightly more than 10,000 miles, developed 20.6 horse power. The same engine with a new set of plugs gave a horse power reading of 23.4.

One "horse power" is sufficient to lift 33,000 pounds one foot in one minute.

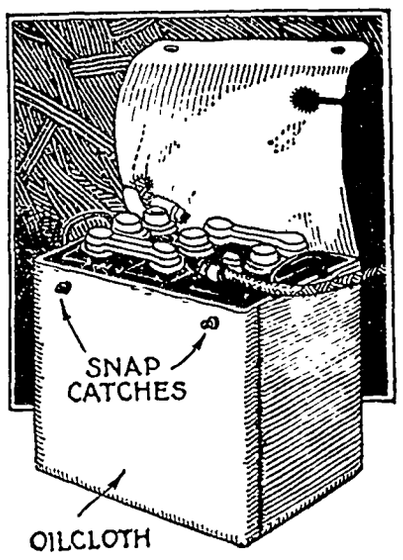
The method used in determining this unit is very interesting. Back in the Eighteenth century, James Watt, inventor of the steam engine, and Matthew Boulton started to manufacture hoisting engines to replace the horses then used in the coal mines of England. In order to compare the power of one of their engines with that of the number of horses required to perform the same work, they undertook to test the pulling power of a heavy draft horse. They found that a horse could lift 330 pounds of coal 100 feet in one minute, which is equivalent to lifting 33,000 pounds one foot in one minute.

Autos in Italy Blessed by Monks

A solemn benediction of automobiles took place near the Forum in Rome, recently, the occasion being the feast of Santa Francesca Romana, patroness of motorists. A picturesque procession of monks from various orders, accompanying an abbot in full regalia, pronounced the ritualistic formula and sprinkled holy water on the cars parked in the plaza. They then paraded to the Church of Santa Maria, where a pontifical mass was celebrated.

Oilcloth Cover Useful to Keep Battery Clean

Keeping th starter battery clear is worth while because the dirt that collects on the top of the battery eventually becomes soaked with creeping acid from the battery and greatly increases the corrosion as well as the leakage. A piece of oilcloth will serve to keep dirt and water splashed up



A Cover Made of Oilcloth Will Keep the Battery Clean and Stop Corrosion and Current Leakage.

from the road from collecting on the top of the battery. It can be made to fit snugly by cutting openings for the cables and fitting snaps along one edge to hold it in place. If the top of the battery is wiped off with a rag moistened with household ammonia at intervals, and the cover is kept buttoned, you will be able to keep the battery in practically new condition.—Popular Science Monthly.

Swine-Sanitation System Profitable

Owing to Improved Conditions Cholera Wanes.

(Prepared by the United States Department of Agriculture.)

The continued success of the swine-sanitation system, developed by the United States Department of Agriculture in Illinois and now widely used throughout the Central West, is discussed in a recent report to the department by Dr. J. E. Gibson, federal inspector in charge of hog-cholera-control work conducted by Purdue university. In bringing the system to the attention of Indiana hog raisers, federal veterinarians have conducted post-mortem demonstrations, showing the damage done by roundworms which the system, when used, prevents.

A leading swine breeder in Rush county, Ind., stated that the benefits he had derived from such a demonstration and lecture delivered four years ago had "turned a losing proposition into one that is now showing a splendid profit."

"Up to that time," he continued, "the average number of pigs per sow had been about 3½, and the few pigs that grew to maturity, when marketed at 10½ months of age, weighed about 200 pounds. Now the average number of pigs per sow is a fraction above 7 and they weigh 200 pounds when about 7 months old."

Approximately 6,000 farmers in Indiana have attended lectures and post-mortem demonstrations similar to the one cited which resulted in such striking success.

Doctor Gibson also stated that the system of swine sanitation is now being fully carried out by more than 325 swine growers in 16 Indiana counties. Still other growers are following the system partially. Owing to the improved sanitary conditions where the system is followed, the danger of hog cholera is reduced considerably, though inspectors of the bureau of animal industry keep before swine growers the necessity for immunizing herds as a means of preventing hog cholera with practical certainty.

Manure Supply on Some Farms Now Inadequate

The supply of manure on some farms is wholly inadequate to the plant-food needs. Anything that can be done to increase the value and efficiency of this manure means increased profits, or at least a lower fertilizer bill, which means the same thing.

A ton of manure is equal in fertilizing value to about 100 pounds of a 12:5:10 fertilizer; in other words, each ton of manure will contain 12 pounds of ammonia, 5 pounds of phosphoric acid and 10 of potash. The weak spot of this analysis will be readily recognized as the low phosphoric-acid content, as compared with the relatively high supply of ammonia and potash per ton of manure.

This situation can be corrected by the addition of 50 pounds of 10 per cent superphosphate or about 40 pounds of 20 per cent superphosphate to each ton of manure.

This addition of phosphoric acid will give an analysis of 12:13:10 to the treated manure, making each ton equal to about 100 pounds of a 12:13:10 fertilizer in value. The practical application of this treatment is that the available supply of manure on the farm, increased in fertilizing efficiency, can be applied less heavily with equal or better results than the untreated, and can thus be made to cover an increased acreage of the farm each year.

Increasing Feed Value of Turnips and Mangels

In the past few years plant breeders have aimed at reducing the labor of harvesting and increasing the feed value of roots. As a result mangels and improved feeding varieties of sugar beets grown from the higher quality of seed, grow largely above the ground so that the difficulty of harvesting, which applies to the poorer, rooty strains of sugar beet, has been eliminated. The modern types of mangel now grow almost entirely above the soil and can easily be harvested, even when the ground is frozen slightly. The feeding content has been greatly increased, the sugar mangels and improved varieties of feeding sugar beets being especially recommended in this connection. Of course, in this case, as with all crops, it is particularly important to use only the very best seed procurable.

Pasture Very Important for the Little Porkers

Pasture may be the determining factor in whether or not farmers make a profit from their hogs this season. Pasture is especially important for young pigs. Experiments have shown that the average daily profit on young pigs grazing in forage is higher than on those confined to pens.

Pigs on pasture need only half as much of the muscle and bone building feeds such as tankage, skim milk, buttermilk and oilmeal as when they are in the dry lot. Pasture crops are also rich in lime and phosphorus, the two minerals which are most likely to be lacking in the pig's ration. They also furnish a green succulent feed. Pigs on pasture will get plenty of exercise and be under sanitary conditions.

Cotton Statistics

The Department of Commerce, which has been investigating the possibility of finding new uses for cotton, has discovered that there are already 1,000 uses for the 135 base fabrics made wholly or in part from the staple. Some 150 different articles made of cotton are used on farms, 100 in households, 43 by railroads and 20 in industry, yet per capita consumption has gained only slightly in the last decade.

It doesn't seem to be sufficiently impressed on anybody that life is short.

Don't fail to study yourself, if you would know others.

Tribute Not Heavy

The republic of Andorra has just paid its annual tribute of 1,400 francs (about $56) to its two "co-princes," the president of France and the bishop of Urgel, Spain. For 649 years Andorra has paid tribute and enjoyed undisturbed sovereignty in its mountain valley. It became a republic in 1806. Andorra claims about 5,200 inhabitants.

Disqualification

"Don't they ever have women bank tellers?"

"No—they'd tell too much."

A man is often silent with disgust when he is defeated and not because he is a good sport.

Forget last year's jelly failures
This year you have **PEXEL**

always this — never this

PEXEL jells all fruits. Requires less boiling. Obtains more jelly. Does not change the most delicate flavor or color of any fruit

EVEN if you've had a dozen failures—or if you never made jelly before—you can make jellies successfully with Pexel. Just add it to fruit juice and bring to full boil. Then add sugar. Bring to vigorous boil once more. Take kettle from range. Skim. Pour into glasses. That's all—*it will be jelled as soon as it is cool.*

When you use Pexel, its price—30c—is repaid from one to three times. Time and fuel are saved. You make more jelly because fruit juice, sugar and flavor are not wasted by prolonged boiling.

Pexel is a 100% pure-fruit product. It is absolutely colorless, tasteless, odorless. It is a powder, not a liquid. Keeps indefinitely. Just as effective in any season with bottled juices or unsweetened canned fruits.

Get Pexel at your grocer's. Only 30c. Recipe booklet with easy-to-follow directions in every package. The Pexel Company, Chicago, Ill.

Here are a few examples of how much jelly Pexel makes:

4½ cups strawberry juice, Pexel, 8 cups sugar make 11 glasses of jelly.
4½ cups raspberry juice, Pexel, 8 cups sugar make 11 glasses of jelly.
6 cups currant juice, Pexel, 10 cups sugar make 14 glasses of jelly.
4½ cups grape juice, Pexel, 7 cups sugar make 10 glasses of jelly.

Mr. and Mrs. D. A. Marshall and Mr. and Mrs. Herb Marshall and daughter, Irene, were visitors at the Peter Trampel home Thursday evening

Mr. and Mrs. Albert Tjepkes and children of Parkersburg, arrived arrived Saturday morning for a short visit at the Hamo Beek, Geo and Henry Buseman homes. They returned home Sunday evening.

Mr. and Mrs. George Buseman and family, Mr. and Mrs. Rank Buss and children, of Alexander, Mr. and Mrs. Hamo Beek and family, Mrs. Frank Roths and Mr. and Mrs Albert Tjepkes, of Parkersburg, were visitors at the Henry Buseman home Sunday.

Goodell News

(By Special Correspondent)

Frank Quigley was a Klemme caller Monday.

Jay Griggs drove to Spirit Lake and Fairmount, Minn., Tuesday on business

Mrs. Wm. Allaben returned last Thursday from a two weeks visit at Rock Island, Ill.

Mrs. Thos. Cashman is enjoying a visit from her daughter, Leona, and husband of Chicago.

Mr and Mrs. Jay Griggs and family spent Sunday evening at the Gus O'Krueg home.

Mr and Mrs. Sandry of St. Cloud Minnesota, visited at the Henry Buse home Thursday.

Mr and Mrs. Wm. Prelipp and family of Meservey spent Sunday at the Matt Smith home.

Mr. and Mrs. Dave Beckman and family of Forest City spent Sunday at the Jay Griggs home.

Goodell was treated to another band concert Saturday night. There was not the usual large crowd due to the inclement weather.

Friends here received announcements of the marriage of Adelaide Engeseth, of Frost, Minn., to Mr Ervin Underhal of Frost.

Mr. and Mrs W. L. Sherwood and La Vonne spent the week end at Iowa Falls visiting relatives. Mr. Sherwood and daughter, Iris, drove down to get them Sunday.

Not O. K.

Nature Lover (gazing at a gigantic tree): Oh, wonderful, mammouth oak, if you could speak what would you tell me?"

Gardner (near-by): "S'cuse me, mam, but 'e would probably say: "If you please, I'm not an oak, I'm a spruce."

How To Make Sugar Syrup

Cook one cup of sugar with one and one half cups of water about ten minutes; add thin shaving of orange rind to syrup while cooking.

PITY POOR FATHER, PLEA OF BACHELOR

Rutger Jewet, the New York publisher, said at a dinner of the Dutch Treat club, of which he is secretary:

"There ought to be an annual Father's day, and the movies ought to give us a couple of hundred father-love films, the same as they gave us all those mother-love films three or four years ago. Though a bachelor I know whereof I speak.

"Paterfamilias! Poor paterfamilias!

"One afternoon I was sitting in a hot office talking to a fat, pale perspiring publisher of middle age when a sunburnt young fellow in pinkish oxford bags and a blue jacket with brass buttons hustled in. He was smoking a cigarette in a 10-inch amber tube.

"'Well, dad,' he said cheerily. 'I'm just up from the shore, and I thought I'd run in and say hello.'

"The fat, pale man mopped his wet forehead.

"'Sorry, boy,' he said, 'but your sister walked off with all my cash half an hour ago. On her way down to the shore she just ran in to say good-by.'"

PLANTS KEPT BUSY TURNING OUT RAYON

"The giant plants erected during the war to provide explosives, with which we attempted to make political democracy safe in Europe, are now producing rayon to make social democracy secure on American Main streets," points out Lucile Leech in an article in Liberty.

"It may be next to impossible to find admitted rayon stockings in the store," the writer explains, "but the deadly statistics disclose these facts—America leads the world in the consumption of both natural and artificial silk. The use of both is increasing by millions of pounds year by year, and the two products are running neck and neck in both production and consumption.

"American plants this year will produce 70,000,000 pounds of the silklike fabric, mostly from wood pulp; some from cotton linters and refuse. We import about 5,500,000 pounds a year for domestic consumption. Twenty-eight per cent of rayon is used in hosiery, 18 per cent mixed with natural silk goods, 15 per cent for underwear, and 10 per cent for sports sweaters."

Unwelcome Serenade

They were jolly good fellows, all seven of them—at least they felt that way at three o'clock in the morning following an old-fashioned soiree in New York. To wind up a perfect evening they decided to serenade the fair lady of one love-sick member. With voices loud but not altogether clear the male septet parked below a window and raised their faces to heaven in their fervor. After the impromptu concert the gentlemen found themselves in the custody of the law—they had serenaded under a window of the dormitory of a police station where a weary bachelor cop was trying to get some sleep.—Exchange.

Novel by Phonograph

Now a phonograph can "read aloud" to you a full length novel, if you wish Or it can give you an entire congressional debate. An English radio concern announces that one of its engineers has developed a process to record a whole novel on six double faced, twelve-inch phonograph records. Each record "reads" to you for forty minutes, at normal speed. They are of greatest benefit to blind persons.—Popular Science Monthly.

Family Secret

Some one asked little Barbara Stern, daughter of the Big U's business manager, the meaning of the quotation, "For men must work and women must weep."

The little girl thought it over for a moment and replied: "It means that the poor man has to work all day and get the money and then his wife has to cry all night and get it away from him. "But," she added as an afterthought, "my daddy isn't like that."

Exterminating Coyotes

Nebraska farmers are raiding coyote dens with wolf hounds to kill off the puppies. The numerous spring crop if allowed to mature would result in a great loss of chickens, turkeys, and young stock. As many as 12 pups have been found in a den And the dens are not hard to find because of the presence of chicken and rabbit bones at the entrances.—Capper's Weekly.

High Finance

"I keep on reading about capital and labor, but I never understand about it."

"That's simple. You give me $10; that's the capital."

"And the labor?"

"That's what you have getting it back from me."—Madrid De Excelsior

Had Her There

"Willie," whispered his mother in church "how many times do I have to tell you one must keep one's eyes closed during the prayer?"

"Well, mother," replied Willie, "how do you know I don't?"—Boston Transcript.

Too Newfangled

Book Salesman—I want to sell you an encyclopedia, sir.

Farmer—Nothing doing; walkin's good enough for me.—Passing Show.

BARZ AND SCHROEDER RELATIVES HAVE MANY GATHERINGS PAST WEEK

The Barz and Shroeders had some real surprises and good times the past week. Monday evening about 7:00 o'clock Mr. and Mrs. Barz and Mrs. Tamke and daughter of Valley City, North Dakota arrived. Tuesday evening Miss Adella Schroeder came up from Ames to spend the Fourth and that evening the whole bunch of relatives enjoyed a fine supper at the Henry Barz home. Again on Wednesday they all enjoyed themselves at a picnic. Mr. and Mrs Wenshell, Miss Wenshell and Mr. Raymond, from Kenosha, Wis. arrived and the next day all drove to West Bend to see the famous Grotto. That evening all met again, this time at the Albert Barz home. Mr. and Mrs. Henry Lau and Mrs. Otto Baack and t ren, of Tracy, Minn., arrive time to partake of the bi that had been prepared.

Friday morning the crow at that time numbered abo five, went to Clear Lake a ed a big picnic dinner. T noon was spent bathing a ing. For supper Friday ev were invited to the Fred B About 7:00 o'clock another was sprung when Mr and ry Schroeder drove in from

Saturday evening Lena invited the visitors to her supper.

For dinner Sunday they invited to the W. J. Barz Garner.

Some of the company day and others left Monda Mr. and Mrs. Schroeder fro go who will remain until t part of the week

Something New In The Line Of

MITE CATCHER

We have had agents calling on us for the last se years trying to sell us "dope" to kill mites on hen roo urated with high-powered disinfectant that would drive mites from the chickens. All these men we listened to, passed them up. Their price was too high for what be could be derived.

It has been proven by several of the experimental tions that chicken houses equipped with these high-pow disinfected roosts has lowered the hatching per cent of the very greatly—and even has decreased the out-put of egg duction as the hens inhaling the fumes of this stuff thr the night, is not beneficial to egg production.

We have finally taken ahold of a proposition tha believe will be worth at least what you pay for it, if only as a roost. This thing is worth investigating and will say they DO NOT cost 25 or 30 cents per foot, as quite a few paid.

We will have in several hundred feet of this materi a few days. Come in, look them over and get an explana of it. Take what you want—try it for a month and if it not work bring them back, we will be here to take them.

DO AGENTS WHO CALL ON YOU GIVE YOU T KIND OF A PROPOSITION?

Unhappy Those Whose Hearts Are Wrinkled

A wrinkled face is often beautiful. In the old a smoth face looks unnatural. Wrinkles can tell life stories. They have a charm of their own.

"Never mind about wrinkles on the face," said an old French writer, "but take care that you have not a wrinkled heart"

That was a striking image, says the London Chronicle. The meaning is plain We all know people whose hearts are wrinkled. They are not people we like or admire.

There is old Mr. Greedy, for example, whose heart has a deep furrow of selfishness across it. He has always thought of himself first; has sought his own advantage and cared nothing for the welfare of others. This is the result

The heart of the cruel man is notched by a series of horrid marks, almost gashes; that of the lazy man has little flabby dents on it.

"Calais," Queen Mary said, would be found on her heart. On the hearts of everyone of us our thoughts, our passions, our ideals, our endeavors, leave marks faint or strong. Let us beware they do not make ugly marks A sorry burden is a wrinkled heart.

Dominant Traits Not Transmitted by Male

It is women, and not men, in the long run, who transmit family traits, points out Rheta Childe Dorr in an article in Liberty.

"Highly-bred male lines run out long before female lines of equal rank," continues the author "Constant wars account, in some measure, for this. In every great war large numbers of superior males are killed off, leaving inferior types to perpetuate the race The superior women, however, are not killed off, and they not only transmit their heritage to future generations, but they educate and train the children born to the inferior male types.

"Even leaving wars out of the question, it is a strange fact that lineal male lines disappear earlier than the female lines. Thus women are not only the physical carriers of the race but carriers also of its cultural heritage."

What Is the Ego?

When I lift my hand eight inches and turn a leaf of the novel I am reading, I put into operation more forces than science will ever explain Indeed, they are so numerous and ineffable that science will never complete the mere listing of them. The human intellect cannot know much about the mysteries that are in the action of a muscle. All our philosophers, after 25 centuries of ardent analysis, cannot determine whether I resolve to turn the leaf or whether "I" is just a name for the joint action of some neuronic forces. Our psychologists have no conception of what an "I" is. So nothing can be said of the origin of this motion of my arm It simply appeared from a region as unexplored as heaven.—(From "Exploring the Universe," by Henshaw Ward.)

Middle-Age Scriveners

In the Middle ages it was not given for every one to be able to write and so letter writers, or scriveners, grew into a profession, and whenever one wished to write to a friend, one called upon the scrivener to help him, writes Frank H Vizetelly editor of the New Standard dictionary At that time materials for writing were carried in metal or leather cases worn hanging from the girdle. Sometimes as many as six reed pens, and several kinds of ink, were packed away in the case There are still places, even in England, where the quill-driver follows his calling.—Detroit News.

First Study of Comet

The comet of 1680 was the first one whose orbit was computed on the basis of the law of gravitation. Newton made the calculations and found that its period of revolution was about 600 years. At its perihelion it passed through the sun's corona at a distance of only 140,000 miles from its surface. It flew along this part of its orbit at the rate of 370 miles per second, and its tail, 100,000,000 miles long changed its direction to correspond with the motion of the comet in its orbit.

There Was a Difference

Betty, age five, wanted a puppy and was frequently asking her father to get her one. One day daddy decided to fulfill her wish and spent one afternoon making the rounds of the pet shops, but none of the dogs seemed to suit Betty. Finally they drove out to the dog pond, where there were quite a number of dogs, all shapes and sizes. Petty was interested, but not in any one dog. The keeper of the pound said to her: "What kind of a dog did you want, little girl?" to which Betty replied, "I want a colic dog."

Favored Settlement

After little Jimmy had listened to his older brothers saying the Lord's prayer, he felt that he, too, had attained the age at which he might discard his childish prayer for the Lord's prayer. With his mother's consent, he bravely started in. All went well until he came to the words "Forgive us our debts," then his memory failed. He considered for several moments and again bowing his head, he finished with, "Forgive us our debts, and help us to pay them."

Work of Locksmiths Encouraged by Kings

The evolution of the lock in France may be traced in great part to the direct encouragement given to the craft by her kings. It was Charles VIII who in 1411 made it compulsory for every locksmith apprentice who aimed at becoming a master to produce a "chef d'oeuvre" lock of such degree that it would entail anything from one year to two in the making. The delicate and intricate examples that are treasured in museums are mostly drawn from the test pieces, none of which, however, bears the name of the smith, though the majority are sufficiently interesting to merit a signature. The forge had little connection with such locks and none was cast in the rough. Great is the ingenuity brought to bear on them in order to display some hitherto unexploited device or to break some fresh ground in ornament. For strong boxes there were contrived locks that are a miracle of intricacy.

Under Francois I, an enthusiastic patron of the locksmith, the craft reached its summit, whence it was then to decline, if not in respect of elaboration, at least in respect of true beauty and feeling. Under Louis XIII, who was so keen a lover of fine ironwork that he himself toiled at the forge and in the workshop, the lock excelled in point of mechanism and ingenuity, but rapidly deteriorated from the esthetic standpoint It had reached the point where the production of puzzle and letter locks began to take precedence of locks that represented compositions of real artistic quality.

Grasshopper Vane Not Original With Faneuil

It is generally conceded that when Peter Faneuil caused a large grasshopper to be placed on top of Faneuil hall in Boston as a weathervane he did it in emulation of Thomas Gresham, who 176 years before had given his home city, London, a handsome bourse for merchants, dedicated by Queen Elizabeth as the Royal Exchange and crowned by the Gresham family crest, a gilded grasshopper. The grasshopper had been adopted for a crest by the Greshams obviously because the name Gresham is regarded as a corruption of the German word for grasshopper, "grassheim." Faneuil undoubtedly had seen the London grasshopper and liked it, so he chose it for the building he gave to Boston The Faneuil hall grasshopper has fallen to the street three times in its 185 years' existence, once in the famous 1755 earthquake, again in 1761 when the building was burned, and finally in 1889, as a result of getting entangled with the flagpole halliards. After the 1755 tumble a demolished leg had to be replaced, and in 1889 new glass eyes, as well as horns and feet were required.—Detroit News.

FEAR THAT WHALES MAY BE WIPED OUT

Wholesale slaughter of whales by Norwegian fleets in the Ross sea is being protested by naturalists and scientists of Australia and New Zealand, who say that continuation of the practice will mean the extinction of whales.

A proposal to call an international convention to regulate the killing is being considered

It is reported that two Norwegian ships operating from Stewart Island in the Ross sea in the latter part of 1926 and the early months of 1927 captured 700 whales, yielding $2,500,000 worth of oil, and that another ship, with Hobart as its base, took about 50,000 barrels of whale oil to Norway.

It is estimated that 1,500 whales were killed in the last year The territory is under the jurisdiction of New Zealand, which receives a royalty on the oil.

World's Timber Supply

The world will face a serious shortage of timber within a few decades says Christian Storjohann, a leading industrial and forestry expert of Sweden. Sweden's effort to safeguard and maintain a future supply of timber is in contrast, he says, to the indiscriminate felling of trees in many countries. Russia still has large forest reserves, but only a small part of them can be utilized because of lack of transportation facilities. Among the northern countries only Sweden now keeps the cutting of trees on a level with reforestation. Steps to convert waste and swamp lands in forest areas by draining are now also being taken.

Accommodating

"Say!" yelled a man who had had his feet run over for the third time while he was working under his car "I'm getting tired of this! If you do it again I'll get up and kick your flivver to pieces!"

"I can't help it!" responded the small town girl who was learning to drive and not succeeding very well "I don't know how to drive yet, and my car seems determined to run over something. I—"

"Aw, that's all right!" said the complainer crawling forth "I didn't see who you were. If you'll wait a minute I'll lie down in the street and let you run over me all you please.'—Kansas City Times.

Reading

The vast number of books we have impresses on us the necessity of a wise selection of what we read One book may determine what a man shall be to all eternity Benjamin Franklin said that a single reading of Cotton Mather's "Essay to Do Good," shaped his entire life. One page of a good book may save a soul One paragraph of a bad book may ruin a soul John Angell James, one of the best men England has produced, stood in his pulpit in his old age and said that he had never overcome the evil effect of having for fifteen minutes once read a bad book.—Exchange.

The Strawberry Tree

The strawberry tree as distinguished from the strawberry plant is not a native of England, although it is to be seen occasionally in the parks and gardens of that country, but in Ireland it is frequently found growing wild especially in the neighborhood of Killarney It usually bears flowers about the end of September or beginning of October, and along with the flowers are found the fruits of the previous year.

The fruit is a large orange red berry, closely resembling the strawberry hence the name of the tree.

Real Progress

T. C. White, author, painter and poet of Peking, China, on his recent arrival in San Francisco, was asked his opinion of present-day literature.

"Well," he replied "in fairness it ought to be conceded that the old fashioned dime novel which is now selling for $2.50 is printed on better paper."

Costly to Railroads

In 1926 the railroads of the country paid more than $8,000,000 in settlement of claims for damage to fresh fruit and vegetables in transit This amounted to an average of nearly $8 a car, while damage claims on all other commodities averaged about 50 cents a car.

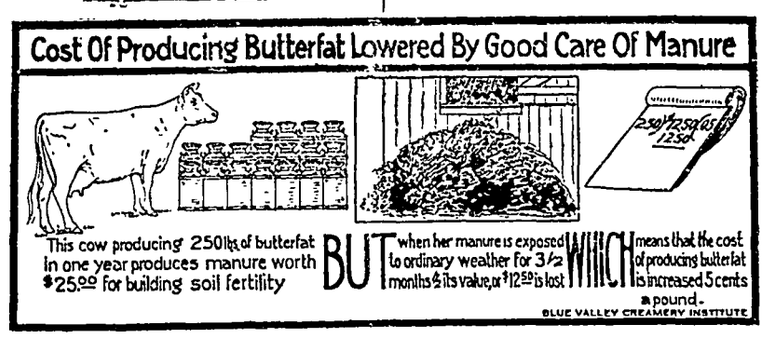
Unlucky Place to Stop

Aunt—Now you mustn't have any more cakes, Johnnie.

Boy—Well, auntie—if I'm ill it will be your fault, because you've stopped me at the thirteenth!—Stray Stories.

More Highways

There were 153,330 miles of surfaced highway in the United States in 1904, and 521,915 miles in 1926.



Cost Of Producing Butterfat Lowered By Good Care Of Manure
This cow producing 250lbs of butterfat in one year produces manure worth $25.00 for building soil fertility
BUT when her manure is exposed to ordinary weather for 3½ months ½ its value, or $12.50 is lost
WHICH means that the cost of producing butterfat is increased 5 cents a pound.
BLUE VALLEY CREAMERY INSTITUTE

ONE WAY TO CUT BUTTERFAT COST

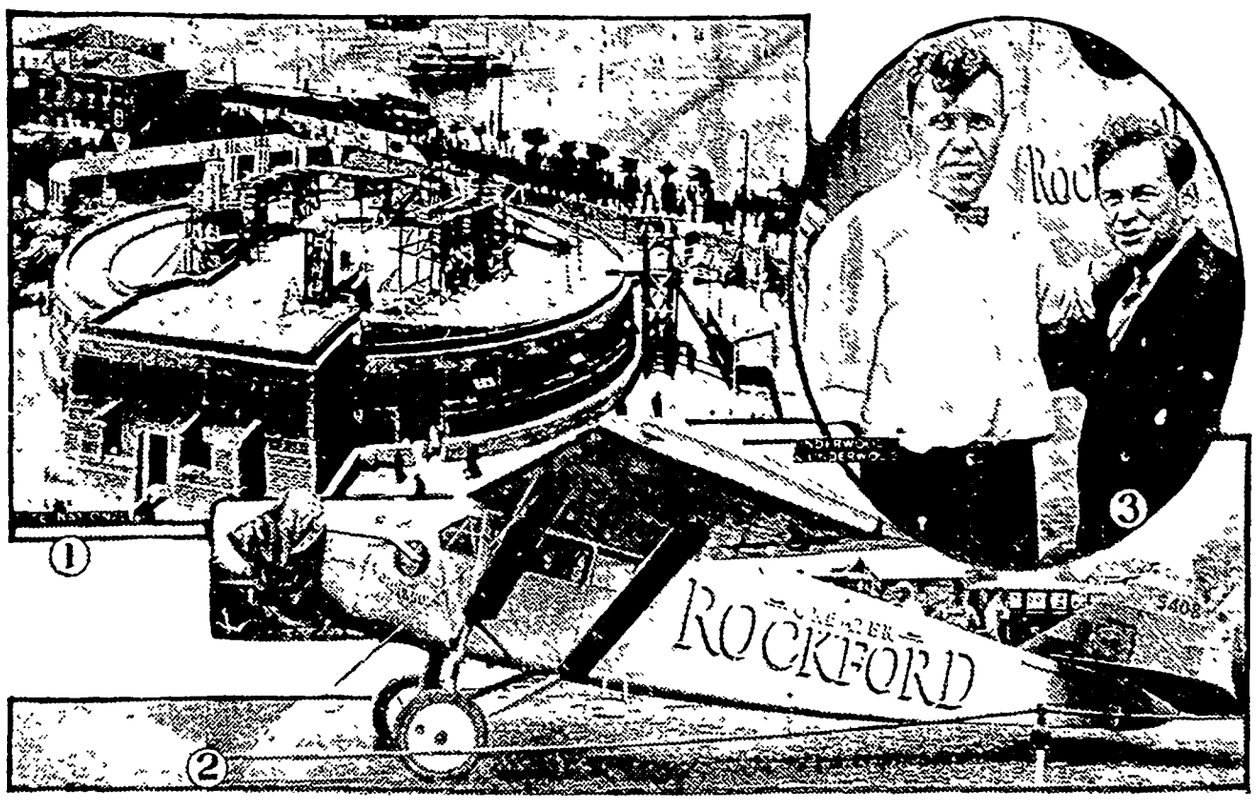
Improper Care of Manure Means Loss of 5 Cents per Pound Produced.

Providing cows with proper feeds in accordance with their ability to produce and taking good care of the manure from each cow are the two sure ways for cutting down the cost of producing butterfat, according to the Blue Valley Creamery Institute.

It is estimated that a dairy cow will produce at least $25 worth of manure a year—one-half of which is lost by the usual methods of handling. As a good dairy cow will produce around 250 pounds of butterfat a year, this loss of $12.50 applied to the butterfat produced by the cow means a loss of 5 cents on each pound of butterfat produced. The best way to care for manure is to spread it on the fields as fast as it is made. Manure is most valuable when it is fresh, because none of its valuable solids have had time to decompose and waste away in the barnyard. Spread on the fields quickly the goodness of manure gets into the soil where it is valuable.

Of all fertilizers, farm manure is the oldest, cheapest and most popular. It is rich in organic matter and in nitrogen, phosphorus and potash. These plant foods must be returned to the land if good crop yields are to be maintained at lowest cost. Although farm manure is perishable, most of its fertility value can be saved by proper handling and care. Plenty of bedding will help soak up and save the liquid excrement.

Manure stacked in an uncovered pile suffers a big loss from rains which wash away its valuable constituents. If it cannot be hauled to the fields daily, it should be kept covered and then spread over the land as often as possible.



1—Votive temple being erected in Venice in fulfillment of a vow by the people made to the Madonna if she would spare their art treasures from aerial bombardments during the war. 2—Airplane Greater Rockford in which Bert Hassell and Parker Cramer will attempt to fly from Rockford, Ill., to Stockholm. 3—Pilots Hassell and Cramer.

NEWS REVIEW OF CURRENT EVENTS

Two Italians Fly From Rome to Brazil, Establishing New Distance Record.

By EDWARD W. PICKARD

TWO Italian aviators, Captain Ferrarin and Major Del Prete, starting from Rome in a Fiat-motored Savoia monoplane, headed for South America on a nonstop flight, reached Brazil in safety, establishing a new record. When they landed near Port Natal they had flown about 4,485 miles, bettering the distance record of 3,909 miles made by Chamberlin and Levine by about 576 miles. These aviators already held the duration flight record of 58 hours, 38 minutes and 26 seconds. When the flyers passed over St. Vincent, Cape Verde Islands, approximately 3,000 miles from Rome, they had been up 22 hours with the remarkable average of more than 135 miles an hour. They made the 1,600 miles from there across the south Atlantic ocean at almost equal speed. On the way they were in radio communication with the steamship Pillarus and said all was well with them. The flight was made under the auspices of the Italian military aviation service.

ONE of the extraordinary tragedies of aviation occurred last week over the North sea. Capt. Alfred Loewenstein, world famous Belgian financier and rated as one of the wealthiest men in the world, disappeared from his Fokker plane in which he was crossing from Croydon, England, to Brussels. It was believed that he had mistaken the door by which passengers left the plane for the one to the washroom, and, opening the former, stepped off into space and fell into the sea.

Loewenstein's wealth was estimated to be only less than that of Henry Ford and the Rockefellers.

He controlled steamship lines, was one of the chief stockholders in the Belgian railway system, owned manganese iron mines in Silesia, steel furnaces in the north of Spain, coal properties in the Saar basin and in the Ruhr, and immense rubber plantations in the Congo. Two years ago he startled the world by offering the Belgian government a loan of $50,000,000 for two years without interest in order that the Belgian franc might be stabilized. The offer was refused. Shortly after this he offered to lend France a like amount at interest of 2 per cent. Quite recently Captain Loewenstein spent several weeks in the United States and Canada on business, traveling most of the time by airplane. He was an enthusiast on aviation and owned a number of big planes which were equipped with office desks and carried a staff of secretaries so he could work while flying.

Immediately after the capitalist's disappearance was reported there were rumors that he had committed suicide because of financial embarrassment following his recent failures to obtain large loans. These stories were denied and were succeeded by reports that he was secretly landed in France from his plane and had been met by an automobile which took him to a place of retreat. On European stock exchanges the Loewenstein shares fell rapidly.

SECRETARY OF COMMERCE HOOVER spent Independence day in rest and quiet recreation, but gave up the rest of the week to preparations for his departure from Washington, winding up with a conference on Saturday with prominent eastern Republicans for the purpose of establishing a campaign organization in that section of the country. It was announced that Mr. Hoover would deliver his resignation from the cabinet to President Coolidge at the summer White House on the Brule river. Further than that his plans were not made public. His notification and speech of acceptance will be made in California, the first week in August.

Governor Smith made two speeches on the Fourth of July, one at Tammany hall and the other from the steps of the city hall in New York city, but in both of them he avoided partisan politics, making only passing allusion to his nomination for the Presidency. Then he went to Albany to attend to state business. His plans called for a campaign conference with Senator Robinson, his running mate, and the Democratic national committee this week Governor Smith also will be notified of his nomination early in August, and it is asserted that in his speech of acceptance he will make a further pronouncement on his position in the matter of prohibition Until then he declined to reply to Josephus Daniels, who, while calling on all Democrats to support Smith, said Al had not been given any leadership by the Democratic party to seek to change the Volstead act and that any attempts to weaken the prohibition laws must be fought in congress.

Ernest H. Cherrington, general secretary of the World League Against Alcohol and a leader in the Anti-Saloon league, issued a summons to all friends of prohibition to unite against Smith, asserting that the country faces "what promises to be the greatest 'wet and dry' battle that the nation has ever seen." National Prohibition party chiefs seemed to be at outs as to the party's national convention called for July 10 and 11 in Chicago. Some desired to nominate some prominent dry Democrat, preferably from the South, while others believed it would be best to indorse Hoover. The Anti Saloon league, scheduled to hold a convention in Asheville, N. C., at the same time, was said not to be co-operating at all with the Prohibition party.

If there is dissension among the drys, there is still greater disagreement among the men who profess to be the leaders of the Middle-West farmers. Gov. Adam McMullen, Republican, of Nebraska; George N. Peek, chairman of the corn belt committee formed in 1926, and some others declared the Democratic plank on farm relief was satisfactory to agriculturists and far superior to the Republican plank, and they predicted the corn belt farmers would vote for Smith. A counterblast came promptly from Senator Brookhart and Governor Hammill of Iowa, who accused Peek of double crossing Lowden and denied the assertions that the farmers were going Democratic. Meanwhile men who think they know the mind of the farmer continue to assert that those who have been Republicans in the past will support Hoover, and those who have been Democratic will cast their votes for Smith

JEAN LAUSSIER, thirty-six years old, a French Canadian salesman from Springfield, Mass., achieved notoriety and perhaps fame last week by going over Niagara falls in a rubber and steel ball designed by himself. Taken from the river a few hundred feet below the cataract, he was found to be uninjured beyond a few bruises on face and shoulders. He was the third person to perform this feat and live. The others were Bobbie Leach and Annie Edson Taylor, both of whom performed the stunt in barrels. Laussier's rubber ball was eleven feet in diameter. Inside the outer covering was a canvas lining. Then came a steel framework and another canvas lining, and inside all a harness-like arrangement in which the occupant strapped himself. He carried in tanks enough oxygen to keep him alive forty hours.

GERMANY'S model of a treaty for strengthening the means of preventing war was adopted by the committee on security and arbitration of the League of Nations in Geneva, and was ordered sent to all governments in preparation for a general discussion of the subject at the September assembly of the league. The essence of the so-called German treaty is that the nations will bind themselves in advance to accept the recommendations of the league council in the case of a threat of war and to refrain from measures likely to aggravate the dispute. Its object is the same as that of the proposed Kellogg pact—namely: the outlawry of war.

CHIEF feature of the celebration of the Fourth of July by Americans in Paris was the dedication of the beautiful triumphal arch in Parc Villeneuve L'Etang in memory of 67 young American members of the Lafayette Escadrille who fell in the service of France. Paul Painleve, minister of war, delivered the address to a great throng that included Ambassador Herrick, Marshal Foch and other notables. Ten French army planes droned overhead and as the last salute was fired and taps blown, tribute was paid to each grave in the marble-lined crypt, where the dead birdmen lie four by four in the order in which they fell.

Americans in Shanghai had as a part of their celebration a Wild West rodeo given by the marines, the first ever seen in the Orient. Czechoslovakia made the day, which was also the tenth anniversary of its own independence, the occasion for the dedication of a monument to Woodrow Wilson in Prague.

CROATIA'S threats of demanding complete separation from Serbia because of the killing of two Croatian deputies in the parliament resulted in the resignation of the Yugo-Slavian government. The king began negotiations with party leaders with a view to forming a coalition government that would satisfy the demands of Croatia, Bosnia and Herzegovina for equal representation with Serbia. Italy announced that she would refuse to accept the ratification of the disputed Nettuno treaty unless it was approved by the Croatian deputies.

ENCOURAGEMENT of foreign immigration and capital are the aims of a bill drawn up by officials of the Mexican government for the purpose of rehabilitating Mexican national finances. The measure has been approved by President Calles and also by Alvaro Obregon, who was unanimously elected President of the republic. The proposed law throws overboard most of the disabilities of foreigners and foreign capital. General Obregon's election was unopposed, as he was the sole surviving candidate. His supporters will be in control of the senate, chamber of deputies and state legislatures.

HERMANN MUELLER, the new Socialist chancellor of Germany, announced to the reichstag that Germany is ready for a final discussion of her full reparation debts. "The Dawes plan has been carried out for almost four years and has prepared the ground for a definite settlement," Chancellor Mueller stated. "The exact date of the final agreement remains vague, but matters have progressed so far that all parties concerned are convinced that a definite debt settlement is not only desirable, but also possible."

In stating his policies Herr Mueller said: "We will give up all thought of revenge. This is the foundation of our policy, and starting from this standpoint we shall endeavor to recouquer for Germany the same rights that other nations have."

YOUNG CHANG HSUEH-LIANG, son of the late Marshal Chang, has succeeded to the dictatorship of Manchuria and has made overtures to the Nationalist leaders at Peking looking to the unification of China. General Chaing Kai-shek, commander of the Nationalist armies, says that Nanking will become the capital of the country immediately, even if the foreign diplomats should refuse to move there.

REVISED but unofficial figures give first place in the international balloon race, which started from Detroit, to the United States army balloon, with the French bag Blanchard second and the German balloon Barmen third. The bags all landed in Virginia, West Virginia and North Carolina.

REHABILITATION of disabled World war veterans, as a government activity, came to an end last week when the last of the 128,500 men who have been trained to be self-supporting, or nearly so, at a total cost of more than $600,000,000, received their diplomas. The number of men who took advantage of the training offered them far exceeded the original estimates. A total of 334,494 applied for the benefits offered them before June 30, 1923, and of these 216,431 were rated as entitled to full courses. Out of the latter number, 58,873 dropped out. Besides paying for tuition and books, the government provided $100 a month for single men and $135 a month for married men with additional allowances for other dependents.

IRATE FATHER HALTS ROMANCE OF GYPSIES

Chief Is Nabbed on Charge of Kidnaping.

Albany, N. Y.—A modern day gypsy trail, followed none the less skillfully or relentlessly because it led over paved roads through cities and towns instead of over woodland paths, ended near here in East Greenbush recently when John Demitro, gypsy chief, was arraigned before Justice of the Peace Hortou, charged with kidnaping thirteen-year-old Rose Thompson, vivacious dark-eyed daughter of Wanda Thompson, gypsy tribal leader of Bridgeport, Conn.

Demitro was arrested at his camp by four state troopers from G troop barracks in Troy and taken to the Rensselaer county jail while a hundred tribesmen, their eyes blazing with wrath, looked on, hesitating to make any openly hostile gesture toward the four troopers.

Rose, who was found in Demitro's roadside camp, was turned over to her father, who had been following the trail of Demitro's band ever since March 1 in the search for his daughter. He took her back with him to the house in which he is temporarily staying here and a few moments later two truckloads of gypsies from Demitro's camp disembarked menacingly in front of the house.

Detectives Avert Violence.

Before anything could happen, however, four Albany detectives appeared and ordered the Demitro faction to move on. Their order was reluctantly obeyed and the Thompson followers breathed an evident sigh of relief. Two private detectives guarded them the rest of the night.

The story of the events that preceded the arrest, being concerned entirely with gypsy jealousies and customs, is characteristically confused. From statements made here by Thompson and advices received from Bridgeport, however, it appears that Thompson is the leader of a gypsy band that was quartered in a house in South Main street in Bridgeport last winter while Demitro's band lived in a house on State street.

According to the story received from Bridgeport, Demitro's wife became ill in February and Thompson consented to let his daughter go to Demitro's house to nurse her. Thompson then went to New York to arrange for opening some concessions he owns in Starlight Amusement park, the Bronx. When he returned March 1 Demitro's band was gone and so was Rose. Thompson traced them to North Adams, Mass., over the Lebanon mountains into New York and finally came to Albany and enlisted the aid of Assistant District Attorney David A. Wanger.

Asserts He Bought Girl.

Demitro asserted here, however, that in accordance with gypsy custom he had paid Thompson $1,500 for Rose to make her the bride of his fourteen-year-old son, John, Jr., and it was noticed that as she left the Demitro camp Rose cast a lingering look back at a young boy who remained behind in the camp.

"What would you do?" Thompson exclaimed, when asked about the transaction. "I good American citizen. No want gypsy marriage for my girl. Want good American marriage. Take out third papers for citizen. I fight John Demitro but it was not because $1,500 was too little for my Rose. I want the Rose to have good American law marriage."

Demitro is held without bail pending extradition proceedings which are being started in Bridgeport.

Norway's Idle Ships May Get an Indemnity

Copenhagen.—One of the greatest problems in the Scandinavian countries is the ever increasing number of idle ships.

Admittedly, says the Scandinavian Shipping Gazette, is Norway worse off in this respect. Proportionately she has more ships laid up than any other nation in the world. Denmark and Sweden also are hard hit and every week brings sorry tidings of further laying up of tonnage.

The latest relief theory is an organized laying up scheme in connection with a mutual insurance system paying indemnity on a fixed scale to owners of idle ships. It is of Norwegian origin and has won recognition among Norwegian owners, but must have international co-operation. From a Scandinavian point of view all such theoretical projects, even if carried through, are mere makeshifts, providing no sound basis for existence or growth of a national merchant marine.

Shipping men say world tonnage is much bigger than the demand, and that it is idle to dream of better conditions for a long time.

Phosphate Taken From Caves to Enrich Farms

Vienna. — Phosphate deposits in mountain caves, the product of long centuries of habitation by swallows, bats and other animals, have been opened to exploitation for use in Europe's grain fields. Three notable caves have lately been explored, according to Franz Kirnbauer, an engineer resident in Rumania. These are the Dragon's cave and the Czoklovina cave in Austria and Minerva cave in France.

The first two have already yielded 25,000 tons of phosphate earth. The latter, estimated to contain 120,000 tons, has not yet been exploited.

SELLERS OF BLOOD SEEK TO UNIONIZE

"Bleeders" Want to Raise Scale of Rates.

Berlin.—Competition in the sale of human blood has become so keen in Vienna that the price has dropped to 50 Austrian shillings a liter.

This blood is used in blood transfusions. These have become so common in medical practice in that city that a regular trade has developed and quite a number of people live solely from the sale of their blood.

Many of them have been bled 12 to 14 times; the record is 16 times.

The Eiselberg clinic is the distribution center of the "bleeders"; from there they are sent to the various hospitals as needed.

The "bleeding" trade is, of course, the last refuge of the impoverished. After about 14 bleedings, however, they find themselves "without blood and without money," and the constant bleeding has made them incapable of heavy manual labor for life.

The names of the patients whose lives are often saved by the blood transfusions are kept secret from the "bleeders" in order to prevent later money requests. Personal gratitude is therefore unable to help them.

Recently the "bleeders" tried to organize a union in order to raise the price of their blood, but the effort failed and the "bleeder's" trade is therefore still run on the open shop principle.

Sunlight Baths Aid English Mine Workers

London—By taking a holiday in Switzerland and sitting in the sun five pit-boys from the mines of Mansfield have demonstrated the value of light baths for men and boys who work underground. A report of the committee which has been testing the usefulness of light in industrial hygiene has just been published.

Following the Swiss experiment with sunlight baths, a clinic was opened and 50 volunteers from the mines, fourteen to seventeen years old, have been given ultraviolet light baths several times a week for three months. At the end of the time the boys had gained in weight an average of more than four pounds. Boys of the same ages who did not get the light baths gained a little over two and a half pounds during the same three months. The boys who had the light baths gained in height more than the boys who did not.

The clinic will be continued, and the committee report recommends that wherever pithead baths are installed light baths should be established with them. The report warns, however, that artificial light baths should be given only under medical supervision.

How to Measure Fish! Who'll Say; Who'll Say?

Olympia, Wash.—How to find the length of fish is now one of the world's puzzles, so after University of Washington sages failed to agree over the method Judge Chester A. Bachelor was left to decide.

Prof. E. Victor Smith declared that since the state game law does not specify, the proper way is to measure them from tip of head to tip of tail. Now comes Dean John Cobb of the college of fisheries: "The proper measurement of a fish is from the point of 'V' in the tail to the end of lower lip." Judge Bachelor in his decision will decide if Roy Jensen was justly accused of selling fish under the legal length.

Oldest House in Paris Is Occupied by Laundry

Paris.—Seven centuries have passed and kings, emperors, wars and revolutions have come and gone, but the oldest house in Paris is doing business at the old stand.

It is a laundry, now in the center of the city, close to the Cathedral of Notre Dame. The laundry isn't that old, but the owner says the pedigree of the building goes back to Louis IX.

The date of the house, 1240, is proudly displayed on a stone set in the street wall, and the laundry's sign is "At the oldest house in Paris."

Open Mosque to Public

Jerusalem.—Sightseers are now admitted to the Great Mosque of Hebron, built over a cave said to contain the bodies of Abraham and Sarah, Isaac and Rebecca and Jacob and Leah.

Tunnel Tolls in Seven Months, $2,401,980

New York.—Exceeding even the most optimistic expectations, the Holland tunnel in the first seven months of its operation has produced toll receipts of $2,401,980.70. Total expenses, including amortization of $48,000,000 in bonds, has been estimated at $10,500 a day. The average daily return so far has been $11,305.50.

The New York-New Jersey tunnel commission believes the tunnel will have paid for itself in ten years. At the time it was projected, engineers estimated not more than 5,372,000 vehicles would use the tube the first year. In the first seven months, ending June 11, 4,334,295 vehicles passed through the tunnel.

DON'T suffer headaches, or any of those pains that Bayer Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for *Bayer*. And don't take any but the box that says Bayer, with the word *genuine* printed in red:

Habit

Arthur Hilton, Mack Sennett's demon cutter, had taken a charming young lady for a ride over his favorite stretch of lonely road. Suddenly she murmured, "This is a regular possum car, isn't it!"

"Possum car? What do you mean by that?" Arthur wanted to know

"Because," sighed the young lady, "it goes dead in such convenient places."

DE FOR SHEEP IN HOT WEATHER

In the sun under a heavy blanket is no more pleasant than for humans. If pas- not have the necessary shade, some cheaply built shelter e sun makes sheep growing rofitable.

ft. S. Curtis, animal husband- the North Carolina State col- ates that shade for sheep is essential as for hogs. While s suffer from heat because of les and physical construction, lso suffer because of the heavy ith which they are covered. It to build a combined corral and tructure where the sheep may ected at night from prowling d from the heat of the noon-

a structure is usually about square with a projecting roof, through the center and sloping sides. The four corner posts ally 3½ feet high and the two posts about 5½ or 6 feet from ound. This is not so material, e shed must not be too low. irculation of air as well as pro- from the sun is desired.

essor Curtis suggests that each end be boarded tightly and in the northern end might be with a removable door. The should be so placed that it struct the morning and after- sunlight. Heavy woven wire the shelter, buried 6 or 8 inches ground will make this shelter or use as a corral.

her suggestion Professor Curtis is to bed down the shelter if il is of a heavy clay. Other- he sheep may get badly soiled. shelter is also a good place in to keep the salt box.

cost of such a building is neg- since the roofing is the most ive part, but they are essential tures where there is not sufli- atural shade.

Feeders Save Time and Labor for Farmers

-feeders for hogs not only save nd labor, but increase gains and re feed. Hogs usually eat less e from a self feeder than they the supplement is hand fed. self-feeders are ideal for feed- inerals. The free choice system ding which allows each hog to e its own ration of corn, tank- d minerals is very sucessful and de most practical by the use of eders.

ther profitable practice is to give pigs grain in addition to their r's milk after they are three old, and that can best be done f-feeders in a pig creep. Shelled is best for them at first, and middlings or shorts, ground oats lled oats can be added, each eparate compartment of the self- . It is very important to keep or little pigs fresh and clean to il scours.

vy Losses Recorded Annually in Marketing

ords show from 85,000 to 105,- gs die annually in transit from g points to terminal markets in country and the number of hogs ed approximates 140,000 to 170,- ead annually. Losses from these sources average around $5 for carload of 70 hogs shipped to t, when figuring dead hogs at per head and cripples at $6. would give a total annual loss e country's hog crop of about ,000.

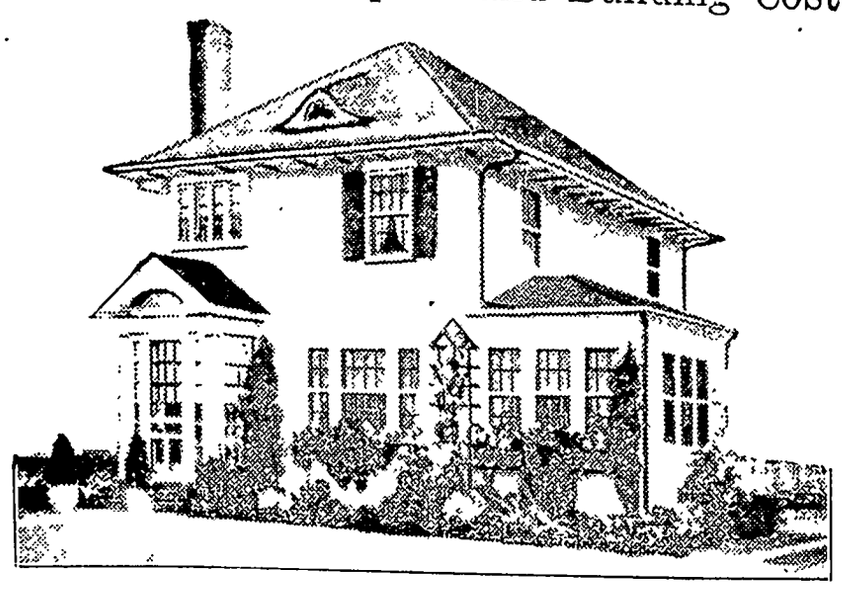
Square Type House Affords Maximum Economy of Space and Building Cost

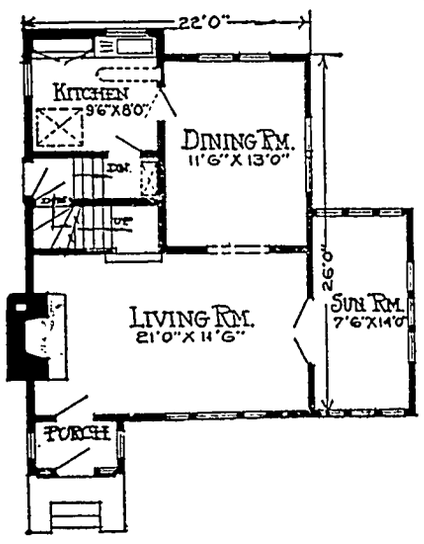


By W. A. RADFORD

Mr William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill, and only inclose two-cent stamp for reply.

The square type of house will always remain the most economical of space and for those who must watch closely to obtain the most for their money it is the best style to adopt. The house shown here is an outstanding example of the utmost utilization of space and may serve as a model even for those who prefer to make their own plans. At the same time nothing has been sacrificed of attractiveness nor comfort in attaining this high degree of compactness.

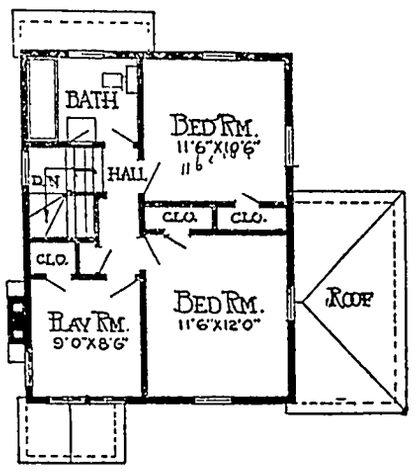
The exterior possesses simplicity, which is in exceedingly good taste for



First Floor Plan.

a house of this size and type. Any tendency toward being too plain is relieved by the handsome entrance, the style of which is highly appropriate, by the eyebrow window in the roof, and is still more by the beautiful treatment of plants and shrubbery.

The front entrance of this house opens directly into the living room, at opposite ends of which are a fireplace and a sun room. The stairway also ascends directly from the living



Second Floor Plan.

room to the second floor. There is an arched doorway between the living room and dining room, and from the latter one passes on to a kitchen of the compact modern type. The service entrance is at the side and is reached from the kitchen through an entry and down three steps. From the service entrance a stair descends to the basement.

Above stairs there are three rooms and bathroom. On the plans, two of these rooms are indicated as bedrooms, while the third is marked playroom. This is done with the idea of providing for a family which requires but two bedrooms, but finds convenience in a room where the children may play as they please without disturbing the rest of the family by their noise. The room could just as well be used as a third bedroom, as a sewing room or for any other purpose for which it might be most useful. All of the upstairs rooms have good-sized closets and there is also a linen closet in the hall at the head of the stairs.

Cubic Foot Price Has Undergone Many Changes

Cubic-foot prices by which architects, appraisers, bankers, builders, estimators, fire insurance adjusters and others calculate building construction and replacement costs, rest this year on somewhat different fundamentals than did those of even six months ago.

At that time a new scale of wages had become generally operative. Building material supply was about equal to demand. Prospective construction work was offered when contractors were exceedingly busy and estimating pencils were not sharpened to the fineness with which they are now.

Instead of those price-making influences, there are today such things as the "temperament of money," importation of European-made materials, the economic benefits beginning to be generally felt from the spreading of building work over all four seasons, contractor competition and the introduction into buildings designed to cater to liberal rent-payers of innovations in appliances and equipment that have been removed from the luxury classification to that of necessities.

For example, they are beginning to install automatic elevators in four and five-story apartment houses in the suburbs that, under previous calculations, were priced as "walkups," on the ground that these buildings will keep fully rented easier than the "stair-climbers."

Cubic-foot prices of today show, perhaps better than any other way, the cost position of building construction in general because they are computed by the highest rated and most experienced builders, as well as by those of recent entry into the low-priced speculative housing field competition.

They show, for one thing at any rate, that a building price turn is taking place, after being long overdue.

The more experience we have in the building business the greater seem to be the surprises as to costs of building from present-day architects' plans and specifications.

Doors Hold Charm

Doors of a house may be the deciding factor that determines whether it shall offer charm or an intangible disappointment. Doors can be attractive and decorative pieces of woodwork.

Heating Equipment

Heat equipment provides a means of increasing the value of the house and every builder should have complete information at hand.

Adequate Home Wiring Is Urged as Economy

The comfort and satisfaction derived from a home is measured by convenience. In a modern home convenience is, to a great extent, a matter of electrical service, and the effectiveness of this service depends on the completeness of the wiring system. Complete wiring is neither complicated nor expensive.

If you are going to build a new home you plan your heating and plumbing systems as units and you make sure that they will be complete. At the same time, you should plan to install a complete electrical system, when it can be done most economically.

A complete wiring system should provide adequate outlets, conveniently controlled, using the best materials throughout and include the following nine essential elements:

1. A safety entrance switch (where the current comes in the house).
2. A safety distribution panel (where the fuses are).
3. A bell-ringing transformer.
4. Code wire.
5. Metal-covered conductors.
6. Metal boxes for light, switch and convenience outlets.
7. A tumbler switch at every doorway.
8. A minimum of one light outlet for every fifty square feet of floor space.
9. A minimum of one convenience outlet for every fifty square feet of floor space.

Stairs Squeak? Some Ways to Stop Noises

Squeaking stairs—and is there anything harder to endure—can be avoided by using well-seasoned wood, by making sure that the underpinning is secure and that the walls adjacent to the stairs are substantially constructed, and by wedging the treads and risers.

Faulty staircase construction does not usually show up until a stairway has been in use, and then it is too late to do anything in the way of stiffening the stair members unless one tears away plaster, lath and finish.

Roof Leaks Often Baffle Best Workmen

A leak once started will often baffle the best of repair men. It keeps getting worse. By and by a large area has to be stripped and reshingled to prevent the leakage that in itself may not cover one square foot. Stopping one leak counts for little, as new ones start operations without warning. Cheap shingles are expensive.

POULTRY

GRAIN AND MASH BEST FOR CHICKS

The Cornell poultry department advocates a combination of scratch grain and mash for feeding young chickens.

During the first four to six weeks, any time between eight and ten o'clock each morning, chicks should be fed enough dry mash to last them until late in the afternoon. Grain should be put before them in the middle of the afternoon, depending on the amount of mash they eat. Both grain and mash should be fed in shallow boxes or troughs.

The grain mixture for this period consists of 40 pounds of cracked wheat and 60 pounds of fine cracked corn. The mush mixture consists of 30 pounds yellow cornmeal, 20 of wheat bran, 15 of flour wheat middlings, 10 of fine ground heavy oats or oat flour, 10 of fine ground meat scrap, 5 of bone meal, 10 of dry milk products, and one-half pound of salt.

For the first four to six weeks, the mash is usually left before the chicks until the grain is fed and the grain is left before them until the mash is fed the following day.

Liquid skim milk is recommended in place of water during the first week. Fine oyster shell may be fed if desired in separate dishes or on the floor. Grit or charcoal are not necessary but may be fed the same as oyster shell.

If liquid skim milk or buttermilk is available as a drink, the dry milk products recommended in the mash mixture should be omitted. If reground heavy oats cannot be obtained for the mash, the cornmeal may be increased from 30 pounds to 40 pounds.

For chicks from six to twelve weeks old a grain mixture consisting of 60 pounds cracked corn and 40 pounds whole wheat is recommended. From twelve weeks to maturity 200 pounds cracked corn, 200 pounds whole wheat and 100 pounds heavy oats are recommended. The same mash mixture as the one on which the chicks are started should be used throughout.

During the first six weeks the chicks should be fed more mash than grain. The second six weeks they should have about equal amounts of mash and grain, and after that more grain than mash.

Spray Solution Kills Mites in Hot Weather

Poultry mites make their first bid for fresh chicken meat in early summer. Sometimes they take the eggs also, or it seems that way because nobody else gets any eggs when they are present in large numbers.

Mites hide in the cracks and crevices of roosts and walls, but do not stay long on the bodies of the fowls. That is different than with lice, which stay on the bodies.

To keep down mites it is best to spray the house before they appear, very thoroughly. Don't wait until the chickens are restless and feverish at night with the attacks of these parasites. Don't presume that your house is clean because it used to be.

Spray well with one gallon of kerosene, one gallon of crude oil or worn-out crank-case oil, four ounces of crude carbolic acid and a half pint of any cresol solution, sheep dip or creolin. Repeat the dose in a few days, and put it on with force enough to reach the hidden places. This solution is a good disinfectant.

Poultry Facts

A box of crushed oyster shell should always be within reach.

* * *

The hen needs a balanced ration, the same as the cow or the man.

* * *

Examine all feed by sight, taste and smell before giving it to baby chicks.

* * *

More little chickens are killed by overfeeding with damp, mushy food than in any other way.

* * *

The roosts should be low, especially for large, heavy fowls, and they should all be of the same height.

* * *

It is said that if alfalfa hay is used for hens' nests and scattered around the chicken coops the chicken mites will beat a hasty retreat.

* * *

Do not go into the poultry business. Grow into it. Start on a small scale and learn the details of the business before you put much capital into it.

* * *

Turkeys, whether sold for breeders at a fancy price or sold to the merchant for Thanksgiving or Christmas trade, should have some special care along about the first of October.

* * *

Eggs may be set after the males have been with the females a week or ten days.

* * *

If one is to market cockerels from the early hatches as broilers they should be placed upon the market as early as possible.

* * *

That the addition of milk to the regular grain ration of growing chicks leads to a greatly increased rate of growth is a conclusion reached by poultry specialists who have studied the matter experimentaly.

Old Timepieces Still Record Passing Hours

Six thousand eight hundred and ninety years of ticking! That's the record established by the contents of four drawers in the wardrobe department of the Paramount studios at Hollywood.

These drawers are given over to ancient watches which are used in the making of pictures. They have been gathered from all parts of the nation during the past 15 years.

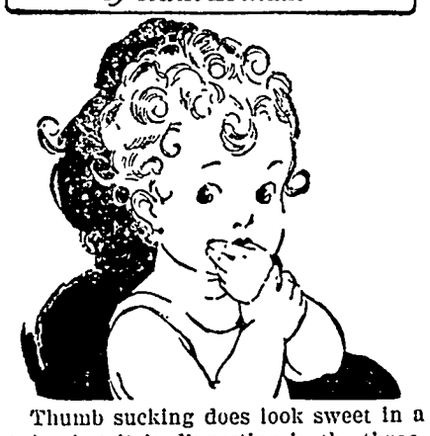
There are 121 of these antiques and all are in perfect working order.

Of men's watches there are 43 silver and 20 gold ones. These are augmented by 42 silver and 10 gold watches for women. The men's collection contains one one hundred fifty years old, six one hundred years old, 17 made more than seventy five years ago, 21 which are sixty years old and 18 used for forty-five years or more.

The two one-hundred-fifty year-old watches are the prizes of the collection. One is a Swiss chatelaine watch worn at the belt.

Cute in a Baby—Awful at Three —and it's Dangerous

by Ruth Brittain



Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

Horrible!

"Do you see that young man over there? He is the black sheep of his family."

"What's wrong with him?"

"Well, it's this way: his father is the man who names the pullman cars and his mother is a famous subtitle writer."

"Is that so?"

"Yes, but the boy has disgraced himself. He names all the new nickel candy bars."

Adding a Word

"Never worry" is a good motto and becomes better if you add "others" to it.

MONARCH
QUALITY FOOD PRODUCTS

set the standard. If you paid a dollar a pound you could not buy better food products than those you find packed under the *Monarch* label.

Splendid Results in Good Health Campaign

No diphtheria deaths in 1927 puts Cambridge, Mass., at the head of the list in diphtheria prevention, of all the cities with populations more than 100,000 in the United States. Only once in the last five years, according to the American Medical association, has any city gone a year without a single death from diphtheria. The previous diphtheria record breaker was Duluth, Minn., in 1925. Seven cities with more than 100,000 inhabitants had no typhoid deaths last year, the medical association's statistics show. New Haven, Conn.; Springfield, Mass.; Yonkers, N. Y.; Paterson, N. J.; Richmand, Va.; Canton, Ohio; Kansas City, Kan., make up the typhoid honor roll, which is the largest known since studies of typhoid death were started in 1913.

No Place for Him

A negro was offered a job feeding sharks.

"Nah, sah, boss, me and sharks ain't friends."

"Why, boy, sharks don't eat black meat."

"Ah know, but it's just mah luck to meet wid one dat's blind."

Any girl who learns to be a good cook will be sure of one thing—oceans of praise.

The easier a man is to approach the harder he is to get away from.

Varicose Veins Reduced *Or Money Back*

Simple Home Treatment That Is Giving Amazing Results.

If you have varicose veins or bunches you can start today to bring them back to normal size, and if you are wise you will do so.

Just get an original bottle of Moone's Emerald Oil at any dispensing pharmacist and apply it night and morning to the enlarged veins. It is very powerful and penetrating.

After a few days' treatment the veins will begin to grow smaller and by regular use will soon reduce to normal.

People who want to reduce varicose veins, or get rid of eczema, ulcers, or piles in a few days should not hesitate to get a bottle at once It is such a powerful, penetrating antiseptic oil that a small bottle lasts a long time. Any pharmacy can supply you

Kill Rats— Without Poison

A New Exterminator that is Absolutely Safe to use Anywhere!

Will not injure human beings, livestock, dogs, cats, poultry, yet is deadly to rats and mice every time.

Poisons are too dangerous

K-R-O does not contain arsenic, phosphorus, barium carbonate or any deadly poison. Made of powdered squill as recommended by the U. S. Dept. of Agriculture in their latest bulletin on "Rat Control."

"One of our good customers just told us he gathered 105 dead rats on his farm from using a 2 ounce package of K-R-O We hear of many finding 30 or 40 rats after using K-R-O, which is highly successful and should please you." Wolgamot's Drug Store, Richwood, O.

75c at your druggist; large size (four times as much) $2.00. Sent postpaid direct from us if dealer cannot supply you. **SOLD ON MONEY-BACK GUARANTEE.** The K-R-O Company, Springfield, Ohio.

News of Klemme and Vicinity

Dr. R. W. Specht, Dentist, Garner, Iowa. adv

Fred Kluckhohn and "Dutch" Turgasen were Mason City business visitors Monday afternoon.

Fred Becker is having his farm home and buildings repainted. Geo. Lawhorn is the painter on the job.

Mr. and Mrs. Emory Schaefer and baby and Geraldine Smid, were Mason City visitors Friday.

C. J. Papousek of Belmond, and E. F. Jacobs were at Clear Lake on business Monday afternoon.

Mrs. Edgar N. Zinn and daughter Miss Marjorie, of Fort Dodge, called on Dr. George Zinn Friday.

Miss Hulda Johnson has had her vacation extended another week and will remain here until July 18.

Zola Hartzell and Betty Jane Hartzell of Britt are here visiting at the Paul Stille home.

Zelda Conklin of Goodell is here visiting for a few days with Mrs. Sumner Trumbell

Mrs. Worthy Usher came from Rowan Monday for a few days visit at the T. Blank home.

Miss Marie Gauger returned Friday from several weeks visit with her aunt at Charles City.

The interior of Wilson's Pharmacy is being repaired and refinished. George Lawhorn is the painter on the job.

Mr and Mrs. Fred Barz entertained, Friday, to dinner all of the Barz families in this vicinity and the relatives from Dakota.

Mrs Nettie Wade and children returned Sunday to Clarion, after visiting at the Geo. Ulrich home for a number of days.

Mrs H A. Smith, Dorothy and Garner, and Miss Mildred Gype, of Spencer, were guests at the P W Johnson home Sunday.

Mr. and Mrs. Wm. Smith, Mrs. J. N. Day and Dorance, and Byrnes Missman were Mason City visitors Friday afternoon.

Franklin Kluckhohn was ten years old Tuesday. He wishes that he was twelve so he could join the Boy Scouts It won't be long now, Tiny!

Mr and Mrs Will Kirkwood and Mr and Mrs. Emil Krause and Arone drove to Des Moines Saturday evening and spent Sunday visiting at the T. C. Wooten home.

Mr and Mrs. R. A. Jorgenson and Buster, accompanied by Donald Turgasen and Wm. Gauger, drove to Mason City Friday morning to get the latter boys fitted out in new scout uniforms.

Emil Patet and George Lawhorn are going to repaint the Klemme school house We understand Emil will do the artistic finishing on the interior and George will do his stuff on the outside.

Miss Marie Blank took her Camp Fire Girls to Clear Lake Monday morning for a three days outing at a cottage. The girls had a wonderful time and are considerably tanned up.

Mayor Paul Grange and family, accompanied by Miss Leona Lau, Alvin Keeper and Wayne Pavey, were Mason City visitors Friday a. m. Wayne and Alvin bought new Scout uniforms.

Sometime ago The Times mentioned that Mr. and Mrs. Chris Jacobs of Garner, and their daughter, Mrs. C. J. Papousek, of Belmond, were making an auto tour through the Blacks Hills and Yellowstone. We are sorry to report that the party met with an auto accident and were forced to be inmates at a Rapid City hospital for a few days. The details of the accident are meager but we gather than none were seriously injured and by this time are enjoying the beautiful scenery. The accident, we understand, happened when a large truck "hogged" the road, forcing the Jacobs car to take the course of hitting the truck or a cement culvert; Chris choosing the latter as the lesser of the two evils, damaging the front of his car and the occupants receiving a few cuts and bruises.

Visitors at the home of Mr. and Mrs. Sumner Trumbell this week are Bruce McMurtrie and Bert Smith of Pennsylvania, and Mr. Trumbell's aunt, Mrs. Hall and children, of Chicago, who came Sunday.

Bennie Schaefer was ten years old Tuesday, and in honor of the event his mother planned a surprise party for him and invited in a number of boys for lunch and all played games in the park in the evening. A fine time was enjoyed by all.

Mr. and Mrs. Clarence Kluckhohn and children, and their Indiana guests, Mr. and Mrs. James Stephenatas and children, drove to West Bend, Sunday, where they enjoyed a picnic dinner and visited the Grotto.

Mr. and Mrs. Henry (Butch) Schroeder drove in Friday night in time for supper, and to visit for a week with Klemme relatives and friends. They left Chicago the day before the Fourth and "Butch" worked his territory on the way out to Klemme.

Rev. C. Grosshuesch and family, and Miss Adella Kuhlmann returned Saturday from Meno, South Dakota where they had been visiting relatives and friends. They left Meno at 2:00 a. m. and got into the old home town here at 11:00 a. m. The Reverend's new Ford is "some stepper."

Mr and Mrs. J. C. Thomas and Irene Harms left July 4th for an auto trip and vacation in northern Minnesota. Miss Harms stopped at Hinkley for a visit, but Jimmie and his wife headed the trusty Ford toward the wild country further north L. H. Suckow is in charge of the Thomas Barber Shop during Jim's absence.

Miss Marie Gauger of this city, and Miss Myrle Gast, of Garner will leave Sunday for Shenandoah, Iowa where they will join the special party on an eastern sight seeing trip the trip takes them by rail to the Niagra Falls, Buffalo and other cities of interest and a trip into Canada. Side trips have been arranged for the party, both on buses and boats The young ladies will no doubt have a wonderful trip.

Mr. and Mrs. C. F. Keraus entertained a large number of relatives for a picnic dinner on their lawn Sunday. There were twenty-seven people present who sat down at the long picnic table for dinner. Those present were Mr. and Mrs. T. F. Mitchell, of Swea City; Mr. and Mrs. C. G. Waterman and Marian; Mrs. Mary Waterman, and relatives from Geneva and Iowa Falls.

Artaur Wellemeyer enjoyed an over Sunday visit from his three brothers, Carl, of Colesburg, Iowa; Fletcher, of Kansas City, Kan.; and Ennest of Patterson, California. They had been visiting with their sister, Ruth Wellemeyer Melcher at Charles City. Junior Fletcher Wellemeyer, who had been visiting in Klemme for a week, returned home with his father to Kansas City.

Stanley, five year old son of Mr. and Mrs. Ralph Ludeke received a rather severe injury Monday morning. Mr. Ludeke and his young son were driving on the highway with a team and wagon, when the team became excited by a hay rake in operation along the ditch. Mr. Ludeke was getting the team under control when a large sedan from Winnebago county approached from the rear, striking the Mr. Ludeke's wagon, throwing Stanley out on his head onto to hard gravel road. The car overturned in the ditch, but no one was very badly injured in the mix up We understand that the little boy is making a good recovery from his accident.

Friday evening Mr. and Mrs. Frank Kluckhohn entertained all of the Kluckhohn relatives here in honor of James Stephenatas and family of Indiana, and Miss Dorothy Blinn, of Ames, who are here visiting. A long table was set on the Kluckhohn yard and a fine dinner enjoyed. The following were entertained for dinner and the evening by Mr. and Mrs. Frank Kluckhohn: Mrs. G. W. Kluckhohn, Mrs. Sallie Turgasen and sons, Vernon and Donald, and their guest, Miss Blinn; Mr. and Mrs. Fred Kluckhohn and daughter, Thelma; Mr. and Mrs. Clarence Kluckhohn and sons, Clarence and Eugene and their guests, Mr. and Mrs. James Stephenatas and children.

Threshing Coal - -

—AND OTHER SUPPLIES YOU MAY NEED NOW OR SOON

We will have plenty of high grade coal on hand especially for threshing. We have three car loads on the way now, due to arrive before threshing. Let us take care of your wants in high grade threshing coal.

COAL FOR RANGES

For your cooking range we recommend that you try our Illinois Egg, especially fine for summer cooking.

ABOUT POULTRY FEEDS

We have a lot of satisfied customers who have fine luck with our MOR-GAIN Starter and growing mash. And by the big orders we sell it certainly must be good. We ask you to try MOR-GAIN.

MAKE YOUR HOGS PAY!

You can make more money, and do it quicker by feeding your Hogs MOR-GAIN PIG MEAL. Klemme farmers report fine results since they began using it. We are selling a lot of it every day and aim to carry plenty on hand.

Try our Occident and Mothers Best Flour—none better regardless of price.

OR AND FAMILY TAKE A WEEK END TRIP

aska's Eight Million Dollar Capitol Nearing Completion

Editor, Mrs. Jorgenson and Buster, got up real early last sday morning and headed the ly Essex southwest, with Lin-, Nebraska as the goal for the s drive. We left Klemme at a. m and arrived at our des- tion at exactly noon; not a bad ning's drive of 323 miles. ith the exception of a short de- near Woodbine, Iowa, the en- distance is now all gravel and ximately 100 miles of paving. detour will soon be opened and one short gap in the paved road pleted.

e have had many inquiries as e crop situation and this phase r trip will be of interest to our er readers.

ll the way along we found the and small grain looking the we have seen it in years. The in this vicinity compares very rably with Nebraska corn this . The Nebraska corn is just a behind the normal year, due to te spring, and this fact brings orth Iowa corn on a par this with parts of Nebraska. Al gh in the "Iowa Corn Belt," h is in the vicinity of Rockwell we saw corn in the tassel and a few field setting ears We sold several fields near Coun- Bluffs, and between Omaha and oln which were beginning to out. However, this was the ex- ion and not the rule.

hen we went down Thursday saw no grain cut until we came Dennison From that point on aw field here and there all the to Lincoln which were being On the return trip we saw s all the way along being cut. terrific wind-storm all the way Rockwell City to Council fs early on the morning of July caused some crop damage and sands of trees were up-rooted g this path and a few small dings

mming up the crops we can that North Iowa crops are as as any we have seen this year. ur trip of course, was made to Mrs. Jorgenson's parents, Mr. Mrs. Titus Davis, and her sister family at Lincoln, and with ds there. We also stopped for hort visit with her brother and at Council Bluffs.

The Nebraska Capitol Building

s on previous trips, we again ed the new eight million dollar tol building in Lincoln, to see the work was progressing. The ding is about 460 feet square, is so constructed that each has outside light, opening in- court in the center and from center a tower, over four hun- feet in height is being erected. he capitol is yet far from being pleted and two or three years e, at least will be required to h it thru-out. However, the building already houses all of state offices and business is in swing in each department. every way the building will be torical monument to Nebraska, istory has been incorporated in- s building, such as each county e occupies a place on the outer , all of the carvings and decor- s deal with the history of the , such as scenes of the covered on, buffalos, Indians, etc. he interior is very beautiful in departments. Especially beauti- is the Governor's Repeception in which Mural paintings dec- e the walls and celigns, the Su- e Court Room which has a ceil- hand-carved and inlaid and was e in Italy. The Mosaic pave- t in the main corridor of the ding depicts Nebraska scenes was made in New York. All sculptured work was done right the capitol building. Many of finest pillars came from Italy. ther beautiful room is the Sen- ate Chamber which has paintings and other art work representing the Indians of Nebraska.

Other interesting places we drove by was Gen Pershing's home, the Wm. J Bryan home, and out on some of the beautiful drives.

We again left Lincoln Monday a. m. at 9:30 o'clock at which time Mrs. Jorgenson's mother was ill but was not considered as anything very serious.

On our return trip we stopped at Dennison, Iowa, where we looked up Carl Heiden, coach of the Klemme schools, who we found at home working around the yard. We had a fine visit with him, his mother and sister. Mr. Heiden expected to get his new Ford this week and plans a trip to Klemme. He will also go with his mother and sister on a trip through Wisconsin. Mr. Heiden says he is "all set" to begin school in the fall and wants us to tell everybody hello, for him

The trip had been fine but was not ended so pleasant, as when we arrived in Klemme a long distance telephone call awaited us and we were informed that Mrs. Jorgenson's mother had become suddenly and seriously ill during the afternoon and that night Mrs. Jorgenson accompanied by her sister, Mrs. L. Liebendorfer, of Mason City, left on a train for Lincoln to be with their mother. A letter from Mrs. Jorgenson says that her mother is at this time holding her own, but is in a critical condition with heart trouble.

BAYSIDE BATHING BEACH HAS BEEN IMPROVED

The bathing beach at Bayside at Clear Lake has been greatly improved the past week The entire beach has been raked and cleaned, new equipment has ben installed and another elevated diving board has also been erected. The new diving board stands 15 feet above the water. The Bayside beach has the only toboggan slide on the lake as the one on the north shore is not being operated this season. Howard Sage, instructor of swimming and life saver, has been employed by the Bayside operator, Mr. Ritz, and he is at the beach daily. A part of the lake front has been roped off for the use of the children and posts have been set in at various places to show the depth of the water. The Bayside beach is now in excellent condition and no doubt the finest on Clear Lake. Several hundred new bathing suits were purchased this spring for the use of bathers. Next Sunday, July 22nd, Cedar Falls will meet the Bayside Cubs on the Bayside ball diamond at three o'clock. Cedar Falls beat the Cubs on July 4th, and that is the only game the Bayside nine has lost so far this season Dances are now being held at the Park every Wednesday and Friday night. Clate Thompson and his Templar Park Crusaders of Des Moines are supplying the music.

MARRIAGE LICENSES ISSUED THIS MONTH

Following are recent marriage licenses issued at the Clerk's office in Garner:

Wayne L. Patrich, Michigan, and Bertha Hanson, Britt.

James Elvin Shelton, Klemme, and Elizabeth M. Freerksen, Klemme.

Lloyd M. Carpenter, Klemme, and Lenora Irene Shelton, Klemme.

Robert Call, Decorah, and Edith Jensen, Tipton.

4-H CLUB ENJOYING WEEK-END OUTING AT CLEAR LAKE

The second 4-H Club Camp is being held at the Odd Fellows grounds at Clear Lake this week from the evening of July 18 to noon July 21.

4-H Club Girls from Hancock, Cerro Gordo and Worth Counties are attending this camp. Special work is given on club demonstrations, and those entering will receive special training during camp. Various amusements, such as boating, and swimming are being enjoyed.

Send in your news items or call us on the phone. We want the news and are glad to have your co-operation. Times Office.

CLINIC WILL BE HELD IN THIS COUNTY ONE DAY

Is Sponsored By The Hancock-Winnebago Medical Society

A tuberculosis and heart clinic will be held at Garner, Iowa, on Friday, July 27, 1928.

The clinic is under the auspices of the Hancock-Winnebago County Medical Society. Dr. H. E. Earl the president, and Dr. G. E. Snearly, secretary, have notified the members of the Medical Society that this clinc will constitute a program for a regular county meeting

Well qualified specialists on tuberculosis and heart disease will be in charge of the examinations and will speak to the County Medical Society on these subjects from two to four Friday.

Patients may have the benefit of this consultation only by making application to their family physician.

This clinic is paid for by the local Christmas Seal committee and the Iowa Tuberculosis Association

CENTRAL STATES ELECTRIC CO. HAS NEW DEPARTMENT

P. A. Stover Directs Engineering Staff For The Company

CENTRAL STATES ELECTRIC COMPANY ANNOUNCES the organization of a Department of Industrial Engineering under the direction of Mr. P A Stover, one of the engineering staff of the Company.

The purpose of the organization of this Department is to secure the fullest development of the existing industries within the territory served by the Company, aid in every way in securing the location of new industries and advise the customers as to the most economical installation for electric drive, changes in existing equipment which can be made to get more efficient operation and reduce the power bill, and what additional uses of electricity the customer can advantageously make.

This department has been functioning about sixty days and the results have proven its worth and justified its creation.

Last week the local managers with Mr. Stover's assistance closed the following business:

Crystal Lake, Creamery, 7½ horsepower.

Britt, Produce Company 10 h. p

Garner, Oil Company, 3 horsepower.

Garner, Meat Market, 3 horsepower.

Wallingford, Creamery, 15 horsepower.

Popejoy, Creamery 7½ horsepower.

Iowa Falls, Oil Company, 3 horse power.

Jewell, Produce Company, 3 h. p.

The Department becomes more important with the installation of the new Worthington 600 Horsepower engine at Armstrong, and the completion of the 4250 Horsepower turbine at the Iowa Falls plant. The Company will be in a position to furnish ample power at prices satisfactory to all concerned desiring to locate factories in Central States Electric Company territory.

The service of the Department is rendered entirely at the expense of the Company and without expense to th customer AND IS FOR THE BENEFIT OF THE CUSTOMER as well as the Company.

Mr. Stover is exclusively an Iowa product, born and raised in Marengo, Iowa, educated at the State University at Iowa City, receiving the degrees of B. E. and E. E. He married a girl born and raised in Iowa, and knows the phsychology of the Iowa citizen.

Our customers should let Mr. Stover know their troubles susceptible of solution or betterment by power engineering. Remember the service is free. His address is care of the Company, Cedar Rapids, Iowa.

CENTRAL STATES ELECTRIC COMPANY 1tc

SPECIAL WEEK-END SHOW AT THE IDLE HOUR

Auxiliary Ladies Will Put On Home Talent With Feature Picture

Friday and Saturday nights are to be something more than the ordinary at the Idle Hour Theatre, as the Auxiliary ladies have planned a big added special for those nights.

They have secured "The Lone Eagle," a six reel feature and one of the best airplane pictures of the season. Along with this they are putting on a two reel comedy—but the big feature on the evening's program is "The Family Album." If you don't want to laugh, don't come, as this is going to be GOOD!

When the Auxiliary ladies do something, they do it up right, so we will vouch for the entertainment Friday and Saturday nights. The first show is at 7:30 o'clock and the home talent follows the first show.

FAMILY GATHERING HELD AT C. E. JOHNSON HOME

Sunday Mr. and Mrs. Clarence E. Johnson entertained a large number of people at their home east of Klemme, as a family gathering in honor of Miss Hulda Johnson, of Los Angeles, Calif., who is here on a vacation and visit.

The following guests were present: Mr. and Mrs. Joe E. Johnson and family; Mr. and Mrs. John Johnson and family; Mr. and Mrs. George Johnson and family; Mr. and Mrs. Arthur Kudje and family; Mr. and Mrs. A D. Gimer and family; and Mr. L. G. Gimer.

The day was spent in visiting and partaking of the delicious refreshments provided by the hostess. Everyone present expressed their unanimous opinion that Mrs Johnson was rated as an A-No. 1 cook.

All report they had a fine time.

CAMP FRE GIRLS STAGE PARTY ON GRACKA QUANDT

A surprise party was given last Thursday evening in honor of Miss Gracka Quandt at the home of Miss Marie Blank, and which was attended by the Klemme Camp Fire Girls. Delicious refreshments were served and all enjoyed a fine time.

Odorous Onion Liked by All World Races

Onions seem to be almost as old as the hills. They are mentioned in the Bible as one of the things longed for by the Israelites in the wilderness and complained about to Moses. Herodotus says that in his time there was an inscription on the Great Pyramid stating the sum expended for onions, radishes, and garlic, which had been consumed by the laborers during its erection, as 1,600 talents. Ancient pictures show priests holding onions in their hands at the altar.

Early explorers, including Columbus, brought onion seed to the New world. New Englanders were raising them as early as 1634, and General Sullivan, in 1779, in his raid against the Indians in central New York, destroyed many onion fields belonging to the savages. Nineteen states now produce large commercial crops of onions. Texas scents up the whole Gulf of Mexico and the eastern side of the Atlantic with her onion-laden vessels bound for New York.—Peter R. Sterling in National Republic Magazine.

Weather Has Little Influence on Tides

Contrary to popular belief, especially that long cherished by many seamen, tides do not exert any influence on the weather, according to meteorologists of the weather bureau, United States Department of Agriculture.

As a matter of fact, close observers have discovered that certain extreme weather conditions affect the tides to some extent. Tides ebb and flow at every point on the coast with clocklike regularity. Nevertheless, the weather continues to be fair or foul, irrespective of those tides. On the other hand, conditions of very low barometric pressure and very strong winds from favorable directions cause either unusually low or unusually high tides, as the case may be. This is the influence of the weather on the tides, and the weather is not the result of any tidal influence.

Even when there is, as meteorologists understand, a very insignificant outflow of air from a region into which the tide is rising, or a corresponding inflow of air as the tide subsides, this does not constitute a significant feature of the weather.

In Bad Company

When a vote is to be taken on some important measure a congressman who cannot be present "pairs" himself with some representative who would vote "aye" to the congressman's "nay," or vice versa.

Once a Democratic member of the house received a letter from an active politician of that party in his district, calling attention to the fact that he was reported in the Congressional Record almost every day as being "paired" with a Republican.

"I don't doubt your loyalty to the party," read the letter, "but I think the boys would like it a good deal better if you paired with Democrats instead of Republicans."—Harper's Magazine.

Pressing Business

"I want to speak to Mr. Jones," said the voice over the wire.

"I'm sorry, sir, but Mr. Jones is in conference," the private secretary replied sweetly.

And at the same moment Mr. Jones was in deep conference with a friend at Merchant and Bishop streets. He declared, very confidentially and not for publication:

"Yeah, it's sure wonderful how quick they can dig a big hole in the ground like that. I see they're putting in the foundation already. Wonder how they are going to get rid of that water, though?"—Honolulu Star-Bulletin.

Almond Raising

Almonds comprise the most important crop of the island of Majorca, where many varieties are cultivated, and the industry is so prosperous that as old olive trees die they are replaced by almonds.

When the almonds are almost ripe they are knocked off the branches by long bamboo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by hand or machinery and the kernels extracted.

Think for Yourself

Don't be too much impressed by what your neighbor is thinking and doing. Democracy doesn't mean that men shall be like bricks in a wall, all the same size, shape and color. Don't let anybody else make your opinions for you. Don't be standardized. The world is full of all kinds of standardization now. Be as near right about your opinions and your acts as you know how. Don't waste your time by looking over the wall into your neighbor's dooryard.—Grove Paterson, in the Mobile Register.

STATE AGENTS RAI KLEMME & GARNER

SIX MEN NABBED IN SATURDAY MORNING LIQUOR RAIDS

Eight State Prohibition Men Make Hauls In East Hancock County

Eight Special Agents from the State Department raided, the east half part of Hancock County early Saturday morning which resulted in the capture of a quantity of alleged illegal liquor and the arrest of four Garner men and two Klemme violators.

At Garner the state agents made raids on the "Bill" Ziesmer pool hall and the Paulson & Zeismer pool hall; the Jim Denny residence and the H. L. Lawhorn home.

Returns on the search warrants, on record in Justice H. L. Suckow's court at Klemme show that nothing was found at the Jim Denny home, but that on W. C. Ziesmer the returns show an eight-ounce bottle and a pocket flask containing about six ounces of alcohol were found. In searching the business place of Ed. Ziesmer the returns show that four pints of alcohol were found in the basement. No return of findings on search worrant in case of Nels Paulson is of record in the justice court. At the Hod Lawhorn place where a small quantity of liquor was found in a kitchen cabinet, Mr. Lawhorn later proved that this was for medicinal purposes and he was released from charges.

The Garner men were brought before Justice Suckow and W. C. and Ed. Ziesmer placed under $1,000 bonds and Paulson under $800 and all bound over to the grand jury.

Two arrests were made at Klemme, following the raids at Garner. Irwin Schwartz was placed under arrest for an alleged sale of liquor to State Agent H. H. Spreckler. Schwartz was placed under a $1,000 bond and bound over to the grand jury.

The raid which netted the biggest haul took place at the Alec Groh place five miles south east of Klemme. At Groh's the agents found a round still, 8-gallon capacity, cooler and coils complete, 5 gallon keg of moonshine, one 3-gallon jar of the same fluid, two 2-gallon jugs of moonshine and ½-gallon jug and one quart of moonshine, and a 50-gallon barrel of mash. Groh was likewise brought before Suckow and placed under $1,000 bond and was bound over pending the action of the grand jury.

The raid at the Groh farm was lead by State Agent Roy Scott.

It is said that the State Agents had men in his part of the county for some time, laying out plans and locating liquor violators.

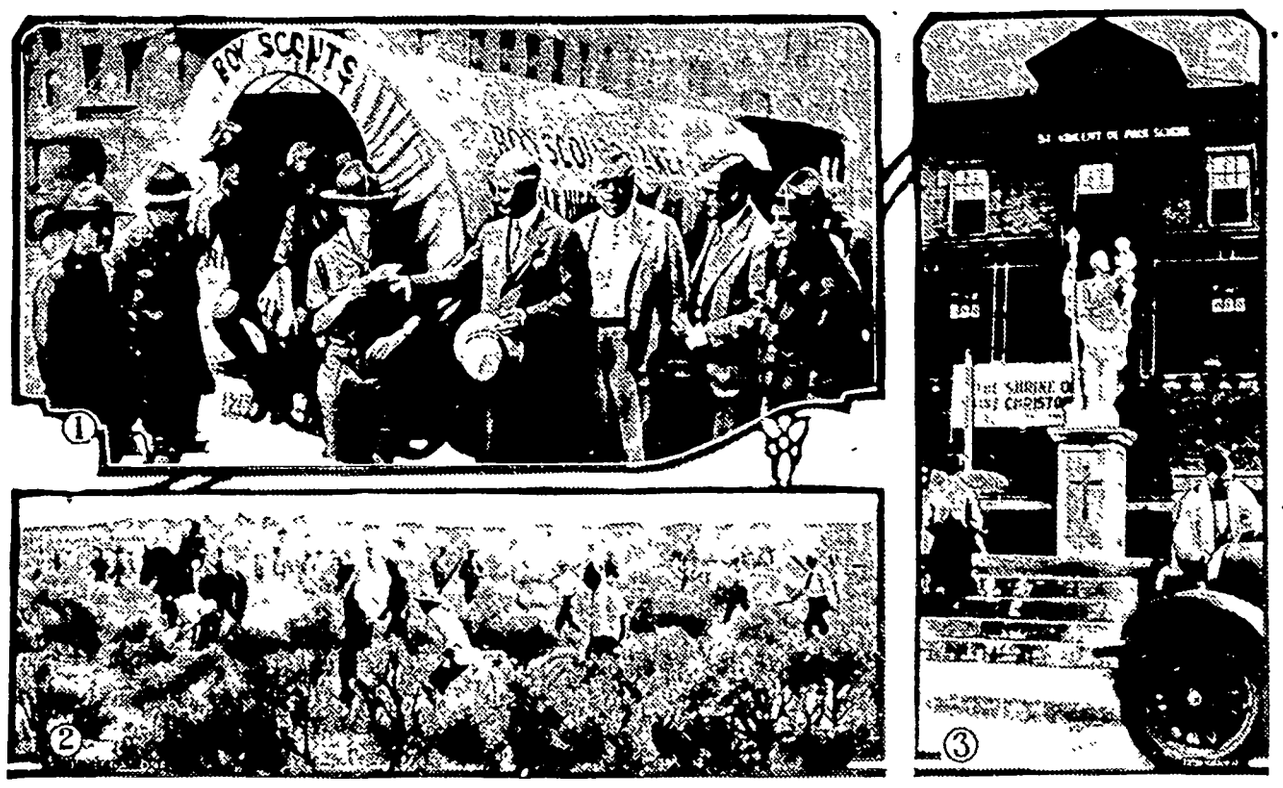
METHODIST CHURCH NOTES

A. W. Gauger, Pastor

We were glad to have so many strangers in our services last Sunday. We were more glad that our own people and friends were present in such splendid numbers to spend the hour of worship together. All need these services as a stimulus, especially during this hot weather and busy season of the year.

Our Bible Story-telling contest brought out a goodly number who were interested in the several contestants. All participants did well and their efforts were greatly appreciated by the audience. This is work that is worth while, and we hope that the story-telling contest may become a permanent event.

On next Sunday morning the pastor will preach the first of a series of sermons on Church-going. The subject next Sunday will be: "Why I do not go to church." This will be followed by other subjects as announced later. On Sunday evening our subject will be: "The man who got his price." He evaluates all life commercially—he places the $ sign before everything. Who is he? This is a character study of one of the men of the Bible. Opportunity will be given those present at the beginning to state who he is.



1—Four Boy Scouts leaving New York in "covered wagon" auto to post markers on Lincoln Highway to San Francisco. 2—Great rabbit drive conducted by the ranchers of Antelope Valley, California. 3—America's first wayside shrine for autoists, erected in Sedamsville, near Cincinnati, by Rev. W. P. O'Conner, former national chaplain of the American Legion.

NEWS REVIEW OF CURRENT EVENTS

Smith Selects J. J. Raskob, Big Business Man, as National Chairman.

By EDWARD W. PICKARD.

JOHN J. RASKOB, head of the finance committee of the General Motors corporation and a resident of Delaware, was elected chairman of the Democratic national committee at the behest of Gov. Al Smith. He is an active Catholic and has given much money to the church and to the anti-prohibition cause, but the Presidential candidate made it plain that he selected him to conduct the campaign not for these reasons but because he is a big business man.

In accepting the chairmanship Mr. Raskob declared there should be no mud-slinging and no pussy-footing in the campaign on the part of the Democrats, and he was surprisingly outspoken as to the wet and dry issue.

"Governor Smith," he said, "as President of these United States, with all the resources then at his command, will be able to give the people of the United States a picture of the real social conditions under the present so-called prohibition laws.

"If, as a result of careful study, he can evolve a plan for the regulation and control of the liquor question in a way that will absolutely prevent the return of the saloon, eliminate bootlegging, with its accompanying evils—graft, corruption, and murder—and restore temperate life in our country, then all fair-minded men must admit his right, if not his duty, as President to promulgate such plan and to advocate such changes in our laws and Constitution as may be necessary for its adoption. This is leadership—not pussy-footing.

"Mud-slinging always makes more enemies than friends. I should like to pledge every speaker and worker for our cause to constructive policies.

"In our business life today we succeed by constructive work and by having better goods to sell than our competitors. There is every reason why the Democratic party should follow this constructive business policy in this campaign. This is our job. Let others sling the mud."

Col. Herbert P. Lehman, New York banker, succeeded Jesse Jones as chairman of the finance committee of the national committee. James W. Gerard and Charles A. Greathouse were re-elected treasurer and secretary respectively. Raskob was authorized to appoint an advisory campaign committee and selected as chairman of that body Senator Peter Gerry of Rhode Island, who had rather expected to be made chairman of the national committee. The five national vice chairmen chosen were: Frank Hague of New Jersey, Gov. Harry Byrd of Virginia, former Congressman Scott Ferris of Oklahoma, former Gov. Mrs. Nellie Tayloe Ross of Wyoming, and Mrs. Florence G. Farley of Kansas. It was decided that main headquarters should be in New York city, but that Governor Byrd should have special headquarters in Richmond, since the campaign in Virginia is expected to be quite important.

THOUGH Al Smith, in conference with his running mate, Senator Robinson, declared that if he were elected the first thing he would do would be to start on plans for relief of the farmers, the Farmer-Labor party, in national convention in Chicago, was not won over to his support. Instead it selected as its candidate for the President Senator George W. Norris of Nebraska. The choice was made on the third ballot, which was 16 for Norris and 14 for Norman Thomas, nominee of the Socialist. Will Vereen of Moultrie, Ga., wealthy cotton mill owner, was nominated for vice president. Both Norris and Vereen said they would not accept the nomination.

The Prohibition party convention, also held in Chicago, nominated William F. Varney of Rockville Center, N. Y., for President and James A. Edgerton of Alexandria, Va., for second place. An attempt to stampede the convention for Hoover failed, but the Republican candidate received 45 votes on the deciding ballot.

HERBERT HOOVER, who already has sent to President Coolidge his resignation as secretary of commerce, left Washington Saturday for the West. On the way he held conferences with party leaders of several sections, and he spent Sunday afternoon with Vice President Dawes in Evanston, considering the difficulties that confront the Illinois Republicans, due largely to the wet sentiment in Chicago and Cook county. Mr. Hoover's further plans included a two-days' visit with President and Mrs. Coolidge on the Brule river in Wisconsin and continuation of his trip to California, with a brief stop in Omaha. The notification ceremony is now scheduled for August 11 at Leland Stanford university, and at that time, Mr. Hoover says, he will outline his position on farm relief. Senator Curtis is to be notified of his nomination for the vice presidency on the evening of August 10 at his home in Topeka, Kan.

National Chairman Work, in reorganizing the party machinery, is arranging to give more authority than ever before to the national committeemen and state organizations. Senator Moses of New Hampshire has been appointed "contact man" for the ticket in the northeastern seaboard states and, as Chairman Work explained, will undertake "the organization and direction of the service of plan and policy for the eastern campaign."

WHEN the dirigible Italia met with disaster in the polar region three of the survivors, Dr. Finn Malmgren, meteorologist; Capt. Alberto Mariano, pilot, and Capt. Filippo Zappi, navigator, started on foot in an effort to reach the mainland. Wednesday of last week, 42 days later, a Russian aviator discovered the little party on the ice floes, but was unable to land. Next day the Russian icebreaker Krassin reached the group and rescued Marlane and Zappi, but found that Malmgren had been dead about a month, his body having been carried along by his half-frozen and starving companions. The icebreaker, as soon as it had rescued the two Italians, again turned its prow toward the east and a few hours later reached and rescued the five men who had been left by Nobile near Foyn island.

AMONG the half-dozen victims of airplane accidents during the week was Morris Titterington, inventor of the earth inductor compass which Lindbergh used on his transatlantic flight and of other safety devices for airplanes. He and Mrs. Patricia Andrews, a pupil, were killed when their plane crashed near Snyders, Pa., in a storm.

Despite the various stories to the effect that Captain Loewenstein landed alive in some way or another from his plane and is in hiding, the Belgian court that investigated the case decided that the famous Belgian financier really fell into the sea and is dead. The insurance companies refused to pay until proof of death was given and the capitalist's family stationed boats along both coasts of the English channel to get the body if it was washed ashore. In London it is believed Loewenstein's disappearance is either a fake or suicide.

Countess Brandenstein, daughter of Count Zeppelin, christened the world's largest airship, named after her father, at Friedrichshafen, Germany, and it was announced that the huge dirigible would make three trips to the United States this year.

ONE of the worst sea disasters of recent years occurred off the coast of south Chile when the Chilean army transport Angamos struck a rock after losing her rudder in a storm and speedily sank. More than three hundred lives were lost, the list of victims including a number of political dignitaries. The other passengers were laborers and their families on their way to the nitrate fields in northern Chile. The crew numbered 215. Lifeboats were smashed by the heavy seas as fast as they were launched and only a few persons were washed ashore alive. The captain shot himself on his bridge.

The schooner Rofa, one of the entrants in a race across the Atlantic, ran into rough weather and lost her masts when about 800 miles out. The six members of the crew, including Capt. William Boos of Pelham Manor, the owner, and Mrs. Boos, were picked up by the oil tanker Tuscarora and brought back to New York. An attempt to tow the schooner in failed and she was abandoned.

SECRETARY KELLOGG'S proposed pact to outlaw war is well on its way to acceptance by all the powers to which it was submitted. Germany has already sent a favorable reply, and last week the French ministerial council authorized Foreign Minister Briand to notify Mr. Kellogg of France's unconditional acceptance of the treaty in its present form, since his revised suggestions showed a considerate interpretation of France's reservations in respect to her connection with the Locarno pact and the League of Nations. This action followed a parley in Geneva by Sir Cecil Hurst, M. Fromageot and Herr Gauss, representing, respectively, Great Britain, France and Germany.

Another conference in Geneva, held under the auspices of the League of Nations, agreed upon the general abolishment of trade restrictions, with a few exceptions. An American delegation was present but there is no indication that the United States will consent to abolish its tariff.

HOSTILITIES between Paraguay and Bolivia are said to be imminent following the breakdown of negotiations for a peaceful settlement of the boundary dispute by a commission that has been sitting in Buenos Aires for some time. It was reported that a virtual state of war existed on the frontier, to which Bolivian troops had been sent. Failure of the negotiations was due to Bolivia's refusal to dismantle the forts in the disputed zone.

LEADERS of the Chinese Nationalists held an eight-day conference in Nanking with 150 provincial officials, and proposals looking to the complete governmental and financial unification of China were adopted. These include detailed regulations, seeking improvement of the country's financial administration, elimination of graft, increased authority for the finance ministry, and other regulations looking to the development of China's resources and trade.

INVESTIGATION of Republican patronage in Georgia, conducted by a senate subcommittee, revealed that postmasters, whether Republican or Democratic, had been in the habit of contributing from their salaries to the Republican state party fund. Some of the witnesses more than intimated that they were virtually compelled to make the contributions, while others said the money was not "demanded" but that they were told the gift of 5 per cent of the salary was customary. In Mississippi a federal grand jury is inquiring into Republican methods of distributing federal patronage and about two hundred postmasters assembled in Biloxi to give evidence.

INCREASING speculation in stocks in Wall street is causing the federal reserve board a lot of worry and some method of checking it and averting a great crash is being sought. Last week a step in that direction was taken when the Chicago and New York Federal Reserve banks increased the rediscount rate from 4½ to 5 per cent. It was expected this example would be followed by the other reserve banks. The Chicago action resulted in a wild break in prices on the New York exchange, declines ranging from 1 to 18 points, wiping out millions of paper profits.

Charles E. Mitchell, president of the National City bank of New York, in a recent warning said that the heavy borrowing of the banks through rediscounting and their relending of the money on stock and bond collateral, which is not rediscountable at the reserve banks, are reducing the liquidity of the banks and creating a situation which, if not actually dangerous, reflects a trend that is unfortunate.

ELKS, in national convention in Miami, Fla., elected Murray Hulbert of New York as grand exalted ruler for the ensuing year. They voted to establish a $20,000,000 trust fund for use in charitable, educational and benevolent enterprises. It will be known as the Elks' national foundation.

ROADSIDE DRIVER LATEST IN MAINE

Licenses Are to Be Distributed to All School Children in State.

With the front seat and the back seat drivers sending up the auto casualty list in the state of Maine, something had to be done, so now we have the "roadside driver" as a safety measure.

And the roadside drivers of Maine are the children. Before a large group of school children gathered at the office of the secretary of state, Charles and Owen Brewster, young sons of Gov. and Mrs. Ralph O. Brewster, received the first of the many roadside driver's licenses which are to be distributed to all the school children of Maine.

Children's Safety Campaign.

With the presentation of these licenses was instituted a children's safety campaign for which the Automobile Legal association has appropriated $5,000.

The aim is to teach the child self-protection by authorizing him to be responsible for the safety of all automobiles on Maine roads so far as his personal acts shall affect them.

The license bears the state seal and the signature of the secretary of state, and is in the same form as the regular automobile driving licenses, and in addition has the sponsoring seal of the A. L. A.

Child's Pledge.

Below the signature of the secretary of state is the child's pledge, which reads: "I, ——, promise to take care of those in my charge, and take care of myself so that pedestrians and automobile riders on the roads of the State of Maine shall not be in any danger because of anything which I do."

The license is to be revoked or suspended by the class teacher of the pupil who is careless or does not keep his pledge.

Dealer Refuses to Sell New Auto to Clemenceau

Georges Clemenceau, the grand old man of Gaul, who uses an automobile instead of the train for traveling about France, tried to buy a new car the other day and couldn't. The company insisted on giving it to him.

For several years the Tiger had traveled about in a big, but old, car. He decided it was about time to get a new model, and went to the sales office to see how much he would be allowed on the old machine.

"Monsieur la President," the sales manager said, "France owes you too much. Let me pay my part of the debt." And he refused to accept a sou from the Tiger.

Clemenceau, on returning to his apartment, sent a check for 10 000 francs—$400—to the automobile plant to be distributed among workmen whose circumstances were the most needy.

Hen Has Come to Aid of Motorist

The barnyard hen, which at various times has supplied the wants of human beings in the form of food products and other things, has again come to the front. This time she has proven a friend in need of the motorist.

An automobilist recently had trouble with his radiator leaking. He tried a number of well known makes of commodities to stop such leaks without success.

"Have you tried an egg?" a neighboring motorist inquired. No, he had not. However, he was willing to give the hen product a trial.

Two eggs were broken into the radiator while the water was hot and soon the leaks, which had caused him trouble, were stopped.

Now the motorist is spreading the news of the value of a hen egg to a motorist in such trouble.

Street Sign Is Easily Read by All Motorists

A street sign designed to be easily read at night by motorists driving i the invention of Mrs. Helen Converse Gatchell. Mrs. Gatchell's invention consists of a square arrangement o four strips of glass, each in a meta

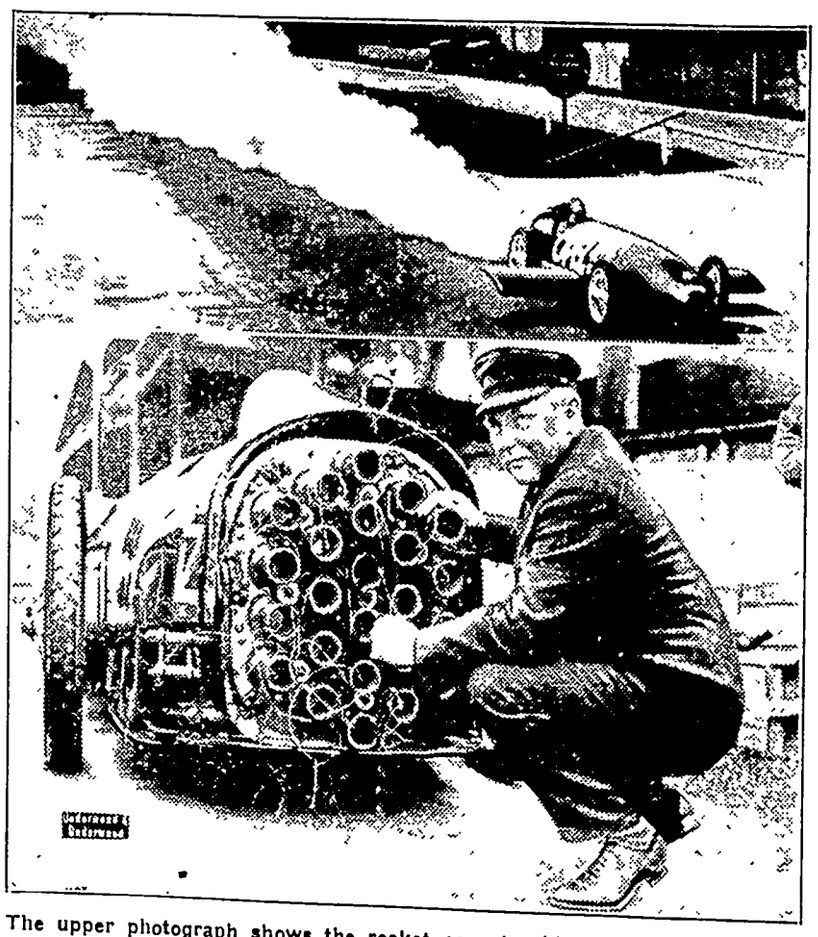
frame and built into a large frame which fits around or over any street lamp. There is one sign installed in the city of Chicago. It stands in the center of a boulevard intersection and is easily read.

ROCKETS USED TO PROPEL GERMAN CAR



The upper photograph shows the rocket car streaking along Avus Speed way, Berlin, and the lower one gives a good idea of the rear end of the car where the rockets are placed.

Vast volumes of smoke and fire shoot out behind the latest experiment in motorless racing automobiles in Germany, called the "rocket" car, Acting Commercial Attache Douglas Miller, Berlin, advises the Detroit office of the Department of Commerce. O. M. Butter, manager of the Detroit district office of the department, calls this latest European experiment in vehicle propulsion to the attention of Michigan automobile manufacturers, says the Detroit News.

The new racing car, which gets its power from a series of 12 smoke-spouting metal tubes in its rear, reached the speed of almost a mile a minute, it is claimed, within 200 feet from a dead start on its first test.

The 12 tubes in the rear of the new car contain rockets which go off one after another and drive it forward, accompanied in the first test, it was said, by tremendous volumes of smoke and fire. First experiments with the new car, it was said, resulted in such great speed that the driver was physically unable to stand the rapid acceleration.

The new car has no motor but it has the conventional form, with the rear built up at a slightly greater height. It was exhibited to the public recently for the first time at Russelheim, Germany, where its first test was also carried out.

Further experiments with the new type of locomotion are now planned on the Avus, automobile racing speedway in Berlin. It is then hoped to establish new speed records for short distances. The German government railways are reported to have placed a stretch of track at the disposal of the builders for experiments with rocket automobiles on rails.

Builders of the new type car declare that they plan to use the same rocket principle in construction of airships, particularly those for long distances and traveling at a great height.

GOETHALS' NOTE GI VIEWS OF CANAL

Posthumous Letter Sh He Feared Failure.

Balboa Heights, Panama Zone.—That the immensity of th of completing the Panama struck Gen. George W. Goetha forcibly when he first took c that he feared it was going to b much, but that afterward cam "realization that it was not a big, but only a mass of irritatin tails," has been revealed by the lication here of a posthumous of the canal builder, delivered to Charles R. Rhodes, commanding Nineteenth brigade, U. S. A Gatun.

Nevertheless, men closely asso with General Goethals in the a plishmment of his great task that "the colonel" as he was k during construction days, not met with "irritating details' but saw that they were carried to pletion according to plan and on

The records of the Panama show that it was his final c "App'd G," that settled every from the price West Indian negr borers paid for their meals to principles and intricate detail complicated engineering problem

Story of the Letter.

General Rhodes explained that than a year ago, when he was manding officer at Camp Gaillard found workmen tearing down a building that had been used as a racks by Porto Rican infantry. inquiry, he learned that it was administration building used by eral Goethals while chief enginee chairman of the Isthmian Canal mission.

General Rhodes had been a st of General Goethals' at West P and when he realized that under orders of the War department old frame structure was soon t razed he wrote to General Goe about it.

The letter was sent in April and when no reply had been rec after almost a year, General Rh concluded that his old teacher's health prevented him from atte to all of his correspondence.

But then after the death of eral Goethals a letter came to eral Rhodes from a young woma New York City who had been eral Goethals' private secretary. inclosed a pencil draft of a lette dressed to General Rhodes in Ge Goethals' own handwriting—w rected, erased and interlined—w had been found in his desk after death.

What the Letter Said.

"I am indeed sorry to learn of passing of the old Culebra adm tration building," the letter "While I occupied the new on Balboa from time to time, it about the old one at Culebra that memories cling. It was there at first the immensity of the struck me so forcibly that wh first took hold I feared it was to prove too much.

"And then gradually this phase replaced by the realization that it not at all big, but only a mass o rritating details. So that the bui became an 'old mill' grinding these details from day to day bling the big things to take final sh

"It was there that I came so c ly in touch with the rank and that control of the force—molding recting and guiding it so as to se results. That became the big, at tive thing of the job.

"Well, it was a great old job, the old barnlike building the co of the universe!"

General Goethals had planned t turn to the canal in January wi large group of his former emplo who held a reunion here at that t but his health would not permi In the midst of the happy celebra of their return the old timers ceived the news of the death of t chief, "the colonel."

The Panama Canal society of York, composed of former emplo of the construction period, has t steps for erection of a memorial honor of their chief, and in this will be aided heartily by their low employees who are still on job.

New Trial Course for Submarines Laid

Portsmouth, N. H.—A new sub ine trial course, nearer to the Kit navy yard than the old course Provincetown, Mass., is being veyed off the coast of Maine.

The United States coast and detic survey is in charge of the ect to determine the suitability trial course off Boon Island.

The area is being dragged t depth of 315 feet, said to be greatest yet attempted by this m od. If no pinnacle rocks that w endanger a submarine are found, expected that the course will be proved for the trial runs and t for the submersibles.

Since the Kittery navy yard is used as a submarine construction repair plant, it is considered th trial course nearer than that off C Cod is needed.

Airman Forgets Pipe

Omaha, Neb.—Cliff Burnham, C cil Bluffs aviator, forgot his pipe w he took off for a trip so he ste his ship for a vacant lot next to home here, made a neat landing, his pipe and took off on his way.

RACHEL'S EGG-BEATER LUCK

(© by D. J. Walsh.)

LIZA POTTER shook the last crumb of brown sugar into the stewed apples. Horace liked sweet sauce and she was afraid would not suit him. But there no more sugar in the house. se than that, there was no money which to buy sugar. Eliza looked of the kitchen window with stern at Horace standing on the back with his pipe in his mouth. The was empty. He reached into his ket for tobacco, but found none. When things get just as bad as can be they can't get any worse, 's one comfort," Eliza said, lifting chin bravely. She took the glass of sauce to the table and placed side the blue plate which held the cornbroad. The meal was now dy, so she called: "Horace!"

Her husband entered. He was a ht man who used a crutch. Eliza reason to believe that Horace's could be mended if there was ney for proper treatment. But he ld not work much with an im- ted fracture.

"Eliza," sighed Horace, "we're old ks. We haven't got long to stay." "Eat your dinner and you'll feel ter," said his wife.

Across the scantily furnished table y looked at each other, this frail and his small, dark-eyed spouse forty-odd years.

"You're determined to make the t of it?" he said.

"Of course I am. When things get t as bad as they can be they"—she ld get no further. Pretending that crumb had gone the wrong way, she ghed. Sometimes it was terribly d to face Horace with any sort of ipful philosophy. When all was said done the fact remained that they re old and destitute, that the house s falling down over their heads, t they hadn't a stick of furniture t wasn't decrepit with age, that re wasn't a chick nor child they ld call their own, but they had all the money they had saved for ir declining years in a bad invest- nt and lost it. "Horace," Eliza be- n again, "if you're going to sit there rreling with your victuals you can t take a piece of this cornpone over Mrs. Whitcomb. She'll appreciate She quickly placed a golden- wn square on a blue plate and nded it to Horace. With something a grin he reached for his crutch. ow then," Eliza whispered to her- f as he hobbled away, "I can do ething." She covered her face h her hands.

It seemed scarcely a moment before race was back, the unemptied plate his hand. "Mrs. Whitcomb isn't re," he said. "She must have tak- the bus somewheres this morning. ere was a girl there that wanted see her. I found her sitting on the ps. She looked all beat out."

"Why didn't you ask her over here?" manded Eliza. She went to the door d looked across at the other house. e woman who sat upon Mrs. Whit- mb's steps had her head in her nds, Eliza's own attitude of a mo- nt before. She seemed too young be dressed in black. There was a ge bag beside her.

Eliza went straight over there. She close before the girl glanced up d saw her. The dark eyes held the k of a mother; the blue ones un- rstood

Until midafternoon the pale girl on Eliza's cord bedstead, while za made her drink camomile tea of a blue cup. Rachel Mayhew's ng husband had died a few weeks ore and she was selling egg-beat- from door to door to get him a ount. She had walked all the y from the next town. Her sales— ll, they hadn't amounted to much—. fact, she had not sold a single egg- ter, but smiling bravely, she had, course, just started out and must better soon. As soon as her head pped aching, and it was feeling lots ter, she must hasten on.

At parting she gave Eliza an egg- ter—"though it's no pay at all for uch kindness as you've shown ," she said. Eliza snatched an odd- ped blue vase from the mantel- lf. "Take that to remember me ," she returned.

Alone she looked at the egg-beater a half-puzzled way. She whisked round and round. It was so nice new and shiny. Such a pity that had no use for it. She wished she ld sell things, but if a bright young g like Rachel Mayhew failed how ld she hope to succeed?

"When things get just so bad as y can be"—she tried to chant, but voice gave out because there was a tightness in her throat.

Next morning Horace sneaked away home. He came back looking so ted that Eliza was frightened.

"Old man, tell where you've been what you've been doing?" she de- nded.

"Well, I got a ride to town and k," Horace confessed. "I've been ng to get me a job. But—they 't peg shoes now the way I was ght." He paused. "I tried to sell house here to Fletcher. He said was only an old heap of junk."

"It's home, our home!" cried Eliza. 've lived here for forty-odd years ther. You've lived here all your and your father and grandfather re you. Do you remember the day got married and you brought me Horry? I had pink ribbons on my white hat. How my heart beat. I'd never had a home before. It meant everything to me—it does yet."

"You've been a fine wife, Eliza. And you'd have been a fine mother if the twins had lived."

"They'd have been 30 years old," mused Eliza softly. "Married, of course, with children. Did you ever think of it, Horry? I guess one investment more or less wouldn't have mattered if our boys had lived—well, I guess you better have a bit of something to eat. Mrs. Whitcomb brought over a big bowl of stew and I've been waiting for you to come and get your share."

They sat down at the daintily laid table. Though Eliza's tablecloth was of coarse, home-woven linen it was white as snow. The color came into Horace's thin face as he ate.

"Mrs. Whitcomb is certainly a fine neighbor," he said appreciatively. "But I guess you're a good neighbor yourself. That time she was sick so long you never left her day or night—"

"Hello!" Eliza jumped. A man was looking in at the open window. "Sorry o intrude," he said pleasantly, "but I'd like to see you folks a minute."

"Come right in!" Eliza sprang up and opened the door. "I'd ask you to dinner but—" she glanced at the empty bowls.

"I've had lunch, thanks. Mrs. Potter, have you a mate to that vase you gave Rachel Mayhew yesterday?"

"Yes." Eliza got the vase from the sitting room shelf. He examined it carefully.

"It is the same thing," the man said. "Rachel Mayhew came to our house selling egg-beaters. She showed my wife the vase. We keep an antique shop. Here's my card. My wife tried to buy the vase, but the girl said you gave it to her for a keepsake and she wouldn't part with it. She said you had another like it. So I thought I'd drive over here and see if you'd sell it. By the way your house seems to be full of quaint old things. This chair now—that table you are eating lunch from—that tablecloth, those dishes, that clock—If you want to sell any of these things I'll give you the best prices for them."

Eliza told Horace afterward that she came near topplin' over. But Horace was up on his crutch fally shouting: "Take your pick of anything we've got and welcome!'

That very afternoon a truck came and carried away almost every article of furniture the house contained. The decrepit chairs, the battered tables, the hooked rugs were replaced by the new, bright things Eliza had always longed for. And tucked in Horace's purse was a check that meant for him a mended hip and for them both security against any number of rainy days in the future.

Rachel Mayhew came to see them in their new comfort. She was working for the antique-dealer's wife and looked plump and hopeful.

"That egg-beater of yours whipped up a lot of luck for us all," Eliza said as she poured tea from her new teapot. "I've heard of folks starving in the midst of plenty, but I never dreamed that was the way with Horace and me. Still, it's just as I've always said: when things get just as bad as they can they can't get any worse, so they're bound to get better."

Take Plenty of Time in Furnishing House

The collector hobby, present to some extend in almost every person's make-up, can be well served by spending a lifetime in collecting furnishings for the home, thinks Miss A. Louise Fillebrown, writing on home decorations in the Farm and Fireside Magazine.

Furnishing the house is something that shouldn't be done in an afternoon or a week of afternoons, thinks the writer. It is, on the contrary, a lifetime job.

"Many a bride rushes into town and buys furniture for a whole house in less time than it takes to make her bridal veil," says the writer. "Some young couples buy a houseful of furniture on the installment plan and have a debt to start with. It is really nice furniture but often is not what they want nor what is most appropriate for their home. Hasty buying is always risky. Then there's the cautious couple who buy 'just do' furniture until the time when they can buy the house of their dreams. That's foolish, too, I often think.

"It isn't necessary to buy all your furniture at once. You will have a more livable home if you furnish it piece by piece. It is well to buy good what you buy and use makeshift things for what you can't afford."

His Complaint

"A public office hain't by no means a private snap," said the postmaster at Seven Corners, down in the Ozarks. "Every little while something comes up to pester a feller, no matter how accommodating he is. Tuther day a gent that subscribes for the only Little Rock daily that comes to the office took a couple of shots at me just b'cuz he wanted his infernal paper before I was through reading of it. And last month an impatient cuss that was expecting a letter from a grass widder lady came in through the side of the office with an ax, when he knowed good and well that I was off on a turkey hunt and wouldn't be back for a couple of days."—Kansas City Star.

Lot of Fun Missed

Ethel—They say she married her first love.

Marie—Poor thing! It must be awful when one's first love turns out to be permanent.

AUSTRALIAN PLANT NEW MOSQUITO FOE

May Free Parts of United States of Pest.

Ithica, N. Y.—Those who are now smearing themselves with oil of citronella or wintergreen and making the night hideous with intermittent slapping at mosquitoes may be cheered by the news that experiments now in progress at Cornell university may result eventually in the banishment of the pest—at least from those regions of the United States rich in limestone deposits. This will cause no cheering in the granite hills of New England or among the sand bottomed ponds and alluvial swamps of the South But to residents of other sections it may bring the joy of anticipation.

The current hope for the banishment of the mosquito lies in an humble plant, Nitella Phaulotoes, native of Australia. Nitella, as it is familiarly known, thrives in limestone districts. It is a peculiar sort of weed, without flowers, that grows in ponds and lakes. It never appears above the water, but develops underneath the surface, and its peculiar effectiveness against the mosquito lies in its power and blind necessity to exude an oily fluid which rises to the surface of the body of water. The fluid is poisonous to mosquitoes and prevents the deposit of their eggs. Hence where Nitella grows the mosquito cannot thrive.

Specimens Imported.

Dr. L. O. Howard, former head of the bureau of entomology in Washington, recently became interested in Nitella and imported a number of specimens of the plant from Australia. He turned them over to Prof. Robert Matheson of Cornell, who is now experimenting to see if there is any reason why the plant cannot thrive in this country. The neighborhood around Ithaca is ideally fitted for the work, due to the limestone deposits there, which keep the lakes well charged with lime.

A peculiar virtue of Nitella is that its oily secretion, while poisonous to the mosquito, is not at all harmful to man, animal, fish, or plant. E. W. L. Buhot, a scientist of Brisbane, Australia, first discovered this. There are a number of mosquito fighting plants indigenous to Australia, and he has spent many months studying them. He first found Nitella growing in a creek and later in lakes and lagoons. On the surface of the latter there was a green scum, which proved to be a bacterial growth, and a thin film resembling oil. This was found to be the product of the plant that grew beneath the surface. Subsequent experiments showed that the plant grew rapidly, reproduced freely, and was easily transplanted Whether it can be grown in the United States is a question which Professor Matheson is trying to solve

Nature has provided, in her usual way, many enemies for the mosquito Nitella is one of the lowest forms of these. If you plunge your hand into the water where Nitella grows and pull up a few stems of it you find them to be greenish and about a foot long. They have a central axis, or stalk, with whorls of short, pointed branches projecting star fashion from each of the joints. It has no leaves or flowers.

Prevents Laying Eggs.

Where Nitella wars against the mosquito by preventing it from laying eggs where it should like to. other higher types of plants carry the battle direct to the larva, or "wiggler," and some insects even to the full-fledged mosquito.

The most curious of the latter class is the bladderwort. This plant, seen above the water, is a beautiful yellow flower of very odd shape. Only the flower is visible, the leaves and stems lying under the water.

On these under-water stems nature has devised one of its oddest structures, consisting of a bladder, partially or entirely filled with water. Each plant is equipped with many of these. On one side there is a small round opening, fitted with a trap door or valve that opens inward. The mosquito "wiggler" approaches. As he nears the trap glands in the bladder produce a bait of some type agreeable to the wiggler. The victim nibbles at the bait, the valve suddenly opens, a current of water shoves the wiggler into the bladder, the valve closes, and the wiggler never comes out again. He is literally eaten up by the plant. These observations have been made by F. B. Rocker, a French observer, and confirmed by C. L. Withycombe, well known English naturalist.

Argentina produces a wild plant that works in a subtle fashion against the mosquito. It has been observed and studied in those regions of the country which are free from malaria during the annual attack of the disease. An abundant plant, like clover, it produces an attractive flower that is highly scented. This seems to be highly attractive to the malaria mosquito, which feeds upon the nectar of the flower. The nectar is largely made up of coumarin, a sugar sirup Well filled with this sirup, the mosquito is rendered incapable of producing the element that, transmitted to man, causes malaria.

Yankee Tractors Win

Angora, Turkey.—American caterpillar tractors outdid German, Czechoslovak and British rivals in Turkish military tests, while Angorans bet on the results.

HOW A GOAT GOT "GOAT" OF A GUIDE

"Hard Luck" Joe Loses Lariat Showing Skill.

Jasper Park, Alberta.—"Hard Luck" Joe Smithers, guide, Jasper Park, is looking around for a new lariat. Which "Hard Luck" Joe declares, is his second piece of bad luck since he left the prairies. His first was in coming to the mountains. "Hard Luck" Joe has taken a dislike to the mountains.

Down on the prairies now a man can lope along for miles without winding his horse on a trail that should be a staircase with a hand rail to match. And then, too, on the prairies a man has a chance to show how good he is with a rope. In the mountains it is different.

Joe was explaining this at some length to his tourist party at the head of Maligne lake. "Rope"—why he could "rope" anything.

She was a mild-looking young lady, but, as Joe says, "straight pretty," and she had a sharp pair of eyes as well, because she spotted a mountain goat only about 500 feet above the camp, close to a group of spruce trees.

"There," she said, "Mr. Cowboy, is something you can't rope."

Joe snorted. After the steers he'd thrown, the calves he'd "heeled," and the cayuses whose ears he'd flicker with his loop—"Sa-ay a man wouldn't even need a horse for a goat."

Even now Joe is not quite certain as to how he got close enough to the goat to throw his rope. But he did. It settled nicely over the two black horns and the white head. There was a moment's pause while the goat surveyed Joe in mild surprise, and while Joe thought of "bending" his rope around a tree. But there was no tree quite handy enough.

And then the goat made up his mind. He was taking a different direction to Joe—but not for the first hundred yards or so. Joe hung on as long as he could. That rawhide lariat had cost a lot of money. But the goat had his eye set on a black peak straight ahead—and up—considerably up. The rope burned Joe's hands as it passed through them.

On his return Joe admitted to the mild-looking young lady that "goats sure come husky in the mountains." Outside of that remark he was noticeably silent for the rest of the trip.

German Tourists Bring New Problem to France

Paris.—France has a new grievance against the former kaiser and Hindenburg, with no means of getting satisfaction without violating international postal regulations.

It started with the sudden interest of German tourists in the scene of signing of the armistice in the forest of Compiegne near Rethondes and the advent of the inevitable sellers of postcards and other souvenirs.

As if by order from their political groups, the German visitors during recent weeks have been addressing cards to the former kaiser, Hinderburg and others. On Sundays these missives have numbered as many as 4,000.

But the grievance does not end there—in a large majority of the cases, the senders fail to pay sufficient postage. The French authorities are not allowed to hold up the correspondence for this reason, however, and the little post office at Rethondes complains that it is being overworked.

More Cartons in Use to Keep Butter Clean

Washington.—Increased use of cartons for sanitary reasons in packing butter for retail sale is considered advisable by health officials in 117 cities.

In a special survey by the federal bureau of agricultural economics officials declared that cartons lessen the likelihood of contamination both in the home and in retail stores, and are a means of checking the absorption of undesirable odors.

Woman Judge Applies Smile and Lorgnette

New York.—Judge Genevieve R. Cline, five feet of femininity, clad in silken judicial robes from whose heavy folds she occasionally drew forth a gold lorgnette, sat on the bench of the United States customs court in Manhattan, and no one considered it an unusual procedure.

With Judge Waite, she disposed of a long calendar of routine government cases and after court was over, exclaimed:

"I'm so glad that I am being accepted as the new judge and not placed in the class of being some kind of a rarity—a woman judge."

And the first women ever appointed to the customs court—the highest honor that has been awarded to women since they were enfranchised—smiled very prettily.

Judge Cline looks young, but she has six years of government experience and several years law practice in back of her She is the rare combination of a feminine-looking woman with a good legal mind She was appointed to the customs bench by President Coolidge at a salary of $10,000. The position is for life.

FARM POULTRY

GROWING PULLETS NEED EVERY CARE

The young growing pullets need every advantage because the profits from them this fall will depend largely on their growth and maturity.

"There are four essentials in developing young pullets," says C. F. Parrish, extension poultryman at the North Carolina State college. "First give them a good range on ground not occupied by the hens nor where mature stock has been kept, supply plenty of fresh air in the poultry house, give them sufficient growing mash and scratch feed and see that shade and green feed is available. From the green feed, the pullets get certain food elements and iron which is essential. If natural shade is not available an artificial shade may be made by driving four stakes in the ground and covering them with sacks. Sunflowers or corn may also be planted to supply this necessity."

For those young pullets still in the brooder house, the heat should be decreased as fast as possible and the house ventilated. The stove should remain in the house for at least two weeks after the fire is out to use in case of cold rains. Feed the scratch grain farther away from the house each day so the birds will go out and eat more green feed.

For roosting, Mr. Parrish advises the placing of temporary perch poles in the brooder house when the chicks are about seven to nine weeks old and do not need heat. These poles should be about fifteen inches from the floor and slanting at an angle of 45 degrees. One-inch mesh wire might be used in front of the poles to make the birds climb up.

Egg That Has Life Very Essential for Success

Whether breeding chickens, ducks, geese or turkeys, the first essential for success is to get an egg that has life. Strong, vigorous parents that are well fed and well cared for produce such eggs. The general principles of breeding apply to all poultry, says a writer in Wallace's Farmer. Well fed, but not overfat, is the ideal condition. Enough feed to keep the flock active during the day; a liberal feed at night. Green feed and animal feed, clean water, no lice or mites; fresh air without draft at night, together with plenty of room, are conditions that favor eggs with life in any locality. There are no rules for growing poultry that must be followed absolutely. There are the general principles of clean food in abundance with work on the part of the fowl to get it; clean houses, clean yards and fresh air, but success comes with about as many different systems as there are breeders. Bone meal, meat scraps and buttermilk furnish bone and muscle building material; corn, wheat and oats ad the necessary fat and energy; green feeds give life and health. Upon the character of the seed depends the harvest.

Light Brahmas Good for the Small-Patch Farmer

The lower your fences are, the heavier may be your breeds of poultry. One of the best breeds for the small-patch farmer, or the business man or wage earner living in the suburbs—the man who cannot afford to put much money into expensive wire netting—is the Light Brahmas. They stand confinement in narrow quarters, and they also stand cold weather. They are less subject to disease than some of the other breeds; they make good layers, and average in weight, when fully grown, about 11 pounds; so when you market your surplus stock you have something to sell. But if you have plenty of space for your chickens the cheapest breeds are the nervous, restless ones, which means that they are good foragers for food, and will not need much feeding. The Brown or White Leghorn and the Black Spanish are among the best foragers. Other breed which do well in the small patch or acre lot are the Plymouth Rocks, Wyandottes and Rhode Island Reds.

Chickens Eat Feathers

Chickens eat their own feathers because of the lack of the following feeds: 1, meat; 2, green food or bulk; 3, salt. One-half pound of fine table salt should be put in the dry mash and this should be kept before the hens at all times. They should get plenty of green food. In the winter time, cabbage, mangels and root crops answer fairly well. They should have plenty of animal food such as beef scraps, fish scraps, skim milk or buttermilk.

Alfalfa Is Favored

If time is lacking to prepare green feed for chicks, it pays to buy high grade commercial alfalfa leaf meal A few hundred pounds will furnish green feed for a lot of chicks. Many of the best chick starting mashes contain a little alfalfa meal. These mashes should be used according to the directions of the manufactures, but chicks on a starting mash containing alfalfa meal often seem to thrive without the other source of green feed. The cost is comparatively small.

LIVE STOCK

HORSE SHORTAGE SEEN BY CORNELL

A new Cornell bulletin on the farm horse situation in New York state says: "If history repeats itself, a shortage of young horses will develop in the next few years and prices of work horses will increase very materially."

This bulletin was prepared by C. E. Ladd, director of extension at the New York state college of agriculture at Cornell, from information received from more than three thousand typical farmers throughout New York state. It states further "the demand for horses for farm and city work has decreased rapidly with the widespread use of automobiles, trucks and tractors. Tractors are replacing horses for heavier types of work on many farms. The automobile has been substituted for horse-drawn vehicles, and the truck is replacing the horse and the team on the country roads and especially on the city streets.

"This decreasing demand for horses has resulted in abnormally low prices. This, in turn, has caused farmers to raise less colts. The replacement of the present farm horses will constitute a major expense on our farms during the next ten years."

Copies of this bulletin, number E 169, like other Cornell bulletins, may be obtained free by requesting them from the state college of agriculture at Ithaca, N. Y.

Tankage, Oil Meal and Skim Milk for Swine

Generally, corn alone will not prove a satisfactory feed for full-feeding pigs even when they are on a legume or rape pasture, according to J. W. Wuichet, animal husbandry specialist of the extension service of the Ohio State university.

Corn and tankage or corn and a mixture of two parts tankage and one part oil meal will produce more rapid gains and less feed will be required to produce 100 pounds of gain than when corn alone or corn and middlings are used.

If the pigs are on blue grass pasture or have no forage at all, Wuichet recommends corn supplemented by a mixture of 50 pounds of tankage, 25 pounds of oil meal, and 25 pounds of alfalfa meal or ground alfalfa.

If skim milk is available in sufficient quantities it may be substituted for all or part of the recommended protein supplement. In general, corn, hominy, or corn and barley fed at the rate of 20 pounds to one pound of protein supplements, will prove to be the most practical combination for full-feeding pigs on pasture when both rate and economy of gain are considered.

Sows Carried Through Summer on Little Corn

Old sows can be carried through the summer with an ear or two of corn a day while on pasture and there isn't a better place to farrow their fall pigs than on good clean pasture. All hogs need plenty of water. A small stream, the outlet of a tile drain or a handy well are all convenient methods. Others use an automatic tank or barrel waterer on skids or fill their waterer from a tank wagon each day.

Skimping the feed while on pasture makes the hogs eat more green feed but it cuts down the rate of gain. The extra feed makes them grow and fatten, getting them to market in less time and on less feed. If at all possible the shotes should be pushed all the time they are on pasture as less feed will be needed and the early fall market is usually more favorable than the later market.

Live Stock Items

Barley, and in fact, all the small grain, should be ground for pigs, and soaking improves the feed value. But let this be only from one meal to another.

* * *

Rape is the best annual pasture crop for hogs. It can be drilled or broadcast early or late, It stands heavy pasturing and it gives a big yield.

* * *

Sows that are fed only grain and tankage over winter are apt to be lazy, and have weak pigs next spring. Alfalfa hay, leafy and green, is fine to go with their grain.

* * *

The practice of suddenly taking the sow away from her pigs when the pigs are eight to ten weeks old without previous preparation for weaning is as out-of-date as raising hogs on a "corn-and-water ration."

* * *

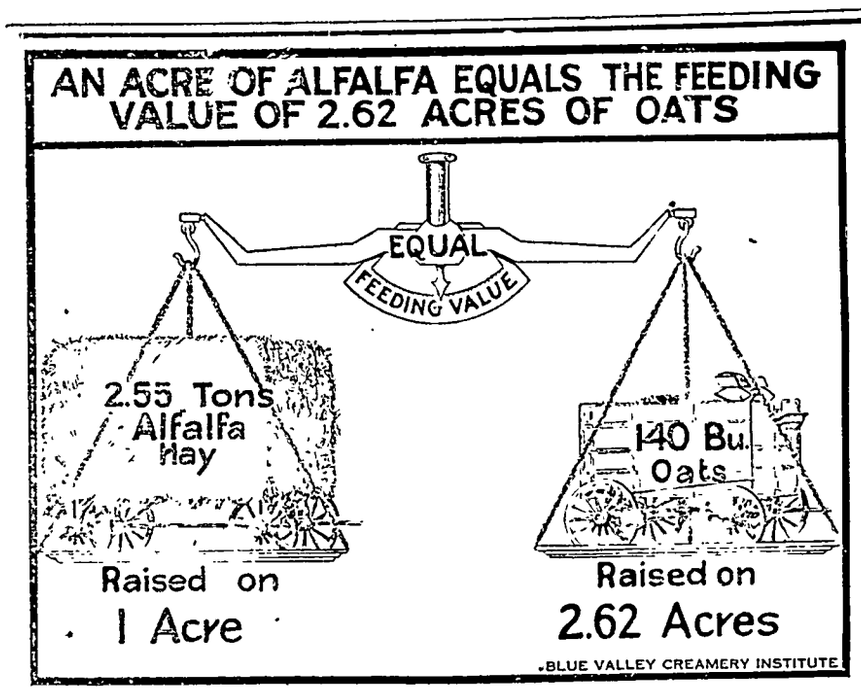
Some recent experiments indicate that a tobacco and salt mixture is worthless as a stomach worm eradicator.

* * *

Lack of minerals in the feed, an all-corn diet, or being kept in a small pen, may cause a hog to "go down in the back."

* * *

For hog pasture, clover requires frequent mowing to keep the growth from becoming too rank and woody. Hogs prefer only the leaves and tender stems.



AN ACRE OF ALFALFA EQUALS THE FEEDING VALUE OF 2.62 ACRES OF OATS
EQUAL
FEEDING VALUE
2.55 Tons Alfalfa Hay
140 Bu. Oats
Raised on 1 Acre
Raised on 2.62 Acres
BLUE VALLEY CREAMERY INSTITUTE

ALFALFA HAY CROP YIELD IS HIGHEST

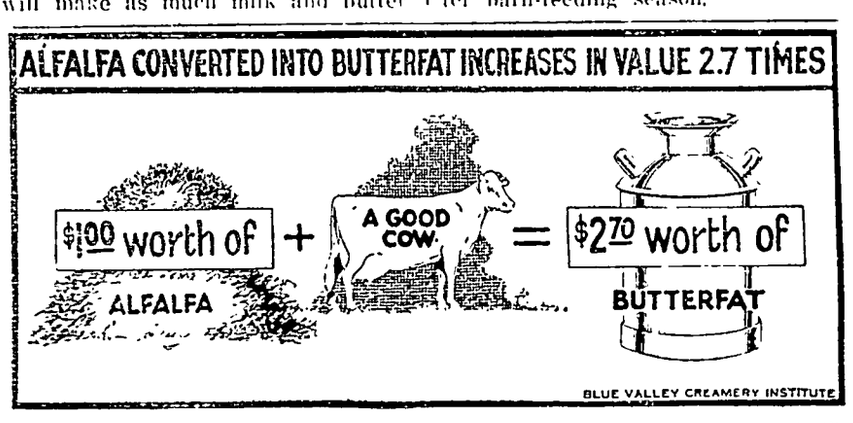
Acre of Alfalfa Has Same Feeding Value as 140 Bushels of Oats.

One acre in alfalfa does the work of 2.62 acres in oats, says the Blue Valley Creamery Institute. An average acre of alfalfa producing 2.55 tons of hay in a season produces a volume of forage that has the same feeding value as 140 bushels of oats produced on 2.62 acres. This comparison is based on feeding tests made by the North Dakota Agricultural College, in which 4,000 pounds of alfalfa hay equaled 3,520 pounds of oats.

The institute estimates that the acre yield of alfalfa hay is equal to 2.62 acres of oats on the basis that it takes only 1.14 pounds of alfalfa hay to equal one pound of oats in feeding value. In the Minnesota dairying district where the survey was made, it was found that the average yield per acre was 2.55 tons or 5,100 pounds of alfalfa as against a yield of 1,712 pounds of oats to an acre.

Many farmers are under the impression that the yield of an acre in grain will make as much milk and butterfat as will the product of an acre in hay. And it will, in certain instances when high yield grains such as corn are compared with low protein not leguminous hays such as timothy. But the comparison does not hold true when an acre of alfalfa with its high yield of protein is matched against an average acre of oats, yielding even the high average of 53.5 bushels per acre. It must be remembered, however, that oats, pound for pound, as shown by the North Dakota station have a higher feeding value than has alfalfa, and it is not recommended to plant all of the land devoted to oats in alfalfa, because a certain amount of oats in the grain ration is sometimes needed for variety. Crushed oats with ground corn, corn-chop as it is called in many sections, form the base of a low-cost grain ration that can be grown on most farms in the Mississippi valley.

Alfalfa is famed as a milk and butterfat producer because of the fact that it produces a high yield of protein per acre. Alfalfa, pound for pound, equals grain in its ability to produce low-cost milk and butterfat. This year is an especially good year to plant an acre of alfalfa for every single cow and every two heifers on every farm, because cattle of all kinds have rarely been as profitable as they are at this time. Hogs, too, make cheaper pork on pastures planted in alfalfa and both hogs and hens, as well as cows, can profitably consume alfalfa hay and leaves during the winter barn-feeding season.



ALFALFA TURNS A DOLLAR INTO $2.70

A dollar expended in growing alfalfa hay and the hay converted into butterfat should return around $2.70, according to estimates made by the Blue Valley Creamery Institute, based on the cost of growing hay in the Mississippi valley and the official results obtained from experiments in feeding 12 fairly good cows nothing but alfalfa hay for a year.

These cows fed exclusively on alfalfa—all they could eat—without grain returned an average of 263 pounds of butterfat per cow worth, at 45 cents per pound, a total of $118.35. Using figures obtained by the Illinois State Agricultural college from farmers, it is estimated that the net cost of producing the alfalfa each cow consumed in the year's time was $43.80 which, of course, covered all costs such as man and horse labor, seeding, taxes, interest on the land and all miscellaneous costs.

When the farm cost of the alfalfa hay, $43.80, is divided into the value of the butterfat which the alfalfa produced, $118.35, it is found that each dollar's worth of hay returned $2.70 worth of butterfat. It pays to grow alfalfa and it pays to feed it to milking cows.

PIGS ON PASTURE NEED LESS GRAIN

Acre of Alfalfa Will Provide Green Feed for From 15 to 20 Pigs.

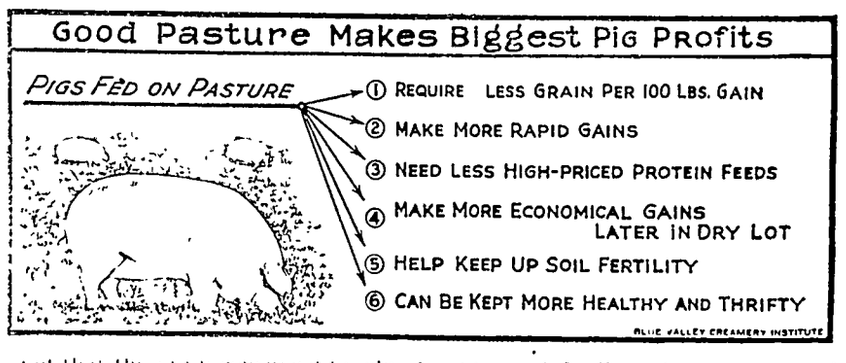
For growing pigs at lowest cost and for greatest profit, good pasture during the grazing season is required, says the Blue Valley Creamery Institute. Pigs fed on pasture need less grain and other concentrated feeds to make 100 pounds gain than those kept in a dry lot. At the Missouri Agricultural Experiment Station it was found that the grain consumed by pigs on pasture was 38 per cent less than the amount of concentrates eaten by pigs fed in a dry lot. As grains and other concentrates are the most expensive parts of a pig ration, the saving made by the pasture-fed pigs is considerable.

Pigs on pasture also make more rapid gains than those fed off grass. Feeding trials show that pigs on pasture make about 35 per cent bigger gains than those not on pasture. Alfalfa pasture, as well as all other legume pastures, and those made from rape, are rich in protein, the growth producing and muscle-building ingredient of feeds. Pigs on these kind of pastures balance up the corn part of their rations very satisfactorily and so require less tankage, shorts and some of the other costly concentrates. Thus a big saving is made in the feed bill for the grass-fed pigs.

Not only do pigs on pasture make bigger and cheaper gains than those in dry lots during the grazing season, but the grass-fed pigs will continue to do better than dry-lot pigs when they, too, are placed in dry lots after the regular pasture season.

Feeding pigs on pasture also helps maintain soil fertility. None of the valuable manure is lost when distributed over the fields by the pigs themselves. Another important advantage of feeding pigs on pasture is that pastures provide more healthful conditions. Providing good clean pastures has been found to be the most effective way to combat worms and other parasites which cause most of the common disorders and losses in pigs.

Alfalfa makes the best of all pastures for hogs. It provides good green feed for from 15 to 20 pigs per acre and, in addition, will make sufficient growth to make two or three cuttings of fine hay, all during a single season.



Good Pasture Makes Biggest Pig Profits
PIGS FED ON PASTURE
① REQUIRE LESS GRAIN PER 100 LBS. GAIN
② MAKE MORE RAPID GAINS
③ NEED LESS HIGH-PRICED PROTEIN FEEDS
④ MAKE MORE ECONOMICAL GAINS LATER IN DRY LOT
⑤ HELP KEEP UP SOIL FERTILITY
⑥ CAN BE KEPT MORE HEALTHY AND THRIFTY
BLUE VALLEY CREAMERY INSTITUTE

Bad Handwriting and Genius Often Linked

Are great writers necessarily afflicted with bad handwriting? A French paper puts the question. But there seems to be no hard and fast rule.

The writing of Victor Hugo, one of his publishers said once, "resembled a battlefield on a piece of paper." The typesetters who succeeded in deciphering Balzac were often desperate, and one is said to have gone crazy after hours of vain effort.

Robert Louis Stevenson was even worse. No printer ever could make out what he had written. Stevenson had to assist in copying what he had put down in the first place. Sydney Smith could not decipher his own handwriting after twenty-four hours.

On the other hand certain English writers like Arnold Bennett, Thomas Hardy and H. G. Wells, write legibly and even elegantly. But it should not be forgotten either that none of these three started out on a writing career in youth. Arnold Bennett was destined for the bar and served his time in a lawyer's office. Thomas Hardy began as an architect, and H. G. Wells started out in life as a dry goods clerk.

Drab Colorings Not Popular With Romans

The old Roman conquerors of Britain had a keen eye for colors, according to analysis of excavations of the Latin settlement at Colchester Eng., made by the Essex Archeological society.

No unornamented walls for the Romans, but brilliant colors of green red, yellow and blue. Their wall plaster was colored and highly tinted. Even the floors were colored, for one room has been found with a red paved floor. Mosaic floors have been discovered which are done in black red, yellow and white "tesserae," or small cubes of clay and stone. The smallness of the tesserae and the fine workmanship of the pavement, according to experts, indicate that the work was done in the early period of the Roman occupation of England.

A Roman rubbish pit was one of the finds of the excavation. Among the debris were found hundreds of whole or nearly whole pottery vessels. Experts say they date to the time of the Emperor Trajan, A. D. 98-117.

India's Sacred River

The Ganges is the sacred river of the Hindus. On its banks are many temples and holy places such as Benares, Allahabad, Hardwar and Gangotri. According to the legend the Princess Ganda, a Hindu goddess of long ago, turned herself into this great river, that she might enrich and purify the country. Devout Hindus bathe themselves in its sacred waters and pray to die beside it. It is their desire that their bodies may be burned upon its banks and their ashes scattered over its waters and allowed to float on down to the sea. The length of the main stream of the Ganges is 1,557 miles, and its every bend is sacred. Pilgrims walk from its source and back again, taking six months or more for the pilgrimage.

Ancient Baths

The Roman bath was heated in the same way as the Persian bath, and exactly the same system is still used in every town and village in Persia today. There is a large copper or iron plate in the bottom of the masonry hot water tank; the heat of the furnace is led beneath this, and then under the floor of the hot room which is supported on low brick pillars, just as in the case of the Roman baths. There are flues in three of the walls, which not only are chimneys but also heat the room still further. By a system of dampers the heat can be both regulated and diverted from one part of the room to another.

Lacquered Silver

The bureau of standards says that the lacquer on sterling silver, when it is wearing off, should be removed by a solvent, such as a lacquer thinner or butyl acetate. If the objects are discolored, they should be cleaned with a silver cleaner and washed and dried carefully, avoiding finger marks on the surface. The silver may then be relacquered with a clear lacquer for silverware sold by most lacquer manufacturers. After lacquering the objects should be dried at 100 to 120 degrees Fahrenheit for 30-45 minutes. Time and money might be saved by taking the articles to an electroplating plant or to a jeweler.

Quaint Nicknames

That schoolboys—and schoolgirls—are so addicted to the bestowal of nicknames is in accordance with race development. Backward races bestowed nicknames to the exclusion of patronymics. When I lived in Madeira, says a correspondent to an English paper, I knew peasants who had forgotten what their real names were—if they had ever known them! There were among my acquaintance, Cabbage Soup, Five Farthings, Mrs. Blackbird and Hot Water Jug, besides Miss Codfish and Sweet Potato. The reasons why these names were given were unknown, yet somehow they all undoubtedly fitted!

The Muse

"Going into commerce, eh?"

"Yes," responded the poet. "I'd rather celebrate good beans than a bum spring." — Louisville Courier-Journal.

MITE CATCHER

We have had agents calling on us for the last several years trying to sell us "dope" to kill mites on hen roosts saturated with high-powered disinfectant that would drive the mites from the chickens. All these men we listened to, but passed them up. Their price was too high for what benefit could be derived.

It has been proven by several of the experimental stations that chicken houses equipped with these high-powered disinfected roosts has lowered the hatching per cent of the eggs very greatly—and even has decreased the out-put of egg production as the hens, inhaling the fumes of this stuff through the night, is not beneficial to egg production.

We have finally taken ahold of a proposition that we believe will be worth at least what you pay for it, if only used as a roost. This thing is worth investigating and will say that they DO NOT cost 25 or 30 cents per foot, as quite a few have paid.

We will have in several hundred feet of this material in a few days. Come in, look them over and get an explanation of it. Take what you want—try it for a month and if it does not work bring them back, we will be here to take them.

DO AGENTS WHO CALL ON YOU GIVE YOU THIS KIND OF A PROPOSITION?

Lesson for Misers in Chinese Legend

An aged Chinese, noted far and wide among his neighbors for his penuriousness, was one day discovered running frantically up and down in front of his small hut, beating his breast and crying out in doleful lamentations

"Woe is me!" he cried, "woe is me! Some one last night stole away the treasure which I had buried in my garden, and left a stone in its place."

"And why do you weep?" asked a neighbor. "You never used your treasure. Bring yourself to believe that the stone is still your treasure, and you will be as well off as you ever were."

The neighbor was right. A buried treasure is of no more value to the world than a buried stone. One of the pathetic truths of life is that so many fail to realize this fact. Had the old miser been generous enough to have shared his treasure with a needy world, he could at least have had the comfort of knowing that many would have joined him in bewailing his loss. But he had lost that which was of value to no one. Not even he himself had made use of it.

Long Sentence Made Matter of Complaint

What is said to be one of the longest single sentences in English on record—a statement of 593 words, covering 56 typewritten lines—was the subject of complaint by counsel in the Court of Appeal, says the London correspondent of the New York Herald Tribune Analysis of some of the phrases in the average income tax return form is difficult enough but in the protested instance of circumlocution and ambiguity it was set forth that a Chinese lawyer could not have supplied more redundant or round about language to convey his meaning.

The sentence, stretched word to word in one line, would reach approximately 35 feet, and to utter it would be a breathing exercise almost equal to climbing the whispering gallery in old St. Paul's. The sentence, it was stated to Lord Justices Atkin and Scrutton, appears in the finance act of 1927, and purports to explain "relief in respect of losses in business set up after April 6, 1923."

A Veiled Criticism

E. Berry Wall, whose portrait by Tade Styka is a hit of the Paris salon maintains in maturity that good taste in dress which won him in his youth the title of "klug of the dudes."

There is a story to the effect that Mr. Wall ran across a New York friend in a hotel the other day. The New Yorker wore vast Oxford bags of the new bois de rose tint, his coat was cinnamon brown with brass buttons over his brown shoes white spats were drawn, and his shirt collar, tie and handkerchief were in various shades of pink.

Mr. Wall shook the New Yorker by the hand and said in a low and sympathetic voice:

"Are you in mourning for some one, Bill?"—Pittsburgh Chronicle-Telegraph.

Old Sailing Vessel

Perhaps the best account that has come down to us in writing, from which a description of a boat in Roman times can be had, is the account of St. Paul's journey in a wheat ship to Rome.

During the storm on the way from Crete to Malta the sailors cast cargo overboard; they nearly lost the ship's boat trailing behind; they undergirded the ship with a cable; they let go their four anchors; the crew tried unsuccessfully to escape in the lifeboat, and finally they cast off their anchors, set a foresail and ran the boat onto the beach.

The Price of Silence

The bill collector found that the family he was about to dun had skipped, taking the goods with them After some inquiry he managed to locate the van driver, but that worthy claimed to have no recollection of where he had taken them.

"Come now," said the collector, producing a $5 bill, "this ought to rouse your memory." "It ought to, sir," the van driver admitted, "but you see mine ain't no ordinary memory an' it'll take a deal of rousing. Why, it cost $10 to put it to sleep."—Boston Transcript.

Ham and Eggs

A Hoosier wife was serving the customary coffee and toast for breakfast. The husband, who had recently returned from a trip to the old home-place in a neighboring state, was talking about the many changes that had occurred.

"I suppose you had so little in common with the folk back there it was dull," said the wife.

"Dull? Not by a long shot. We had a great time talking about the days of ham and eggs for breakfast," replied the vivacious husband.

Impressed

A negro arrested on a banditry charge came before Judge Rosalsky in general sessions in New York and was held in bail of $25,000. When statement was made from the bench to this effect attaches were surprised that the negro was undismayed. Rather there was a look of admiration in his eyes. As he was led toward the bridge of sighs and jail he remarked: "Dat ge'man sho' does talk in magnificent figures."—The New Yorker.

Water is not necessary give nothing but sour skimmilk to drink for the first four to six weeks.
BLUE VALLEY CREAMERY INSTITUTE

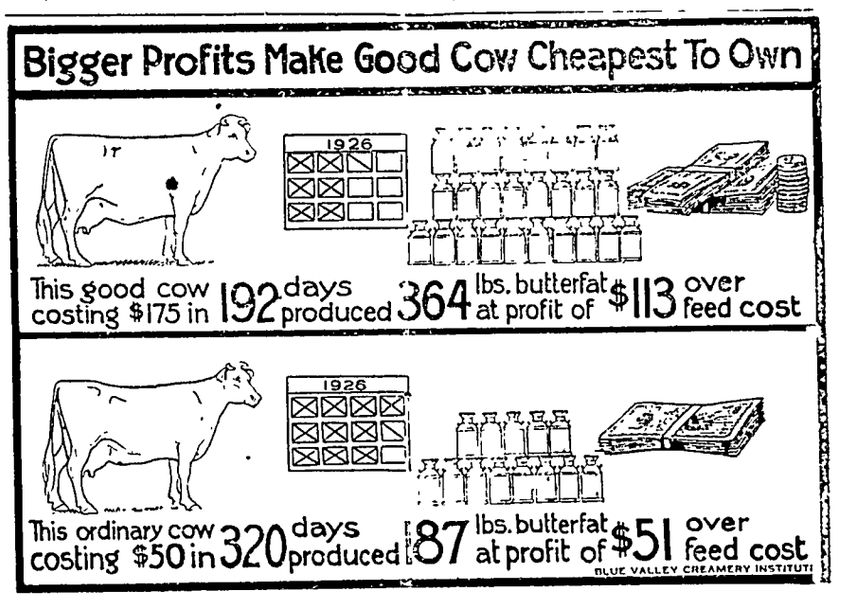
CHICK RATION CAN BE MADE AT HOME

Liquid Skimmilk Is Only Drink Included in Wisconsin College Mixture.

Vitamines aplenty and food essentials in abundance will be found in a simple ration for growing chicks that can be prepared at home, says the Blue Valley Creamery Institute by combining milk, yellow corn, middlings bone meal, oyster shell and salt in certain proportions. But no single ingredient can be left out, warns the Institute, because it takes all of them in combination to produce the best results.

Splendid results have been attained on this particular mixture, especially in Wisconsin where its proportions were first formulated by the State College of Agriculture. This excellent home mixture consists of 80 pounds ground yellow corn, 20 pounds pure wheat middlings, 5 pounds chick-size raw bone, 5 pounds chick-size oyster shells or high-grade limestone, and 1 pound salt, all mixed together thoroughly and nothing to drink but sour skimmilk for the first four to six weeks of the chick's life.

The dry mash can be made best accessible to the chicks by keeping it in a small size, constant feeding pattern hopper Liquid skimmilk is the essential part of the ration and can be kept, soured, in small wooden troughs



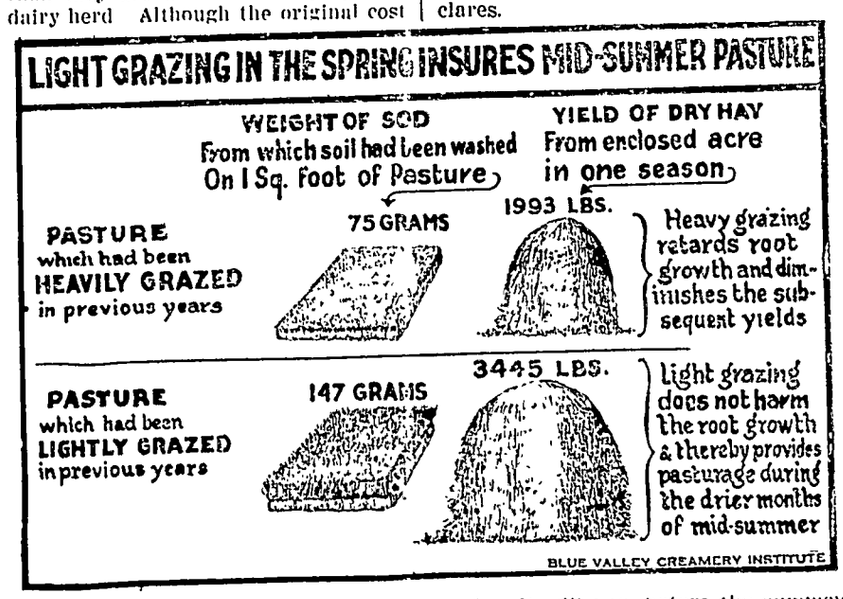
Bigger Profits Make Good Cow Cheapest To Own
1926
This good cow costing $175 in 192 days produced 364 lbs. butterfat at profit of $113 over feed cost
1926
This ordinary cow costing $50 in 320 days produced 87 lbs. butterfat at profit of $51 over feed cost
BLUE VALLEY CREAMERY INSTITUTE

PROFITS THE REAL TEST OF GOOD COW

Returns From Better Animal Invariably Make Up for Its Higher Price.

The value of a dairy cow is expressed by the profits she makes and not by her cost price, according to the Blue Valley Creamery Institute. A good cow costs more to buy than an average or a poor cow It is true also that many good cows are worth considerably more than their cost price when compared to prices being paid for common cows. On the other hand many ordinary or low profit-making cows are selling for much more money than they are worth for keeping in a dairy herd Although the original cost price of a good cow is higher than that of the general run of dairy stock, this difference is soon made up by the greater profits made from the sale of milk and butterfat from the better animal.

The real value of a good cow was expressed recently in the records of a Minnesota cow testing association . cow, costing her owner $175, produced 364 pounds of butterfat in 192 days since freshening at a profit over feed cost of $113 17. Another cow in the same association, having a sale value of $50, produced 187 pounds of butterfat in 365 days and made a profit above feed cost of $51 20 The lower-producing cow made less than half the profit of the 192 day yield of the better cow and it took all of her milking year to do it. A good dairy cow is the cheapest to own With good feed and care, she makes a good profit while the ordinary cow under the same conditions does not make a worthwhile profit, the Institute declares.



LIGHT GRAZING IN THE SPRING INSURES MID-SUMMER PASTURE
WEIGHT OF SOD From which soil had been washed On 1 Sq. foot of Pasture
YIELD OF DRY HAY From enclosed acre in one season
PASTURE which had been HEAVILY GRAZED in previous years
75 GRAMS
1993 LBS.
Heavy grazing retards root growth and diminishes the subsequent yields
PASTURE which had been LIGHTLY GRAZED in previous years
147 GRAMS
3445 LBS.
Light grazing does not harm the root growth & thereby provides pasturage during the drier months of mid-summer
BLUE VALLEY CREAMERY INSTITUTE

MORE ATTENTION TO PASTURE URGED

Over-Grazing Leaves Little Grass for Dry Summer Months.

The average pasture gets less attention than any other field on the farm, says the Blue Valley Creamery Institute. It is rarely ever limed, top-dressed or top-seeded and in nine out of ten cases it is pastured too early in the season before the grass roots and top growth have had a chance to get "set" into vigorous growth.

The first growth of grass is mostly water. To cows, it is deliciously tasty, but it is not substantially nourishing Grass should be allowed to get a good start before cows are turned into pasture. Early grazing retards growth because it is only by exposed leafage that pastures are enabled to grow. The less the exposure of the leaves to sunlight, the less rapid the growth is made. It will pay, before the summer is over, to keep cows off the grass from three to four weeks longer than is customary in one's locality.

Over-grazing early in the spring cuts down on the grazing capacity of a pasture. An experiment conducted by the Wisconsin Agricultural college shows how heavy-grazing hinders sod development and diminishes the production of grass and grass hay. Two adjacent pastures were selected for the trial. One pasture had been heavily grazed while the other had been lightly grazed for a period of years. The results obtained showed that a square foot of sod from the heavily grazed pasture weighed only 75 grams after the soil from around the roots had been washed away. Sod from the lightly grazed pasture weighed 147 grams. Acre portions of each pasture lot were fenced off early in the spring and the grasses in the enclosures were permitted to mature. The pasture that had been heavily grazed averaged only 1,993 pounds of dry grass-hay to the acre, while the pasture that had been lightly grazed yielded 3,445 pounds of dry grass-hay. Close grazing during May and June leaves little grass to provide pastures during the drier months of mid-summer.

MASSACRE AT WYOMING (Courtesy of K.E. Marshall)

By ELMO SCOTT WATSON

THE recent five-day sesquicentennial celebration, held in the cities of Wilkesbarre and Kingston, Pa., culminating in the great pageant in which 6,000 persons re-enacted the scenes which took place there 150 years ago, was more than an effort to recall the Wyoming valley massacre, one of the most tragic incidents in the Revolutionary war. It was a striking tribute to the memory of a gallant army of citizens who fought in defense of their homes and perished as nobly for the cause as any patriot warrior who fell on the field of battle wearing the Continental buff and blue.

At the outbreak of the Revolution, Wyoming valley, then a part of the county of Westmoreland of the colony of Connecticut, had been among the first to send its sons to fight for liberty. As a result, it was marked for punishment by the Tory leaders who had succeeded to winning over most of the Six Nations, the dread Iroquois, to the British side. Several forts had been built in the valley during the summer of 1776, but due to the ready response of its inhabitants to the calls of the Continental congress for recruits to Washington's army, most of its able-bodied men had marched away, leaving the task of defending their homes to the old men and boys. Those who were left were organized into companies for home defense and preparations were made to guard against the storm of destruction which was about to break over the valley.

That storm came in the summer of 1778. Smarting under the losses which they had received at the Battle of Oriskany, a large war party of Seneca Indians, led by a chief named Gi-en-gwatah, joined the force of British regulars and Tories which the notorious Col. John Butler was preparing to lead in a raid through the valley. On June 30 Colonel Butler, with an army of 800, appeared in the valley and captured the upper forts with little or no resistance. He then proceeded against the Americans' strongest post, called Forty fort, on the banks of the Susquehanna, about three miles above Wilkesbarre, into which the settlers had fled at the approach of the enemy. This fort was defended by six companies of the "home guards," numbering some 200 men, commanded by Col. Zebulon Butler, a cousin of the enemy's leader, who was a resident of the valley and an officer in the Continental army.

On July 3 Col. John Butler sent a demand for the surrender of the fort. A council of war was hastily held and although some were in favor of playing for time, in the hope that reinforcements would come, the opinion of the majority was that it would be best to march out and give the invaders battle. Accordingly about three o'clock that afternoon the little army left the fort, their numbers swelled to about 300 by the addition of old men and boys, and advanced against the enemy which were drawn up with the British regulars on the left flank, the Tories in the center and the Indians on the right, their position resting on the border of a swamp in which many of the savages concealed themselves.

The battle began about four o'clock. The American commander ordered his men to fire in volleys and at each discharge to advance a step. Under this steady fire the left of the British line began to give way, but as the Americans pressed forward in some disorder, the Indians in the swamp struck them on the flank and in the rear. An order was given to one company to fall back to check this flanking movement and that order resulted in disaster. It was misinterpreted as an order to retreat and the word ran along the whole line. The Americans broke ranks and began to retreat. Instantly there was utter confusion and the retreat became a rout. As the settlers fled toward the fort Colonel Butler, recklessly exposing himself to the fire of the enemy, tried to rally his men. "Don't leave me, my children, and the victory is ours!" he pleaded. But it was too late.

The whooping savages were on the heels of the fugitives, stabbing, shooting and trying to herd them toward a death trap in the river. Of the 300 who marched out to meet the enemy, 102 officers and men were killed in action or in the massacre which followed. For no quarter was given to the poor wretches who fell into the hands of the enemy. That night scenes of hellish cruelty took place in the Indian camp. Nor was all of the horror committed by the Indians, for almost incredible tales are told of the inhumanity of their white allies, the Tories.

History has preserved a hundred thrilling incidents of that battle and the massacre. One of the most horrible is the story of the fearful revenge exacted by Queen Esther Montour of the Senecas for the death of her son in the battle. She was a half-breed who had been educated in Canada and who had once been accepted in the best society in Philadelphia. She was an old woman at the time, but her loss and the bloody scenes which were taking place incited her to fury. Sixteen captive Americans were led before her. One by one they were seated on a rock (known as Queen Esther's rock to this day) and there, securely held by two warriors, all except two fell victims to a death-mall in the hands of the furious old hag.

One of the most unusual stories of escape was the case of Noah Hopkins, which closely parallels the legendary story of Robert Bruce of Scotland and the spider. Hopkins, pursued by the Indians and almost exhausted, sought refuge in a hollow log. While lying there, he noticed a spider spinning a web across the entrance to the log. In a short time two Indians approached and sat down on the log. Noticing it was hollow, one of the Indians leaned over to peer into the darkness, but, seeing the web spun across the opening, made no attempt to investigate further.

The next day after the massacre, Col. Zebulon Butler with the remnants of the home defense company, consisting of only 14 men, left the valley. When the Tory Colonel Butler approached the fort, he promised Colonel Denison, who had been left in charge, to spare the lives of the settlers and allow them to return to their farms unharmed if the fort was surrendered. This was agreed to and the fact that the Tory leader kept his word is about the only bright spot on the record of cruelty which history has written against his name. For the Indians, who swarmed into the fort after the surrender, although they were guilty of some plundering, apparently had their blood lust sated in the killing of the men who had opposed them in arms and did not massacre the defenseless women and children as they might have been expected to do.

In the meantime, word of the disaster having reached the people in the Wilkesbarre fort, they immediately fled down the river toward the Delaware. They left in such haste that they failed to take along sufficient provisions for their journey and an unknown number died of hunger and privation in the depths of a great pine forest which is known to this day as the Shades of Death, and the beautiful Wyoming valley, "deserted by its inhabitants, became the abode of desolation and woe."

One exception at least to the general flight was the case of one settler who remained in the valley and thereby hangs one of the most romantic stories in all American history—the story of the "Lost Sister of Wyoming." Jonathan Slocum, a Quaker from Rhode Island, settled with his wife and nine children in the valley in 1777. On November 2, 1778, a party of three Delaware Indians, stealing into the valley for scalps and plunder, approached the Slocum home. A Mrs. Kingsley with her two sons were making their home with the Slocums. One of the boys was grinding a knife near the door of the cabin when the Indians approached. They immediately shot down the boy and began scalping him with the knife he had been sharpening. Then they seized Mrs. Slocum's lame son, Ebenezer, whereat the mother, unmindful of her own danger, ran to the Indian and pointing down to the boy's foot exclaimed, "The child can do thee no good. See, he is lame!" Meanwhile her five-year old daughter, Frances, who had been hiding under the stairs, was discovered by one of the Indians, who threw her over his shoulder and dashed into the woods, heedless of the piteous pleas of her mother to spare her. As the Indians fled, with little Frances stretching out her arms beseechingly toward her mother, the alarm was given at the fort nearby, but the brief start which the Indians had was enough to allow them to outdistance the pursuit that was organized.

When the Revolution ended two of the Slocum sons, now grown to manhood, determined to lift the weight of sorrow from their mother by beginning a systematic search for their lost sister. In 1784 they went to Niagara, but all of their inquiries among the Indians gathered near there and offers of a reward for the return of the child were fruitless. They returned, convinced that their sister had been killed, but their mother was firm in her belief that she still lived. Four years later they spent several months among the western tribes in their search, but again they were unsuccessful. In 1789 a large number of Indians were gathered at Tioga Point to make a treaty and to surrender prisoners to their friends. Although prematurely aged by her troubles, Mrs. Slocum made the long journey there and spent several weeks in examining the prisoners in hopes of discovering among them her long-lost child. But the quest was in vain, as was another expedition made by the two brothers into the western wilderness in the summer of 1797. Finally in 1807 the sorrowing mother, still convinced that her daughter was alive and still hoping to see her again, died.

And it was not until 1835 that the "lost sister of Wyoming" was found. In that year Col. George W. Ewing of the United States Indian service discovered her in a Miami village on the Mississinewa, a branch of the Wabash river in Indiana. Under his questioning she admitted that she had been carried into captivity as a child and she remembered that her parents' name was Slocum. She had grown up as an Indian, married a Delaware chief and borne him children. After his death, she had married a warrior of the Miamis, but at the time of her discovery she was again a widow, highly esteemed among her tribesmen and possessed of considerable means.

Colonel Ewing had never heard the story of Frances Slocum, but believing the information would be of value to some one, he wrote to the postmaster at Lancaster, Pa., telling of his discovery and asking him to make inquiry. That official, believing the letter to be a hoax, threw it aside. Two years later he died and his widow found the letter among his papers. Impressed by the story, she sent it to the Lancaster Intelligencer, which published the letter. It was read by an acquaintance of the Slocum family, who mailed it to one of Frances Slocum's brothers, who was then living in Wilkesbarre. From Colonel Ewing he learned that the woman was still living near Logansport, Ind., and there members of the Slocum family sought her out.

The "white" Indian woman readily admitted her identity, but when they urged her to return to her old home with them she refused. She had lived as an Indian, was an Indian in every way except blood and would die as an Indian, she said. In fact, it is believed that during all the years her brothers were searching for her she may have known of the search and with the aid of her Indian friends avoided being found because she feared that her relatives would take her away from the life she had learned to love. So perhaps it was better, after all, that the mother never saw her lost daughter.

Through the influence of Frances Slocum's brother, when the Miamis were moved west across the Mississippi, the old woman was allowed to remain on the Missisinewa and was granted a tract of land one mile square for her home. There she died March 9, 1847, and was buried on a beautiful knoll near the junction of the Missisinewa and the Wabash beside her Indian husband and her children. One of her daughters married Francis Godfrey (or Godfroy) of a family famous as a line of war chiefs among the Miamis. The Godfreys were among the Miamis who were exempt from deportation when their tribesmen were moved west and some of them still live near Peru, Ind. During the recent celebration at Wilkesbarre a number of Miamis, among them descendants of Frances Slocum, went to Pennsylvania for the event. So after a century and a half the "Lost Sister of Wyoming," in the person of men and women carrying her blood in their veins, came home at last!

Give Opposing Sex Their Rights

By RING LARDNER

To the Editor:

Ladies and others of the female sex that is always shrilling for equal rights with we boys and want the same privileges we have got, well I wished they could enjoy the privilege of shaveing themselfs every A. M. and a specially going shopping in a barber shop once in a while for a hair cut or something, but unfortunately most of the fair sex is like the Russians and either don't or don't have to do neither one, and won't never know what they are missing. Only some of the gals that's in the business of pairing your nails can even guess at the delights of a barber shop.

Shaveing yourself is sport enough and always keeps me laying in bed a couple of extra hrs. looking forward to it but the real treat comes when the hair begins to drape itself down around the ears and you get a hint from some reliable source that it would be feasible to her if you spent the lunch hr. in a tonsorial parlor, because what is the use of looking like a virtuoso when you got a name that can be pronounced.

Well I was out in old Chi a few weeks ago and to show you what I went through I'll tell you what I went through. In the first place I roamed into a barber shop which is like most other barber shops on acct. of the barbers being natives of the country where the national flower is garlic, and I clumb into a steamer chair and D. Annunzio tied on my napkin and leant over me so as we was on intimate terms and asked me what did I want. As soon as I got so as I could breathe I says I wanted my hair trimmed and also myself and a shave besides. And I says:

"Just trim my hair around the edges and don't use the clipper on the sides and don't take even a little bit off the top."

"No," he says. "You look like you need some put on."

In the old days of chivalry and beauts they couldn't of been none of the former that could train a more delicate compliment than a barber. What this wop meant to subtly convey was that he had noticed me enough to see that some of my hair had fell down like London Bridge and the Philadelphia Nationals.

Well he started out with the clippers at the base of the skull as per orders, but the next thing I knew he was way up above the ears with the same utensil and had the right side of the old bean pretty near bear before I could say Jack Robinson, which incidentally I hadn't no desire to say, a specially to a barber. Well, when the right side of your head gets shaved you have got to let the left side know what the right side has been haveing did to it, so I told him to go ahead and when I got through with the hair trim I looked like a left hander from Marion, Ohio.

Maybe I could have stopped him in time if he hadn't started a fascinating conversation in the original garlic.

"Was you at the worlds Series," he says, and I says "Yes."

"What did you think of it," he says.

"Nobody that was there could think," I says.

"Well," he says, "it was no surprise to me."

"No," I says. "All us experts knew how it was going to come out like a recent war between Germany and Turkey vs. the Allies, but everybody was pretty reticent till it come out."

Then he asked me what I thought of the White Sox and the Cubs and Jack Dempsey and the Democrats in the order named, and I said I thought they would all lose and finely he asked me did I want a shave and I told him I don't never want one but there was a certain party that insisted that I better get one once in a while, so he begins to shave me and just then a big thunder storm started outside where they most generally always starts, and it seems that this guy was a scared of thunder like a lot of dogs and every time they was a clap of thunder he would lose control of the African stiletto and cut a fresh slice of boiled ham, so when he was through with that major operation he asked me what did I want on my hair and I told him my hat.

"Listen," he says. "Did you ever have your hair cinched? It closes up the ends and keeps the oil from comeing out."

"Well," I says. "I guess you are right as I made a few little investments in oil wells that they told me was a cinch and no oil ever come out."

"Well," he says. "I bet if you had your hair cinched it would benefit your hair."

"Never mind," I says. "I have quit betting on cinches."

"Well," he says. "How about a little tonic."

"I suppose you want $10 a pint," I says. "Nothing doing I know a Dr. where I can get a prescription."

"How about a little O. D. Quinine," he asked me."

So I asked him how about a little speed and a little check but the check said 85 cents and the time elapsed was 1 hr. and reckoning my time at 10 cents per hr. makes a total of 95 cents.

So all in all I wish ladies of the opposing sex could spend a term in a tonsorial parlor or library or living rm. and I bet they wouldn't be so wild for the privileges we boys enjoy.

Poor man's price. Only $25 with bundle tying attachment; sold in every state. Free catalog showing picture of harvestor. Progress Co., Salina, Kans.

Would Bar Bachelors From Holding Office

To be eligible for the Presidency of the French republic a man must be the father of at least seven children is one of the provisions of a bill proposed by M. Jean Rameau, with the idea of increasing the dwindling population of France.

A Frenchman who aspires to be a cabinet minister would have to have at least six children, according to the proposed law. If he had only five in his family, he could rise no higher than the senate. With four he might aspire to the chamber of deputies. To be mayor of a French town a man would have to have two children, and even a town councillor would be required to have one child, as one of his qualifications for office.

The author of the plan, relying upon the aspirations of his countrymen for political careers, estimates that such a law would increase the French population 10,000,000 in ten years.

Playing Safe

"Don't watch my car, watch the light. Why do you watch my car instead of the light?"

"The light ain't apt to run over me," responded the pedestrian addressed.

Money cannot buy an ounce of love but it will purchase tons of sympathy.

Life is a game of chance; it would be rather stupid if it were not.

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

FOR INFLAMED JOINTS

Absorbine will reduce inflamed, swollen joints, sprains, bruises, soft bunches. Quickly heals boils, poll evil, quittor, fistula and infected sores. Will not blister or remove hair. You can work horse while using. $2.50 at druggists, or postpaid. Send for book 7-S free.

From our files: "Fistula ready to burst. Never saw anything yield to treatment so quickly. Will not be without Absorbine."

ABSORBINE

TRELLISES HELP ALL CANE FRUITS

Artificial support for some cane fruits is desirable. There are some kinds that have weak and drooping canes and others make very long growth in a single season. When they grow downward and get matted to the sod, it is hard to pick berries and difficult to handle them.

There are three main types of trellis used. These are the single wire, the two-wire horizontal, and the two-wire vertical. In all cases the posts should be set from 25 to 30 feet apart. The height of the posts above the ground is from three to five feet for the single wire trellis, and as a rule six feet is about right.

In the single wire system a No. 10 wire is stapled to the posts and the canes are then tied to it. They may be tied loosely in groups or in single canes. Use soft cord or raffia. Do not use sharp wire in tying them.

The two wire horizontal trellis costs more to make, but it cuts out tying. In this case a 15 to 18-inch cross-piece is fastened to the posts at the desired height and a wire is fastened along the ends of the crosspieces.

Use two-by four material for crosspieces. The wires are kept from spreading too much between the posts by loosely stapling pieces of one-by-three-inch stuff to them. These can be spaced at any desired distance. Where one wants to lay down the canes for winter protection, the center posts can be replaced by a support such as shown. The wires may be held by staples driven in part way or by a nail bent down over the wire.

The two-wire vertical trellis is not used much except for tall growing red raspberries. It requires longer posts and more care in tying up the canes.

Time of Picking Apples Important for Storage

(Prepared by the United States Department of Agriculture.)

September and October are the principal apple-picking months. Picking apples at the right time to catch the qualities most desired in the markets and to avoid injuries in storage is important to growers. The picking maturity varies with the different varieties and with the conditions of storage which they will undergo. Department bulletin, 1448-D, which may be obtained by application to the Department of Agriculture, Washington, D. C., includes the tests to be applied to the principal varieties. Color, firmness, and the tenacity with which the fruit adheres to the tree, are the principal points to be observed. In several varieties, otherwise similar, a few days' difference in picking may produce wide differences in keeping qualities and dessert values. The use of a pressure test apparatus for determining the firmness of the fruit is advised. This apparatus measures the pressure required to force a plunger of stated size into the pared fruit for a given distance. At this distance an electric contact is made and a flash-light indicates the point at which the picking should be made. The Arkansas Black apple usually tests 25 pounds when in picking condition, while the McIntosh is ready for storage when it registers not less than 14 or 15 pounds.

Late Apples in Summer Orchard Cause of Grief

Many growers for the sake of cross-pollination or other reasons mix late apples in a summer apple orchard. This practice brings much grief. The greatest difficulty is that the summer apples are picked early. The late apples need several sprays after the summer apples are picked. Where these trees of late varieties are scattered around in the summer block part of the time the grower never gets back to spray the late trees. This leaves these late apples an ideal breeding place for insects and fungus diseases which can infect the next crop when the time comes.

Horticultural Facts

The difficulty in pruning currants is greatly increased by neglect. Systematic annual pruning from planting should be followed.

* * *

Newly set strawberry plants need proper fertilization as soon as they are firmly established in order to develop into efficient factories for the manufacture of the 1929 shortcake supply.

* * *

The chief item in currant pruning is to remove canes which have passed their best fruiting and to replace them with new canes.

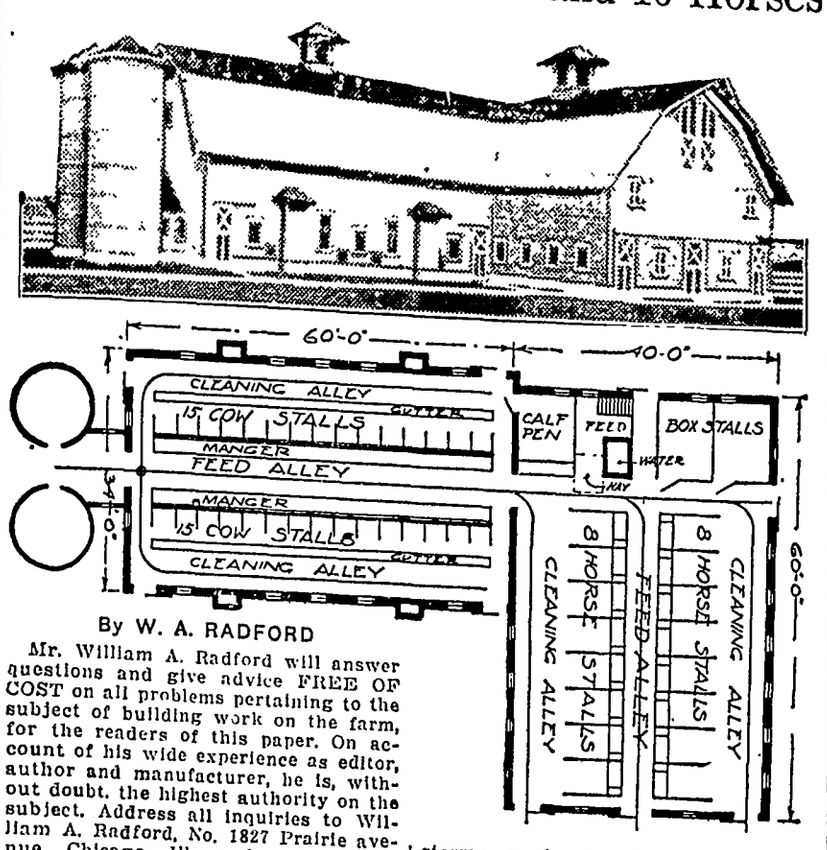
* * *

Thinning will increase the proportion of fancy and high quality tree fruits and will reduce the cost of handling, grading and packing.

* * *

A tree receives a very severe shock when dehorned for topworking purposes. This is exemplified by the many watersprout and sucker growth thrown out by the tree.

Ell-Shaped Stock Barn Provides Housing for 30 Cows and 16 Horses



By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

A large cow barn and a good-sized horse barn are built together in the design reproduced here.

This plan devotes the main wing of the barn 40 by 60 feet, entirely to dairy cows. The other wing, which might be termed the base of the "L," is planned for horses, for the most part in single stalls. A couple of box stalls are provided for special use. From the feed room, a stairway leads up to the hay floor. A pen that may be used in connection with the cow stable occupies the corner.

A very desirable feature of the horse stable is the watering tank in the central alley that connects with and runs through the cow stable. This watering trough is intended for use of the horses, but on stormy days, it comes in handy for some of the cows, if not all of them.

This plan provides for the housing of 30 cows and 16 horses in the single stalls, so that considerable live stock can be housed under one roof. There is a comfortable feeling in stormy weather in winter about doing the chores in a self-contained barn.

With the two silos and such storage capacity as this roof provides, the feeding proposition is easy. There is a great difference in taking care of animals when you have the facilities for doing it. It seems to relieve a stockman of the principal burden. He really has nothing to worry about. He can devote his whole time to the improvement of his live stock, which, of course, menus laying out work for summer as well as taking care of their present needs.

The ventilating flues in this cow stable are a little different from the ordinary, because they are built outside of the stable. This is done for the purpose of leaving the stable walls straight and smooth on the inside. Above the stable ceiling they are carried into the building, where they do not interfere with the internal working of the barn.

In most of the large improved barns, provision is made for overhead tracks to carry feed and litter cars. Men having a good-sized dairy and plenty of horses will appreciate this design.

Tudor Period Homes Relic of Old England

The English manor houses to which present-day architects look for inspiration when planning Tudor work are invariably of considerable size and importance.

Otherwise they would not have endured the ravages of time and social upheaval.

This style is distinctly English, and in plan the true Tudor house will exemplify the prevailing character of all English domestic work. Planned for comfort with economy of cost. Planned for lovers of the country who desire privacy.

The public part of house and grounds is distinctly separate from the service portions, and both from the family living quarters. This latter commands the part of the grounds reserved for the enjoyment and rest of the members of the family.

Domestic architecture of Tudor tradition is fundamentally an achievement in brick and stone. The English very consistently utilized a building material which came readily to hand, the common red brick.

The walls are of brick, usually red in color, and stone trim is used freely. Gable walls usually are carried above the roof line and the masonry crowned with a stone coping.

This coping will follow the roof pitch in the simpler examples, with finials of stone at eaves and ridge to relieve the severity. Sometimes the gable ends are very decorative, with the coping curved in semicircles, arcs, etc., and embellished with ornamented finials where opportunity presents.

Door and window openings are embellished with stone sills, and often with jambs, lintels and mullions of stone.

The casement sash is typical of the English style, offering a splendid opportunity for a bank of windows with mullions and transom bars in stone. Bay windows are often two stories in height and crowned with stone coping. The window openings with their great width have flat lintels as a rule, but doorways are often arched and richly ornamented with stone. Molded carved stone ornament is used in the decorative examples of this style.

As is the case in much English work, the many chimneys are highly decorative in character. They are capped with stone and often surmounted with chimney pots of fanciful design.

The roof is given little importance, as has already been suggested. The pitch is steep enough to permit attic rooms, and dormer windows are treated in the same spirit as gables.

Provide Rear Stairs When Space Permits

If space is available, and the pocketbook permits, provide a rear stairway as well as a main one, so that the maid or even the housewife may go up or down stairs without passing through the main hall or the living room. Every housewife knows the value of such a stairway. It may save many steps and at times permit the ladies to skip upstairs and quickly arrange to meet a welcome visitor or to avoid an unwelcome one.

Rough Texture Wall Finishes Easily Done

Textured interior finishes, according to noted interior decorators, are not merely a fad, and as such doomed to early obscurity, but are a distinct contribution to the art of arranging lovely interiors.

Furthermore, they have a historical background in that textured interiors were a part of almost all great architectural periods—the Greek, Italian, Spanish, French, English, etc.

Such finishes have physical as well as esthetic qualities to recommend them. A textured wall and ceiling, for example, break up and soften light waves and thus "tone" the atmosphere of a room. They also break up sound waves and thus improve a room's acoustics. And a textured finish can be so treated that it can be washed down when soiled, which eliminates the need for redecorating.

One of the simplest ways to produce a textured finish is to use a plastic paint. This material comes in the form of a white powder and is mixed with water and proper color before application. After it is on the walls or ceiling, and while it still is "tacky," the texture is produced with a kitchen spoon, a crumpled piece of paper, a sponge or some such commonplace instrument.

Device Lifts Ashes From Under Furnace

Removal of ashes from the furnace, a disagreeable and often neglected task, is rendered quick and easy with a new device styled an "ash uplifter," which places a can below the furnace and brings it out for emptying at the turn of a crank.

The ash-lifting device is installed in a pit lined with concrete which may be waterproofed where conditions require. Whenever the fire is shaken the ashes drop into the can through a hole in the floor of the furnace ash pit. This pit is automatically closed when the elevating mechanism is operated, preventing the can pit from becoming clogged with ashes. The door may also be kept closed excepting when the ashes are shaken, in the case of a forced-draft furnace.

The trapdoor of the device may be placed either in front or at one side of the heater. For convenience in trundling the cans of ashes a small steel cart is furnished with the outfit.

Small Home Typically American in Style

The small house is typically American. Thousands are being built every year, many of them on the supposition that the art of small house architecture is independent of its material. Sense of proportion and the laws of structure are based in great part on the material employed.

The material, in turn, has an important bearing upon the design. Since lumber will continue to be the favorite material for small house construction, those who build small houses should be familiar with the best practices in planning and designing.

"Honor System" Pleases Farmer

More Loyal to Marketing Bodies Than "Ironclad" Contracts.

Co-operative marketing organizations of farmers throughout the country are rapidly dropping the so-called ironclad contracts by which their members have been bound in the past and are adopting an "honor system" which will allow farmers to withdraw from membership at will.

This is the extensive movement revealed by Fred Wilmarth, marketing expert, in an article written for the Farm Journal. Mr. Wilmarth in a nation-wide survey has found that 56 co-operative associations now favor the plan which will allow members to withdraw at will, as against 20 that present objections.

He predicts that the "co-ops" will grow stronger both in loyalty and membership in the future with the obligatory membership clause abolished than under the plan which bound the members to abide by the organization's rules for periods of from five to seven years.

Compulsion Irritates Members.

Such outstanding organizations as the California Fruit Growers and the Dairymen's league are among those who feel that the co-operative plan is now so firmly established that compulsory membership of dissatisfied members will be more a hindrance than an aid in the future, he points out.

"It must be admitted that the binding feature presented a powerful appeal in the organization period of many co-operatives," says Mr. Wilmarth. "The idea of making the other fellow stick went over with a bang. Then, too, it gave the new organizations a certain air of permanency that was doubtless of value in the beginning. But as an instrument to actually bind members to deliver their product it hasn't worked according to specifications.

"I believe it will be borne out by most of those connected with the now-operating associations that the member who is delivering his product is doing it because he wants to and because he believes in co-operative marketing, rather than because he thinks he'll be sued if he doesn't deliver.

American Trait.

"This is peculiarly an American trait. We do what we want to do, and it riles us to be told that we have to do anything. Contracts are necessary to be sure. But the idea of forcing members to stick to their organization by threat of court action is of little effect.

"Neither can it be argued longer that the 'ironclad' feature is necessary to establish the permanency of the co-operatives," his Farm Journal article concludes. Those that are in successful operation are successful through plain business merit."

Best Breeding Age for Heifers Used in Dairy

The age at which the heifer should come into milk depends somewhat on the breed to which she belongs and the rapidity of development of the individual. In all herds there are some heifers which mature more slowly than others, and it is well to postpone breeding of backward animals two or three months.

Production of milk has an important influence on growth and development, and too early breeding is apt to result in undersize, and this in turn is reflected in the productive ability of the animal.

Normally developed animals should be bred at the following ages:

Holsteins	19 to 21 months
Ayrshires	18 to 21 months
Guernseys	17 to 19 months
Jerseys	15 to 17 months

These figures are based on a study of the production records of the cows in the herd of the University of Missouri, and further information on Ayrshire cattle contained in Maryland Station Bulletin 217.

Agricultural Squibs

It is more important to plant when the land is right than when the moon is right.

* * *

Sweet clover has no equal as a combined soil building, weed fighting, pasture and hay crop.

* * *

If killed at an early stage, weeds have not the opportunity to sap the ground of moisture and plant nutrients.

* * *

The secret of weed control in the vegetable garden and with other cultivated crops is to destroy these pests while they are young.

* * *

The careless manner in which barnyard manure is often handled suggests that its value as a fertilizer and the manner in which it deteriorates when exposed to leaching and fermentation are not fully appreciated.

* * *

Much of the alfalfa hay produced is of low quality due to a large percentage of the leaves being lost. Most of the leaves may be saved if the hay is raked into small windrows as soon as possible after the leaves have wilted and the curing completed in the windrows rather than in the swath.

Chinese Women Work Long for Small Pay

Two-thirds of the women workers in Tientsin, the most prosperous city of north China, work for 11½ hours or longer for an average wage of 20 cents gold a day, according to a comprehensive survey just completed by the Young Women's Christian association. Out of 10,000 women workers studied, fewer than half have one rest day in seven, and one-fourth do not have any rest day whatever. Most of those who have one day a week to themselves are employed in foreign factories. Two industrial secretaries of the Y. W. C. A. made a study of 30 establishments, factories and small shops, which were selected as a cross-section of the Chinese woman worker's life in Tientsin. As many foreign factories were included, where conditions are above average, the picture is probably a little more favorable than the entire facts justify.

Very Simple, But—

Aimee Semple McPherson, the beautiful evangelist, said to a girl reporter in Los Angeles:

"It is a simple thing to be good, and yet it is a difficult thing. Listen:

"A student at the University of California was training for the pole vault. He went to a famous trainer and said:

"'What's the matter with me? Almost every time I try to do a high vault my right leg knocks the crossbar off the pins.'

"The trainer looked at the student thoughtfully and then answered:

"'Raise your right leg a little higher.'"

Alfred and Eloise

Eloise was trifle upset. Her devoted Alfred wanted to know what had gone wrong.

"I ran into a telephone pole with my roadster."

"When you see a telephone pole coming, give it the right of way."

Sure Cure

"So your wife's down South for her health? What did she have?" "A thousand dollars her father gave her."

If a man would give as much attention to his garden as he does to sports he could take prizes.

Powdered Foods

Karl Hessel, a German engineer who has devoted his life to the study of fruit and vegetable chemistry, has developed a method of preserving whereby fruits and vegetables are reduced to dry powder, which is pressed into a briquet. In preparing for use, the briquet is dissolved in water and the substance and taste are revived.

Some women think they are man's superior because the latter take off their hats to them.

The average man is seldom willing to do the things he is constantly telling others to do.

The Aviator

Absolute dependability is aviation's first law and that is why I use dependable Champion Spark Plugs.

Champion is the better spark plug because it has an exclusive sillimanite insulator specially treated to withstand the much higher temperatures of the modern high-compression engine. Also a new patented solid copper gasket-seal that remains absolutely gas-tight under high compression. Special analysis electrodes which assure a fixed spark-gap under all driving conditions.

Dangerous Varicose Veins Reduced or Money Back

This Simple Home Treatment Is Giving Amazing Results

Rub Gently and Upward Toward the Heart as Blood in Veins Flows That Way.

If you or any relative or friend is worried because of varicose veins, or bunches, the best advice that anyone in this world can give you is to ask your druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and apply as directed night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that even Piles are quickly relieved and absorbed.

If you want Hail Insurance see Karl Kraus who writes Square Deal. tfc

TO HOLDERS OF

Third Liberty Loan Bonds

The Treasury offers a new 3⅜ per cent. 12-15 year Treasury bond in exchange for Third Liberty Loan Bonds.

The new bonds will bear interest from July 16, 1928. Interest on Third Liberty Loan Bonds surrendered for exchange will be paid in full to September 15, 1928.

Holders should consult their banks at once for further details of this offering.

Third Liberty Loan Bonds mature on September 15, 1928, and will cease to bear interest on that date.

A. W. MELLON,
Secretary of the Treasury.

Washington, July 5, 1928.

John and Paul Pritchard went to Des Moines yesterday and drove back two new Fords. One was a roadster and the other a four door sedan. This was the first four door to arrive in Hancock county. It is certainly a fine looking car.

Ventura Heights was the scene of a picnic Sunday attended by the following Klemme folks: William Schlawin and family; Carl Wille and family; G. Goll and family; C Wille and family; Werner Schlawin and family; and Grandma Schlawin

Mr and Mrs. J. H. Benzing and son, Newton, of Monona, Iowa are visiting at the Geo. Ulrich and Levi Klotzbach homes. Mrs. Benzing is a sister of Mr Klotzbach and Mrs Ulrich. They came Saturday and remained until Monday

Mr and Mrs. J. C. Thomas, and Irene Harms returned last Wednesday evening from their trip north They went via St. Paul to Duluth thence onward to Bemidji and into North Dakota a short distance, then down through Ortonville and into South Dakota, thence on toward home via Okoboji They visited relatives all along the way and had a fine trip

Threshing Coal - -

—AND OTHER SUPPLIES YOU MAY NEED NOW OR SOON

We will have plenty of high grade coal on hand especially for threshing. We have three car loads on the way now, due to arrive before threshing. Let us take care of your wants in high grade threshing coal.

COAL FOR RANGES

For your cooking range we recommend that you try our Illinois Egg, especially fine for summer cooking.

ABOUT POULTRY FEEDS

We have a lot of satisfied customers who have fine luck with our MOR-GAIN starter and growing mash. And by the big orders we sell it certainly must be good. We ask you to try MOR-GAIN.

MAKE YOUR HOGS PAY!

You can make more money, and do it quicker by feeding your Hogs MOR-GAIN PIG MEAL. Klemme farmers report fine results since they began using it. We are selling a lot of it every day and aim to carry plenty on hand.

Try our Occident and Mothers Best Flour—none better regardless of price.

Klemme Food Market

News of Klemme and Vicinity

Dr. R. W. Specht. Dentist. Garner, Iowa. adv

Mr. and Mrs. C. F. Keraus spent the week end at Iowa Falls.

J W Pritchard was in Mason City Friday on business.

Miss Christine Callison, of Britt, was a caller in Klemme Friday

Mrs. Ben Coobs visited with Mrs. J. Bredbenner Friday afternoon.

Gilbert Schaper was a Garner visitor Friday.

Mrs Christianson came for a visit with her mother, Mrs. Einar Salling.

Mr. Souter of Ames, was visiting with Clarence Elder Sunday.

C A. Bielefeld was at Ames on business Monday.

Mrs. Frank Kluckhohn and children and Mrs. C. F. Kerause spent Monday afternoon at Clear Lake.

Mrs. Chris Gram visited with her parents. Mr. and Mrs. F. A. Gee east of Goodell Friday evening.

Mrs. Missman and son, Byrnes, and Cecil Leitzinger were Hampton visitors Friday

Beatrice Lumly of Chicago came for a visit at the Ted Dutheridge home.

Mrs. A. Ahrenkeil and son, of Goodell, visited at the Blank home Thursday.

Mr. and Mrs. Ely of Belmond visited at the Dr. Missman home Sunday evening.

Dr. W. F. Missman and family were dinner guests at the Will Lemke home Sunday

John Lackore and wife of Forest City were visiting at the Emil Pater home Sunday.

Maurice Greiman, who is attending summer school at Ames, was a visitor at home over Sunday.

Dr. J. L. Hesselhuus and family of Conrad visited at the Sumner Trumbell home Sunday.

Mr. and Mrs. Henry Steiblock and family visited at the Fred Albers home Sunday evening.

Rev Grosshuesch and family visited at the Geo. Albers home southeast of Goodell last Wednesday

Verner Lewis and family and Mr. and Mrs Lew Lewis enjoyed a picnic at Goodell Woods Sunday.

Mr. and Mrs. Glenn Seney, of Sheffield spent Sunday at the Dr. P. P. Anderson home.

Donald Gibbs, Allie White and son, Albert, played with the Goodell band Saturday evening.

Clarence Kluckhohn and family and their company from Indiana, drove to Humboldt Sunday

Mr. and Mrs. Einar Salling and daughter, Mrs. Christianson, drove to Des Moines Saturday.

Dr and Mrs. R. W. Specht, of Garner, visited at the Missman home Thursday evening.

A few of the Boy Scouts enjoyed a trip to Morse Lake Thursday forenoon.

Mr. ad Mrs. Wm. Franks, of Waseca Minn., came last Wednesday for a visit at the W. F. Pavey home and with other Klemme friends.

A. J. Kudje and family and Mr. and Mrs. Joe E. Johnson are enjoying a ten days outing in northern Minnesota.

Mrs. Hattie Lanahan and daughter, Laura, and Fred Musefelt, of Clarion, were visiting here Saturday evening.

Mr. and Mrs. Walter Lau and children, and Mrs. P. W. Johnson and children were at Mason City Wednesday.

Fred Arnold, Jr. has purchased a Ford, one of the ancient varieties and is fixing it up. When through we presume it qualifies in the "collegiate" class. With this means of transportation Fred intends to take a trip.

This vicinity was visited by good rains Tuesday evening and again on Wednesday night. There is plenty of moisture and the crops look fine.

Mrs. G. W. Kluckhohn, Mrs. Sadie Turgasen and son, Donald, visited over Sunday with W. C. Keraus and family at Traer, Iowa.

Wm. Smith, accompanied by Dorance Day, Byrnes Missman and Buster Jorgenson were Belmond visitors this morning.

Andrew Nelson of Clear Lake was visiting here Monday with relatives. Tom Nelson, Sr. went back with him for a visit.

Mrs. Best, mother of Mrs. Henry Jost returned to her home at Manson. Sunday H. F. Jost and family took her back in their car.

A birthday party was held at the home of Mrs. Henry Schuldt, Sr. last Friday in her honor and for Magnus Schuldt.

Miss Hulda Johnson left Wednesday for Los Angeles, California, after visiting and spending her vacation with Klemme relatives.

Catherine Block of Manson, Iowa came Sunday for a visit with her uncle and aunt, Mr. and Mrs. Henry Jost.

Merle Anderson who has been visiting with his uncle and aunt, Mr. and Mrs Einar Salling, went to Eldora, Friday

Miss Bertha Johnson underwent an operation at a Mason City hospital last week Tuesday. She is reported as getting along fine.

Paul Grange and family went to Ruthven Saturday for a visit over Sunday with his brother and family They returned Monday.

Herb Bailey came in from Sioux City last Wednesday to look after matters of business and visit old friends. We acknowledge a very pleasant call.

Mr. and Mrs. Geo. Stokesbary visited at Corwith Friday evening.

Florence Stokesbary and Norma Barz were Britt visitors Friday evening.

Mr. and Mrs. F R. Perkins, of Oelwein, Iowa, visited at the Harold Leitzinger home over the week end. They came Saturday and left Monday afternoon.

John Day and family left Friday morning for Sioux City for a week end visit with Mr and Mrs. Donald Nissen They returned to Klemme Tuesday evening.

W. F. Pavey and family and Ben Coobs and family went to Bayside Sunday. There they met William Coobs who came up from McGregor on the special excursion.

Mr and Mrs Albert Lukow and daughter, Violet, of Manitowoc, Wis, visited for a couple of days st week at the Fred Albers home south and east of Goodell.

The Ladies Aid met Thursday at the Parish House with a very good attendance. Lunch was served by Mesdames Chris Gram and C. A. Arnold.

Mrs Ernest Helps enjoyed a visit from her two sisters and a brother, who came Sunday from Morris, Ill. Monday they went to Rochester where a sister entered the hospital.

"Iowa, That's Where The Tall Corn Grows" And if you don't believe it take a look at the sample brought in by Harm Christians at the Wellemeyer store, it's seven feet tall!

The R. N. A Lodge met at their Hall Friday afternoon and a good attendance was reported, dispite the fact that it was "Friday the 13th." Mrs. Fern Gram, and Mrs. Fern Moulton were inlated into the order Refreshments were served.

J. C Thomas is driving a Whippet coach as the result of a recent trade with Lester Stille, who is now the owner of Jim's Ford coupe.

Miss Edith Haupt has been engaged to keep books for the Klemme Creamery and will begin work in about a week. Mr. Val. Josten, secretary is still unable to look after this part of the work. However we are glad to report that Val is getting along fine.

Kitchen Ranges

Now is a good time to think about buying that new Kitchen Range and be all prepared to cook those big harvest and thresher dinners.

We have a fine line of Ranges to select from right now as we have a big stock on hand. We have a range to suit your particular requirements, as well as your pocket book.

We are featuring two popular makes THE NEW SOUTH BEND MALLEABLE which comes in an assortment of finishes—Gray, Tan, Ivory, White and in assorted sizes. It's easy to pick one you like here.

THE NEW MAJESTIC

Comes in a fine assortment of colors—the old reliable range you all know.

The above ranges have all the new features of construction and are the very last word in strength, good baking and cook ing qualities; none better on the market.

We have a few good oil and gas stoves and ranges on hand yet.

KLEMME TROOP 56 ALL IN SCOUT CAMP

KLEMME BOY SCOUTS 100 % IN CAMP ATTENDANCE

Will Enjoy A Week's Outing At Camp Roosevelt, Ventura

The Klemme Boy Scouts, Troop No. 56, entered Camp Roosevelt, on the shores of Clear Lake near Ventura, 100 per cent in attendance Tuesday morning for the opening of the sixth period of the summer Boy Scout Camp of the North Iowa Coun cil. Seventeen Klemme boys are in camp, nine of whom completed the Second Class requirements and were given their badges at a Court of Honor held at Camp Roosevelt last Sunday afternoon.

Camp Roosevelt is a Scout Training Camp with a character building program, developing leadership and resourcefulness, teaching Americanism and Scoutcraft.

The people of Klemme can well feel proud of Troop 56, composed at the present time of seventeen boys, all fine boys, who have made wonderful strides in Scout work. The troop was officially organized but little over a month ago, but have already progressed beyond many of the older troops in the Council. The boys have worked hard to master scouting and the Klemme Troop is one of the liveliest bunch of boys at Camp Roosevelt, and without a doubt the only Scout Troop which has made a 100% attendance record this year.

The boys all have new uniforms, bright new neckerchiefs and their troop numerals arrived just in time for use at this camp.

Some Facts About The Camp

Camp Roosevelt, the Boy Scout camp of the North Iowa Council, is located on the south shore of Clear Lake about a half mile south of Ventura and then a half mile east, in Ventura Heights. (The road is marked) Twenty-three acres here afford an ideal place for real outdoor Scouting.

The Camp Equipment

There are nine open air type cabins, housing eight Scouts each. The cabins are twelve by sixteen feet, open on three sides but with shutters that may be closed in case of rain or storms. The cabins are well screened. Bunks are built in each cabin and mattresses with hay or straw are provided each Scout. A large airy eating Lodge, a Handicraft Lodge, and Officers Quarters are also part of the equipment. The buildings are well protected against storms by a wooded hill.

The Camp Leadership

The Camp Staff is composed of C. Underwood, Scout Executive and Camp Director; L. Osam, Field Scout Executive; H. H. Ober, Chm. Camping Committee; "Doc" West, Randall Klemme, Director of Handicraft, Scoutmasters, and other experienced Scout men, so that your boy in Camp has ample leadership and instruction.

Expert leaders of boy work are in charge of the program at Camp Roosevelt. Every precaution is taken to guard against mishaps of any nature. Expert Life Guards are always at hand. Scouts who do not know how to swim will be given special instruction by expert men.

Camp Roosevelt is famous for its well cooked food and balanced rations. Ask the boy who has been there!

Religious services are held every Sunday morning for both Protestant and Roman Catholics.

Camp Roosevelt is brimful of activity with something useful to do, something to think about, something to enjoy from Reveille to Taps every day, including: Swimming, Hiking, Camping, Games, Baseball, Nature Study, Pioneering, Handicraft, Woodcraft, Treasure Hunts and an interesting course in Leather work. There is a campfire every evening except Thursday evening which will be given over to night games. The Campfire programs consist of songs stories and stunts.

When You May Visit Camp

Because of a definitely planned Camp program, visitors would be disruptive No one, except Scout men, are allowed in camp during the day Visitors are made welcome any evening after 6.30, except on Thursday everings, for the Campfire program, and especially welcomed and urged to be present on Sunday afternoons, which is Visitor's Day.

The Scout Law is the law at the Roosevelt Camp, and a boy must observe the following established laws at camp:

1. No firearms, tobacco, playing cards or swearing permitted

2 A Scout must not enter the water any time other than regular swimming periods and then only when expert adult swimmers are present

3. A Scout must not leave the camp grounds without Camp Director's consent and he must not break a regular camp term.

4. All illness, no matter how small, must be reported.

5. A Scout breaking any of the rules will be "dishonorably discharged" without being allowed to finish his camp term

Parents and friends may not bring treats to camp, although treats for ALL Scouts in camp will be welcomed These must be turned over to H H Ober, Camp "chief." Watermelon absolutely barred

The evening camp fires are held at 7:45 o'clock and the Court of Honor is held each Sunday afternoon at 3:00 o'clock. We urge the people of Klemme to visit the Camp next Sunday afternoon and witness the Court of Honor At that time we are sure a number of our boys in Troop 56 will be up for promotion and Merit Badges

The Scouts in Camp get up at 6:30 a m and at 6:40 take their morning dip and have breakfast at 7 20 The only "inactive" part of the day is from 1:00 to 2 00 p m Lights are out and all Scouts in bed at 9 15 p m.

Scouts with a "sweet tooth" are permitted to spend not more than ten cents a day for candy, which is purchased at the Scout trading post

At this time nine of our seventeen Scouts are 3nd Class Scouts and will complete some of their 1st Class tests during camp; six of our boys are well along and have completed most of their tests and no doubt will be up for promotion next Sunday to receive their 2nd Class badges Two boys were admitted to the Tenderfoot class Monday evening at an Investiture Service held at local Scout Headquarters, the ceremony being put on by local Scouts and Scout men. These boys should be able to do much of their work toward the 2nd class goal at camp this week.

Members Of Troop 56

William Guager, Wayne Pavey, Floyd Klotzbach, Donald Turgasen, Henry Smid, Harold Jost, Raymond Schuldt, Willis Busch, Dorance Day, Paul Sampson, Asa Gibbs, Byrnes Missman, Alvin Keeper, Kenneth Kluckhohn, Clarence Kluckhohn, Wilbur Arnold, Ronald Geisler

Members of the Troop Committee are: Dr. W. F. Missman, Chairman; E. F. Jacobs, R. A Jorgenson, Andrew Wellemeyer, and Rev. Calvin Grosshuesch. Dr D P. Anderson, Scoutmaster, Asa Arnold, Asst Scoutmaster.

Any boy, of good character, 12 years of age and over, who may wish to join Klemme Troop No. 56 should get in touch with any of the above men.

ROYAL NEIGHBORS ENJOYED PICNIC AT CLEAR LAKE

Enjoy Afternoon At Koerner Cottage And Go In Bathing

The Klemme Royal Neighbors enjoyed a fine time last Friday afternoon when they went to the Koerner Cottage at Clear Lake for a picnic lunch. The ladies enjoyed the afternoon bathing, taking pictures, and having a general good time, returning to Klemme in the early evening.

Glen and Evelyn Lewis are visiting with their grand-parents, Mr. and Mrs Lew Lewis, while their mother, Mrs. Verner Lewis, is visiting at McGregor.

ALLABEN RETIRES FROM MAIL ROUTE

RURAL MAIL CARRIER RETIRES AFTER 27 YEARS SERVICE

Rural Mail Carriers Of County Gave Party For Veteran Carrier

Wm Allaben, better known on his route and among friends as just plain "Bill," has retired from Government Service as as a rural mail carrier out of Goodell, after completing approximately twenty-seven years of uninterrupted service for Uncle Sam In recognition of Mr. Allaben's long and faithful service the Government gives him an honorable discharge with a nice, fat pension that will enable Bill to live a life of ease and put in long happy hours at his chief past time—fishing

Last Friday evening the mail carriers Association of Hancock County honored Mr. Allaben at a gathering held at the home of his daughter, Mrs Robert McNutt, as an appropriate farewell and to extend their congratulations for having completed a long, faithful service The carriers presented Mr Allaben with a fine silver gift

"Bill" has seen the many up and downs of rural mail carrying, from the early days when the best transportation available was riding horse back to get thru the mud in summer and snow in winter, and at times this means of travel would be tied up and the route made on foot. For many years Mr Allaben carried his mail with a horse and buggy, and when the automobile came into service and with it better roads, he resorted to that means of travel on his daily rounds

His many patrons, all of whom are his staunch friends, will miss his daily appearance, for he was ever cheerful, courteous and always ready to do his utmost in giving the best of service.

Mr. Allaben has made a record to be proud of.

MONSTER SEA ELEPHANT COMING WITH CIRCUS

Only One of its Kind Ever Captured Alive Making American Tour With Ringling Bros. & Barnum & Bailey

Carrying hundreds of people and presenting the greatest lineup of acts and attractions ever before in its entire history, Ringling Bros. & Barnum & Bailey Circus, Greatest Show on Earth, will pay its annual visit to

MASON CITY, WED., AUG 8th

Advance notices indicate the circus this year eclipses its past efforts to supply clean entertainment for the masses. In fact, the Ringling Brothers have spared no expense in bringing to America only the greatest and best acts that Europe has to offer.

Its displays this year offer more than 300 acts of varying nature, combining thrills, amazement and fun for over two hours. To be exact, the big show carries 1600 people; 800 men and women arenic stars; 1009 menagerie animals, with "Goliath," the only sea elephant ever captured alive; 350 performing horses with 150 in one display; 5 herds of elephants. It is the world's first and only 5 ring circus and is transported from city to city on 100-double-length railroad cars.

The afternoon performance begins promptly at 2 P. M., and the night program starts at 8 o'clock Patrons will find courtesy the watchword and every possible attention given youngsters and women, and for the benefit of the kiddies, it might be well to say that there are over 100 clowns. adv

PLAN NOW TO BE AT COUNTY FAIR

HANCOCK COUNTY FAIR TO BE HELD SEPT. 11-14

Those In Charge Planning A Fine Program For Everybody

Plans are being made for the Hancock County Fair and the dates have been definitely set for September 11, 12, 13, and 14, four big days at Britt.

Some time ago one of the big fine buildings on the Fair Grounds, the Floral Hall, burned to the ground. It was not possible to build another structure and in place of Floral Hall the Fair officials have arranged to use large tents for the exhibits this year which were formerly displayed in Floral Hall

A number of requests have already come in for concessions and exhibit spaces. No doubt "Midway" will be well filled again this year

Officials are working out an attractive program and have already booked six acts of free attractions for the fair visitors.

A poplar feature of the county fair is the boys and girls club show and this will be bigger and better than ever this year.

Make your plans now to be at the "home fair," at Britt on the above dates, Sept. 11, 12, 13 and 14.

GIRLS CLUB ACHIEVEMENT DAY TO BE HELD AUGUST 10

Number Of Contests and Exhibits Will Be Staged

Arrangements have been made to hold a girls club achievement day at Garner at the high school building on Friday, August 10th., beginning at 9:30 a. m.

This is a big day for the girls clubs and a number of contests and exhibits will be put on. There are seven different girls clubs in the county in as many townships. These clubs have been working on the Clothing project during the year and are going to exhibit things they have made. From these exhibits articles will be selected that may be sent to the Iowa State Fair.

The Music Memory, contest will be conducted on this date. In this contest, a number of selections will be played and the club correctly identifying the pieces will be given a prize of a Portable Victrola.

A Health contest will be conducted and the champion health girl of the county will be chosen and sent to represent Hancock County at the State Fair.

Demonsration teams from the different clubs will compete and the winning team will be declared the champion of Hancock County and will represent the county at the North Iowa and Iowa State Fairs.

Mrs. Harold Ellis of Sac City will be the judge of the exhibits and the demonstrations. Mrs. Ellis will be remembered as Miss Grace McIlrath who was Home Demonstration Agent here a few years ago.

KLEMME FOOD MARKET AD IS NATIONAL "HOOK-UP"

Everybody is interested in aviation these days, and anything pertaining to that is of special interest.

An unusual adv in the Times this week is the one carried by the Klemme Food Market. This ad is a "tie-up" with a stunt in the 4th Annual Air Tour of the U. S. In this tour, in which many well known pilots entered, along with a plane of the Monarch Co., each morning before hopping off the pilots were all given a day's supply of piping hot Monarch Coffee which they carried in specially constructed thermo bottles. "Coffee Filling Stations" along the route of stops was maintained by the Monarch Co. The big tour included 6200 miles and overnight stops in more than thirty big cities.

The cut in the ad is a reproduction of the Monarch plane used.

FARM BUREAU WOMEN TO PUT ON STATEFAIR EXHIBIT

Hancock County Ladies Will Show Booth On Home Furnishings

The Farm Bureau women of Hancock County will put on a Home Furnishing exhibit at the Iowa State Fair. This project is in charge of a committee with Mrs. Fred Oxley of Corwith as Chairman. The other members of the committee are as follows: Mrs. Ernest Schubert, Posters; Mrs. Ed. Oxley, Maps and Results; Mrs. Chas. Grau, Photographs; Mrs. S. B. Durant, Publicity.

This committee is being assisted by Miss Merle Ramer, Home Demonstration Agent. Plans have been practically completed and the committees are hard at work getting things in shape for the exhibit. They are making every effort to put on a winning exhibit for Hancock county. The support of the Farm Bureau women in every township in the county is necessary and the committee is practically assured of help from each township.

Considerable interest has been taken in these county Farm Bureau project exhibits at the State Fair. The purpose of the exhibit is to develop project work and to show the people of the state the extent of home project work. It also arouses a spirit of competition between counties. Each exhibit represents a regular completed course as outlined by the Extension Service.

The committee from this county will, of course, have charge of the setup of the booth at the State Fair and some member of the committee will be at the booth at all times to answer questions in regard to anything shown in the exhibit. It will, also, be necessary for the committee to furnish a one-half hour period on the local leaders program during the fair.

HERE'S A PROBLEM FOR THE WATER ENGINEERS

Two Klemme Wells Evidently Tap Same Underground Stream

For quite some time the Creamery has had difficulty in pumping enough water to supply the needs of the plant as the well did not hold out This was thought to be rather queer as the well is a deep one, 175 feet, and should supply plenty of water.

A. D. Gimer, buttermaker at the plant began investigation as to why at times the water supply ran short and at other times there seemed plenty of water. Continuing his investigations he discovered that when the city water pumps were working that the creamery water ran short. He concluded that both wells tapped the same underground water stream, and this is evidently the fact.

Tuesday morning Mr. Gimer arranged with Marshall Finn to conduct a test That morning the city pump was not started. The centrifugal pump at the creamery threw a fine stream of water and there was an adequate supply of water.

It was found that when the city pump is working the creamery supply of water soon goes down.

The Creamery uses a centrifugal pump and when the water goes down the pump must be primed. Gimer says that in a half days run they often have to prime the pump fifty times.

This presents a real problem to both the Town and the Creamery. Both wells are 175 feet and evidently tap the same water vein. This is a rather unusual case.

Marriage Licenses Issued

The following marriage licenses were issued by the Clerk of the District Court:

July 17th: J. A. Henschien, of Grandville, N. Dak, and Miss Rosa Claude, of Britt, Iowa.

July 17: Dale H. Miller, Northwood, Iowa, and Mabel Lau, Northwood, Iowa.

July 21: Ploquento J. Lornzo, Kanawha, Iowa, and Maria L. Juerz, Kanawha, Iowa.

Rev Grosshuesch and family will return the last of this week from Sheboyagan, Wisconsin, where they have been enjoying a ten days vacation visiting relatives and many friends.

AVERY COOPERATORS HAVE FINE MEETING

FARM BUREAU LADIES ENJOY SPECIAL DEMONSTRATION

Expert Demonstrated Various Uses Of Paints And Decorating

The Avery Township Farm Bureau Ladies Cooperators of the training school held an afternoon meeting at the Center School House last Thursday. This lesson was on review work

Through the kindness of Mr. Ed Jacobs of Klemme, the Lowe Bros Paint Company sent their special representative, Mr. Hanson, of Cedar Falls, who gave a very interesting demonstration of the various uses and ways to use Lowe Bros. Paints and Lacquers in decorating and refinishing interior work, also old furniture

Each lady brought a vase or an earthen jar which Mr. Hanson marbleized, using the Lowe Bros. Lacquer. This process was very simple as well as interesting, and the products were very pretty; no two articles were alike.

Mr. Hanson also demonstrated how to finish walls in different colors and designs as follows: Sponge Prints, Scrumbling, and Tiffany.

This meeting adjourned at six o'clock, after light refreshments of cake, cookies and lemonade were served.

Those present were Mrs. C. A. Arnold, Mrs E. C. Arnold, Mrs. W L Sherwood, Mrs J J. Cook, Mrs. J Griggs, Mrs L. H Wilson, Mrs. V. L. Thada and Miss Minnie Lenz. Visitors were: Avis Wilson, Lela Griggs, Iris Sherwood, Mrs Will Soier, Mrs Harve Christenson, and Mrs Hanson, of Cedar Falls.

All present were very much pleased with the demonstrations and felt that the time had been well spent.

AVERY TOWNSHIP HELD FINE FARM BUREAU MEETING

Everybody Had A Fine Time At V. A. Cook's Home Tuesday Eve

Avery Township held one of the most interesting Farm Bureau meetings of the year, last Tuesday night at the Virgil Cook home.

The program consisted of community singing, talks on various topics, readings, minstrel jokes, and reports on the county tour to Ames. Miss Ramer gave the report of the Farm Bureau Ladies Vacation Camp held at Clear Lake This camp was a new experiment this season, but it proved very successful, and the ladies hope to continue it each year Mr Nutty, County Agent of Britt, was also present and presented the attendants of the meeting with interesting pictures pertaining to ridance of rats. After the meeting the time was spent in a social way and refreshments were served. The gathering was estimated at about one hundred and thirty people.

MRS. JORGENSON'S MOTHER DIED AT LINCOLN, NEBRASKA

Mrs R. A Jorgenson received the sad news last Monday afternoon that her mother had passed away that day shortly after the noon hour at her home in Lincoln, Nebraska

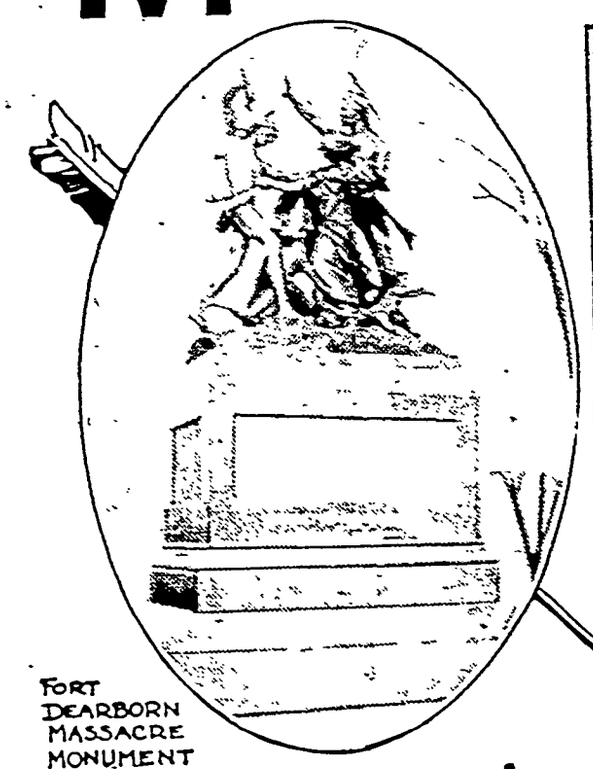
Ye Editor and family, accompanied by Mrs. Jorgenson's sister, Mrs Lyle Liebendorfer and son, Robert, of Mason City, left Tuesday morning by auto for Lincoln, arriving at that place in the early evening.

Funeral services for Mrs. Davis were held at Lincoln Wednesday afternoon and the body taken to Pawnee City, Neb., Thursday morning, where a short service was held and interment made at the Pawnee City cemetery.

Thus we briefly, yet reverently, are called upon to pen one of the saddest stories in life—the passing to the Great Beyond of a beloved Mother.

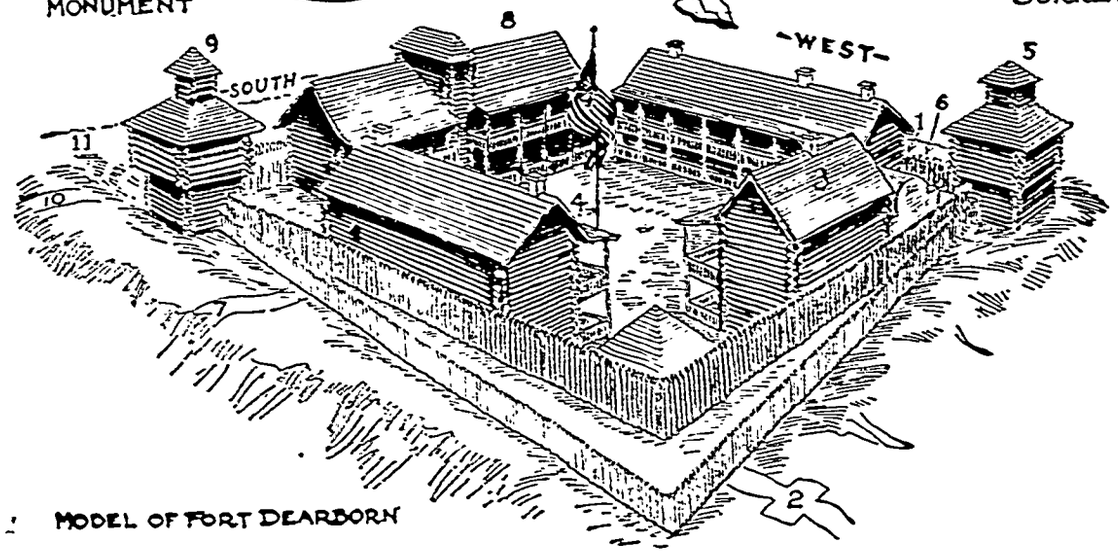
The Times was not published last week because of the absence of the Editor and on short notice other arrangements could not be made.

Two Historic Massacres



FORT DEARBORN MASSACRE MONUMENT

SURRENDER OF FORT WILLIAM HENRY
PAINTING BY FERRIS
COURTESY, GLENS FALLS (N.Y.) INSURANCE CO.



MODEL OF FORT DEARBORN

By ELMO SCOTT WATSON

THE coming of August—"August, America's Month of Battles," it has been called because so many dramatic and important engagements in our history have been fought during that month—brings the anniversaries of two famous massacres which offer an interesting study in "historic parallels." In both cases the commander of a fort, putting his faith in the word of an enemy, led out from the shelter of its log walls his little garrison of men, women and children, who were set upon by a horde of savages, who killed until the waters in the lake, on whose shores the fort stood, figuratively ran red. In both cases the commander realized fully the danger into which he was leading his people and in both cases he was compelled to evacuate by orders from his superior officer. And upon the heads of these "superior" officers—who were certainly incompetent or stupid, if not actually cowardly—the blood of the unfortunate victims whom they sent to their deaths must rest until history finds some new facts to absolve their guilt. The two massacres were those which took place at Fort William Henry on the shores of Lake George in New York on August 9, 1757, and at Fort Dearborn on the shores of Lake Michigan in Illinois on August 15, 1812.

Fort William Henry was built in 1755 by Sir William Johnson, the gallant Irish-American baronet, who won the powerful Iroquois confederacy of Indians to the side of England in her struggle with France for possession of North America. It was the base of his operations during the futile campaign of 1755 against the French, was abandoned when winter came, repaired again the next spring and was again the base for General Winslow's equally futile campaign against the French at Crown Point in 1756. When the campaign of 1757 opened, Fort William Henry, which had again been repaired and strengthened, was the most advanced British post in the direction of Canada and was the one which would bear the brunt of the attack by an army of 8,000 men which the able French general, Marquis de Montcalm, was preparing to launch against it. In the face of this threat, the earl of Loudon, British commander in chief, had weakened the possibility of resisting Montcalm's attack by sending a large part of the British and Colonial forces on a useless and doomed-to-failure expedition against Louisbourg in Nova Scotia.

Fort William Henry was held by Lieutenant Colonel Monro with a force of 2,140 men. Eighteen miles away his superior officer, Gen. Daniel Webb, held Fort Edward with an army of 6,000, but, although Webb knew in advance of Montcalm's plans, he made no attempt to summon the colonial militia to his aid and even when he learned from his scouts that the French general was concentrating his forces at Ticonderoga, he made no attempt to concentrate his own forces at either William Henry or at Edward.

Montcalm appeared before Fort William Henry on August 4 and after the usual formal demand for its surrender, which was refused, opened fire upon it with his battery of 12 and 18-pounders. For five days Monro held out gallantly against the superior forces and the superior artillery of the enemy, hoping all the time that Webb would "march to the sound of the guns." But no help came. The fort was being pounded to pieces, his garrison was weakened by sickness as well as by death from the Frenchman's artillery, and half of his cannon had been rendered useless. On the morning of August 9 Montcalm planted his heaviest guns within such close range that further resistance would have been futile. So Monro was forced to surrender with the honors of war.

Under the terms of the capitulation the garrison of Fort William Henry was to march out, unarmed but retaining their personal belongings, and to be escorted to Fort Edward, after giving their promise not to serve in the British army again for eighteen months. As a token of their brave defense, the chivalrous Frenchman allowed them to take along one piece of artillery, a six-pounder. Unfortunately they left in the fort a supply of liquor and the Indians, who swarmed into the fort as the garrison left it, found this "firewater." Their thirst for blood aroused by the stubborn defense of the garrison during the siege and maddened by the liquor, the Indians gathered in a threatening mass along the column of marching English.

One of the most vivid descriptions of what then took place is found in a classic in American literature, J. Fenimore Cooper's "The Last of the Mohicans." Although that book is fiction, there is probably an element of truth in the dramatic scene in which he depicts an Indian attempting to steal a shawl from one of the women, who wrapped her baby in it, whereupon the savage seized the child, dashed its head against a rock and then tomahawked the mother. From that point Cooper continues:

> At that dangerous moment, Magua placed his hands to his mouth, and raised the fatal and appalling whoop. The scattered Indians started at the well-known cry, as coursers bound at the signal to quit the goal; and directly there arose such a yell along the plain, and through the arches of the weeds as seldom burst from human lips before. They who heard it, listened with curdling horror at the heart, little inferior to that dread which may be expected to attend the blasts of the final summons.
>
> More than two thousand raving savages broke from the forest at the signal, and threw themselves across the fatal plain with instinctive alacrity. We shall not dwell on the revolting horrors that succeeded. Death was everywhere, and in his most terrific and disgusting aspects. Resistance only served to inflame the murderers, who inflicted their furious blows long after their victims were beyond the power of their resentment. The flow of blood might be likened to the outbreak of a torrent, and as the natives became heated and maddened by the sight, many among them even kneeled to the earth and drank freely, exultingly, hellishly of the crimson tide.
>
> The trained bodies of troops threw themselves quickly into solid masses, endeavoring to awe their assailants by the imposing appearance of a military front. The experiment in some measure succeeded, though far too many suffered their unloaded muskets to be torn from their hands, in the vain hope of appeasing the savages.

To the credit of the French commander it must be said that he did all in his power to restrain the Indians. At the risk of their lives, he and members of his staff threw themselves between the savages and their victims and he immediately summoned his French regulars who stopped the massacre. But before that could be accomplished more than fifty of the English, including some of the wounded men who lay in a temporary hospital, were killed and scalped, and some two hundred were carried away into captivity by the Indians who took them to Montreal to be ransomed. Not all of the two hundred survived, however, for, according to one authority, some perished at the stake and as a final touch to the horrors of the Fort William Henry massacre, one band, called the Cold County Cannibals, roasted some of their prisoners and ate them. So the exact loss of the English on that fateful day will never be exactly known, although it is certain that Cooper's statement that "between 500 and 1,500 fell in this unhappy affair" is an exaggeration, as is often the case with the creator of "Leatherstocking." Aside from the fact that the Fort William Henry massacre was one of the most tragic events in American history, it was also a significant one. For France's failure to control her savage allies, as illustrated by this instance, nerved the colonists to the resolution to resist to the utmost an enemy which used such allies and in the long run that resolution contributed to the downfall of the French power on this continent.

Fort Dearborn, whose log walls were to be the genesis of the second largest city in the United States and the metropolis of mid-America, was built in 1803 by Capt. John Whistler of the United States regular army, in line with the government's policy of establishing posts on the new western frontier to protect the wave of settlement which was sure to follow the Louisiana Purchase. In 1810 Capt. Nathan Heald took command of the post and within a short time began hearing alarming reports of the activities of the great Shawnee chief, Tecumseh, who was dreaming the old dream of Pontiac of uniting all the Indian tribes to wipe out the white invaders of their lands.

In June, 1812, the United States went to war with Great Britain and Tecumseh, temporarily foiled by the defeat of his boasting brother, the Prophet, at Tippecanoe, cast his lot with the British, which meant savage warfare on the northwestern frontier. On July 20 Gen. William Hull, commander of the U. S. fort at Detroit and Heald's superior officer, sent an order to Heald to evacuate the post, destroy all surplus arms and ammunition, but to give the goods in the United States factory there to the friendly Indians around the post and proceed at once to Fort Wayne, Ind. It was this Hull, be it remembered, whose blundering and general incompetence was so soon to lead to the surrender of Detroit to the British General Brock without firing a shot in its defense.

Heald's force at the time the order from Hull was received on August 8 consisted of 54 regulars and 12 militia. Various hostile acts committed by Indians around the post during the preceding months indicated that the abandonment of the fort and the march to Fort Wayne would be a dangerous undertaking, whereas if he remained, he could no doubt count upon help from militia, which the governors of Illinois and Indiana would raise, should the Indians attack. But Hull's orders were positive and left nothing to Heald's discretion. Being a soldier, he could do nothing but obey. So preparations were made for the evacuation of the fort on August 15. On the previous day the goods in the factory were distributed among the Indians with the understanding that in return for these goods they were to protect the garrison on its retreat. According to orders Heald had destroyed the surplus arms and a large stock of liquor. It was disappointment over loss of these which is believed to have invited the Indians to the attack the next day. On the other hand, to have given the sullen tribesmen the liquor and arms would have insured the destruction of the whites, so in either case the garrison of Fort Dearborn was doomed.

While preparations for the evacuation were taking place, Capt. William Wells, a famous scout and an uncle of Mrs. Heald, had arrived from Fort Wayne with a small force of friendly Miami Indians to help guard the retreating garrison. When the march started the next morning, Wells and his Indians led the advance to guard against the treachery which he felt sure would follow. In fact, Black Partridge, a friendly Pottawatomie chief, had warned Heald on August 14 that "linden birds had been singing in his ears and the white men should be careful on the march they were about to make." But it was too late then to turn back and, even though fearing the worst, Heald determined to go on.

A mile and a half from the fort the Indians, hidden among the sand hills, attacked the head of the column. Wells' Miamis fled at the first fire. Heald succeeded in rallying his soldiers and charged with bayonet, driving the Indians back. At the rear of the column the savages had attacked the wagons bearing the women and children which were guarded by the militia, who were cut down to a man. Captain Wells, who had ridden back to the wagons to save his niece, was shot down and killed, fighting to the last. But he was only one of several heroes, both men and women, who perished that day after fighting desperately until the tomahawks of the savages cut them down.

Surrounded by the Indians, who outnumbered his force nearly ten to one, there was but one thing left for Captain Heald to do to stop the slaughter. That was to surrender and that he did to Black Bird, the principal Pottawatomie chief. In the brief conflict 25 regulars, 12 militia, 2 women and 12 children were killed or so desperately wounded that they died later. Many others, including Captain Heald himself, were also seriously wounded. Some of the wounded prisoners were saved by the Indians only to meet a more terrible fate than captivity. For, as was the case at Fort William Henry, the massacre was followed by an infernal orgy of torture in the Indian camp. The most of the prisoners were carried away to Indian villages or to Canada and were later ransomed.

Today a monument marks the spot where the Fort Dearborn massacre took place. It stands at the foot of Eighteenth street, near the lake, in Chicago. Topping it is a scene of one of the most thrilling scenes in the massacre—the friendly chief, Black Partridge, staying the hand of an Indian who is attempting to tomahawk Mrs. Helm, the young wife of Lieutenant Helm.

SHAVE HEADS OF BAD BOYS AS PUNISHMENT

'Argentina's Method Proves to Be Effective.

New York.—Down in the Argentine republic if a boy is bad and you whip him he forgets the whipping but remembers the badness. But if you cut off his hair, shave it right down to the scalp, it hurts, and he forgets the badness and remembers the hair cutting.

With which interesting homily on South American discipline, Jose Amatuzzo of Buenos Aires, who is in America now to study reformatories, discussed recently the "reform camp" he has built out of a real penitentiary in three years.

Officially, Jose is a Y. M. C. A. secretary on leave, loaned to the Argentinian government. Actually, however, he is a sort of big brother to 350 "bad boys" of his country. He has taken the juvenile malefactors of the Argentine out of chain gangs into homes.

Started Work Three Years Ago.

"Three years ago," said Senor Amatuzzo, "the minister of education asked me what I could do with the boys who have received sentences for crimes from the courts. Then they were all housed in one building and they were treated like prisoners. They were always handcuffed or big chains were placed on their ankles. So I didn't know what I could do. But I told him I'd try something.

"I demanded three things. First, that there be no politics if I tried to help the boys. You know there is nothing but politics in everything in my country. Then I insisted on running my own budget and last that I should not take any men or women workers who came to me recommended by officials. I knew that type in my country."

It's a long story this bright, black-eyed young Argentinian had to tell. In three years, for instance, his institution has produced $200,000 worth of various goods in his 17 shops and 18 farms. It has spent the money for more and better equipment. It has produced, too, one boy who is certainly going to represent his country in the coming Olympic games and another who has a pretty good chance to do it.

Knows His Boys.

It has produced carpenters and masons who built 35 houses for themselves. It has brought out a furniture maker who sold a chair and desk to the President of the republic—"at a good price, too"—for his use in the official headquarters of the Argentine. Lots of other things have been done.

The thing that was most impressive about the youngster who in three years changed the system of handling boy criminals is that he knows so much about boys.

"I read the football stories in the paper every day. I've learned the boys are football crazy. So I know the names of all the stars, and I argue with the boys. That makes friends.

"I don't preach a sermon. I get out and play with 'em. I pat them on the back and shake hands.

"I haven't whipped a boy since I took the place. It isn't necessary. You can joke with a boy and get him to do more than you can when you force him.

"When a boy is a little bad I deny him the swimming pool. When he is very bad I cut his hair. They love their hair and that's what hurts them most.

"Let them plan things themselves. They figure out their own menus, for instance. They do whatever kind of work they want to do.

"Take them places. I try to give them little outings whenever I can."

Jose got his training in the Y. M. C. A. schools here. He's back now officially representing the government to study reform schools.

Influence of Health on Progress Studied

Washington.—The history of health, and how health conditions influenced the progress of Americans for the last 300 years, is being studied for the first time this summer. The American Historical association has commissioned Dr. Richard H. Shryock, research scholar appointed under the $50,000 memorial fund established in honor of former United States Senator Albert J. Beveridge by his widow, to do this job.

Historians often mention spectacular epidemics or strange medical practices, and medical men record the technical progress of their science, but none heretofore has made an attempt to relate the status of the nation's health with its social background.

Doctor Shryock will work this summer among scholars of Washington and Philadelphia.

Lapis Lazuli Monopoly Given to German Firm

Idar, Germany.—As first evidence of the much heralded trade development with Afghanistan expected to result from King Amanullah's recent visit, a local firm announces that it has been granted by the Afghan monarch the monopoly for importing Afghan lapis lazuli.

It is claimed that nowhere in the world is lapis lazuli found of such good quality as in Afghanistan. Idar is a small town on the River Nahe, a tributary of the Rhine, and has a special industry connected with the setting and mounting of semi-precious stones.

Around Orchard

NEW STRAWBERRY GIVES FINE CR

One of the most promising o new strawberry varieties which been tried out in New Jersey d the past few years is undoubtedl Aberdeen.

As a matter of precaution ever variety must be thoroughly teste in a wide range of soil and cli conditions before it can be r mended for general planting, J. H. Clark, associate profess pomology of the New Jersey e ment station. Aberdeen has grown on the experiment s grounds at New Brunswick 1923, it has been tested in a way by numerous growers, and ing the season of 1927 it fruit commercial quantities on s farms in the state.

Aberdeen originated in Mon county and so joins a rather f list of varieties (including Joe, ton, Gandy, etc.), which claim Jersey as their native state. Kuhns of Cliffwood, N. J., a ma has been raising strawberry see for many years, is responsible fo new addition to the desirable fr rieties of the state. The variet inated about 1919, but has not pushed very rapidly, as Mr. realized the necessity for a tho trial before commercial plant justified.

The two things about Abe which commend themselves t practical grower are its prolific making quality and its productiv It is an extremely heavy bedde should be thinned for best r During 1927, on two farms li 17 and Aberdeen were compared yields produced on adjoining ro in each case the latter variety y a decidedly larger crop.

The fruit of this variety is v tractive in appearance and qui form in size, shape and color, medium to large, narrow shaped, and a sprightly light re flavor is surpassed by that of so rieties, but it is decidedly abo average. The season is late.

The greatest fault of the Abe and the one which may prevent coming one of our important mercial varieties, is the fact th a little soft and cannot stand handling or distant shipment. ever, because so many New berries are sold locally or are into New York or Philadelp comparatively short hauls, it seem that it might find an imp place in our variety list. It recommended as an excellent for the home garden, fine for market, and worthy of carefu for the New York or Phila markets.

Why Bordeaux Is Usef as Spray During Sum

The question is often asked why it is necessary to use tw gicides, lime-sulphur in the spri bordeaux mixture in the s when both are effective in con diseases.

It has been found by exp that bordeaux mixture has a te to burn the foliage and rus fruit when used in cool, damp, weather. As this kind of weat quently occurs in the spring, it essary to use some material th not have this effect. Lime-sul an effective fungicide and used with safety at a time wh deaux would be harmful.

On the other hand, lime used in hot, dry weather wil injury to the fruit and foliag deaux does not affect the fol fruit under these conditions therefore, recommended for t sprays.

Bordeaux mixture should b oughly agitated, as spray in liable to occur if the materi lowed to settle and become trated at the bottom of the Virginia Extension Division

THEIR MADE-OVER MOTHER

(© by D. J. Walsh.)

SSY BAIN clipped her eyeglasses to her nose and read the letter slowly, twice. Color rose to her full, fair cheeks and she caught breath sharply. Mrs. Darrin had led them all to spend the follow- day with her at the Rexmere, re she was stopping for the sum- . She would send the car after at noon. That meant lunch, a ghtful afternoon, dinner, an even- on the porch while the young s were dancing. The girls, of rse, would be wild to go. As for elf—but she must see what they

hey came in presently, tennis rack- in their hands, eighteen and sev- en, respectively, slim, French ed, their charming faces touched a bit with rouge, clad in delight- sports togs. Jessy's two daughters e attractive and popular. They e also expensive. In order to feed, he, educate them as they demand- Jessy found it necessary to econo- e strictly in other ways. The in- e which had seemed abundant n the girls were small shrank now h every succeeding year. Some- es Jessy wondered if it would not better to sell her pretty home and to live in an apartment. With the constantly at school or visiting likely to be married soon she ld not need so much room.

hey read the letter, Peggy hang- upon Betty's shoulder.

Great!" they both cried. "That's In Mrs. Darrin.. Must be she's ed us on Hal's account, huh, Bet?" asked.

That's it, of course—but, mother! e she's asked you, too."

have known Mrs. Darrin for a time, dears. When your father Mr. Darrin were both living they d to be intimate friends," Jessy , with a little quiver of the lips. Well! Shall we go, Betty?"

Sure! I wouldn't miss it for any- g," returned Betty. "Call up the mere at once, mother."

No," Jessy said with unusual firm- s for her. "As she has written I fer to reply in the same manner." went to her desk and sat down. girls left the room. She heard porch hammock squeak. They e there—just outside the window.

To Jessy it promised more than ely being a treat to spend the day h her old friend. What a lot they ld have to talk over! The girls ld have a good time, too. Per- s Hal Darrin might——She smiled pply as she dipped her pen. At t instant Peggy's voice came to her lly, distinct.

I wish mother wouldn't go. If wears that old made-over black rmeuse I shall die."

Betty answered: "You'll have to ke the best of it, Peg. You can't her to stay at home when the itation is really hers. We're just own in on Hal's account. But that black charmeuse is the limit. She's ting so fat, too! But we must be eful not to hurt the old dear's feel- s."

I'd rather stay home," grumbled gy. "Can't we back out at the last nute? Think now! Isn't there some y we won't have to appear at that ncely hotel chaperoned by that old rmeuse?" They began to whisper.

Jessy dropped her pale face in her nds. She had received a shock. r the first time she had heard her ughter's opinions of her expressed words. She did not blame them. e was herself at fault. She had ought them up to demand all, give le. If they were selfish she had de them so. If they were ashamed her and her made-over clothes e deserved it. Her sacrifice, her molation of self, had produced un- tifying results, but— She should ve seen that they would.

Jessy, sitting there at her desk, had very bad ten minutes—the worst haps she had ever known—and she d known many—since Tom died. At end of that time she lifted her d, took up her pen and wrote with n purpose, although with a slightly steady hand, an acceptance for her- f and her daughters of Mrs. Dar- 's invitation.

At the breakfast table next morn- she said quietly that she was go- downtown. When the Darrin car rived the girls could direct the uffeur to find her at Madam ulse's hat shop.

Oh! You are going to get a new ," Peggy cried. "Might I come h you, too, mother? I do so want new hat myself."

No," Jessy replied with unwonted ness. "You can't have a new , Peggy. You have already had e this season and so has Betty. have not had a new hat in two rs." She tried not to see the cloud pout that descended on her daugh- 's face.

An hour later she stood at the bank ndow drawing out money. It was ney she had saved, bit by bit, inst some unexpected need. Twice ore she had been tempted to use once when the girls wanted to go h the Jensons for an outing at the shore, once when she had been ill the doctor had urged a short sea as a cure. Now actually she was g to use the money. It seemed a . Even when it was in her hands purpose nearly failed. Then, she membered that she was wearing the made-over charmeuse and what Peggy had said about it.

Just before noon when the street was crowded Mrs. Darrin's mono- grammed limousine drew up before the small, Frenchy looking little shop whose windows bore one word only, "Louise." Peggy and Betty, fresh and expectant, looked out for mother in her new hat. "I wish she'd let us help her pick it out," sighed Peggy.

Coming toward them down the street was a lovely young woman step- ping gracefully in the daintiest of shoes. Gray from head to foot, such gray, with a bunch of violets pinned in the correct place. Peggy gave a gasp, Betty gave a start, for the woman stopped as the chauffeur held open the door of the limousine and the smiling, yet wistful, eyes that looked out from under the charming hat brim were—mother's.

Not a word was said before the liveried chauffeur of Mrs. Darrin, Peg- gy and Betty were too well trained for that. But how they looked! Un- der other circumstances Jessy might have enjoyed their astonishment. Her purse was empty, she must begin to save again, and it was going to take a long, long time to replace what she had expended so lavishly, she could not say foolishly yet, for in some ways she had never felt so contented in her life.

Her progress across the broad ve- randa and through the crowded lobby of the Rexmere might have thrilled a vain woman. But it only embarrassed Jessy, and she was glad when at last she was safe in Mrs. Darrin's suite.

"Girls, your mother looks like your sister," Mrs. Darrin said. "How have you done it, Jessy, with all your cares and anxieties?" Then as Jessy smiled tremulously Mrs. Darrin hurried on: "My brother, Major Scott, is to lunch with us today. You remember him, Jessy? He married Helen Soule—she died a couple of years ago."

A wonderful luncheon. Hal was not there and Major Scott was the only man in the party. For the first time Peggy and Betty saw themselves set aside for another. And this other their mother!

"I bet she marries him," Peggy said to Betty as later they joined a gay boating party of young people. "Well —I don't blame her. We've been awful pills. And the major is nice— but he's got a strong jaw, Bet. He won't let anybody sass him. We'll have to watch our steps—and do you know I'm glad? Mother is a queen. I never realized it before. What a shame that she had to wear made- overs when she might have looked like that. I feel like a pig. I do really. Don't you, Bet?"

And Betty murmured sober assent.

Turn the Limelight on Presidents' Wives

Presidents' wives, who now receive almost as much attention in the news- papers as their husbands, were almost completely ignored until a few years ago, it has been discovered by the forces preparing for the coming na- tional campaign.

"The women of the White House were the least important, certainly the least reported of any individuals in the President's entourage," says the Woman's Home Companion. "Abigail Adams stands out for such homely practices as drying her clothes in the East room on rainy Monday after- noons. Dolly Madison shone by the splendor of her personality rather than the prestige of her position. The marriage of Maria Monroe, the first daughter of a President to be married in the White House, was good for only four lines in the Washington papers.

"With the coming of the young and beautiful Frances Folsom as the White House bride of Grover Cleveland, pub- lic indifference began to give way to sharp curiosity, and by the time Alice Roosevelt was married to Nicholas Longworth, every detail of the cere- money was eagerly sought and widely printed. Mrs. Taft, who declared that she was not going 'to be a slave,' es- caped a good deal of the spotlight, but both the Wilson brides, youthful and mature, were expected to live in the front window of the public gaze. The glare which has beaten steadily on Mrs. Coolidge's head has disclosed in minutest detail the personality and character of the First Lady of the Land.

"This public curiosity has been grad- ually translating itself into serious re- sponsible interest until possible First Ladies are studied with almost as great interest as the Presidential can- didates," the article concludes.

Inn Without Beds

The small inns of China are totally without beds. In one end of a rather large room there is a stone raised about two feet above the floor with a length of 10 or 12 feet. This stone is kept slightly heated when it is desir- able and it answers the purposes of a bed and dining table. At night the guests spread their own mats upon it and sleep there one alongside of an- other. At meal time they sit on this platform and eat their rice.

Evidence of Vitality

"Why do you insist on expressing your opinions?"

"I don't regard the opinions of great importance," said Senator Sorghum. "I merely wish to remind my constit- uents that I am still here."—Washing- ton Star.

The Needful Quantity

"Kemper said he was painting now and had sold four pictures—he inherit- ed his talent from his father."

"Was he a painter?"

"No, a picture seller."

Charming Rambling Effect Achieved in Really Compact House Design

Second Floor Plan.

By W. A. RADFORD

Mr William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to prac- tical home building, for the readers of this paper. On account of his wide experience as editor, author and man- ufacturer, he is, without doubt, the highest authority on all these sub- jects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

A low rambling effect, yet one which holds together remarkably well, is the basis of appeal in this most attractive home. It is particularly well adapted to a location where somewhat irregu- lar ground affords a site upon an ele- vation. The low, irregular roof and wide eaves, with the roof line sweep- ing down over the porch makes the house cling to the ground and gives it a snug appearance. The snubbed gables add to this, while the wide shingles of the exterior, the large brick chimney and small-paned win- dows add their touch to the whole effect.

Turning to the plans we find a dwelling of five rooms and breakfast room. Just the right size for the av- erage family, and every room commo- dious in size. The entrance, in the an- gle of the "L," opens into a small hallway from which stairs lead up to the upper floor. On this upper floor are the sleeping quarters, two bed- rooms equipped with ample closets and the bathroom. Though this is but a story and a half house, each of the bedrooms is so arranged that cross ventilation can be obtained by way of the hall windows, and with proper exposure they should be al- ways comfortable.

On the lower floor, we find at one side of the entrance hall, a large liv- ing room, 13 by 23 feet with a broad fireplace at one side with French doors opening from it onto the porch. This is just such a combination of liv- ing room and porch, as we always as- sociate with the idea of home as dis- tinguished from the modern cramped apartment and with the privacy at the side of the house, separated from the entrance, the porch will be a welcome gathering place on warm evenings.

At the opposite side of the hall is the dining room, with the breakfast room, just off it serving as a passage from the kitchen and affording the much desired separation of kitchen and dining room which must so often be sacrificed in the small modern house. From the kitchen two steps lead down to the service entrance, and from the latter one passes to the base- ment stairs.

New Type One-Unit Heating Plant in Home

Combining in one unit the advan- tages of efficiency, sightliness and the dustproof qualities required for the modern model basement, a new type of home heating furnace is available all over the country at prices no high- er than those charged for the usual type.

The new unit is made for both steam and hot water heating installa- tions and is distinguished by its in- sulated metal jacket, finished in a glossy enamel, which adds to its at- tractiveness as an integral piece of furnishing for the basement.

The perfected sectional design of the new boiler insures quick heating response on cold winter mornings and an unusually high degree of fuel econ- omy. Both water and steam boilers are fully equipped with automatic reg- ulation and all accessories.

The insulation is thorough, insur- ing a minimum of heat loss through the walls, and its metal covering makes it practically indestructible, besides enhancing the appearance of the unit. The doors are finished in black porcelain enamel, forming an ef- fective contrast with the vivid red of the jacket.

The joints at which dust might otherwise penetrate to the basement, and so to the rest of the house, are machined and ground to a tight fit, this feature also being a point in fuel economy.

The grates are of a type designed to retain the coal until every com- bustible particle has been consumed, and then to permit of ready shaking without the annoyance of jamming. Fire passages are so arranged that but a small proportion of heat is lost in the chimney.

Fix Plaster Cracks

Before walls and ceilings can be repapered, repainted or recalcimined, unsightly cracks must be filled and plaster must be restored to patches where it has fallen off, exposing the lath.

Cedar Panels Give Very Pleasing Effect

An interesting method of obtaining an all-wood half-timbered effect has been developed on the west coast by the use of western red cedar panels. Builders have utilized cedar finish lumber from one-half to one inch thick in place of the usual stucco, mortar, or brick between the timbers.

Since cedar is easy to work, these panels are readily fitted into place between the heavy timbers used to get the half-timbered effect on the ex- terior. Being of dry lumber, there is no danger of cracking, warping or pulling away at corners. Only ver- tical grain-clear cedar is used for these panels. The great size of the western red cedar trees makes it pos- sible to get lengths and widths of clear cedar to fit any architectural plan.

The same half-timbered effect may be gained in a less expensive type of construction by omitting the heavy timbers and applying the cedar panels directly on the sheathing. Cedar strips can then be used to cover the joints and act as false timbers. These may be one by six inches and when care- fully applied over the panels give an excellent result. This type of panel- ing and timbering is especially effec- tive on gable ends or entrance.

The smooth surface of the cedar finish lumber affords an ideal surface for either stain or paint. The panels are usually of light shades, to con- trast with the darker colors used on the half-timbering. For rough effects the panels can be used unsurfaced, giving an excellent broken surface, but yet one which will hold paint or stain.

Durable Stone

In regard to the matter of stone construction nothing is more satisfac- tory if well done. Nothing is more dur- able. Neither wind, snow nor rain can penetrate. Once it is warmed up it will stay warm for hours after all fires are out. The fire risk is at a minimum. There are no worries about painting. Its appearance improves with age.

DAIRY

BUTTER QUALITY CAN BE IMPROVED

The delivery of good cream was never as important as it is today. Eastern markets have often discrim- inated in price as much as ten cents per pound between butter classing as firsts and that classing as seconds. A slight difference in the score of but- ter has often made a difference of three cents per pound in the price.

It is impossible to make good but- ter from poor cream. More attention must be given to the production of good cream on the farm.

Cooling of cream promptly has much to do with the quality. Warm cream should never be mixed with cold cream. It should be cooled before be- ing mixed with other skimmings, other- wise bad flavors and poor quality will result. The best way to cool cream is to place it in cold water. Cream quickly cooled and held in cold water will keep in good condition. Cream should be immediately put in a small can when separated and kept in cold water. Stirring occasionally allows the animal heat to escape and im- proves the quality. Cream should be delivered to the creamery frequently in hot weather. If held more than three days it is apt to get moldy Ship every other day if possible.

Every farm does not not have a sup- ply of cold water, but most farms do. A tank so situated that all water pumped for stock purposes runs through the cream tank will serve to keep cream cool. Many manufactured tanks are now on the market which can be purchased; likewise a common barrel may be made to serve the pur- pose very satisfactorily.

Build a cooling tank on your farm and you will produce less second- grade cream and thus raise the qual- ity of butter.—Colorado State Dairy Commission.

Healthy Dairy Herds Are Always Most Profitable

In a preliminary survey of pure-bred herds in three localities, but one herd has been found free from the disease. This owner has been very particular about purchasing breeding stock. Bulls are bought only subject to abortion test as well as the tuberculin test. The value of clean herds is becoming thor- oughly appreciated each year, and breeders of pure-bred cattle who be- lieve their herds free from infection should attempt to confirm this suspi- cion by blood testing.

The advantages of clean herds are well known. First of all and most im- portant, health herds are more profit- able. Abortion disease control is thus a business proposition for every herd owner. Breeders who protect their customers against this infection by selling clean animals are building on a sound basis. On the other hand, pros- pective purchasers cannot afford to invest in pure-bred animals that har- bor abortion infection.

Home-Raised Calves Are Best for Replacements

There are two principal reasons why most dairymen prefer to raise the cat- tle that are needed for their herd re- placements. One is a question of econ- omy and the other is that of disease control and elimination. Both are im- portant considerations for practical dairymen.

Often when people depend upon pur- chasing the mature cows needed in their herds they find that they are forced to take cows that are not en- tirely desirable. Sometimes the cows are hard to milk, sometimes buyers find a bad quarter after the cow comes fresh and sometimes the cows are not as heavy milkers as expected.

Disease control is one of the haz- ards of dairying. This applies to con- tagious abortion as well as to tuber- culosis. Present tests indicate that tu- berculosis is more easily eradicated than abortion. When cattle are im- ported they should be purchased un- der a sixty-day retest for tuberculosis.

Dairy Notes

Be careful not to overfeed.

* * *

Provide plenty of pure, fresh water.

* * *

Keep cows comfortable and content- ed.

* * *

Feed cows sparingly the first few days after calving.

* * *

Cows should receive grain in pro- portion to production.

* * *

If you have ten or more dairy cows or are feeding beef cattle you need a silo. Silos pay for themselves quickly.

* * *

Be prepared to treat an attack of milk fever by having a clean sterilized pump to inflate udder with air.

* * *

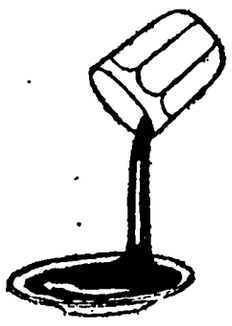
Protect cows from heat and flies by giving them shade and keeping them in darkened stables during the heat of the day.

* * *

Successful operation of a milking machine depends largely on the oper- ator. Occasionally there is dissatis- faction with a machine, due to diffi- culty encountered in meeting bacteria requirements in milk.

new PEXEL the new sure way to make your jelly turn out like this

no more of this



YOU probably know what it means to have jelly that will not set. In the old days no one could be sure of results. But there's no risk now—Pexel al- ways makes jelly jell as soon as it is cold.

Pexel is tasteless, colorless, odorless—a 100% pure-fruit product that provides only necessary elements for jelling. Makes continued boiling un- necessary. Repays one to three times the 30c it costs, saving fruit, sugar, flavor, time, fuel.

Get Pexel at your grocer's. Recipe booklet with complete recipes, accurate tables in each package. 30c. The Pexel Com- pany, Chicago, Ill.

For example—with Pexel

4½ cups strawberry juice and 8 cups sugar make 11 glasses jelly.

4½ cups raspberry juice and 8 cups sugar make 11 glasses jelly.

6 cups currant juice and 10 cups sugar make 14 glasses of jelly.

4½ cups grape juice and 7 cups sugar make 10 glasses jelly.

GREAT OUTING 1928 STATE FAIR IS PROMISED

Des Moines, Special:

With the prediction that Iowa this summer will again break all previous records with a state fair attendance of nearly one-half million, officials of the 1928 Iowa State Fair this week made final announcement of the major features for this year's exposition, August 22 to 31.

The combined value of the various attractions and exhibits which will be shown at Des Moines this summer is estimated at more than $5,000,000. The fair will cover more than 300 acres and will be the largest agricultural and livestock exposition to be held in tho United States this year.

Among the chief features announced this week are the following:

EXHIBITS: National Livestock Show of more than 6,000 head of cattle, horses, swine and sheep from all parts of the country; many acres of exhibits of prize grains, vegetables, produce and farm bureau projects from every section of Iowa; a boys and girls' fair in which nearly 2,000 junior farmers will compete in numerous demonstrations and contests and will exhibit over 1500 head of livestock and poultry; 40 acres of farm machinery and home conveniences; a motor show comprising more than 100 cars of all different makes; a complete women's exposition filling two entire buildings and covering all fields of feminine interest; more than 90,000 square feet of displays in the new $350,000 Educational Building.

ENTERTAINMENT FEATURES: Five days of harness and running races; two days of automobile and motorcycle racing; midwest aircraft exposition; fifteen famous circus and hippodrome features; "A Night in Bagdad" a super-fireworks spectacle of tho orient; Creatore and his Band and six other famous bands and orchestras; four nights of society horse shows, numerous statewide contests and competitions; 35 carloads of sideshows, menageries and riding devices on the midway; official state encampment of the Modern Woodmen of America; first demonstration of automobile operated and controlled by radio; free camp ground of 80 acres open to the public.

Admission to the fair this year will remain 50c as before. All railroads operating in Iowa have announced greatly reduced rates for the period of the exposition, and the Highway Commission has announced that practically all the important highways in Iowa would be put in first class condition for the benefit of the thousands of motorists who are expected to drive to the fair.

"The Iowa State Fair last summer had the largest paid attendance of any eight-day fair in America, reaching a grand total of 430,000 spectators," Secretary A. R. Corey stated this week. "With favorable weather, every indication points to one-half million fair visitors this summer which will set a new record mark."

PLAN JUNIOR FAIR

Des Moines, Special:

Nearly 2,000 Iowa farm boys and girls have already entered in the statewide contests and competitions which are to feature the junior department of the 1928 Iowa State Fair and National Livestock Show, August 22 to 31.

This year's boys and girls' exposition, it is said, will be the largest that has ever been held in the United States Nearly 1500 head of livestock and poultry alone will be exhibited by these junior farmers. Ninety-nine counties will be represented in the judging contests and demonstration features by both individuals and teams for 4-H Club members. A total of $13,337 50 has been offered in prizes in this department of the Iowa State Fair.

IOWA AIRCRAFT SHOW

Des Moines, Special:

The first midwest aircraft exposition to be held in Iowa has been announced as one of the features of the 1928 Iowa State Fair opening in Des Moines, August 22 Visitors to the fair will have an opportunity to view at first hand virtually all types of planes, ranging from the small single-seated "air coupe" to the big multi-motored models which are being used for transport and passenger service. Several unusual flying features are also being booked by the state fair management to further emphasize aviation in connection with this year's fair.

NEW FAIR FEATURE

Des Moines, Special:

"A Night in Bagdad", a new type of oriental fireworks spectacle is to be the big night attraction at the 1928 Iowa State Fair, according to the final entertainment program just given out by the State Fair Board.

The spectacle will comprise a cast of more than 500 characters in elaborate costumes and will be enacted on a stage extending almost the full length of the amphitheater arena. It will be built around the famous tales of the Arabian Nights, embracing many unusual fireworks effects and new types of fireworks displays never witnessed before.

MOTOR BOAT RACES WILL BE HELD AT BAYSIDE SUNDAY

About A Dozen Boats Will Compete For $200 In Prizes

Motor boat races will be held at Bayside Park, Clear Lake, next Sunday afternoon, August 5th. The thrilling races will take place on the lake front at Bayside and private owners and manufacturers will have speed boats entered Boats from Waterloo, Fort Dodge and Spirit Lake will probably be in the races. $200 in cash prizes will be awarded the winners of the various events. Charles Ritz, Park operator, states that a dozen or more boats will compete The Bayside amusement program Sunday will also include a fast ball game between Sumner and the Bayside Cubs. Most of the Sumner boys have played league ball and the Cubs have lost only 2 games out of 20, so a real battle is expected. Vaudeville, free movies and special musical concerts will also entertain the Park visitors Sunday Bobby Boyson's orchestra and Teppy's Country Club orchestra are now furnishing the music for the Bayside park plan dances which are held every Wednesday and Friday nigth.

Pella Grants Central States New Gas Franchise

Central States Electric Company is pleased to announce that it has been granted a new gas franchise by the city of Pella by a vote of 853 for and 343 against.

Our success in obtaining the franchise was partially brought about through the kindness of our friends having our gas service elsewhere recommending our service to the city of Pella, and we take this opportunity to express our appreciation and thanks.

The obtaining of this franchise is a further guaranty that the standard constructive policies of our Company for the extension of our service will be carried out.

About three years ago, we acquired the gas plant ot Knoxville and completely rebuilt it so that the citizens of Knoxville are now getting gas service second to none. The next move was to extend our mains to the U S. Veterans' Hospital at Knoxville increasing the annual output by 3,000,000 feet The service at Pella will be given from the Knoxville plant through a fourteen mile four inch high pressure main to be laid at Pella and a new distribution system to be laid out at Pella all at a cost of about $125,000.00.

Gas service is now being extended from the centers to other communities through high pressure mains similar to electric service furnished over transmission lines

Roman Penkert, Joseph Glaser and Miss Lauretta Glaser, of New Ulm, Minnesota, spent a few days at the home of the former's brother-in-law and sister, Mr. and Mrs. August W. Baack. They were accompanied by Alfred Penkert who will spend several weeks here.

Mr. and Mrs T. F. Mitchell drove down from Swea City Sunday and the following day they accompanied C. G. Waterman and family to Trae for a visit with the W. C. Keraus family. All drove to Eldora in the afternoon and enjoyed a picnic supper there and visited the Industrial School.

Pilot Knob State Park, a few miles east of Forest City, was the scene of a big picnic Sunday when the following met there to enjoy the day: Mr. and Mrs. Will Wenz of Klemme; Mr. and Mrs. Leppo Wessels and family, of near Ventura; Mr. and Mrs. Marten Peterson and family of near Garner; Mr. and Mrs. Will Roswag, of near Garner and Mrs. Ben Roswag, Garner and Mrs. Anton Nelson and of Miller; and Fred and John els, of Klemme A big pic ner was enjoyed, after which ternoon was enjoyed in visiting viewing the Park Later in ternoon watermelon was All report a fine time.

Physio-therapy Clinic for
Chronic Diseases

I wish to announce and invite your attention to a Physio-Therapy Clinic to be held at my office on

TUESDAY, AUGUST 7th

This clinic will be conducted by Dr. H. D. Wright of Hampton, specialist in Physo-Therapy, formerly wth the Taylor Clinic of Des Moines and the Engeln Electric Corporation of Cleveland, Ohio.

Dr. Wright will examine each case, outline the treatment indicated and demonstrate the treatment wihout charge.

I have equipped my office with various electrical appliances, ultra violet and radiant lamps, each of which will be explained and used for treatment.

All types of cases may take advantage of this clinic, however, we particularly urge anyone complaining of any form of chronic disease to attend this clinic. It will cost nothing to take advantage of this clinic and you will, no doubt, receive some valuable information regarding your health.

WORLD'S GREATEST SHOW POSITIVELY COMING!

Ringling Bros. and Barnum & Bailey To Bring Monser Sea Elephant And Other Big Features

Yep, youngsters, it's really true! Meaning that a rumor heard sometime ago is now confirmed by the official announcement that the Ringling Bros and Barnum & Bailey Combined Shows will positively exhibit at

Mason City, August 8th

At that time the world's first and only 5 ring circus will be within easy reach of local sawdust fans. With it will come Goliath, the Monster Sea Elephant, the only one of his kind ever to be captured and exhibited alive and who will be the foremost feature of menagerie composed of more than a thousand animals.

The big show is now a third larger than it was when it last visited this locality Enormous new displays have been introduced such as ninety zebras, camels and horses performing at one time on a mammoth pedestal On a similar series of circular raised platforms thirty-two of the show's forty-three elephants dance, run and perform in unison with the topmost of the ponderous actors twenty feet above the ground Prior to this gigantic display five herds of elophants appear in the five separate rings At another time the rings are given over to five companies of liberty horses. At still another juncture of the program two hundred of the show's 900 horses, each ridden by an expert, are seen in the brilliant manouvers

Of the sixteen hundred people carried on tour this season more than eight hundred are the world's foremost aerialists, bareback riders ground and lofty gymnasts, high-wire artists and super athletes These are now seen in extensive troups each display led by its particular champions, a new method of presentation that is in keeping with the Ringling Bros. and Barnum & Bailey 1928 plan of extending acts in equal number over the entire length of the mammouth main tent Little folks will be delighted to learn that the bringing of a score of European clowns to America has increased the fun makers to more than a hundred 1-adv

The Ladies Aid of he Klemme Reformed Church me at the home of Mrs. John Bock last Wednesday afternoon. Twenty-one members were present, and a number of visitors. Refreshments were served by the hostess.

CENTRAL STATES ELECTRIC CO. FULFILLS AGREEMENT WITH LAURENS

Less than two years ago Laurens sold its municipal plant to Central States Electric Company, and that Company agreed to give immediate service from the Peterson power plant, and later on to extend its lines so that Laurens could be served from the Armstrong or Iowa Falls plant. It has certainly fulfilled this agreement for Laurens is now connected directly with both the Armstrong and the Iowa Falls plant. To furnish this service it was necessary to install a new engine in the Armstrong plant at an expense of $60,000, build the forty-five miles of line from Laurens to Armstrong, together with transformers, which cost an additional $110,000. From this line service will now be furnished at Rolfe, Mallard, Curlew, Plover, Havelock and Laurens.

In anticipation of the economies in operation which will be effected through the operation of this line, ninety days ago the rates were reduced in Mallard, Plover, and Curlew to the same low rates now being charged in Laurens, Havelock and Rolfe, and these towns are now enjoying the contracts for annual service which permits of the use of ranges and frigidaire at reasonable cost.

Agreeable tothe policies of the Company the lines and substation were built with extra capacity available for the increased demands which the Company believes will promptly follow improved financial conditions in the agricultural districts. (adv 7-21-28).

Mr. and Mrs. Henry Buseman accompanied by Mrs. Frank Roths and grand-daughter, Nada Busse drove to Mankato, Minn, early Saturday morning to visit with relatives. Mrs. Roths and Miss Buss remained for a longer visit and Mr. and Mrs. Buseman returned Sunday evening.

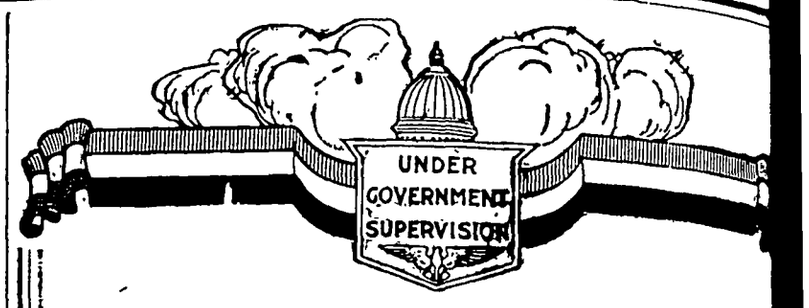
N. Day, C. G. Waterman and family, Mrs. Sadie Turgasen and son Vernon, Frank Kluckohn and family, Clarence Kluckhohn and family, and Ye Ed. and family. The ceremony was greatly enjoyed by all.



Farm Loans

We negotiate loans for the Federal Land Bank of Omaha, the present rate of interest is 5% payable semi-annually, for a term of 36 years. An additional one per cent pays the loan in that time.

Options to pay more than that on the principal are granted at certain stated periods.

The payments at the present rate of 5% plus one per cent additional making a total of six per cent will retire the loan in thirty six years. This is termed the amortization plan.

EW MEXICO BOY ON LONG RIDE

-YEAR OLD BOY CARRIES INVITATON TO PRESIDENT

s Ridden Pony Over 1,500 Miles; Passed By Klemme Saturday

Boyd Jones, fourteen year old lad Gallup, New Mexico, passed by lemme Saturday forenoon on the ilson highway on his trusty little dian mustang pony, Mollie.

Some days prior Dr. Missman had ad of the boy and on a call Satday morning Dr. Missman saw the der and notified the Times of his ind." Together we interviewed e boy and gathered his story for r readers.

Some months ago at Gallup, New exico it was decided to stage a eat celebration, the dates being ugust 29 to 31, inclusive. The celeration planned is the Inter-Tribal dian Ceremonial, to be the best nd greatest of its kind ever held. oyd Jones, foureen year old son a Gallup rancher, conceived the ea of helping along matters by ding a "pony express" and personlly delivering an invitation to Pres. oolidge at Brule, Wis., to attend e celebration, bond this invitation e carries in his saddle bag, along ith a greeting from the Governor New Mexico, and a personal letr of introduction from the Gallup iwanis Club.

Boyd left home June 7th and has dden over 1500 miles. He says e overages 33 miles a day and aout 200 miles a week on his pony. unday he and his pony both rest nd again start out early Monday orning. Boyd travels light, as he ends most of his nights at hotels, ut Mollie is more of a problem as very barns are becoming scarce, nd it is sometimes hard to find roper lodging for her.

Boyd expects to reach Brule, Wis. n or about the 20th of August, at hich place he will be met by his ather, and after interviewing the resident, Boyd, Mollie and Dad will ake the return trip home via rail.

Boyd presented a natty appearnce as he came down the highway iding his little dark bay pony. oyd was decked out in real cowoy style, "ten gallon hat," leather haps, red silk shirt and neckerhief. He carried a saddle bag, a up tent for use in emergency, and poncho for wet weather. Boyd's oice was soft and with a distinct outhern brogue. He was very ourteous, polite and well mannerd. Boyd spends most of his time n the ranch during vacation with is father, but goes to school t marilla, Teras, where his mother aintains a winter home so that he an be properly educated. He eeps in touch with his parents at ll times, and several times he has een visited by his father.

After giving the invitation to the resident, we cannot but wonder f the President will have the heart o turn down the offer after this rave lad has ridden 2000 miles to ive him the message.

ROCK ISLAND WILL EXTEND TRACK SYSTEM HERE

Will Greatly Aid In Handling Live Stock Shipments From Here

An extension to the track system, hich it is believed will greatly facilitate the handling of stock in this erritory, will be made by the Rock sland lines here.

L. C. Fritch, vice-president of he Rock Island, in charge of operaion, said the improvement would ost $315.

The project will be an item in the 5-million dollar improvement proram inaugerated by this railroad. imilar improvemens are being made n virtually every town in Iowa, hrough which the Rock Island asses.

The program will extend over a eriod of two years.

WOODMEN TO CAMP

Des Moines, Special:

With more than sixty crack drill teams in competition for the state championship and for valuable trophies which are being offered, the Modern Woodmen of America will hold their first statewide encampment at the Iowa State Fair this summer from August 29 to 31.

It is expected that approximately 1,000 trained drill team members will participate in the competition for the state championship. Thousands of other members of the order are also expected to attend the encampment to witness the contests and to lend encouragement to their favorites. The final events in the statewide drill contests will take place in front of the grandstand at the fair.

REDUCED RAIL RATES

Des Moines, Special:

Reduced railroad rates for the Iowa State Fair from points throughout Iowa and northern Missouri have been announced by all railroads operating in this territory.

In addition to a rate of fare and one third for round trip at any time during the fair, the railroads have also authorized still lower rates for the period from August 25 to 29. This will be 1¼ cents per mile for the first 200 miles, and 1 cent per mile for beyond 200 miles.

AT THE STATE FAIR

Giuseppe Creatore and his 50 piece concert band, internationally famous as one of the three outstanding bands of the world, will come to Iowa for seven days this summer from August 25 to 31 as the featured musical attraction at the Iowa State Fair and National Livestock Show. This is the first time that Creatore has appeared in Iowa in recent years. Following closely the appearance at the Iowa State Fair last year of John Philip Sousa, the engagement of this famous conductor is expected to again contribute largely in setting a new attendance record at the state exposition in Des Moines.

MARRIAGE LICENSES ISSUED DURING THE PAST WEEK

The following marriage licenses were issued at the County Clerk's office the past week:

Charley O'Rourk, Britt, Iowa and Tressa Cook, Britt, Iowa.

Edwin J. Stuek, Galt, Iowa, and Julia L. Finn, Galt, Iowa.

LIGHTNING DAMAGED HOMES AT GOODELL

August Has Plenty Of Rain For Balance Of Season

This part of Iowa was more than blessed with rain last week and in the two to half a dozen rains last week official reports say that about four inches of rain fell. Many of the small creeks and ditches were flooded and every dry pond became a small lake Threshing, which had just started was delayed, but Tuesday and Wednesday of this week found most machines in operation again.

Along about noon last Thursday a severe electrical storm hovered over this vicinity and three places at Goodell were struck.. A bolt of lighting struck Mrs A. D. White's residence and did some damage.

Lightning struck the home of Cora Lamer, postmistress. The bolt entered in on an electric line and blew out the wires in a floor lamp and started the wall paper afire. Mrs. Lamer was home and quickly extinguished the blaze.

At Frank McNulty's home a bolt struck a cement platform around a well and tore a sizeable hole in the cement.

In Klemme the Koerner residence was jarred by a bolt that damaged a larg electric light fixture.

A small twister put in its appearance a few miles southeast of town and tore up a few trees, but none of the farm buildings were damaged.

TWO DAYS OF AUTO RACING AT THE NORTH IOWA FAIR

Automobile racing has proven so popular in the past years as one of the featuro attractions at the North Iowa Fair that Secretary A. P. Parsons, has arranged for a two day auto racing program for the 1928 Fair instead of the one day as in previous years.

The days set aside for the auto speed classics are August 13 and 16

The schedule for the two days will vary greatly. On Monday, a series of seven dash events for open amateur competitions, while on August 16th, Thursday, the program will be given over to the running off of another series of seven dash events for professional cars and drivers.

Entry blanks have already been forwarded to more than 100 of the leading dirt track pilots thruout the country in the professional ranks and efforts are being made to induce a few of the leading Canadian drivers to bring their machines out to add luster to the competition.

The speed events for both days are wide open for entry to any professional or amateur drivers with a standard type of racing machine. As a safety precaution, freak cars will be barred. No piston displacement limitations have been adopted, however, and the giant aviation motored machines as well as the tiny straight-eight speedway cars will be acepted.

AUTO CHAMPS TO MEET

At least three and possibly four present world-record holders in dirt track auto racing have already entered in the two big days of speed classics which will headline the Iowa State Fair program in Des Moines on August 24 and August 31, according to word just given out by the International Motor Contest Association. Fifteen famous stars of the dirt ovals have filed entry thus far for these events, and some new track records are expected, officials state.

CENTRAL STATES CO. KEEPS FAITH WITH CORWITH AND KANAWHA

The Central States Electric Company promised the people of Corwith and Kanawha service from opposite directions and from two separate points.

This has been accomplished by building a new line from Wesley to Corwith and raising the voltage from Wesley to Belmond so that the towns now have service from both the Armstrong plant and Iowa Falls plant over the connecting 33,000 volt line.

The engineers of Central States Electric Company have designed a system so that more than 85 per cent of its customers have two way service and are over-insulaing their lines to prevent interruptions in service. adv 1tc.

MYSTERY MAN AT THE BAYSIDE PARK NEXT SUNDAY

Pasha Will Be Buried Alive At The Ball Park Sunday Afternoon

Ritz's Cubs at Bayside Park have lost only three ball games out of twenty-two played. Harold Fisher, manager of the Cubs, states that a good team will battle the Cubs next Sunday at the Park. The game will start at 3:00 o'clock. The Bayside Cubs have played several games in north Iowa towns and Ritz states that he is booking his team to play at fairs and celebrations. Anyone wanting to engage the Cubs for a game should communicate with Mr. Charles Ritz at Clear Lake.

The entertainment program Sunday at Bayside will include free movies, musical concerts and vaudeville on the open air stage. The feature attraction will be presented by the Great Pasha, Hindu. His act is mystifying and dumbfounding. He is not a magician or slight-of-hand artist. The Great Pasha will do several mysterious fetes in the afternoon and evening. It is claimed that he will also be buried in the ground in the Bayside diamond, before the game starts and will be taken up soon as hte game is over. This act is the only one in the world of its kind, according to Pasha, notorious entertainer.

Sunday, August 19th, the famous Manchester girls band of forty-five pieces will appear at Bayside and will play concerts afternoon and evening. This wonderful girls band has been presented at the park for several seasons and always draws a large crowd of admirers.

The music for the Bayside dance, Friday night, August 10th, will be furnished by Toppy's Country Club orchestra and Wednesday night, August 15th, Bobby Boyson's Midnight Entertainers will supply the syncopation.

WHEN'S CAKE BEAT ENOUGH?

Possible To Give Batter Too Few Or Too Many Strokes

"In making cakes, when the proportions of milk, flour, eggs, fat or other ingredients vary, the manipulation of the batter must vary accordingly," says Miss Belle Lowe, associate professor of foods and nutrition at Iowa State College.

To determine the effect on volume and texture, of beating plain cake, Miss Lowe used a regular recipe. She removed one-sixth of the batter after 50 strokes of the beater and baked this amount. She repeated this procedure after 100, 150, 300, 400 and 1,000 strokes, respectively. Each sample was baked, then the cakes were tested for appearance, texture and volume.

The cake that had received 150 strokes seemed to be the best, and the one that had been given 1,000 stroks semed to be the poorest in appearance. Miss Lowe explained this by saying that the glutten in the flour had been over-developed in the 1,000-stroke cake. Beating develops more tunnels in a cake than stirring.

TROOP 56 SCOUTS WON CAMP "R"

KLEMME SCOUTS AGAIN ARE 100 PER CENT WORKERS

Wm. Gauger And Donald Turgasen Capture High Camp Honors

Klemme Boy Scouts, Troop 56, returned home Tuesday morning after a busy week spent at Camp Roosevelt, the North Iowa Area Council Camp south-east of Ventura on the shores of Clear Lake.

The Klemme Troop, one of the youngest troops in the council, ha hung up a record at Camp Roosevelt, that would be an honor for any of the more experienced troops to equal. In the first place the Klemme Troop was one hundred per cent in camp attendance; they were one hundred per cent in winning of Camp "R's", they captured two of th six Tepee belt awards.

In winning Camp "R's" thirteen of the Klemme boys won their red R, for piling up 300 or more points in Camp. They are Wilbur Arnold, Willis Busch, Asa Gibbs, Ronald Geisler, Dorance Day, Harold Jort, Alvin Keeper, Floyd Klotzbach, Clarence Kluckhohn, Wayne Pavey, Paul Sampson, Raymond Schuldt, and Henry Smid. There were 32 red R's issued; Klemme received 13 of them.

In the White R division, there were a total of 15 issued of which Klemme received 4. The White R s issued for 500 points or more. These boys earned the White R: Wm. Gauger, Kenneth Kluckhohn, Byrnes Missman, and Donald Turgasen.

There were 6 Blue R's issued. The Blue R represent 700 points or more and is seldom earned by a first year camper. Other Camp Honors issued were 4 Gray CR and 3 Gold CR awards. These are the highest camp awards and can only be earned by the holder of a blue R.

Each day the best all around Scout is chosen by the officers for outstanding qualities, such as good sportsmanship, obedient, courteous, cheerful, and an all around good Scout in every way. The boy who is thus chosen is rewarded with a Tepee on his belt, the highest award in the camp for the day. Six are issued each week and two were won by Klemme boys, Wm. Gauger and Donald Turgasen.

Several Klemme scouts were awarded promotions before the Court of Honor Sunday afternoon. This ceremony was attended by a large number of Klemme parents and interested friends of Scouting.

Nearly every evening Klemme people were present at the Council Fires and greatly enjoyed this ceremony. The opening camp fire on Tuesday night, and the closing camp fire on Monday evening are the most interesting to out-siders.

The Klemme Scouts all enjoyed their week at Camp Roosevelt, and although it was perhaps one of the busiest weeks these boys have ever put in, they certainly had a fine time and gained a lot of useful knowledge.

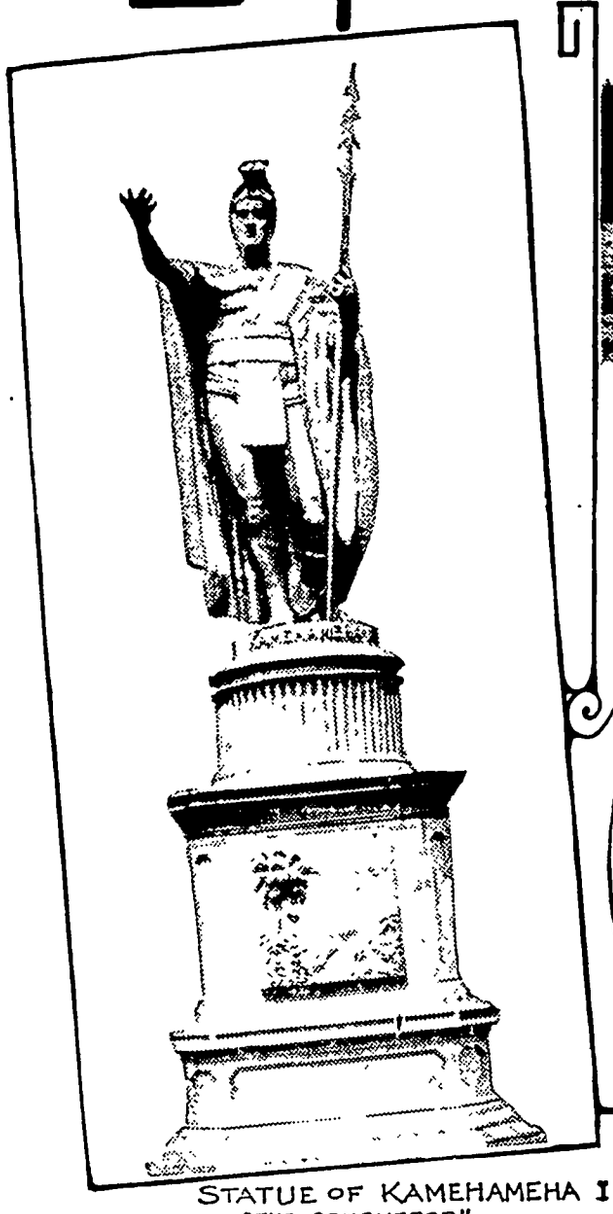
We are proud of the record that Troop 56 made at Camp Roosevelt.

IOWA LOOKS BEST AFTER ALL

"Iowa can beat Kentucky raising blue grass, Illinois in raising corn and most other states in all of the principal agricultural crops," says Carl N. Kennedy, Asst. Sec. of Agriculture, when he and his family returned recently from a vacation trip into some of the historic sections of Kentucky and Tennessee.

"The more you see of some of the other agricultural sections of the country, the better you like Iowa" he says. "It looks to the tourist as if farm profits in some of the mountainous sections of the country must be figured in terms of barbequed sandwiches, hot dogs and tourist camp rates. That is, if there are any farm profits."

The Slain English Explorer in Hawaii



STATUE OF KAMEHAMEHA I
"THE CONQUEROR"

NATIVE OUTRIGGER CANOE

MONUMENT TO CAPTAIN COOK IN KEALAKEKUA BAY

ANCIENT HAWAIIAN PLACE OF WORSHIP

By KATHERINE POPE

Author of "Hawaii, The Rainbow Land."

THIS summer that portion of the United States known as the Territory of Hawaii celebrates the fact that just one hundred fifty years ago the brave English explorer, Capt. James Cook, discovered this group of islands lying off quite by itself there in mid-Pacific. Hawaii, with play and pageant, brings back the days so different from present life in these delectable isles.

A century and a half ago the "Eight Islands" (the number is really twelve) were unknown to the civilized world; but now their anchorage there in the great ocean is frequently called "The Crossroads of the Pacific." For today the port of Honolulu is crowded with ships from myriad routes that center there. Ships come from New Zealand far to the south, and greet craft from San Francisco, Vancouver, even distant Vladivostock. Too, East and West meet in Honolulu, vessels from Asiatic waters seek harborage near those from Panama and from South American ports. A great change from that January day, 1778, when Captain Cook and his party, voyaging from the South seas toward the northwest coast of America, discovered in latitude 21 degrees 12 minutes 30 seconds north bits of land rising here and there above the waste of waters, and then made landing on Kauai, northernmost of the Hawaiian islands.

The English explorer, out of compliment to his patron and friend, the earl of Sandwich, decided to christen these isles that he had come upon "The Sandwich islands." And for long they bore this name; and still today the name clings to the group, which Mark Twain called "the loveliest fleet of islands that lies anchored in any ocean."

Captain Cook's discovery of Hawaii marked a turning point in the history of the little land. For Cook's account of the place and people made known to the world the existence of a land of plenty sorely needed as a port of call for the voyagers abroad now in this period of discovery.

Captain Cook found the first natives encountered timid, afraid to come aboard his vessels, the Discovery and the Resolution, although several of the canoes did approach quite close, and the occupants offered to barter fish, pigs and potatoes for nails and bits of iron. Cook, who is famed for the care with which he looked after the health of his men, seized this opportunity to obtain fresh provisions, his supply of turtle by now being exhausted.

Presently the bartering nativese lost their timidity and consented to come aboard the vessels. But these at once beginning to help themselves to whatsoever pleased their fancy, the hosts had to keep a sharp watch on the guests. Cook, who was in need of fresh water as well as fresh food, proceeded slowly along the coast of Kauai on the lookout for a suitable landing. As the vessels made their way along the coast, natives swarmed on the shore, and on the hills above the water, to observe the strange visitants. As they gazed upon the advance of the tall-masted ships, the watchers on land cried: "Look! moving islands of forests!"

"No," said others among them, "these are temples to the high god Lono!"

Concerning the beings upon the strange ships, they regarded these as more than men, as gods returning to isles where once they had dwelt. For the old chants of the land sang of a past day when gods walked among men; also related that the same gods would come back sometime.

The white men went ashore heavily armed, for these were uncharted islands, the character of the dwellers thereon most uncertain, their hospitality waiting to be proved. But as the white men stepped ashore at Waimea, Kauai, the natives fell down before them in adoration, received them with rejoicing. A supply of excellent water was found, and the next day the natives gladly helped in rolling the casks back and forth. Meanwhile brisk bartering was carried on between islanders and visitors, and, too, the latter made some exploration inland. Cook's record of the natives here reads: "No people could trade with more honesty than these people, never once attempting to cheat us, either ashore or alongside the ship."

The exploring party remained for two weeks in Hawaiian waters, and obtained a valuable addition to the ships' supplies for the long voyage north; very good sweet potatoes, between sixty and eighty pigs, some salt, also salt-fish, a few fowls, and the excellent taro-root that was the chief food of the island people. Whilst the nails and iron objects received in exchange by the natives were highly valued in a land where tools had to be made of stone, of wood, of bone, or of shell. Valued by the Hawaiians, also, were two pigs of English breed and three goats that Captain Cook turned over to the care of one of the chiefs when his party resumed the voyage northward.

The natives gave so generously of their possessions to the visitors because they thought Captain Cook the great god Lono, whose return to Hawaii had been prophesied. Messengers were sent about the islands to tell the chiefs of the strange beings that had come to Hawaii. The messengers said, "The men are white, their skin is loose and folding; their heads are angular; fire and smoke issue from their mouths; they have openings in the sides of their bodies in which they thrust their hands and draw out iron, beads, and other treasures."

Captain Cook now cruised here and there about the group, and made no small advance in acquaintance with the natives. And again he and his party were welcomed, again they were given high honors, again out to the Resolution and the Discovery the outrigger-canoes toiled laden with presents of much value, the best that the land had to offer.
